consistent with the ME. and ML. forms of the name; it is appar. due to the tendency of some writers to reject etymologies that are obvious, on the unacknowledged ground that being obvious they must be "popular" and therefore erroneous.] 1. [*cap.*] In *Eng. hist.*, a court of civil and criminal jurisdiction at Westminster, constituted in view of offenses and controversies most frequent at the royal court or affecting the interests of the crown, such as maintenance, fraud, libel, conspiracy, riots resulting from faction or oppression, but freely taking jurisdiction of other crimes and misdemeanors also, and administering justice by arbitrary authority instead of according to the common law. Such a jurisdiction was exercised at least as early as the reign of Henry VI., the tribunal then consisting of the Privy Council. A statute of 3 Henry VII. authorized a committee of the council to exercise such a jurisdiction, and this tribunal grew in power (although successive statutes from the time of Edward IV. were enacted to restrain it) until it fell into disuse in the latter part of the reign of Henry VIII. In 31 Henry VIII., c. 8, a statute declared that the king's proclamation should have the force of law, and that offenders might be punished by the ordinary members of the council sitting with certain bishops and judges "in the Sterr Chamber at Westm. or elsewhere." In 1640 the court of Star Chamber was abolished by an act of 16 Charles I., c. 10, reciting that "the reasons and motives inducing the erection and continuance of that court [of Star Chamber] do now cease." As early as the reign of Edward III. a hall in the palace at Westminster, known as the "Chambre des Estoyers" (or "Etoilles"), was occupied by the king's council; and during the reign of Henry VII. appear records of "the Lords sitting in the Star Chamber," or "the Council in the Star Chamber," from which time it seems to have been regarded as the court of the Star Chamber. There is a difference of opinion whether the tribunal sitting under the act of 3 Henry VII. should be deemed the same court or not.

Starre chamber, Camera stellata, is a Chamber at the one end of Westminster Hall, so called, as Sir Thomas Smith conjectureth, lib. 2. cap. 4, either because it is so full of windows, or because at the first all the roof thereof was decked with Images of gilded starres. The latter reason is the likelier, because Anno 25. Hen. 8. cap. I. it is written the *sterred chamber*. Now it hath the signe of a Starre over the doore, as you one way enter therein. Minshew (1617).

2. Any tribunal or committee which proceeds by secret, arbitrary, or unfair methods; also used attributively: as, *star-chamber proceedings*; *star-chamber methods*.

starchiness (stär'chi-nes), *n.* The quality of being starchy, or of abounding in starch.

starchy (stärch'li), *adv.* [*< starch*¹ + *-ly*².] In a starchy manner; with stiffness of manner; formally.

I might . . . talk starchly, and affect ignorance of what you would be at. Swift, *To Rev. Dr. Tisdall*, April 20, 1704.

starchness (stärch'nes), *n.* Stiffness of manner; preciseness. Imp. Dict.

starchroot (stärch'röt), *n.* See *starchwort*.

starch-star (stärch'stär), *n.* In *Characeæ*, a bulblet produced by certain species of *Chara* for propagative purposes: it is an underground node.

starch-sugar (stärch'shüg'är), *n.* Same as *dextrose*.

starchwoman (stärch'wüm'an), *n.* A woman who sold starch for the stiffening of the great ruffs worn in the sixteenth century. The starch-woman was a favorite go-between in intrigues. See the quotation.

The honest plain-dealing jewel her husband sent out a boy to call her (not bawd by her right name, but starch-woman): into the shop she came, making a low counterfeited curtsy, of whom the mistress demanded if the starch were pure gear, and would be stiff in her ruff. Middleton, *Father Hubbard's Tales*.

starchwort (stärch'wört), *n.* The wake-robin, *Arum maculatum*, whose root yields a starch once used for fine laundry purposes, later prepared as a delicate food under the name of *English* or *Portland arrowroot*. This was chiefly produced in the Isle of Portland, where the plant is called *starchroot*. See cuts under *Araceæ* and *Arum*.

starchy¹ (stär'chi), *a.* [*< starch*¹ + *-y*¹.] Stiff; precise; formal in manner.

Nothing like these starchy doctors for vanity! . . . He cared much less for her portrait than his own.

George Eliot, *Middlemarch*, xlii.

Piers Plowman's Creed (E. E. T. S.), I. 553.

Her fyrie eyes with furious sparkes did stare.

Spenser, *F. Q.*, III. vii. 39.

4. To be unduly conspicuous or prominent, as by excess of color or by ugliness. Compare *staring*, 3.

The homeliness of the sentiment *stares* through the fantastic enunciation of its fine language, like a clown in one of the new uniforms! Sheridan, *The Critic*, I. 1.

=Syn. 1. *Gaze, Gape, Stare, Gloat.* *Gaze* is the only one of these words that may be used in an elevated sense. *Gaze* represents a fixed and prolonged look, with the mind absorbed in that which is looked at. To *gape* is in this connection to look with open mouth, and hence with the bumpkin's idle curiosity, listlessness, or ignorant wonder: one may *gape* at a single thing, or only *gape* about. *Stare* expresses the intent look of surprise, of mental weakness, or of insolence: it implies fixedness, whether momentary or continued. *Gloat* has now almost lost the meaning of looking with the natural eye, and has gone over into the meaning of mental attention: in either sense it means looking with ardor or even rapture, often the delight of possession, as when the miser *gloats* over his wealth.

II. *trans.* To affect or influence in some specified way by staring; look earnestly or fixedly

at; hence, to look at with either a bold or a vacant expression.

I will stare him out of his wits.

Shak., M. W. of W., II. 2. 291.

To stare one in the face, figuratively, to be before one's eyes, or undeniably evident to one.

They stare you still in the face.

Milton, On Def. of Humb. Remonst.

stare¹ (stär), *n.* [*< stare*, *v.*] The act of one who stares; a fixed look with eyes wide open, usually suggesting amazement, vacancy, or insolence.

starrer (stär-ēr), *n.* [*< stare*¹ + *-er*.] One who stares or gazes. Pope, Essay on Man, iv. 256.

starft. An obsolete preterit of *starve*.

star-facet (stär-fas'et), *n.* One of the small triangular facets, eight in number, surrounding the table on a brilliant-cut stone. See *brilliant*.

starfinch (stär'finch), *n.* The redstart, *Ruticilla phoenicea*. See first cut under *redstart*.

starfish (stär'fish), *n.* 1. An echinoderm with five or more arms radiating from a central disk; applied to all the members of the *Asteroidea* and *Ophiuroidea* (see these words). These belong to the phylum *Echinodermata*, which contains also the sea-urchins, holothurians, crinoids, etc., though these are not usually called starfishes. In some of the asteroids or starfishes proper the disk is enlarged so as to take in nearly or quite the whole length of the rays, so that the resulting figure is a pentagon, or even a circle; but in such cases the stellate structure is evident on examination. Such are known as *cushion-stars*. In the ophiurians the reverse extreme occurs, the body being reduced to a small circular central disk, with extremely long slender rays, which in some, as the euryaleans, are branched into several thousand ramifications. (See cut under *basket-fish*.) The commonest type of starfish has five rays; whence such are popularly known as *five-fingered jack* or *five-fingers*. (See cuts under *Asterias* and *Echinaster*.) Those with more than five rays are often called *sun-starfish* or

Brittle Starfish (*Luidia clathrata*).

sun-stars. (See *Heliaster*, and cuts under *Briozoa* and *Solaster*.) The skin of starfishes is tough and leathery, and usually indurated with calcareous plates, tubercles, spines, etc. It is so brittle that starfishes readily break to pieces, sometimes shivering like glass into many fragments. This fragility is at an extreme in the ophiurians, sometimes, on this account, called *brittle-stars*. (See cut under *Astrophyton*.) Lost arms are readily replaced by a new growth, if the body of the starfish is not broken. On the under side of the animal's rays may be observed rows of small holes; these are the ambulacra, through which protrude many small soft, fleshy processes—the pedicels, tube-feet, or ambulacral feet—by means of which the creatures crawl about. The ambulacra converge to a central point on the under side, where is the oral opening or mouth. The animals are extremely voracious, and do great damage to oyster-beds. They abound in all seas at various depths, and some of them are familiar objects on every sea-coast. Some of the free crinoids of stellate figure are included under the name *starfishes*, though they are usually called *lily-stars* or *feather-stars*. Echinurites are fossil starfishes of this kind. (See cuts under *Comatulidae* and *enerinurites*.) Very different as are the appearances superficially presented by a starfish, a sea-urchin, a holothurian, and a crinoid, their fundamental unity of structure may be easily shown. If, for instance, a common five-fingered jack should have its arms bent up over its back till they came to a center opposite the mouth, and then soldered

together in that position by plates filling the spaces between the arms, it would make the globular or oblate spheroid figure of a sea-urchin. If a starfish should turn over on its back, and have a stem grow from the center, and then have its arms come together like the petals of a lily, it would represent a crinoid. If, again, the starfish should have its arms reduced to mere rudiments, or to tentacular appendages of an elongated leathery body, it would represent a holothurian, sea-slug, or trepang. These are the principal types of echinoderms—in fact less unlike one another than are the several stages they undergo in development, for which see *Asterodea*, *Bipinnaria*, *Brachiolaria*, *echinopodium*, and *pluteus*.

2. The butter-fish or dollar-fish.—3. In *her*., a bearing representing a five-pointed star, the rays surrounded by short waving flames or the like, and having a small circle in the center.—**Brittle starfish**, a brittle-star; any ophiurian.—**Cushion starfish**, a cushion-star, as *Ctenodiscus crispatus*.—**Serpent-starfish**. Same as *serpent-star*.—**Starfish-flower**. See *Stapelia*.

star-flower (stär'flou'ēr), *n.* A plant with bright stellate flowers. (a) Species of *Trientalis*, especially *T. Americana*, the chickweed-wintergreen. (b) Species of the lilaceous genus *Brodiaea*, formerly classed as *Triteleia*, of which *B. uniflora*, a delicately colored free-blooming early flower from Brazil, is the spring star-flower. (c) Species of *Sternbergia*. (d) Any one of a few other plants.

star-fruit (stär'früt), *n.* Same as *star*¹, 8.

star-fruit (stär'früt), *n.* A smooth tufted water-plant, *Damasium stellatum*, of southern Europe and eastern Asia: so called from the long-pointed radiating carpels. Another name is *thrumwort*.

star-gaze (stär'gäz), *n.* See under *gaze*².

star-gaze (stär'gäz), *v. i.* To gaze at the stars; especially, to make astronomical or astrological observations: used chiefly in the present participle.

Struck dead with ladies' eyes!—I could star-gaze

For ever thus. Shirley, Maid's Revenge, l. 2.

star-gazer (stär'gä'zēr), *n.* 1. One who gazes at the stars; especially, an astrologer, or, humorously, an astronomer.

Let now the astrologers, the *stargazers*, the monthly prognosticators, stand up, and save thee from these things that shall come upon thee. Isa. xlvii. 13.

2. A book-name of fishes of the family *Uranoscopidae*: so called from the vertical eyes. The

Naked Star-gazer (*Astroscopus guttatus*).

name originally designated *Uranoscopus europæus*. *Astroscopus guttatus* is a common star-gazer of the United States.

star-gazing (stär'gä'zing), *a.* Given to the observation and study of the stars.

star-gazing (stär'gä'zing), *n.* Attentive observation and study of the stars; astrology or astronomy. Purchas, Pilgrimage, p. 63.

star-gooseberry (stär'gös'ber-i), *n.* The fruit of a moderate-sized tree, *Phyllanthus (Cicca) distichus*, native in Java and Madagascar, and cultivated throughout India. It is a globose drupe, three- to five-lobed, acid, and eaten raw, cooked, or pickled.

star-grass (stär'gräs), *n.* A name of various grass-like plants with starry flowers, or other radiate feature. Such are species of *Aletris*, *Hypoxis*, and *Rhynchospora*; also *Callitriche*, more often *water-starwort*, so called from its stellate tufts of leaves. See the genus names, and cut under *Hypoxis*.

star-hawk (stär'häk), *n.* A goshawk; a hawk of the genus *Astur*: so called from the stellate markings of the adult birds. See *goshawk*, and cut under *Astur*.

star-head (stär'hed), *n.* A plant of the genus *Scabiosa*, section *Asteroccephalus*.

star-hyacinth (stär'hī'a-sinth), *n.* A species of squill, *Scilla amara*, a very early garden-flower with indigo-blue petals and a conspicuous yellowish-green ovary.

stariert, *n.* [*ME.*, appar. for **starrier*, irreg. *< starre, sterre, a star.*] An astronomer.

Without any manner of niclts of *staries* imagination.

Testament of Love, iii.

stariik (stär'ik), *n.* [*< Russ. stariikū, the fulmar, lit. 'an old man': so called from its gray head.*] An auklet or murrelet; one of several small birds of the family *Alcidæ*, inhabiting the North Pacific. The name was originally applied to the ancient auk or murrelet, *Synthliborhamphus antiquus*, and thence extended to various related auklets of the genus *Simorhynchus* and others, as the crested stariik, *S. cristatellus*. See cuts under *auklet* and *Synthliborhamphus*.

staring (stär'ing), *p. a.* 1. Standing out prominently and fixedly, or fixed and wide open, as eyes; gazing fixedly or intently; fixed.

starlike (stär'lik), a. [*star* + *like*.] 1. Resembling a star; stellated; radiated like a star: as, *starlike* flowers.—2. Bright; lustrous; shining; luminous: as, *starlike* eyes.

starling (stär'ling), n. [*ME. starling, sterling, sterlyng*; < *stare* (< AS. *stær*), a stare, starling (see *stare*), + *-ling*.] 1. An oscine passerine bird, of the family *Sturnidae* and genus *Sturnus*, as *S. vulgaris* of Europe. The common starling or stare is one of the best-known of British birds. It is 8½ inches long when adult; black, of metallic luster, iridescent dark-green on some parts, and steel-blue, purplish, or violet on others, and variegated nearly throughout with pale-buff or whitish tips of the feathers. The

Common European Starling (*Sturnus vulgaris*).

wings and tail are duller-black, the exposed parts of the feathers frosted or silvered, with velvety-black and buff edgings. The bill is yellowish, and the feet are reddish. Immature, winter, and female birds are less lustrous, and more variegated with the ochery- or tawny-brown, and have the bill dark-colored. Starlings live much about buildings, and nest in holes of walls, crannies of rock, openings in hollow trees, etc. They are sociable and gregarious, sometimes going in large flocks. They are often caged, readily tamed, and may be taught to whistle tunes, and even to articulate words. The name *starling* is extended to all birds of the family *Sturnidae*, and some others of the sturnoid series; also, erroneously, to the American birds of the family *Icteridae*, sometimes known collectively as *American starlings*. The last belong to a different series, having only nine primaries, etc. The bird with which the name is specially connected in this sense is *Agelaius phoeniceus*, the common marsh-blackbird, often called *red-winged starling*. The name of *meadow-starling* is often applied to *Sturnella magna*. See also cuts under *Agelaius* and *meadow-lark*.

Looking up, I saw . . . a *starling* hung in a little cage. "I can't get out—I can't get out," said the *starling*.

Sterne, Sentimental Journey (The Passport).

2. One of a breed of domestic pigeons which in color resemble the starling.—3. Same as *rock-trout*, 2.—**American starlings**. See def. 1.—**Black starling**, a melanistic variety of the common starling.—**Cape starling** or **stare** (Latham, 1783), the black and white Indian starling of Edwards (1751), the contra from Bengal of Albin (1740), *Sturnopastor contra*: so called as erroneously described from the Cape of Good Hope (as l'étrouneau du Cap de Bonne Esperance

of Brisson, 1760), but found chiefly in India. It is 9 inches long; the ground-color of the plumage is black, much glossed with greenish and bronze tints and varied with white; the bill and a bare space above the eyes are orange.—**Chinese starling** (Edwards, 1743), the so-called crested grackle (Latham, 1783), *Acridotheres cristatellus* of central and southern China, and also the Philippine island Luzon (where it is supposed to have been introduced). It is 10½ inches long; the bill is yellow with rose-colored base; the feet and eyes are orange; the plumage is glossy-black with various sheen, and also varied with white; and the head is crested.—**Cockscomb-starling** or **-stare** (Latham, 1783), a remarkable African and Arabian starling, *Dilophus carunculatus*, having in the adult male the head mostly bare, with two erect caruncles or combs on the crown, and a pendent wattle on each side of the face; the plumage is chiefly isabelline gray, with black wings and tail, the former varied with white.—**Glossy starlings**, various birds, chiefly African, forming a subfamily *Lamprolornithinae* (or *Juidinae*) of the family

Glossy Starling (*Spreo bicolor*).

Sturnidae, as of the genera *Lamprolornis*, *Lamprocolinus*, *Spreo* (or *Notaspis*). Of the last-named there are several species, as *S. bicolor* of South Africa and *S. pulchra* of West Africa. They are mainly of extremely iridescent plumage.—**Meadow-starling**. See def. 1.—**Red-winged starling**. See def. 1.—**Rose or rose-colored starling**, a bird of the genus *Pastor*, as *P. roseus*, which used to be called *rose* or *carnation ouzel*, *rose-colored thrush*, etc. See cut under *pastor*.—**Silk starling** (Brown, 1776), or **stare** (Latham, 1783), the Chinese *Polyborus sericeus*, 8 inches long, the bill bright-red tipped with white, the feet orange, the eyes black, the plumage ashy gray varied with black, white, green, brown, purplish, etc.—**Talking starling**, one of several different sturnoid birds of India, etc.; a religious grackle; a mina. See *mina*², *Acridotheres*, and cut under *Endeas*.

starling² (stär'ling), n. [Also *sterling*; cf. Sw. Dan. *stör*, a pole, stake, prop; Sw. *stora*, prop up with sticks or poles, = Dan. *stære*, put corn on poles to dry.] 1. In *hydraulic engine*, an inclosure like a coffer-dam, formed of piles driven closely together, before any work or structure as a protection against the wash of the waves. A supplementary structure of the same kind placed before a starling to resist ice is called a *fore-starling*. See cut under *ice-apron*. 2. One of the piles used in forming such a breakwater.

Starnoenadinæ (stär-nē-nā-dī'nē), n. pl. [NL. (Coues, 1884), < *Starnœnas* (-ad-) + *-inæ*.] A subfamily of *Columbidae*, represented by the genus *Starnœnas*, grading toward gallinaceous birds in structure, habits, and general appearance; the quail-doves. The feet are large and stout, with short and not completely insistent hallux; the tarsal are long, entirely naked, and reticulated with hexagonal scales. There are ceca, but no oil-gland nor amblens, the reverse of the case of *Zenaidinæ*, the group of ground-doves with which the genus *Starnœnas* has usually been associated.

Starnœnas (stär-nē'nas), n. [NL. (Bonaparte, 1838), < *Starna* + Gr. *oivās*, a wild pigeon of the color of ripening grapes, < *oivn*, the vine, *olive*, wine.] A genus of West Indian and Floridian quail-doves, typical of the subfamily *Starnœnadinæ*. The bill is short and stout; the frontal feathers project in a point on the culmen; the wings are short, broad, rounded, and vaulted, with reduced first primary; and the tail is short, broad, and nearly even. The only species is *S. cyanocephalus*, the blue-headed quail-dove, of olivaceous and purplish-red or chocolate shades, the throat black bordered with white, the crown rich-blue, and a white mark along the side of the head, meeting its fellow on the chin. It is about 11 inches long.

starnose (stär'nōz), n. The star-nosed mole, *Condylura cristata*.

star-nosed (stär'nōzd), a. Having a circle of fleshy processes radiating from the end of the snout in the form of a star, as some moles: specifically noting *Condylura cristata*. See cut under *Condylura*. Also *button-nosed*.

star-of-Bethlehem (stär'ov-beth'lē-əm), n. 1. A plant of the genus *Ornithogalum*, particularly *O. umbellatum*: so called from its starlike flowers, which are pure-white within. This species is native from France and the Netherlands to the Caucasus; it is common in gardens and often runs wild, in some parts of America too freely. In Palestine its bulbs are cooked and eaten, and they are thought by some to have been the "dove's dung" of 2 Kings vi. 25. Some other species are desirable hardy garden-bulbs, as *O. nutans* and *O. Narbonne* (*O. pyramidale*), the latter 3 feet high with a pyramidal cluster. *O. caudatum*, with long leaves drying like tails at the end, and with watery-looking bulbs, is a species from the Cape of Good Hope, sometimes called *onion-lily*, remarkably tenacious of life except in cold. It has a flower-scape 2 or 3 feet high, and continues blooming a long time.

2. One of a few plants of other genera, as *Stellaria Holostea* and *Hypericum calycinum*. [Prov. Eng.] See also *Hypoxis* and *Gagea*. [In the name of all these plants there is reference to the star of Mat. ii., which guided the wise men to Bethlehem.]

star-of-Jerusalem (stär'ov-jē-rō'sa-lēm), n. The goat's-beard, *Tragopogon pratensis*. Prior ascribes the name to the salsify, *T. porrifolius*. See cut under *salsify*.

A stupid lout . . . in a grey jerkin, with his head bare, his hose about his heels, and huge startups upon his feet.

Scott, Kenilworth, xxiv.

starvation (stär-vä'shon), *n.* [*starve* + *-ation*.] The word is noted as one of the first (*firtation* being another) to be formed directly from a native E. verb with the L. term. *-ation*. It was first used or brought into notice by Henry Dundas, first Viscount Melville (hence called "Starvation Dundas"), in a speech on American affairs, in 1775. The state of starving or being starved; extreme suffering from cold or hunger; hence, deprivation of any element essential to nutrition or the proper discharge of the bodily functions: often used figuratively of mental or spiritual needs.

Starvation Dundas, whose pious policy suggested that the devil of rebellion could be expelled only by fasting.

Walpole, To Rev. W. Mason, April 25, 1781.

Starvation was an epithet applied to Mr. Dundas, the word being, for the first time, introduced into our language by him, in a speech, in 1775, in an American debate, and thenceforward became a nickname: . . . "I shall not wait for the advent of starvation from Edinburgh to settle my judgment." *Mitford*, in *Walpole's Letters* (ed. Cunningham), VIII. 80, note.

Whether an animal be herbivorous or carnivorous, it begins to starve from the moment its vital food-stuffs consist of pure amyloids, or fats, or any mixture of them. It suffers from what may be called nitrogen starvation.

Huxley and Youmans, Physiol., § 170.

starve (stärv), *v.*; pret. and pp. *starved*, ppr. *starving*. [Early mod. E. also *sterve*; < ME. *sterven, steorven* (pret. *starf, sterf*, pp. *starven, storven, i-storve, y-storve*), < AS. *steorfan* (pret. *starf, pl. sturfon*, pp. *storfen*), die, = OS. *sterbhan* = OFries. *sterva* = D. *sterren* = MLG. *sterren*, LG. *starven, sterren* = OHG. *sterban*, MHG. G. *sterben*, die; not found in Goth. or Scand., except as in the derived Icel. *starf*, trouble, labor, toil, work, *starfa*, toil, work, *stjarfi*, epilepsy (= AS. *steorfa*, E. dial. *starf*, a plague), which indicate that the verb orig. meant 'labor, be in trouble'; cf. Gr. *οἱ καμνόντες*, the dead, lit. 'those who have labored,' < *καμνέω*, labor, toil.] I. *intrans.* 1. To die; perish.

She starf for wo neigh when she wente.

Chaucer, Troilus, IV. 1419.

He starf in grete age disherited, as the story witnesseth.

Merlin (E. E. T. S.), III. 401.

Specifically—2. To perish from lack of food or nourishment; die of hunger; also, to suffer from lack of food; pine with hunger; famish; suffer extreme poverty.

Starves in the midst of nature's bounty curst,

And in the laden vineyard dies for thirst.

Addison, Letter from Italy.

See cut under *Stellaria*. — 2. Any species of the genus *Aster*, the name alluding to the stellate rays of the heads. Specifically, in England, *A. Tripolium*, the sea-starwort, a salt-marsh species. The Italian starwort is *A. Amellus*, of central and southern Europe.

3. The genus *Callitriche*, more properly *water-starwort*. Also *star-grass*. — **Drooping starwort**, the blazing-star, *Chamaelirium Carolinianum*. — **Mealy starwort**, the colic-root, *Aletris farinosa*. It is tonic, and in larger doses narcotic, emetic, and cathartic. — **Yellow starwort**, the elecampane.

stasidion (sta-sid'i-on), *n.*; pl. *stasidia* (-iä). [*< Gr. stasidion*, a stall, dim. of *stasis*, a standing-place.] In the *Gr. Ch.*, a stall in a church, as of a patriarch, hegumen, or monk. Originally the stasidia seem to have been places for standing only (whence the name).

stasimon (stas'i-mon), *n.*; pl. *stasima* (-mä). [*< Gr. stasimon* (see def.), *< stasis*, a standing, station.] In *anc. Gr. lit.*, any song of the chorus in a drama after the parodos. The parabasis of a comedy is not, however, called a stasimon. Some authorities limit the use of the term to tragedy. The name is derived not, as stated by scholiasts, from the chorus's standing still during a stasimon (which cannot have been the case), but from the fact that it was sung after they had taken their station in the orchestra.

stasimorphy (sta'si-mór-fi), *n.* [*< Gr. stasis*, standing, + *μωρφή*, form.] Deviation of form arising from arrest of growth. *Cooke*, Manual.

stasis (stā'sis), *n.* [NL., *< Gr. stasis*, a standing, a stoppage, *< ιστάω*, mid. and pass. *ιστάω*, stand: see *stand*.] 1. In *pathol.*, a stopping of the blood in some part of the circulation, as in a part of an inflamed area. — 2. Pl. *staseis* or *stases*. In the *Gr. Ch.*, one of the sections (regularly three) of a cathisma, or portion of the psalter. At the end of each stasis *Gloria Patri* and *Allulia* are said. The name probably comes from the pause (*stasis*) in the psalmody so made. A stasis usually contains two or three psalms. See *cathisma* (*a*).

stassfurtite (stas'fërt-it), *n.* [*< Stassfurt* (see def.) + *-ite*.] A massive variety of boracite, found at Stassfurt in Prussia. It resembles in appearance a fine-grained white marble.

Ascham, The Scholemaster, p. 81.

A train which well besem'd his *state*,
But all unarm'd, around him wait.

Scott, Marmion, IV. 7.

3. A class or order: same as *estate*, 9.

We hold that God's clergy are a *state* which hath been, and will be as long as there is a Church upon earth, necessary by the plain word of God himself.

Hooker, Eccles. Polity, III. 11.

4. Style of living; mode of life; especially, the dignity and pomp befitting a person of high degree or large wealth.

Do you know, sir,

What *state* she carries? what great obedience
Waits at her beck continually?

Fletcher, Mad Lover, I. 1.

By a man of understanding and knowledge the *state* thereof [of a land] shall be prolonged.

Prov. xxviii. 2.

10. Estate; income; possession.

I judge them, first, to have their *states* confiscate.

B. Jonson, Catiline, v. 8.

11. The whole people of one body politic; the commonwealth: usually with the definite article; in a particular sense, a civil and self-governing community; a commonwealth.

In Aleppo once,

Where a malignant and a turban'd Turk
Bent a Venetian and traduced the *state*.

Shak., Othello, v. 2. 354.

A *State* is a community of persons living within certain limits of territory, under a permanent organization, which aims to secure the prevalence of justice by self-imposed law.

Woolsey, Introd. to Inter. Law, § 36.

12. The power wielded by the government of a country; the civil power, often as contrasted with the ecclesiastical: as, the union of church and *state*. — 13. One of the commonwealths or bodies politic which together make up a federal republic, which stand in certain specified relations with the central or national government, and as regards internal affairs are more or less independent. In this sense the word *state* is used chiefly with reference to the several States (generally cap.) of the American Union, the United States of America. The relations between the individual states and the national or central government of Mexico, Brazil, and various other republics of the American continent are formed more or less closely on the model of the United States. Current designations or epithets of the States of the American Union are the following: Badger State, Wisconsin; Bay State, Massachusetts; Bayou State, Mississippi; Bear State, Arkansas, California, Kentucky; Big-bend State, Tennessee; Blue-hen State, Delaware; Blue-law State, Connecticut; Buckeye State, Ohio; Bullion State, Missouri; Centennial State, Colorado; Corn-cracker State, Kentucky; Cracker State, Georgia; Creole State, Louisiana; Dark and Bloody Ground, Kentucky; Diamond State, Delaware; Empire State, New York; Empire State of the South, Georgia; Excelsior State, New York; Freestone State, Connecticut; Garden State, Kansas; Golden State, California; Gopher State, Minnesota; Granite State, New Hampshire; Green Mountain State, Vermont; Gulf State, Florida; Hawkeye

See the nouns.—**State lands**, lands granted to or owned by a state, for internal improvements, educational purposes, etc.—**State paper**. (a) A paper prepared under the di-

rection of a state, and relating to its political interests or government. (b) A newspaper selected, by or pursuant to law, for the publication of official or legal notices.—**State prison**. (a) A jail for political offenders only. (b) A prison maintained by a State for the regular confinement of felons under sentence to imprisonment: distinguished from county and city jails, in which are confined misdemeanants, and felons awaiting trial, or awaiting execution of the death penalty, and from reformatories, etc. [U. S.]—**State prisoner, sword**, etc. See the nouns.

state (stāt, v. t.; pret. and pp. *stated*, ppr. *stat-ing*. [*< state, n.*]) 1. To set; fix; settle; establish; stablish: as, to state a day: chiefly used in the past participle.
And you be *stated* in a double hope.
B. Jonson, Volpone, III. 6.
2. To settle as a possession upon; bestow or settle upon.
You boast to me
Of a great revenue, a large substance,
Wherein you would endow and state my daughter.
Middleten and Rowley, Fair Quarrel, i. 1.
3. To express the particulars of; set down in detail or in gross; represent fully in words; make known specifically; explain particularly; narrate; recite: as, to state an opinion; to state the particulars of a case.
I pretended not fully to state, much less demonstrate, the truth contained in the text. Atterbury.
4. In law, to aver or allege. Thus, stating a case to be within the purview of a statute is simply alleging that it is: while showing it to be so consists in a disclosure of the facts which bring it within the statute.—**Account stated**. See *account*.—**Case stated**. See *case agreed*, under *case*.—**To state it**, to keep state. See *state, n.*
Wolsey began to state it at York as high as ever.

[*< L. stater, < Gr. στᾶρις, a standard of weight or money, a Persian gold coin, also a silver (or sometimes gold) coin of certain Greek states, < ιστράβαι, mid. and pass. ιστράβαι, stand.*] A general name for the principal or standard coin of various cities and states of ancient Greece. The common signification is a gold coin equal in weight to two drachmæ of Attic standard, or about 132.6 grains, and in value to twenty drachmæ. There were also in various states staters of Euboic and Æginetan standards. The oldest staters, those of Lydia, said to have been first coined by Croesus, were struck in the pale gold called *electrum*. At the period of Greek decline the silver tetradrachm was called *stater*. This coin is the "piece of money" (equivalent to a Jewish shekel) of Mat. xvii. 27. As a general term for a standard of weight, the name *stater* was given to the Attic mina and the Sicilian litra.

state-room (stāt'rōm), n. 1. A room or an apartment of state in a palace or great house.—2. In the United States navy, an officer's sleeping-apartment (called *cabin* in the British navy).—3. See *manometer*.

statically (stat'ikal-i), *adv.* In a statical manner; according to statics.

Statice (stat'is-ē), *n.* [NL. (Tournefort, 1700), < Gr. *στατική*, an astringent herb, fem. of *στατικός*, causing to stand: see *static*.] A genus of

gamopetalous plants, of the order *Plumbaginæ*, type of the tribe *Staticeæ*. It is characterized by its acaulescent or tufted herbaceous or somewhat shrubby habit, flat alternate leaves, inflorescence commonly cymose and composed of one-sided spikes, stamens but slightly united to the petals, and styles distinct to the angles of the ovary, with capitate, oblong, or linear stigmas. Over 120 species have been described, natives of the sea-shore and of desert sands, mostly of the Old World, and of the northern hemisphere, especially of the Mediterranean region. A smaller number occur in America, South Africa, tropical Asia, and Australia. They are usually perennials; a few are diminutive loosely branched shrubs. They are smooth or covered with scurf or dust. The leaves vary from linear to obovate, and from entire to pinnatifid or dissected; they form a rosette at the root, or are crowded or scattered upon the branches. The short-pediceled corolla consists of five nearly or quite distinct petals with long claws, and is commonly surrounded by a funnel-shaped calyx which is ten-ribbed below, and scarious, plicate, and colored above, but usually of a different color from the corolla, which is often white with a purple or lavender calyx and purplish-brown pedicel. They are known in general as *sea-lavender*. The common European *S. Limonium* is also sometimes called *marsh-beet* from its purplish root; it is the *red beken* of the old apothecaries. Its American variety, *Caroliniana*, the marsh-rosemary of the coast from Newfoundland to Texas, is also known as *canker-root*, from the use as an astringent of its large bitter fleshy root, which also contains tannic acid (whence its name *ink-root*). The very large roots of *S. latifolia* are used for tanning in Russia and Spain, and those of *S. micrantha* as a nerve in Morocco under the name of *safra*. Other species also form valued remedies, as *S. Brasiliana*, the guaycura of Brazil and southward. Many species are cultivated for their beauty, as *S. latifolia*, and *S. arborea*, a shrub from the Canaries. In Afghanistan, where several species grow in desert regions, they form a source of fuel.

Staticeæ (stā-tis'ē-ē), *n. pl.* [NL. (Endlicher, 1836), < *Statice* + *-eæ*.] A tribe of plants, of the order *Plumbaginæ*, distinguished from the other tribe (*Plumbagææ*) by flowers with a commonly spreading, scarious, and colored calyx-border, stamens united to the petals at the base or higher, and styles distinct to the middle or the base. It includes 5 genera, of which *Statice* is the type. They are commonly acaulescent plants, very largely maritime, and of the Mediterranean region.

statics (stat'iks), *n.* [Pl. of *static* (see *-ics*). Cf. F. *statique*, < Gr. *στατική*, the art of weighing, fem. of *στατικός*, causing to stand: see *static*.] That branch of mechanics which treats of the relations of strains and stresses, or of the figures of bodies in equilibrium and of the magnitudes and directions of the pressures.—**Chemical, graphical, social statics**. See the adjectives.

station (stā'shon), *n.* [ME. *stacion*, < OF. *station*, *stacion*, *estagon*, *estachon*, *estaisun*, etc., F.

station = Sp. *estacion* = Pg. *estação* = It. *stazione* = D. G. Sw. Yule and Burnell, Anglo-Indian Glossary.

The little bills done by the rich bunneahs, the small and great pecuniary relations between the *station* and the bazaar. W. H. Russell, Diary in India, I. 194.

6. The condition or position of an animal or a plant in its habitat, or its relation to its environment: often used synonymously with *habitat* (but *habitat* is simply the place where an animal or plant lives, *station* the condition under which it lives there).

The males and females of the same species of butterfly are known in several cases to inhabit different *stations*, the former commonly basking in the sunshine, the latter haunting gloomy forests.

Darwin, Descent of Man, I. 391.

7. In *surv.*: (a) The place selected for planting the instrument with which an observation is to be made. (b) A fixed uniform distance (usually the length of a chain of 100 feet, or 66 feet, or half the length of a twenty-meter chain) into which a line of survey is divided. The *stations* are consecutively numbered.—8. A stock-farm. [Australia].—9. A regular stopping-place. (a) One of the stages or regular stopping-places at which pilgrims to Rome or other holy place were wont to stop and rest, as a church or the tomb of a martyr. (b) One of the places at which ecclesiastical processions pause for the performance of an act of devotion, as a church, the tomb of a martyr, or some similar sacred spot. Hence—(c) The religious procession to and from the service of devotion at these places. (d) One of the representations of the successive stages of Christ's passion which are often placed round the naves of churches, and by the sides of the way leading to sacred edifices, and which are visited in rotation. (e) In the *early church*, the place appointed at church for each class of worshippers, more especially for each grade of penitents; hence, the status, condition, or class so indicated. (f) A place where railway-trains regularly stop for the taking on of passengers or freight; hence, the buildings erected at such a place for railway business; a depot.

10. *Eccles.*: (a) In the *early church*, an assembly of the faithful in the church, especially for the celebration of the eucharist. (b) The fast and service on Wednesday and Friday (except between Easter and Pentecost), in memory of the council which condemned Christ, and of his passion. These are still maintained by the Greek Church, but the fast of Wednesday in the Western Church has been abrogated. (c) Among Roman Catholics, a church where indulgences are to be obtained on certain days.—11. Situation; position.

Political economy, the kinetic theory of gases, and Darwinian evolutionism pursue statistical methods, which are also now applied to psychology.—**Statistical proposition**. See *proposition*.—**Statistical ratio**, the number of one class of things which are found associated upon the average with each one of another class of things: thus, the number of children per family is a *statistical ratio*; so is the average duration of life.

statistically (stā-tis'ti-kal-i), *adv.* In a statistical manner; by the use of statistics; from a statistical point of view.

statistician (stat-is'tish'yan), *n.* [= *F. statisticien*; as *statistic* + *-ian*.] One who is versed in or collects statistics.

statistics (stā-tis'tiks), *n.* [*Pl. of statistic* (see *-ics*).] **1.** A systematic collection of numbers relating to the enumeration of great classes, or to ratios of quantities connected with such classes, and ascertained by direct enumeration. Thus, a table of the populations of the different States of the American Union is called a *table of statistics*; so is a table showing the percentages of farms in different parts of the country that are mortgaged, provided these percentages have been ascertained from direct sampling, and not calculated by dividing the number of mortgaged farms by the total number of farms.

The word *statistics*, as the name of a peculiar science, was first engrafted into our language by Sir John Sinclair. It comprehends, according to the practice of the German writers, from whom it was adopted, all those topics of inquiry which interest the statesman.

Monthly Rev., 1796, App., p. 553 (N. and Q., 6th ser., XI. [404].)

2. The study of any subject, especially sociology, by means of extensive enumerations; the science of human society, so far as deduced from enumerations.—**Bureau of Statistics**. See *bureau*.

—**Vital statistics**, a collection of statistical ratios relating to the average course of life, including the death-rates at different ages, liability to different diseases, etc.

statistology (stā-tis-tol'ō-jī), *n.* [*Irreg. < statistic* (ies) + *Gr. -λογία, < λέγω, speak*: see *-ology*.] A discourse or treatise on statistics.

stative (stā'tiv), *a.* [= *OF. statif*; *< L. stative*, standing still, *< stare*, stand: see *state*.]

1. Pertaining to a fixed camp or military post or quarters.—**2.** In *Heb. gram.*, indicating a physical state, or mental, intransitive, or reflexive action: said of certain verbs.

statizer (stā'tiz), *v. t.* [*< state + -ize*. Cf. *statist*.] To meddle in state affairs. *Davies*.

Secular . . . mysteries are for the knowledge of *statizing* Jesuits.

Rev. T. Adams, Works, II. 168.

statlicht, *a.* A Middle English form of *statly*.

statoblast (stat'ō-blāst), *n.* [*< Gr. στατός, standing, fixed* (see *static*), + *βλαστός, a bud, germ*.]

One of the peculiar internal asexual buds developed in the body-cavity of the fresh-water or phylactolematous polyzoans, comparable to the gemmules of the fresh-water sponges, and serving for reproduction. These germs of new individuals to be reproduced agamogonetically by internal gemmation are formed in the funicular or mesenteric of the polyzoan; on the death of the parent organism, they are ruptured, and give exit to a young animal essentially like the parent. The fact that statoblasts contain no germinal vesicle, and never exhibit the phenomena of segmentation or yolk-division, is conclusive against their being ova or eggs; and, moreover, an ovary producing ova occurs elsewhere in the same individual that produces statoblasts. Also called *winter bud*. See *cut* under *Planorbella*.

statoblastic (stat'ō-blas'tik), *a.* [*< statoblast + -ic*.] **1.** Having the character or nature of a statoblast; of or pertaining to statoblasts: as, *statoblastic capsules*; *statoblastic reproduction*.—**2.** Giving rise to statoblasts; reproduced by means of statoblasts: as, a *statoblastic polyzoan*.

statocracy (stā-tok'ra-si), *n.* [*< state + -ocracy*, after *aristocracy*, etc.] Government or rule by the state alone, uncontrolled by ecclesiastical power.

statoscope (stat'ō-skōp), *n.* [*< Gr. στατός, standing, fixed* (see *static*), + *σκοπεῖν, view*.] A form of aneroid barometer for registering minute variations of atmospheric pressure. It consists of a sensitive metallic diaphragm exposed on the outside to the changes of atmospheric pressure, and connecting on the inside with a closed reservoir of air, of four or five liters capacity, protected from temperature-changes by non-conducting walls filled with felt and wool. Registration is effected by a long index-needle on the cylinder of a chronograph. At the beginning of observation the index is brought to zero of the scale by opening a stop-cock connecting the reservoir with the outside air, and the absolute pressure at the moment is observed with a mercurial barometer. The stop-cock is then closed, and the index-needle shows variations of pressure as small as .01 millimeter of mercury. The total limit of change that can be registered is about 5 millimeters; for pressures beyond this the instrument must be reset.

statosphere (stat'ō-sfēr), *n.* [*< Gr. στατός, standing, fixed*, + *σφαῖρα, a globe*.] The globe, chitinous, spiculiferous envelop of the protoplasm of the winter or resting stage of the fresh-water sponges. *J. A. Ryder*.

statospore (stat'ō-spōr), *n.* [*NL.*, *< Gr. στατός, standing, fixed*, + *σπορά, seed*: see *spore*.] In *bot.*, a motionless or resting spore; a hypno-spore.

statuat (stat'ū-ā), *n.* [*< L. statua, an image, a statue*: see *statue*.] A statue.

Even at the base of Pompey's *statua*,

Which all the while ran blood, great Caesar fell.

Shak., J. C., iii. 2. 192.

Behold the *Statuas* which wise Vulcan plac'd

Under the altar of Olympian Jove,

And gave to them an artificial life.

Beaumont, Masque of Inner Temple and Gray's Inn.

statuary (stat'ū-ā-ri), *a.* and *n.* [= *F. statuaire* = *Sp. Pg. estatuario* = *It. statuario*, *< L. statuaris*, of or pertaining to statues (*statuaria*, *sc. ars*, the statuary art), *< statua*, a statue: see *statue*.] **I. a.** Of or pertaining to a statue or statuary.

What connoisseurs call *statuary* grace, by which is meant elegance unconnected with motion.

Goldsmith, The Bee, No. 2.

Statuary marble, fine-grained white marble, especially sought for monuments, busts, etc.

II. n.; *pl. statuaries* (-riz). **1.** One who makes statues; a sculptor; specifically, one who makes statues in metal, a bronze-caster, or one who makes copies of statues designed by another artist.

Statuaries could

By the foot of Hercules set down punctually

His whole dimensions.

Massinger, Emperor of the East, II. 1.

Burst the gates, and burn the palaces, break the works of the *statuary*. *Tennyson, Experiments, Boadicea*.

2. The art of carving or making statues or figures in the round representing persons, animals, etc.: a main branch of sculpture.

The northern nations . . . were too barbarous to preserve the remains of learning more carefully than they did those of *statuary* or architecture or civility.

Sir W. Temple, Ancient and Modern Learning.

3. Statues collectively.

statue (stat'ū), *n.* [*< ME. statue*, *< OF. statue*, *F. statue* = *Sp. Pg. estatua* = *It. statua*, *< L. statua*, an image set up, a statue, pillar, *< statuere*, set up: see *statute*.] **1.** A figure of a person or an animal, made of some solid substance, as marble, bronze, iron, or wood, or of any substance of solid appearance; a sculptured, cast, or molded figure, properly of some size (as distinguished from a *statuette* or *figurine*) and in the round (as distinguished from a *relief* or an *intaglio*).

This proude king let make a *statue* of golde Sixty cubytes long. *Chaucer, Monk's Tale*, l. 169.

Within the area of the foundation walls, and all round them, were lying heads and bodies of many *statues*, which had once stood within the temple on bases still in position in three parallel rows.

C. T. Newton, Art and Archæol., p. 306.

2t. A picture.

The rede *statue* of Mars with spere and targe So syneth in his whyte baner large That alle the feeldes glaucen up and down.

Chaucer, Knight's Tale, l. 117.

Sir John. Your nieces, ere they put to sea, crave humbly, Though absent in their bodies, they may take leave Of their late suitors' *statues*.

Luke. There they hang. *Massinger, City Madam*, v. 3.

Equestrian statue, a statue in which the figure is represented as seated on horseback.—**Plinth of a statue**. See *plinth*.

statue (stat'ū), *v. t.*; pret. and pp. *statued*, ppr. *statuing*. [*< statue, n.*] To place as a statue; form a statue of.

status (stā'tus), *n.* [*L. status*, standing, position, attitude, state: see state.] 1. Standing or position as regards rank or condition.—2. Position of affairs.—3. In *law*, the standing of a person before the law in the class of persons indicated by his or her legal qualities; the relation fixed by law in which a person stands toward others or the state. Different writers vary much in the extent of meaning implied, but in the best usage it includes liberty, citizenship, and marriage, infancy and majority and wardship or tutelage, and mental capacity or incapacity according to legal tests. It is rarely if ever used of any of those relations which are terminable by consent, such as partnership.—**Status quo**, the condition in which (the thing or things were at first or are now). Compare *in statu quo*.

statutable (stat'ū-tā-bl), *a.* [*statute* + *-able*.] 1. Made, required, or imposed by statute; statutory: as, a statutable punishment.—2. Allowed by the rules; standard.

I met with one the other day who was at least three inches above five foot, which you know is the statutable measure of that club.

Addison, Spectator, No. 108.

statutably (stat'ū-tā-blī), *adv.* In a manner agreeable to statute; as required or provided by statute.

statute (stat'ūt), *n.* [*ME. statut*, < *OF. statut*, *estatut*, *statu*, *F. statut* = *Pr. statut* = *Sp. Pg. estatuto* = *It. statuto*, *statuto* = *D. statut* = *G. Sw. Dan. statut*, < *LL. statutum*, a statute, prop. neut. of *L. status*, pp. of *statuere*, set up, establish: see stand.] 1. An ordinance or law; specifically, a law promulgated in writing by a legislative body; an enactment by a legislature; in the United States, an act of Congress or of a State or Territorial legislature passed and promulgated according to constitutional requirements; in Great Britain, an act of Parliament made by the Sovereign by and with the advice of the Lords and Commons. Some early statutes are in the form of charters or ordinances, proceeding from the crown, the consent of the Lords and Commons not being expressed. Statutes are either public or private (in the latter case affecting an individual or a company); but the term is usually restricted to public acts of a general and permanent character. Strictly speaking, an ordinance established by either house of the legislature, or by both, without the assent of the executive, as a resolution, or joint resolution, is not a statute. The word has sometimes, however, been interpreted to include municipal ordinances. See also *act*, *article*, *bill*, *by-law*, *charter*, *code*, *decree*, *edict*, *law*, *ordinance*, *petition*, *provision*.

Ac whiles Hunger was her maister there wolde none of hem childe,
Ne stryue agenes his statut so sterneliche he lokod.

Piers Plowman (B), vi. 321.

The statutes of the Lord are right.

Ps. xix. 8.

Girded with frumps and curtall gibes, by one who makes sentences by the Statute, as if all above three inches long were confisat.

Milton, Apology for Smectymnus.

What are called in England constitutional statutes, such as Magna Charta, the Bill of Rights, the Act of Settlement, the Acts of Union with Scotland and Ireland, are merely ordinary laws, which could be repealed by Parliament at any moment in exactly the same way as it can repeal a highway act or lower the duty on tobacco.

J. Bryce, American Commonwealth, I. 237.

2. The act of a corporation or of its founder, intended as a permanent rule or law: as, the

statutes of a university.—3. In foreign and civil law, any particular municipal law or usage, though not resting for its authority on judicial decisions or the practice of nations. *Burrill; Worcester*.—4. A statute-fair. [Prov. Eng.]—

Bloody statute, an occasional name of the Act of the Six Articles. See the *Six Articles*, under *article*.—**Declaratory statute**. See *declaratory*.—**Directory statute**. See *directory*.—**Enabling statute**, a statute which confers a power upon a person or body that not previously possess it.—**Enlarging statute**, a statute which increases a power that already existed.—**Equity of a statute**. See *equity*.—**Estate by statute**, more fully *estate by statute merchant*, or *estate by statute staple*, in *Eng. law*, the estate or tenancy which a creditor acquired in the lands of his debtor by their seizure on judgments by confession in forms now obsolete. See *statute merchant* and *statute staple*, below.—**General statute**, a statute which relates directly to the government or the general public interest, or to all the people of the state or of a particular class, condition, or district therein. See *legislation*, also *public statute* and *local statute*.—**Local statute**. See *local legislation*, under *local*.—**Mandatory statute**. See *mandatory*.—**Penal statutes**. See *penal*.—**Private statutes**. (a) See *private acts*, under *private*. (b) Same as *special statute*.—**Public statutes**. See *public acts*, under *public*.—**Remedial statutes**, statutes the main object of which appears directly beneficent, by supplying some defect in the law or removing inconveniences, as distinguished from those the immediate aspect of which is to impose punishment or penalty, which are called *penal statutes*. Some statutes partake of both characters, for a statute which is penal as against an offender may be remedial as toward those whom it is intended to protect.—**Retroactive statute**. See *retroactive*.—**Special or private statute**, a statute which the courts will not notice unless pleaded and proved like any other fact; also, a particular or peculiar statute: as, there is a *special statute* regulating chattel mortgages on canal-boats.—**Statute against benevolences**, an English statute of 1483-4 (1 Rich. III. c. 2) abolishing the peculiar system of raising money by solicitation, called benevolences, and declaring that such exactions should not be taken for precedent.—**Statute cap**. See *capit.*—**Statute de Donis**, more fully *Statute de Donis Conditionalibus*, an English statute of 1285 (13 Edw. I., being the Statute of Westminster, II. c. 1) intended to put an end to the common-law doctrine that under a gift to a man and the heirs of his body he acquired absolute title by having issue, even though none should survive. The act prescribed instead that the condition stated by the giver of reversion in failure of issue should be carried into effect. Also sometimes called *statute of entail*.—**Statute labor**. See *labor*.—**Statute lace. See *lace*.—**Statute law**, a law or rule of action prescribed or enacted by the legislative power, and promulgated and recorded in writing; also, collectively, the enactments of a legislative assembly, in contradistinction to *common law*. See *law*.—**Statute merchant**, in *law*, a bond of record, now obsolete, acknowledged before the chief magistrate of some trading town, on which, if not paid at the day, an execution might be awarded against the body, lands, and goods of the obligor. See *pocket-judgment*.**

A certain blinde retaylor, called the Bluel, used to lend money vpon pawnes or anie thing, and would let one for a need haue a thousand poundes vpon a statute-merchant of his soule.

Nashe, Pierce Penilesse, p. 9.

Statute of bread and ale. See *bread*.—**Statute of charitable uses**, an English statute of 1601 (43 Eliz. c. 4), sometimes called the *statute of Elizabeth*, for the protection of property devoted to charities. It authorized the lord chancellor to appoint commissioners to inquire into the management of such property, with power to correct abuses.—**Statute of Circumspecte Agatis**, an English statute of 1285 (13 Edw. I.), in the form of a writ addressed to the judges: so named from its first two words. It directed that the king's prohibition should not lie in spiritual matters, and that the jurisdiction of the spiritual courts should be exercised in cases of demands by a person for tithes, mortuaries, pensions, etc., notwithstanding such prohibition.—**Statute of false pretenses**, an English statute of 1757 (30 Geo. II. c. 24) which defines and punishes the crime of false pretenses.—**Statute of fraudulent conveyances**, sometimes called the *statute of Elizabeth*, (a) An English statute of 1571 (13 Eliz. c. 5), reenacted in nearly all of the United States, which declares all conveyances of property with intent to delay, hinder, or defraud creditors to be void as against such creditors. (b) An English statute of 1585 (27 Eliz. c. 4) making void all conveyances of land made with intent to deceive purchasers.—**Statute of Gloucester**, an English statute of 1278 (6 Edw. I.), passed at Gloucester, and relating to local franchises and judicature, damages to real property, waste, trespass, etc.—**Statute of laborers**, an English statute of 1349 (23 Edw. III.) designed to compel workmen and servants to work for the wages commonly paid in the year 1346: enacted because the pestilence had seriously decreased the number of servants, and the survivors demanded exorbitant wages.—**Statute of Lincoln**, an English statute of 1315-16 (9 Edw. II. st. 2), so called because the Parliament sat at Lincoln. It prescribed the qualifications of sheriffs. Also known as the *statute of sheriffs*.—**Statute of Marlborough** (Marleberge, Marlbridge), an English statute of 1267 (52 Hen. III.), so called because made at Marlborough, containing twenty-nine chapters or sections relating principally to distress suits, landlord and tenant, courts, writs, etc. It is one of the earliest written laws, after the Great Charter, and is said to have been intended to defeat attempts to evade feudal dues on succession at death made by gifts *inter vivos*.—

Statute of merchants (also known as the *statute of Acton Burnell*, from the place of its enactment). (a) An English statute or ordinance of 1283 (11 Edw. I.) for the collection of debts. (b) Another of 1285 (13 Edw. I.) for the same purpose.—**Statute of Merton**. Same as *provisions of Merton* (which see, under *provision*).—**Statute of military tenures**. See *military*.—**Statute of monopolies**. Same as *Monopoly Act* (which see, under *monopoly*).—**Statute of Northampton**, an English statute of 1328 (2 Edw. III.) relating to felonies, sheriffs, etc.—**Statute of Quia Emptores**, an English statute of 1290, 1290 (18 Edw. I.), which, because purchasers of land had

evaded their feudal dues to the chief lord by claiming to hold under the seller as their lord, provided that upon all sales or feoffments of land in fee simple the feoffee should hold, not of his immediate feoffor, but of the next lord paramount of whom the feoffor himself held, and by the same services, thus putting an end to subinfeudation for several centuries.—**Statute of Rageman**, an English statute of 1276 (4 Edw. I.) requiring justices to "go throughout the land" to try suits for trespasses.—**Statute of Rutland, Ruddlan, or Rothlan**, an English royal ordinance of 1284 (12 Edw. I.), made at Rutland, which, among other things, forbade suits in the Exchequer except such as concerned the king and his officers, and referred to the keeping of the rolls, etc. Also called *provisions made in the Exchequer*.—**Statute of sheriffs**. Same as *statute of Lincoln*.—**Statute of Stamford**, an English statute of 1309 (3 Edw. II.) which confirmed an act of 28 Edw. I. abolishing the taking of goods, etc., by the king when on a journey except upon payment, and also abolished certain customs duties.—**Statute of Winchester or Winton**, an English statute of 1285 (13 Edw. I.) containing police regulations such as concern lesser crimes and the hue and cry, and prohibiting fairs and markets in churchyards.—**Statute of York**, an English statute of 1318 (12 Edw. II.) which relates to the administration of justice.—**Statutes of liveries**, English statutes, the first of which were in 1377 (1 Rich. II. c. 7), 1392-3 (16 Rich. II. c. 4), and 1396-7 (20 Rich. II. c. 1 and 2), for the better preservation of the peace: so called because directed against the practice of giving distinctive liveries to retainers and partisans, whereby confederacies and hostile parties were engendered.—**Statutes of Westminster**, early English statutes, so called because made at Westminster. "The first" (1275), comprising fifty-one chapters, relates to freedom of elections, amercements, bail, extortion by officers, aid taken by lords, etc. "The second" (1285), including fifty chapters, relates to gifts, writs, pleas, court-proceedings, etc. Also known as *Statute de Donis* (which see, above). "The third" was the statute "Quia Emptores" (which see, above).—**Statute staple**, in *law*, a bond of record, now obsolete, acknowledged before the mayor of the staple or town constituting a grand mart, by virtue of which the creditor might forthwith have execution against the body, lands, and goods of the debtor on non-payment.

There is not one gentleman amongst twenty but his land be engaged in twenty statutes-staple.

Middleton, Family of Love, I. 3.

The Great Statute, an English code of customs law of 1086 (12 Car. II. c. 4) imposing duties which were termed the "old subsidy." (As to noted statutes on particular subjects, such as *statute of distributions*, *statute of enrolment*, *statute of fines*, *statute of frauds*, *statutes of justit*, *statute of Jewry*, *statute of limitations*, *statutes of mortmain*, *statute of murders*, *statute of non-claim*, *statute of preeminence*, *statute of provisors*, *statute of staple*, *statute of tillage*, *statute of uses*, *statute of wills*, see the word characterizing the statute.) = *Syn. 1. Enactment, Ordinance*, etc. See *law*.

stauraxonia (stā-rak-sō'ni-ā), *n. pl.* [*NL.*, *< Gr. stavros*, a cross, + *axis*, an axis.] In *promorphology*, stauraxonal organic forms, as pyramids. *Stauraxonia homopola* are figures with equal poles, whose stereometric figure is a double pyramid (two pyramids base to base). *Stauraxonia heteropola* are single pyramids with dissimilar, usually anal and oral, poles. When these have regular bases, they are *stauraxonia homotaura*; when irregular, *stauraxonia heterotaura*.

stauraxonal (stā-rak-sō'ni-āl), *a.* [*< stauraxonia* + *-al*.] Having a main axis and a definite number of secondary axes at right angles therewith, so that the stereometric figure is fundamentally a pyramid: correlated with *centraxonial*.

stauri, *n.* Plural of *staurus*.

Stauria (stā'ri-ā), *n.* [*NL.* (Edwards and Haime, 1850), *< Gr. stavros*, a cross, a stake.] The typical genus of *Stauriidae*, having a compound astriform corallum growing by calicular gemmation, four cruciate primitive septa, and no columella.

staurian (stā'ri-an), *a.* [*< Stauria* + *-an*.] Resembling or related to the genus *Stauria*; of or pertaining to the *Stauriidae*.

Stauriidae (stā'ri-i-dē), *n. pl.* [*NL.*, *< Stauria* + *-idae*.] A family of fossil rugose stone-corals, typified by the genus *Stauria*. The wall is well developed; the septa are complete, lamellar, and conspicuously tetramorous. The interseptal loculi are crossed by endothelial dissepiments, and there is a central tabulate area. The genera besides *Stauria* are *Holocyclus*, *Polygyra*, *Conosmilia*, and *Metriophyllum*. Usually *Stauriidae*.

staurolite (stā'rō-lit), *n.* [*< Gr. stavros*, a cross, + *lithos*, a stone.] A silicate of aluminium and iron occurring in reddish to yellowish-brown or brownish-black prismatic crystals. These crystals are often twins, in the form of a cross, whence it is called *cross-stone*. Also *staurolite*, *grenatite*.—**Staurolite-slate**, a mica-slate through which are scattered crystals of staurolite. Rocks of this character have been found in Scotland, the Pyrenees, and New England.

staurolitic (stā'rō-lit'ik), *a.* [*< staurolite* + *-ic*.] Pertaining to, resembling, or characterized by the presence of staurolite.

Stauromedusæ (stā'rō-mē-dū'sē), *n. pl.* [*NL.*, *< Gr. stavros*, a cross, + *NL. Medusæ*, q. v.] In Haeckel's classification, a subfamily of *Scyphomedusæ*, having four pairs of adradial gonads or four simple interradial gonads in the subumbrellar wall, four large periradial gastral pouches, and no special sense-organs.

stauromedusan (stā'rō-mē-dū'san), *a.* and *n.* [*< Stauromedusæ* + *-an*.] *I. a.* Pertaining to the *Stauromedusæ*, or having their characters.

II. n. A member of the *Stauromedusæ*.

Stauropus (stā'rō-pus), *n.* [*NL.* (Germar, 1813), *< Gr. stavros*, a cross, + *pois* = *E. foot*.]

1. A genus of bombycid moths, of the family *Notodontidae*, having the thorax woolly, the fore wings rather broad and sinuate on the hind margins, hind wings rounded, tongue weak, and the abdomen slightly tufted above. The larvæ have fourteen legs, and are naked, with humps on the middle segments and two short anal projections; the legs on the third and fourth segments are exceedingly long. When at rest they raise the large head and enlarged anal segments, and it is from their extraordinary appearance that the only European species, *S. jagi*, derives its English name of *lobster-moth*. Its larva is of a brown color, and feeds on oak, birch, beech, and apple. The only other known species is Asiatic.

2. A genus of melandryid beetles, erected by Fairmaire and Germar in 1863 on a single South American species.

stauroscope (stā'rō-skōp), *n.* [*< Gr. stavros*, a cross, + *σκοπεῖν*, view.] An optical instrument, invented by Von Kobell of Munich, for examining sections of crystals, and determining the position in them of the planes of light-vibration.

stauroscopic (stā'rō-skōp'ik), *a.* [*< stauroscope* + *-ic*.] Of, pertaining to, or made by means

of the stauroscope: as, *stauroscopic examination*. *Spottiswoode, Polarisation*, p. 113.

stauroscopically (stā'rō-skōp'i-kal-i), *adv.* By means of the stauroscope: as, *stauroscopically determined systems of crystallization*.

staurotide (stā'rō-tid), *n.* [*< Gr. stavros*, a cross, + *-tē* + *-idē*.] Same as *staurolite*.

Staurotypidæ (stā'rō-tip'i-dē), *n. pl.* [*NL.*, *< Staurotypus* + *-idæ*.] A family of tropical American cryptodirous tortoises, represented by the genera *Staurotypus* and *Claudius*. They have nine plastral bones, the carapace with epidermal scutes, the nuchal bone with a short costiform process, and caudal vertebrae prococious. Also *Staurotypina*, as a group of *Chelydridæ*.

staurotypous (stā'rō-ti-pus), *a.* [*< Gr. stavros*, a cross, + *τύπος*, type.] In *mineral*, having mackles or spots in the form of a cross.

steam (stēm), *n.* [*< ME. steem, stem*, *< AS. steām*, vapor, smell, smoke, = *Fries. stoame* = *D. stoom*, steam; origin unknown.] 1. Vapor; a rising vapor; an exhalation.

Fough! what a *steam* of brimstone
Is here!
B. Jonson, *Devil is an Ass*, v. 4.

2. Water in a gaseous state; the gas or vapor of water, especially at temperatures above 100° C. It has a specific gravity of .625 as compared with air under the same pressure. It liquefies at 100° C. (212° F.), under a pressure of 14.7 pounds upon a square inch, or the mean pressure of the atmosphere at the sea-level. The temperature at which it liquefies diminishes with the pressure. Steam constantly rises from the surface of liquid water when not obstructed by impervious inclosures or covered by another gas already saturated with it. Its total latent heat of vaporization for 1 pound weight under a pressure of 76 centimeters of mercury (or 14.7 pounds to the square inch) is 965.7 British thermal units, or 536.5 calories for each kilogram. Its specific heat under constant pressure is .4805. (*Regnault*.) It is decomposed into oxygen and hydrogen at temperatures between 1,000° and 2,000° C. (*Dewille*.) In addition to the surface evaporation of water, the change from the liquid to the gaseous state takes place beneath the surface (the gas escaping with ebullition) whenever the temperature of the liquid is raised without a corresponding increase of pressure upon it. The temperature at which this occurs under any particular pressure is the *boiling-point* for that pressure. The boiling-point of water under the atmospheric pressure at the sea-level is 100° C. or 212° F. Saturated steam has the physical properties common to all gases whose temperatures are near those of their liquefying-points, or the boiling-points of their liquids. Saturated steam when isolated, and superheated at temperatures from 100° to 110° C., and under constant pressure, expands with a given increase of temperature about five times as much as air, and at 186° C. about twice as much as air; and it must be raised to a temperature much higher than this before it will expand uniformly like air. The large quantity of latent heat in steam, its great elasticity, and the ease with which it may be condensed have rendered its use in engines more practicable than that of any other gaseous medium for the generation and application of mechanical power.

3. Water in a visible vesicular condition produced by the condensation of vapor of water in air. — 4. Figuratively, force; energy. [*Colloq.*] 5†. A flame or blaze; a ray of light.

Steam, or lowe of fyre. *Flamma*. *Prompt. Parv.*, p. 473.

Absolute steam-pressure. See *pressure*. — **Dead steam**. Same as *exhaust-steam*. — **Dry steam**, saturated steam without any admixture of mechanically suspended water. — **High-pressure steam**, **low-pressure steam**. See *pressure*. — **Live steam**, steam which has performed no work, or only part of its work, or which is or might be available for the performance of work in an engine. — **Saturated steam**, steam in contact with water at the same temperature. In this condition the steam is always at its condensing-point, which is also the boiling-point of the water with which it is in contact. In this it differs from superheated steam of equal tension, which has a temperature higher than its condensing-point at that tension, and higher than the boiling-point of water under the same pressure. — **Specific steam-volume**, in *thermodynamics*, the volume which a unit of weight of steam assumes under specific conditions of temperature and pressure. — **Steam fire-engine**. See *fire-engine*, 2. — **Steam jet-pump**. See *pump*¹. — **Steam vacuum-pump**. See *vacuum-pump*. — **Superheated steam**, steam which at any stated pressure has a higher temperature, and for any particular weight of it a greater volume, than saturated steam (which see, above) at the same pressure. Also called *steam-gas*. — **Total heat of steam**. Same as *steam-heat*, 1. — **Wet steam**, steam holding water mechanically suspended, the water being in the form of spray or vesicles, or both.

steam (stēm), *v.* [Early mod. E. also *steem*; *< ME. stēmen*, *< AS. stēman*, *stijman* (= *D. stoomen*), steam, *< steam*, vapor, steam: see *steam*, *n.*] **I. intrans.** 1. To give out steam or vapor; exhale any kind of fume or vapor.

Ye mists, . . . that . . . rise
From hill or *steaming* lake.
Milton, *P. L.*, v. 186.

2. To rise in a vaporous form; pass off in visible vapor.

When the last deadly smoke aloft did *steeme*.
Spenser, *F. Q.*, I. xii. 2.

3. To move or travel by the agency of steam: as, the vessel *steamed* into port.

We *steamed* quietly on, past . . . the crowds of yachts at Ryde, and dropped anchor off Cowes.
Lady Brassey, *Voyage of Sunbeam*, I. i.

4†. To flame or blaze up.

His eye steepe and rolling in his heede,
That demede as a forneys a leede.
Chaucer, Gen. Pro. to C. T., l. 202.
Stemyn, or lowyn vp. Flammo. Prompt. Parv., p. 473.
Two demynge eyes. Wyatt, Satires, l. 53.

II. trans. 1. To exhale; evaporate. [Rare.]
In slouthfull sleepe his molten hart to *steme*.
Spenser, F. Q., II. vi. 27.

2. To treat with steam; expose to steam; apply steam to for any purpose: as, to *steam* cloth; to *steam* potatoes instead of boiling them; to *steam* food for cattle; *steamed* bread.

steamboat (stēm'bōt), *n.* A vessel propelled by steam-power.

steamboat-bug (stēm'bōt-bug), *n.* A water-beetle of large size, or otherwise conspicuous. [Local, U. S.]

steamboat-coal (stēm'bōt-kōl), *n.* Coal broken small enough to pass between bars set from 6 to 8 inches apart, but too large to pass between bars less than 5 inches apart. This is the variation of size in different collieries in the Pennsylvania anthracite regions, where this size of coal is rarely prepared except to fill special orders, and where alone this term is in use.

steamboating (stēm'bō'ting), *n.* 1. The business of operating steamboats.—2. Undue hurrying and slighting of work. [Colloq.]—3. A method of cutting many boards for book-covers at one operation, instead of cutting them singly.

steamboat-rolls (stēm'bōt-rōlz), *n. pl.* The largest rolls used in breaking coal for the market. Also called *crushers* and *crusher-rolls*. See *steamboat-coal*. [Pennsylvania anthracite regions.]

steam-boiler (stēm'boi'ler), *n.* A receptacle or vessel in which water is heated and boiled to generate steam; particularly, a receptacle or vessel in which the water is confined, or isolated from the external air, in order to generate steam under a pressure equal to or exceeding that of the atmosphere, for the conversion of its expansive force into work in a steam-motor or engine, or for heating purposes. The kinds of steam-boilers in use are very numerous and may be variously classified. In some the parts are rigidly joined together by rivets, bolts, stays, tubes expanded into heads, etc.; in others the parts are easily detachable one from the other, as in what are known as *sectional boilers*. Another division may be made, with reference to the treatment of the contained water, which in one class of steam-boilers is heated principally in a single mass of considerable cubic capacity, and in another is distributed in small spaces connected with each other and with the steam-space, as in what are known as *sectional safety-boilers*. A third ground of classification is the mode of applying heat. (See *cylindrical steam-boiler*, *return-flue boiler*, *horizontal tubular boiler*, *fire-tube boiler*, etc., below.) Boilers are made of wrought-iron or steel plates and tubes, or of cast-iron, or partly of wrought-iron or steel and of cast-iron. Steel of moderate tensile strength has lately been much used for boilers in which high pressures are maintained; and the present tendency of engineering in power-boilers is toward the use of as high pressures as is compatible with good lubrication, or the use of steam at as high a temperature as can be employed without decomposition of lubricants. Sectional boilers are often made partly or wholly of cast-iron, the sections being bolted or screwed together; and cast-iron is also very largely employed for low-pressure boilers used for steam-heating.—**Circulating steam-boiler**, a compound boiler in which the connected parts are unequally heated, the water rising in the more intensely heated parts, and descending in the cooler parts, to insure a rapid circulation of the water constantly in one direction.—**Compound steam-boiler**. (a) A battery of two or more single steam-boilers having their steam- and water-spaces connected, and acting together to supply steam to a heating-apparatus or a steam-engine. (b) A single boiler, or a battery of boilers, combined with other apparatus, as a feed-water heater or a superheater, for facilitating the production or for the superheating of steam. (c) A sectional boiler.—**Cornish steam-boiler**, the cylindrical flue-boiler invented by Smeaton. See *return-flue steam-boiler*.—**Corrugated furnace steam-boiler**, a boiler in which the plates exposed to the direct radiation from the fire and to the hot gases in the furnace are corrugated to give increased strength and to present a more extended heating-surface to the fire.—**Cylindrical steam-boiler**, a boiler with an exterior cylindrical shell, having flanged heads of much thicker iron fastened to the shell by rivets.—**Fire-tube steam-boiler**, a boiler in which the heat of the furnace is partly or wholly applied to the interior of tubes which pass through the water-space of the boiler.—**Flue steam-boiler**, a general name for all steam-boilers with an internal flue or flues, whether vertical, horizontal, or of other construction.—**Horizontal flue steam-boiler**, a horizontal steam-boiler with one or more flues through its length. (Also called *return-flue boiler*.) If cylindrical also, it is a *horizontal cylindrical flue or return-flue boiler*.—**Horizontal steam-boiler**, a steam-boiler in which the flues or tubes are in a horizontal position.—**Horizontal tubular steam-boiler**, a horizontal boiler with fire-tubes, through which the gases of combustion pass in a manner analogous to their passage through flues, for which the tubes are substitutes, presenting a greater extent of heating-surface than can be obtained in the same space by flues, and effectively tying the heads of the boiler together. A modern form of this boiler is shown in the cuts, which also show the method of setting it in brickwork. *a* is the shell; *b, b*, saddles for supporting the boiler in the masonry; *c*, *d*, the furnace-door; *e*, ash-pit door; *f*, clean-out door in the boiler-front; *f'*, by which the

tubes are reached for cleaning; *g*, ash-pit; *h*, grate; *i*, steam-dome; *j*, safety-valve; *k*, steam-pipe; *l*, bridge-wall; *m*, combustion-chamber; *n*, back connection for passage of

the gases of combustion into the rear ends of the tubes; *o*, flue in the masonry; *o'*, uptake; *p*, flanged head; *q*, tubes; *r*, side-bars which support the masonry; *s*, dead-air spaces in the masonry in which the air acts as a heat-insulator. The course of the gases of combustion is indicated by arrows.—**Locomotive steam-boiler**, a tubular boiler which has a contained furnace and ash-pit, and in which the gases of combustion pass from the furnace directly into horizontal interior tubes (instead of passing first under the boiler, as in the horizontal cylindrical tubular boiler), and after passing through the tubes are conveyed directly into the smoke-box at the opposite end of the tubes. The name is derived from the use of such boilers on locomotive engines, but it is typical in its application to all boilers having the construction described, and used for generating steam for stationary or portable engines, as well as for locomotives.—**Marine steam-boiler**, a boiler specially designed and adapted for supplying steam to marine engines. Compactness, as little weight as is consistent with strength, effective steaming capacity, and economy in consumption of fuel are the prime requisites of marine boilers. They are usually tubular, and short in proportion to their width, and have water-legs at the sides and water-spaces below and at the backs of their furnaces—that is, their furnaces are entirely surrounded by water-spaces except at the openings for the doors. Marine boilers are now sometimes used with forced draft—that is, air is forced from the outside into the boiler- or fire-rooms (which are sometimes made air-tight) or immediately into the fires by powerful blowers.—**Return-flue steam-boiler**, a horizontal flue-boiler with one or more interior flues through which the gases of combustion are returned to the front end of the boiler after having passed to the rear from the furnace over the bridge-wall and under the bottom of the shell.—**Rotary tubular steam-boiler**. See *rotary*.—**Sectional safety steam-boiler**, a sectional boiler in which the water is divided into numerous small masses connected with one another by passages large enough for free circulation from one to the other, but not large enough to permit so sudden a release of pressure, in case of rupture of one of the sections, as to cause an explosion.—**Tubular steam-boiler**, a boiler a prominent feature of which is a series of either fire- or water-tubes.—**Vertical steam-boiler**, a steam-boiler in which the heating-surface of the tubes or flues is in a vertical position. When constructed with fire-tubes, it is called a *vertical tubular boiler*.

steam-box (stēm'hoks), *n.* A reservoir for steam above a boiler; a steam-chest.

steam-brake (stēm'brāk), *n.* A brake applied by the action of steam admitted to a steam-cylinder the piston of which is connected by rods to the levers which apply the brake-shoes.

steam-car (stēm'kär), *n.* A car drawn or driven by steam-power; a railway-car. [U. S.]

steam-carriage (stēm'kar'ij), *n.* A road-carriage driven by steam-power.

steam-case (stēm'käs), *n.* Same as *steam-chest*.

steam-chamber (stēm'chäm'bér), *n.* 1. A box or chamber in which articles are placed to be steamed.—2. A steam-chest.—3. A steam-dome.—4. The steam-room or steam-space in a boiler or engine.

steam-chest (stēm'chest), *n.* 1. The chamber in which the slide-valve of a steam-engine works. See cuts under *passenger-engine*, *rock-drill*, and *slide-valve*.—2. In *calico-printing*, a metallic vessel or tank in which printed cloths are steamed to fix their colors.

steam-chimney (stēm'chim'ni), *n.* An annular chamber around the chimney of a boiler-furnace for superheating steam.

steam-cock (stēm'kok), *n.* A faucet or valve in a steam-pipe.

steam-coil (stēm'kōil), *n.* A coil of pipe, either made up flat with return bends or in spiral form, used to impart heat to a room or other inclosed space or to a liquid, or, by exposure of its exterior surface to air-currents or contact of cold water, to act as a condenser.

steam-color (stēm'kul'gr), *n.* In *dyeing*, a color which is developed and fixed by the action of steam after the cloth is printed.

steam-crane (stēm'krän), *n.* A crane worked by steam, frequently carrying the steam-engine upon the same frame.

steam-cutter (stēm'kut'ér), *n.* A ship's boat, smaller than a launch, propelled by steam.

steam-cylinder (stēm'sil'in-dér), *n.* The cylinder in which the piston of a steam-engine reciprocates.—**Starting steam-cylinder**. Same as *starting-engine*.

steam-dome (stēm'dōm), *n.* A chamber connected with the steam-space and projecting above the top of a steam-boiler. From it the steam passes to the cylinder of a steam-engine, or to steam-heating apparatus. See cut under *steam-boiler*.

steam-dredger (stēm'drej'ér), *n.* A dredging-machine operated by steam.

steam-engine (stēm'en'jin), *n.* An engine in which the mechanical force arising from the elasticity and expansive action of steam, or from its property of rapid condensation, or from the combination of the two, is made available as a motive power. The invention of the steam-engine has been ascribed by the English to the Marquis of Worcester, who published an account of it about the middle of the seventeenth century. By the French the invention has been ascribed to Papin, toward the close of the same century. Papin's plan contained the earliest suggestion of a vacuum under a piston by the agency of steam. The first actual working steam-engine of which there is any record was invented and constructed by Captain Savery, an Englishman, to whom a patent was granted for it in 1698. This engine was employed to raise water by the expansion and condensation of steam. The steam-engine received great improvements from the hands of Newcomen, Beighton, and others. Still it was imperfect and rude in its construction, and was chiefly applied to the draining of mines or the raising of water. Up to this time it was properly an atmospheric engine (see *atmospheric*), for the actual moving power was the pressure of the atmosphere, the steam only producing a vacuum under the piston. The steam-engine was brought to a high state of perfection by James Watt about the year 1782. The numerous and vital improvements introduced by him, both in the combination of its mechanism and in the economy of its management, have rendered the steam-engine at once the most powerful, the most easily applied and regulated, and generally speaking the least expensive of all prime movers for im-

Steam-engine (Corliss Engine).
(The upper figure is a front view, the under a rear view.)

The steam-valve A and exhaust-valve A' are independent of each other, and have cylindrical bearing-surfaces. An oscillatory motion is given to them by rods B, connecting with an oscillating disk C (wrist-plates) upon the side of the steam-cylinder, which is worked by an intermediate rock-lever D, driven by the eccentric-rod E, connected with an eccentric upon the main shaft. The motions of the exhaust-valves are positive, but those of the inlet valve are varied by means of spring-catches *a*, which are adjustable to determine the points of opening and the range of motion of the valves, and are also controlled in their disengagement of the valve-stems by the governor F, rock-lever G, connecting rods H, and rock-levers *i*, all connected together in such manner that an extremely small increase or decrease of speed in the rotation of the fly-wheel shaft causes the inlet-valves to be released and to close correspondingly earlier or later in the stroke. The closing is performed by exterior weights suspended from short levers on the valve-stems by the rods *k*; the motion of closing being controlled by dash-pots at *l*, only the covers of which are shown. The other parts of the engine, which are common to most reciprocating engines, are 1, the bed-plate; 2, cylinder; 3, a piston; 4, piston-rod; 5, stuffing-box; 6, sliding block or cross-head; 7, connecting-rod or pitman; 8, rod end fitted to a crank-wrist; 9, fly-wheel; 10, fly-wheel; 11, crank keyed to 12, the crank-shaft; 13, centrifugal lubricating tube; 14, steam-pipe; 15, lubricator; 16, exhaust-pipe.

pulling machinery of every description. The steam-engine is properly a heat-engine, and the total work *L* is expressed theoretically by the equation

$$L = QG(T_1 - T)/AT,$$

in which *Q* represents the total heat converted into work per unit of weight, *G* weight of steam, and *A* the thermal equivalent of a unit of work, while *T*₁ and *T* are respectively the higher and lower limits of temperature between which the steam is worked, *T*₁ being the absolute temperature at which the steam is induced to the engine, and *T* the absolute temperature at which it is exhausted from it. Inspection of the equation shows that the work performed must vary directly as the factor (*T*₁ - *T*) varies—that is, the greater the difference which can be maintained between the temperature of induction and that of eduction the greater is the amount of work performed by any given weight of steam. It is in accordance with this law that much higher steam-pressures are now adopted than were formerly employed. The factor (*T*₁ - *T*) is commonly called the *temperature range* or *fall*. The varieties of steam-engines are extremely numerous. (For names of various types, with explanations of their characteristic features, see below.) The specific differences between steam-engines of the same type of construction consist chiefly in their valve-gear. (See *valve-gear*, *governor*, *regulator*, *n.*, *slide-valve* (with cut), and *piston-valve*.) Of the total steam-power employed in modern industry on land, that supplied by steam-engines of the horizontal type far exceeds that furnished by steam-engines of all

other types put together. Vertical direct-acting engines of large size are little used, but small engines of this type are much employed. Steam-engines of the rotary type are scarcely used except for some kinds of steam hoisting-engines. Double, triple, and quadruple expansion steam-engines are now largely used in marine engineering. Many double expansion stationary engines are in use, and the economical value of the compound system has been demonstrated both theoretically and practically. — **Agricultural steam-engine**, a portable engine with a boiler, often specially adapted to burn light fuel, as chaff or straw, either by itself or in connection with wood or coal. — **Annular steam-engine**, a steam-engine having an annular piston working in an annular steam-cylinder, and having two diametrically placed piston-rods connected with the cross-head, the latter also being connected by rods to a guide-block working in the hollow cylinder forming the center of the annular steam-cylinder, this guide-block being connected with the crank by a pitman. — **Atmospheric steam-engine**. See *atmospheric engine*, under *atmospheric*.

— **Beam steam-engine**, an engine in which a working-beam connects the connecting-rod with the crank-pitman, and transmits power from one to the other. See *beam-engine*. — **Compound steam-engine**, a steam-engine having two steam-cylinders of unequal size, from the smaller of which the steam, after use, passes into the larger cylinder, and completes its work by expanding against the piston in the latter. — **Concentric steam-engine**. Same as *rotary steam-engine*. — **Condensing steam-engine**, a steam-engine in which the exhaust-steam is condensed, for the purpose of removing the back-pressure of the atmosphere from the exhaust, and also to economize fuel by saving heat otherwise wasted. See *condenser*, and cut under *pump-jet*. — **Cornish steam-engine**, a single-acting condensing steam pumping-engine, first used in the mines of Cornwall. It is also used as a pumping-engine for supplying water to cities. Steam-pressure is not used to raise the water, but to lift a long loaded pump-rod, whose weight in its descent is the power employed to force up the water. The motion is regulated by a kind of hydraulic regulator invented by Smeaton, and called a *cataract*. — **Direct-acting steam-engine**, a steam-engine in which the power of the piston is transmitted to the crank without the intervention of levers, side-beams, or a working-beam. — **Disk steam-engine**, a form of rotary engine in which the steam-pistons act successively against a revolving disk set at an angle to the plane of rotation, thus imparting a gyratory motion to a central shaft upon which the disk is mounted, the end of this shaft being connected with a crank turning in the plane of rotation. — **Double-acting steam-engine**, the ordinary form of steam-engine, in which the steam acts upon both sides of the piston. — **Double-cylinder steam-engine**, a steam-engine having two steam-cylinders acting in combination with each other. See *compound steam-engine*. — **Double expansion steam-engine**. (a) A double-cylinder steam-engine in which steam is used expansively. (b) A compound steam-engine. — **Double steam-engine**, a steam-engine having two cylinders in which the pistons make either simultaneous or alternate strokes and are connected with the same crank-shaft. — **Duplex steam-engine**. Same as *double steam-engine*. — **High-pressure steam-engine**. See *high pressure*, under *pressure*. — **High-speed steam-engine**, a somewhat indefinite name for a reciprocating engine working at a high speed as compared with the much slower speed of engines with the Corliss and other

Double Expansion Marine Steam-engine.
a, high-pressure cylinder; b, low-pressure cylinder; c, induction and eduction-valve for a in position of exhaust from lower end and of induction to upper end of cylinder; d, passage for steam from a to b; e, pistons; f, h, piston rods; i, j, cross-heads; k, l, slipper-guides for cross-heads; m, n, connecting-rods; o, p, cranks; q, crank-shaft; r, shaft which drives feed-pump s and also bilge-pump (not shown) on the opposite side; t, u, worm on main shaft gearing into worm-wheel v on the shaft w, and actuating pump-plungers by crank and pitman connection; x, y, eccentrics; z, z', eccentric rods; t, t', links connected by link-blocks with valve-stems u, u'; v, crank-lever which turns a sequential worm-gear, keyed to the rock-shaft w carrying the rocker-arm x, x', for reversing high-pressure and low-pressure valves respectively; y, bed-plate; z, columns supporting the cylinders; z', tie-rods for stiffening the columns; a', exhaust from low-pressure cylinder to the condenser (not shown); a'', butterfly throttle-valve; b', gear for operating throttle-valve; c', relief-valves.

piston. The name is sometimes given to reciprocating engines which have a fly-wheel and crank-shaft. E. H. Knight.

— **Rotary steam-engine**. Same as *rotary steam-engine*.

— **Semi-portable steam-engine**, a steam-engine which is movable with its foundation-plate, as distinguished from an engine mounted on wheels, and from one resting on a fixed foundation. — **Triple expansion steam-engine**, a steam-engine that expands its steam in three successive stages and in three separate and distinct cylinders, one taking its steam from the boiler, and each of the others taking its steam from the exhaust of the cylinder working at the next higher pressure. This type of marine engine is found at the present time on many of the swiftest steamships, but may be in turn superseded by the quadruple expansion-engine. — **Vertical steam-engine**, a steam-engine whose piston reciprocates vertically.

steamer (stē'mēr), n. [*steam* + *-er*.] One who or that which steams in any sense. Specifically—(a) A steam-box. (b) A person employed in steaming oysters in shucking them for canning. (c) In *calico-printing*, one who steams printed cloth for fixing steam-colors. (d) One who steams wood for bending, etc. (e) A steam-generator or boiler: as, the boiler is an excellent steamer. (f) Especially, a vessel propelled by steam; a steamship. (g) A fire-engine the pumps of which are worked by steam. (h) A vessel in which articles are subjected to the action of steam, as in washing or cooking. See *steam-chest*, 2. (i) In *paper-making*, a vessel in which old paper, fiber, etc., are treated in order to soften them. (2) An apparatus for steaming grain preparatory to grinding. (3) A locomotive for roads. See *road-steamer*.

steamer-cap (stē'mēr-kap), n. Same as *fore-and-aft*, 2.

steamer-duck (stē'mēr-duk), n. A South American duck of the genus *Micropterus* (or *Tachyeres*); a race-horse. See *Micropterus*, 2. This duck becomes when adult incapable of flight, but swims very rapidly, with a movement which has suggested the action of a side-wheel steamboat (whence the name).

steam-excavator (stēm'eks'kā-vā-tōr), n. Same as *navvy*, 3.

steam-fountain (stēm'foun'tān), n. See *fountain*.

steam-gage (stēm'gāj), n. An attachment to a boiler to indicate the pressure of steam; a pressure-gage. There are many forms. One of the older is a bent tube partially filled with mercury, one end of which connects with the boiler, so that the steam raises

Steam-gage (Ashcroft's).
a, hollow bent tube attached to case at a', and receiving condensed water or steam under pressure through the opening at f; g, link connecting end of tube a with short arm of rock-lever c, which has at the upper end a small rack intermeshing with a pinion on the spindle of the index d; e, small coiled spring which acts upon the spindle of the index d in a direction opposite to that of the pinion and pinion; g, dial, on which the figures indicate pressures (in pounds) above the atmospheric pressure.

the mercury according to the amount of pressure. A very common form of gage is that known as Bourdon's, which consists essentially of a flattened metal tube, closed at one end and bent circularly, into which the steam is admitted. As such a tube tends to straighten itself out by the force of the steam, the amount of pressure can easily be ascertained by an attached index-apparatus. — **Electric steam-gage**, an attachment to a steam-boiler for indicating at a distance the pressure of the steam. One form consists of a bent tube filled with mercury, which, as it rises under the pressure, closes a series of electrical circuits after the manner of a thermostat. Another form employs the expansion or movement of an ordinary steam-gage diaphragm as a circuit-closer. The closing of the circuit in each case serves to sound an alarm.

steam-gas (stēm'gās), n. Same as *superheated steam* (which see, under *steam*).

steam-generator (stēm'jen'gē-rā-tōr), n. A steam-boiler.

steam-governor (stēm'guv'ēr-nōr), n. See *governor*, 6.

steam-gun (stēm'gun), n. A gun the projectile force of which is derived from the expansion of steam issuing through the shotted tube.

steam-hammer (stēm'ham'ēr), n. A forging-hammer operated by steam-power. It has assumed several forms, but now consists of a vertical and inverted steam-cylinder with piston and piston-rod (the rod passing through the lower cylinder-head and carrying at the end a mass of metal which forms the hammer), an anvil directly beneath the hammer and cylinder, a supporting framework, and suitable valves for the control of the steam. Steam is used to raise and may also be used to drive down the hammer. By means of the valve-system, steam is admitted below the piston to raise the hammer and to sustain it while the metal to be forged is placed on the anvil. To deliver a blow, the steam is exhausted below the piston, and the hammer is allowed to fall by its own weight. To augment the blow, live steam may be admitted above the piston to assist in driving it downward. To deliver a gentle blow, the exhaust-steam below the piston may be retained to act as a cushion. Blows can be delivered at any point of the stroke, quickly or slowly, lightly or with the full power of the combined weight of the hammer and force of steam-pressure; or the machine may be used as a vise or squeezer. All modern steam-hammers of the type described are modifications of the original Nasmyth steam-hammer illustrated in the cut. Steam-

Steam-hammer (Nasmyth's).

a, anvil; b, frame; c, hammer-head; d, guides; e, piston-rod; f, valve-chest containing valves that control induction of steam to and eduction from the cylinder h; g, steam-pipe; h, crank-lever (moved by the rod f) connected with the valve-stems and moving the valves; i, tripping-mechanism by which the hammer is caused to descend from any part of the upstroke, the adjusting-gear k being manipulated by a workman standing on the platform l.

hammers of the largest class have been made with hammers weighing eighty tons. Another type of steam-hammer consists of two horizontal steam-cylinders placed in line, the hammers meeting over an anvil on which the forging rests.

steam-heat (stēm'hēt), n. 1. In *thermodynamics*, the total heat required to produce steam at any tension from water at 0° C. or 32° F. It is the sum of the sensible heat and the latent heat expressed in thermal units. — 2. Heat imparted by the condensation of steam in coils, pipes, or radiators.

steam-hoist (stēm'hoist), n. A lift or elevator operated by a steam-engine.

steam-house (stēm'hous), n. In oyster-canning, a house or room where oysters are steamed.

steaminess (stē'mi-nēs), n. Steamy or vaporous character or quality; mistiness.

steam-jacket (stēm'jak'et), n. An inclosure adapted for receiving steam, and applying the heat of the steam to a kettle, tank, steam-cylinder, etc., surrounded by such inclosure.

steam-jet (stēm'jet), n. A blast of steam caused to issue from a nozzle.

steam-joint (stēm'joint), n. A joint that is steam-tight.

steam-kettle (stēm'ket'l), n. A vessel heated by steam, and used for various purposes. The

types of valve-gears. In general it may be said that engines of considerable power, making one hundred turns per minute and upward, are high-speed engines. — **Horizontal steam-engine**, a steam-engine in which the piston works horizontally. — **Inclined-cylinder steam-engine**, a form of marine engine having cylinders inclined to the horizontal. — **Inverted-cylinder steam-engine**, a steam-engine in which the cross-head is placed below the cylinder. This construction is much used for marine engines, and to some extent for stationary engines. — **Low-pressure steam-engine**. See *low pressure*, under *pressure*. — **Marine steam-engine**, a steam-engine specially designed for marine propulsion. The best modern types are condensing, short-stroke, double, triple, or quadruple expansion-engines of the inverted-cylinder type. Marine engines for steam-tugs are for the most part single and often non-condensing. See cut in next column. — **Non-condensing steam-engine**, an engine that exhausts its steam without condensation. See *non-condensing*. — **Oscillating steam-engine**, a steam-engine whose cylinder oscillates on trunnions and has its piston-rod directly connected with the crank. Double engines of this type have been considerably used for marine propulsion, and some are still employed. — **Overhead steam-engine**. See *overhead*. — **Quadruple expansion steam-engine**, a steam-engine which, taking its steam at high pressure, expands it in four different operations successively, and in four distinct and separate steam-cylinders. The pistons of the cylinders are connected by piston-rods, cross-heads, and connecting-rods with cranks attached to a common shaft, to which rotary motion is imparted by the coacting pistons. — **Reciprocating steam-engine**, a steam-engine in which the power of steam is applied to a reciprocating piston. — **Revolving-cylinder steam-engine**, a steam-engine of which the cylinder is so mounted that it is caused to rotate by the reciprocation of the piston. Compare *rotary steam-engine*. — **Rotary steam-engine**, a steam-engine in which the piston rotates in the cylinder, or the cylinder upon the

steam for heating is usually applied by induction to a steam-jacket surrounding the sides and inclosing the bottom of the kettle.

steam-kitchen (stēm'kich'en), *n.* An apparatus for cooking by steam.

steam-launch (stēm'lānch), *n.* See *launch*.

steam-motor (stēm'mō'tor), *n.* A steam-engine.

steam-navigation (stēm'nav-i-gā'shon), *n.* The art of applying the power of steam to the propulsion of boats and vessels; the art of navigating steam-vessels.

steam-navvy (stēm'nav'i), *n.* A digging-machine or excavator actuated by steam.

steam-organ (stēm'ōr'gan), *n.* Same as *callope*, 2.

steam-oven (stēm'uv'n), *n.* An oven heated by steam at high pressure.

steam-packet (stēm'pak'et), *n.* A packet propelled by steam. Compare *packet*, *n.*, 2.

steam-pan (stēm'pan), *n.* A vessel with a double bottom forming a steam-chamber. See *vacuum-pan*.

steam-pipe (stēm'pip), *n.* Any pipe in which steam is conveyed. Specifically—(a) A pipe which leads from a boiler to an engine, pan, tank, etc., or from the boiler to a condenser or to the open air. (b) In a steam-heating or drying apparatus or system, a name given to any one of the steam-supply pipes, in contradistinction to the corresponding return-pipe through which water of condensation is returned to the boiler.

steam-plow (stēm'plou), *n.* A gang-plow designed to be drawn by a wire rope, and operated by steam-power. Such a plow has usually eight shares arranged in a frame, four pointing in one direction and four in the other. The frame is balanced on a pair of wheels in the center, and forms an angle in the middle, so that when one half the plows are in use the others are raised above the ground. Steam-plows are used with either one or two engines. If with two engines, the plow is drawn forward and backward between them, each engine being advanced the width of the furrows after each passage of the plow. If one engine only is used, snatch-blocks and movable anchors are employed to hold the rope, the anchors being automatically advanced after each passage of the plow. Traction-engines also have been used to drag plows. See *anchor*, *porter*, and *plow*.

steam-port (stēm'pōrt), *n.* 1. In a slide-valve steam-engine, the name given to each of two oblong passages from the steam-chest to the inside of the cylinder, which afford passage to the steam to and from the cylinder, and act alternately as an induction-port and an eduction-port. See cut under *slide-valve*.—2. A passage for steam into or out of any inclosure.

steam-power (stēm'pou'ēr), *n.* The power of steam applied to move machinery or produce any other result.

steam-press (stēm'pres), *n.* A press actuated by steam-power acting directly or indirectly; specifically, a printing-press worked by steam.

steam-printing (stēm'prin'ting), *n.* Printing done by machinery moved by steam, as opposed to printing by hand-labor on hand-presses.

steam-propeller (stēm'prō-pel'ēr), *n.* Same as *screw propeller* (which see, under *screw*).

steam-pump (stēm'pump), *n.* See *pump* and *vacuum-pump*.

steam-radiator (stēm'rā'di-ā-tōr), *n.* A nest or collection of iron pipes in ranks or coils, through which steam is passed to heat a room, etc. See cuts under *radiator*.

steam-ram (stēm'ram), *n.* See *ram*, 2.

steam-regulator (stēm'reg'ū-lā-tōr), *n.* See *regulator*, 2.

steam-room (stēm'rōm), *n.* In a steam-engine, etc., the space which is occupied by steam.

steamship (stēm'ship), *n.* A ship propelled by steam.

steam-space (stēm'spās), *n.* A space occupied, or designed to be occupied, by steam only; particularly, in a steam-boiler, the space allowed above the water-line for holding a quantity of steam.

steam-table (stēm'tā'bl), *n.* 1. A bench or table fitted with shallow steam-tight tanks; used in restaurants, etc., to keep cooked dishes warm.—2. A tabular arrangement of data relating to steam-pressures, temperatures, and quantities of heat.

steam-tank (stēm'tangk), *n.* A chamber or inclosed vessel in which materials of any kind are treated either by direct contact with steam or with steam-heat by means of pipes coiled in the tank or a steam-jacket. Such tanks are used in many industries, and are made in many forms, as for steaming wood, paper-stock, lard, etc. See *rendering-tank*.

steam-tight (stēm'tit), *a.* Capable of resisting the passage of steam, as a joint in a steam-pipe.

steam-toe (stēm'tō), *n.* In a steam-engine, a projection on a lifting-rod, which is raised by it through the action of a cam, tappet, or wiper.

steam-trap (stēm'trap), *n.* A contrivance for permitting the passage of water of condensation out of pipes, radiators, steam-engine cylinders, etc., while preventing that of steam.

steam-tug (stēm'tug), *n.* A steamer used for towing ships, boats, rafts, fishing-nets, oyster-dredges, etc. Such vessels are furnished with engines very powerful in proportion to the size of their hulls, and usually carry only sufficient coal for short trips.—**Steam-tug heart-murmur**, the combination of an aortic regurgitant with an aortic obstructive murmur.

steam-valve (stēm'valv), *n.* A valve which controls the opening of a steam-pipe or steam-port.

steam-vessel (stēm'ves'el), *n.* Same as *steam-ship*.

steam-wagon (stēm'wag'on), *n.* Same as *steam-carriage*.

steam-wheel (stēm'hwel), *n.* A rotary steam-engine. See *steam-engine*.

steam-whistle (stēm'hwis'l), *n.* A sounding device connected with the boiler of a steam-

Fig. 1 is the simplest form of steam-whistle, with adjustable lever *v*, which acts on the valve *x*, its motion being limited by a stop-pin at *w*. Steam passes through a pipe connected at *t* when the valve *x* is opened. The steam issues through openings in the base *y*, and, passing over the lower edge of the bell *u*, causes a powerful vibration producing the sound, the pitch of which depends upon the length of the bell. Fig. 2 is a chime-whistle consisting of three bells, *t*, *f*, *k*, tuned to emit the common chord or some inversion of it. It receives steam at *l*, and by branches *m*, *n*, together with *l*, distributes it to the steam bases *y*. Fig. 3 is a piston-whistle. Its base *y* and bell *u* operate as described for the other whistles, the steam entering at *p*. The tone of the whistle is changed by moving up and down the piston *s* by means of the stem *q*.

engine, either stationary, locomotive, or marine, for the purpose of announcing hours of work, signaling, etc.

steam-winch (stēm'winch), *n.* A form of winch or hoisting-apparatus in which rotatory motion is imparted to the winding axle from the piston-rod of a steam-engine, directly, or indirectly by means of bevel-gearing, the direct action giving most rapidly, the indirect most power.

steam-worm (stēm'wērm), *n.* A spiral steam-coil. Such coils are used in tanks for heating liquids, as tan-liquor in tanneries, water in laundries, dye-works, etc., the liquid being placed in the tank enveloping the coil, while steam is passed through the latter. They are also used in some forms of calorimeter.

steamy (stēm'mi), *a.* [*steam* + *-y*.] Consisting of or abounding in steam; resembling steam; vaporous; misty.

The bubbling and loud hissing urn
Throws up a steamy column. Cowper, Task, iv. 39.

I found an evening hour in the steamy heat of the Ham equal to half a dozen afternoons.

R. F. Burton, El-Medina, p. 272.

steam-yacht (stēm'yot), *n.* A yacht propelled by steam, or by steam and sails.

steal. See *steal*, *steal*, *steal*.

stealing, *n.* See *stealing*.

steapsin (stēp'sin), *n.* A ferment of the pancreatic secretion which to some extent resolves fats into fatty acids and glycerin.

stearate (stē'a-rāt), *n.* [*stearic* + *-ate*.] A salt of stearic acid. The neutral stearates of the alkalis are soaps.

stearic (stē-ar'ik), *a.* [Irreg. for *stearic*, < Gr. *stear* (*stear*), stiff fat, tallow, suet; see *stearite*.] Of or pertaining to suet or fat; obtained from stearin.—**Stearic acid**, $C_{18}H_{35}O_2$, a monobasic acid, forming brilliant white sooty crystals. It is inodorous, tasteless, insoluble in water, but soluble in alcohol and ether. It burns like wax, and is used for making candles. Its compounds with the alkalis, earths, and metallic oxides are called *stearates*. Stearic acid exists in combination with glycerin as stearin, in beef and mutton-fat, and in several vegetable fats, such as the butter of cacao. It is obtained from stearin by saponification and decomposition by an acid of the soap formed, and also from mutton-suet by a similar process.

stearin (stē'a-rin), *n.* [*stearic* + *-in*.] 1. An ether or glyceride, $C_{18}H_{35}O_2(C_{18}H_{35}O_2)_3$,

formed by the combination of stearic acid and glycerin. When crystallized it forms white pearly scales, soft to the touch but not greasy, and odorless and tasteless when pure. It is insoluble in water, but soluble in hot alcohol and ether. When treated with superheated steam it is separated into stearic acid and glycerin, and when boiled with alkalis is saponified—that is, the stearic acid combines with the alkali, forming soap, and glycerin is separated. When melted it resembles wax. There are three stearin, which may all be regarded as derivatives of glycerin in which one, two, or three OH groups are replaced by the radical *stearyl*. Natural stearin is the tristearyl derivative of glycerin. It is the chief ingredient in suet, tallow, and the harder fats, and may be prepared by repeated solution in ether and crystallization. Candle-pitch, chandlers' gum, or residuary gum, used in the manufacture of roofing-cements, is a by-product of this manufacture.

2. A popular name for stearic acid as used in making candles.—**Lard-stearin**, the residue left after the expression of the oil from lard.

stearinery (stē'a-rin-ēr-i), *n.* [*stearin* + *-ery*.] The process of making stearin from animal or vegetable fats; the manufacture of stearin or stearin products.

stearone (stē'a-rōn), *n.* [*stearic* + *-one*.] A substance ($C_{35}H_{70}O$) obtained by the partial decomposition of stearic acid. It is a volatile liquid, and seems to be stearic acid deprived of two equivalents of carbonic acid.

stearoptene (stē-a-rōp'tēn), *n.* [Irreg. < Gr. *stear*, stiff fat, tallow, suet, + *πρῶτος*, winged (volatile).] The solid crystalline substance separated from any volatile oil on long standing or at low temperatures. See *elaeoptene*.

stearyl (stē'a-ril), *n.* [*stearic* + *-yl*.] The radical of stearic acid ($C_{18}H_{35}O$).

stearin (stē'a-rin), *n.* Same as *stearin*.

stearinum (stē-a-ti'nūm), *n.* [NL., < Gr. *stearinon*, neut. of *stearinos*, of or pertaining to tallow or suet, < *stear* (*stear*), stiff fat, tallow, suet; see *stearite*.] A name given to certain pharmaceutical preparations similar to cerates, but containing considerable tallow.—**Stearinum iodoformi**, stearinum composed of mutton-tallow 18 parts, expressed oil of nutmeg 2 parts, powdered iodoform 1 part.

stearite (stē'a-tit), *n.* [= F. *stearite*, < L. *stearitis*, < Gr. *stearitis*, used only as equiv. to *stearinos*, *stearinos*, of dough made of flour of spelt, < *stear* (*stear*), also *stear*, also contr. *stear* (with rare gen. *stearos*, also *stear*), stiff fat, tallow, suet, also dough made of flour of spelt, prob. < *istaraui* (√ *stara*), cause to stand, fix; see *stand*.] Soapstone: an impure massive variety of talc. Also called *polstone*.

stearitic (stē-a-tit'ik), *a.* [*stearite* + *-ic*.] Of or pertaining to stearite or soapstone; made of stearite.

stearogenous (stē-a-toj'e-nus), *a.* [*Gr. stear* (*stear*), fat, + *-γενής*, producing; see *-genous*.] Tending to produce steatosis (see *steatosis*, 2); as, *stearogenous* processes.

steatoma (stē-a-tō'mā), *n.*; pl. *steatomata* (-mā-tā). [*Gr. steatoma*, a kind of fatty tumor, < *stear* (*stear*), fat, tallow, suet.] A lipoma.

steatomatous (stē-a-tōm'a-tus), *a.* [*Gr. steatoma* (-tōm'a-tus).] Of the nature of a steatoma.

steatopyga (stē'a-tō-pi-gā), *n.* [NL., < Gr. *stear* (*stear*), fat, tallow, suet, + *πυγή*, the rump.] An accumulation of fat on the buttocks of certain Africans, especially Hottentot women.

steatopygous (stē'a-tō-pi-gus), *a.* [*NL. steatopyga* + *-ous*.] Affected with or characterized by steatopyga; having enormously fat buttocks. R. F. Burton, El-Medina, p. 60.

steatopygy (stē'a-tō-pi-jī), *n.* [*Gr. steatopyga* + *-y*.] The development of steatopyga, or the state of being steatopygous. *Jour. Anthropol. Inst.*, XVIII. 17.

Steatornis (stē-a-tōr'nis), *n.* [NL. (Humboldt, 1817), < Gr. *stear* (*stear*), fat, tallow, suet, + *ὄρνις*, a bird.] The representative genus of *Steatornithidae*. The only species is *S. caripensis*, the guacharo or oil-bird of South America, found from Venezuela to Peru, and also in Trinidad, of frugivorous and nocturnal habits. The bird resembles and is usually classed with the goatsuckers. It is so fat that the natives prepare from it a kind of oil used for butter. See cut under *guacharo*.

steatornithic (stē'a-tōr-nith'ik), *a.* Having the characters of *Steatornis*.

Steatornithidae (stē'a-tōr-nith'i-dē), *n.* pl. [NL., < *Steatornis* (-ornith-) + *-idae*.] A family of picarian birds, represented by the genus *Steatornis*. It is related to the *Caprimulgidae*, and is often associated with them, but differs in many important characters, and in some respects approaches the owls. The sternum has a single notch on each side behind. The palate is desmognathous, with united maxillopalatines and peculiarly shaped palatines. There are basipterygoid processes, and the rostrum of the skull is compressed. The second pectoral muscle is small, and the femoro-caudal is wanting. The syrinx is entirely bronchial, and hence paired. The oil-gland is very large. The plumage is not after-shafted, and the rectrices are ten. There is only one genus and one species. See cut under *guacharo*.

steatornithine (sté-a-tór-ni-thin), *a.* [*< Steatornis (-ornith-) + -ine*]. Steatornithic; of or pertaining to the *Steatornithidae*.

steatorrhæa, steatorrhœa (sté-a-tō-rê-ä), *n.* [*N.L., < Gr. steap (stear-), fat, suet, tallow, + rha, a flow, < rhoi, flow*]. 1. Seborrhæa.—2. The passage of fatty stools.

steatosis (sté-a-tó-sis), *n.* [*N.L., < Gr. steap (stear-), fat, tallow, suet, + -osis*]. 1. Fatty degeneration or infiltration.—2. Any disease of the sebaceous glands. Also called *steatopathia*.

Steatodon (sté-a-tō-zō-on), *n.* Same as *Demodex*.

stedt, n. An obsolete form of *stead*.

steadfast, steadfastly, etc. See *steadfast*, etc.

stead (stéd), *n.* [*< M.E. stede, < A.S. stēda, a stud-horse, stallion, war-horse (cf. gestēd-hors, stud-horse; Icel. stēdda, a mare; Sw. sto, a mare), < stōd, a stud: see stud*]. Cf. *stot*¹, *stote*, *stoat*¹.] A horse: now chiefly poetical.

steek (stēk), *v.* [Also *steik*; obs. or dial. (Sc.) form of *stick*¹.] 1. *trans.* 1. To pierce with a sharp-pointed instrument; stitch or sew with a needle.—2. To close or shut: as, to *steek* one's eyes. Burns. [Obsolete or Scotch in both uses.]

But doors were *steek'd*, and windows bar'd,

And none wad let him in.

Willie and May Margaret (Child's Ballads, II. 172).

II. *intrans.* To close; shut.

It es callede cloyster for it cloyes and *steekys*, and waresly sall be lokked.

Religious Pieces (E. E. T. S.), p. 50.

steek (stēk), *n.* [Also *steik*; a dial. (Sc.) form of *stitch*.] The act of stitching with a needle; a stitch. [Scotch.]

steel¹ (stēl), *n.* and *a.* [*< ME. steel, stēl, stēl, stēl, < A.S. *stēle, stēle, earliest forms stēli, stēli = MD. stal, D. stal = MLG. stāl, LG. stal = OHG. stahh, stāl, MHG. stahel, stachel, stāl, G. stahl = Icel. stāl = Sw. stål = Dan. stal = Goth. *stahla = OPruss. stakla, steel; root unknown. The words *gold* and *silver* also have no L. or Gr. or other cognate terms outside of Teut. and Slavic*]. I. *n.* 1. A modified form of iron, not occurring in nature, but known and manufactured from very early times, and at the present time of the highest importance in its various applications to the wants of man. For certain purposes, and especially for the manufacture of tools and weapons, there is no metal or metallic alloy which could take the place of steel. The most essential features of steel as compared with iron are elasticity and hardness, and these qualities can be varied in amount to a very extraordinary degree, in the same piece of steel, by slight changes in the manipulation. Steel can be hardened so as to cut glass, by rapid cooling after being strongly heated, and it can be tempered, by reheating after hardening, so as permanently to take the precise degree of hardness best adapted to the use to which it is to be applied. (See *temper*.) Steel has been known from very early times, but where and how first manufactured is not known. That it has long been in use in India, and that it is still manufactured in that country by methods precisely similar to those in use long ago are well-known facts. (See *wootz*.) It is thought by some to have been known to the pyramid-builders; but this has not yet been demonstrated, and the same is true of the ancient Semites. The words translated 'steel' in the authorized version of the Old Testament signify 'copper' or 'bronze', and are usually rendered 'brass', 'brazen'. That steel was clearly recognized as something distinct from iron by the author or authors of the Homeric poems cannot be proved. The earliest known and simplest method of reducing iron from its ore—the so-called 'direct process'—is capable also of furnishing steel, although a sufficiently homogeneous product cannot be easily obtained by this method. This would explain how steel became known at an early period, and why it was so long before it became an article of general use, with well-established methods of manufacture. Steel is a form of iron in which the amount of carbon is intermediate between that in wrought- and that in cast-iron, and this carbon does not exist in the steel in the form of graphite, but is either combined with or dissolved in it; but the subject of the relation of carbon to iron is one of difficulty, and is now undergoing investigation at the hands of various skilled metallurgical chemists. Other ingredients besides carbon are also present in steel—namely, silicon, manganese, sulphur, and phosphorus. Of these the two first mentioned are probably never entirely wanting, and they are not especially undesirable or injurious, as is the case with the two others, of which only traces can be permitted in the best quality of steel. They are all, however, different from carbon, which latter is regarded as an essential element of steel, while the others may be looked upon as being more or less of the nature of impurities. The quality of steel varies with the amount of carbon present, and

the effect of this latter element varies with the amount of impurity (silicon, etc.) present in the steel. The larger the amount of impurity, the larger is the quantity of carbon required to give to the iron the character of steel. In the case of the best bar-iron, a little over 0.3 per cent. of carbon is sufficient to give it a steely character; from 0.5 to 0.65 per cent. of carbon, according to the purity of the iron, gives a steel which can be hardened so as to strike fire with flint. Iron containing from 1 to 1.5 per cent. of carbon gives steel which, after tempering, combines the maximum hardness with the maximum tenacity. One per cent. of carbon gives, on the whole, the most generally useful steel. With more than 1.5 per cent. of carbon the tenacity and weldability of the steel are diminished, although the hardness may be increased. With more than 1.74 per cent. of carbon the steel ceases to be weldable, and is with difficulty drawn out under the hammer; and from 1.8 to 2.0 per cent. is usually considered as the limit between steel and cast-iron, the steel with that amount breaking when hammered after softening by heat. Since steel is intermediate between wrought- and cast-iron in the amount of carbon which it contains, it is evident that it might be made either by carburizing the former or decarburizing the latter. The method of carburizing, or *cementation* as it is generally called, is one of the oldest, perhaps the most ancient, as, although differing greatly in the details, in the essentials it is the same as the process by which the Indian wootz is manufactured. The cementation process was described in detail by Réaumur in a work published in 1722. By this method blister-steel is obtained, and this is further worked up into spring, shear, and double-shear steel by one or more processes of forging, welding, and hammering or rolling, the object of this being to give the metal greater homogeneity. A great addition to the value of this process was the invention by Huntsman, in 1740, of cast-steel, the product of the fusion in crucibles, under suitable manipulation, of blister steel, which process is still in use as first arranged almost without change. By this method, when iron of a sufficiently high grade is used, the finest quality of steel is produced, and it is only steel manufactured in this way which can be used for the best tools, weapons, and cutting instruments of all kinds. The methods of producing steel by the decarburization of pig-iron are numerous and varied. The Styrian method of decarburization in the open-hearth finery, whereby a material called *raw steel* is produced, was once of very considerable importance, but is now little used. The method of decarburizing pig-iron by puddling, which is similar in principle to the ordinary puddling process used for converting pig-into wrought-iron, is also somewhat extensively employed, especially on the continent of Europe, the product being called *puddled steel*, this being drawn into bars, which are cut up and remelted, as is done with blister-steel in manufacturing cast-steel. There are various methods for producing steel by fusing pig-iron with iron ores, or with wrought-iron, or with both together. The Uchatz process belongs to this class of processes, but is of comparatively small importance; but the processes known as the 'Siemens,' the 'Martin,' and the 'Siemens-Martin' are extensively employed. The steel made by any of these processes is generally called *open-hearth steel*, as the work of decarburizing the pig is done in the open-hearth regenerative furnace. The difference between these processes is simply that in the first-named the pig-iron is treated with certain iron ores without the addition of wrought-iron (scrap-iron); in the second the pig is melted with scrap-iron; and in the third both scrap and ore are used together: hence the names by which the first two of these modifications of what is essentially the same process are known—*pig-and-ore*, *pig-and-scrap*—the third, or the 'Siemens-Martin,' being the most commonly employed. By far the most important of all steel-producing processes, if only the amount of the metal produced is considered, is the 'pneumatic' or 'Bessemer' process, invented by Sir Henry Bessemer about 1856, which consists in blowing air through molten pig-iron in a 'converter,' or vessel of iron lined with a refractory material—the oxidation of the carbon and silicon which the pig contains, together with a small part of the iron itself, furnishing sufficient heat to keep the material in a fluid state while the operation of decarburization goes on. After complete decarburization of the iron, a certain amount of carbon is restored to the metal by the introduction of spiegeleisen or ferromanganese; this extremely important addition to the Bessemer process, without which it would hardly have been a success, was contributed by R. F. Mushet. The Bessemer process, as conducted in a converter lined with the ordinary silicious or 'acid' material, is suited only for working iron which is practically free from phosphorus and sulphur, or such as is made from ore like that of Lake Superior, from which all, or nearly all, the Bessemer steel made in the United States is manufactured. By the so-called 'basic' or 'Thomas-Gilchrist' process, the converter having a basic (calcined dolomite) lining, iron containing a considerable amount of phosphorus is treated, and a fair quality of steel produced, the phosphorus passing into the slag during the operation, as is the case in puddling. The metal produced by the Bessemer process is generally called *Bessemer steel*, but some consider it more correct to call it *ingot-iron*. It can be produced of various grades by varying the amount of carbon which it contains, and is a material of the highest value for structural purposes—as being cheaper, and having more durability, than wrought-iron made by puddling—although of no value for the purposes for which the older higher-class steels are employed. Its principal use is for rails, and during the past few years from seventy to eighty per cent. of the Bessemer steel made in the United States has been used for that purpose.

A flying splendour out of brass and steel.

Tennyson, Princess, vi.

A single span of the Forth Bridge is nearly as long as two Eiffel Towers turned horizontally and tied together in the middle, and the whole forms a complicated steel structure weighing 15,000 tons, erected without the possibility of any intermediate support, the lace-like fabric of the bridge soaring as high as the top of St. Paul's. The steel of which

the compression members of the structure are composed contains $\frac{2}{3}$ of carbon and $\frac{1}{3}$ of manganese. The parts subjected to extension do not contain more than $\frac{1}{10}$ of carbon.

W. C. Roberts-Austen, Nature, XLII. 36.

2. Something made of steel. Specifically—(a) A cutting or piercing weapon; especially, a sword. Compare *cold steel*, below.

Shall I Sir Pandarus of Troy become,

And by my side wear *steel*?

Shak., M. W. of W., i. 3. 83.

(b) A piece of steel for striking sparks from flint to ignite tinder or match. (c) A mirror.

We spake of armour.

She straight replies, Send in your steel combs, with
The steel you see your faces in.

Cartwright's Lady Errant (1651). (Nares.)

(d) A cylindrical or slightly tapering rod of steel, sometimes having fine parallel longitudinal lines, used for sharpening carving-knives, etc. (e) A strip of steel used to stiffen a corset, or to expand a woman's skirt.—**Beard steel**, steel made by adding hydrogen gas to the air-blast in the Bessemer process, to remove arsenic, sulphur, and phosphorus.—**Bessemer steel**, steel made by the Bessemer process. See *def. 1*.—**Blistered steel**. Same as *blister-steel*.—**Carbon steel**, ordinary steel; not 'special steel,' but steel in which carbon is clearly the element which gives the iron those peculiar properties which justify its designation by the term *steel*.—**Chrome steel**, steel alloyed with a small amount of chromium. Various alloys called by the name of *chrome* or *chromium steel* have been introduced, but none have come into general use. They are said to be hard and malleable, and to possess great strength, but to oxidize on exposure more readily than ordinary steel.—**Cold steel**, a cutting- and thrusting-weapon; a weapon or weapons for close quarters, as distinguished from firearms.—**Compressed steel**, steel which is made more dense, tenacious, and free from blow-holes by being condensed by pressure while in a fluid state. This pressure is produced in various ways, as by hydraulic machinery, by steam, by centrifugal force, by the use of liquefied carbonic acid, etc.—**Crinoline-steels**. See *crinoline*.—**Crucible steel**. Same as *cast-steel*.—**Damask steel**. See *damask*.—**Garb of steel**. See *garb*.—**German steel**, steel from Germany. The phrase has no definite meaning other than geographical. It formerly meant steel made in the finery from spathic ore.—**Homogeneous steel**. Same as *cast-steel*.—**Indian steel**. Same as *wootz*.—**Manganese steel**, a variety of special steel made by the addition of manganese, which element is present in various manganese steels which have been analyzed in quantity ranging from less than 1 per cent. to over 21 per cent. The qualities vary greatly with its composition.—**Mask of steel**. See *mask*.—**Mild steel**, steel containing a small amount of carbon (Bessemer steel is frequently so designated); a metal which has some of the qualities of steel, but does not admit of being tempered, or only imperfectly so. See *def. 1*.—**Native steel**, the name sometimes given to small masses or buttons of steel, steely iron, or iron which has occasionally been formed by the ignition of coal-seams adjacent to deposits of iron ore.—**Nickel steel**, a variety of special steel recently introduced, and thought by some to surpass the best carbon steel in certain important respects. It has not yet been sufficiently tried to justify a decided statement as to its value. The high price of nickel, and the small likelihood of any considerable reduction in the price of this metal, would seem to bear heavily against the chances of the general introduction of an alloy of which it should form any considerable part.—**Run steel**, a trade-mark name (in England) of various small articles, such as bridle-bits and stirrups, made of cast-iron which has been to a certain extent rendered malleable by partial decarburization by cementation. The method is one which has been long known, but which has not come into extensive use till comparatively modern times. Also called *malleable cast-iron*.—**Silicon steel**, a variety of special steel which has been experimented with to some extent, but which has not yet become of importance.—**Special steel**, steel in which the element which gives the iron its peculiar qualities, or what distinguishes it from iron, is not carbon, but some other substance. The principal special steels are chrome, manganese, nickel, silicon, titanium, and tungsten steels, all of which have been much experimented with in recent years. While some authorities appear to maintain that the carbon in special steels is so overpowered by the special element used that its effects are entirely neutralized, others believe that some carbon is absolutely necessary that iron may become converted into what can properly be called steel.—**Styrian special steel**, steel from Styria; steel made by the Styrian process, which closely resembles the Styrian process of making malleable iron in the finery.—**Tungsten steel**, a variety of special steel, now largely employed in the manufacture of the harder grades of crucible steel. 'Mushet's,' 'special,' 'imperial,' and 'rescent-hardened' are brands of tungsten steel now sold in the American markets. Steel may contain a much larger proportion of tungsten than it can of carbon without losing its power of being forged. In a table of thirteen analyses of tungsten steel given by H. M. Howe in his 'Metallurgy of Steel' (1891), the tungsten ranges from 1.94 to 11.03 per cent.; the carbon, from 0.38 to 2.15; the manganese, from a trace to 2.66; the silicon, from .05 to .82. Tungsten steel is exceedingly hard and very brittle; it is used chiefly for the tools of lathes and planers designed for heavy work.

II. *a.* 1. Made of steel: as, a *steel plate* or buckle.

The average strength (of the Bessemer steel used in building the Forth Bridge) is one-half greater than that of the best wrought iron, and the ductility of the steel plates is fully three times that of corresponding iron plates.

Sir John Fowler and Benjamin Baker, Nine-

teenth Century, July, 1889, p. 39.

2. Hard as steel; inflexible; unyielding.

Prison my heart in thy *steel* bosom's ward.

Shak., Sonnets, cxxiii.

Smart as a steel trap. See *smart*¹.—**Steel bonnet**, a head-piece made of a Scotch bonnet lined with steel, as with a skeleton cap. Compare *secret*, 9.—**Steel bronze**.

See *bronzes*, 1.—**Steel hat**. Same as *chapel-de-fer*.—**Steel rail**. See *rail*.—**Steel saddle**, the saddle of the man-at-arms in the middle ages, having the bow and sometimes the pommel guarded with steel.—**Steel toys**, among manufacturers, small articles, such as corkscrews, buckles, button-hooks, and boot-hooks, when made of polished steel.—**Steel trap**. See *trap*.

steel¹ (stēl), *v. t.* [*ME. stelen, stilen*, < *AS. *stylan* (= *D. stalen* = *MLG. stalen, stelen* = *G. stählen* = *Icel. stæla*), make hard like steel; from the noun.] 1. To fit with steel, as by pointing, edging, overlaying, electroplating, or the like.

Believe her not, her glass diffuses
False portraiture; . . .
Her crystal 's falsely steel'd; it scatters
Deceitful beams; believe her not, she flatters.
Quarles, *Emblems*, ii. 6.

Give me my steel'd coat. I'll fight for France.
Away with these disgraceful walling robes!
Shak., 1 Hen. VI., i. 1. 85.

2. To iron (clothes). *Hallivell*. [*Prov. Eng.*]
—3. To make hard as steel; render strong, rigid, inflexible, determined, etc.; make firm or stubborn.

Thy resolution would steel a coward.
Beau. and Fl., *Little French Lawyer*, i. 2.
Ximenes's heart had been steel'd by too stern a discipline to be moved by the fascinations of pleasure.
Prescott, *Ferd. and Isa.*, ii. 5.

4. To cause to resemble steel in smoothness or polish.

Lo! these waters, steel'd
By breezeless air to smoothest polish.
Wordsworth, *Sonnets Dedicated to Liberty*, ii. 5.

steel², *n.* An obsolete form of *steel*¹, *stale*².
steel-blue (stēl'blū), *a. and n.* I. *a.* Of a lustrous dark-bluish color, resembling steel tempered blue.

II. *n.* A lustrous dark-bluish color; a darker shade than Berlin blue and less chromatic, but nearly of the same hue. See *blue*.

steel-bow (stēl'bow), *a.* [Origin and distinctive sense obscure.] See the phrase.—**Steel-bow goods**, in *Scots law*, corn, cattle, straw, and implements of husbandry, delivered by the landlord to his tenant, by means of which the tenant is enabled to stock and labor the farm, and in consideration of which he becomes bound to return articles equal in quantity and quality at the expiration of the lease.

steelboy (stēl'boy), *n.* [Prob. < *steel*¹ in the phrase "hearts of steel," used by the insurgents in a remonstrance entitled "Petition of the Hearts of Steel" (Record Office, London).] A member of a band of insurgents in Ulster, Ireland, who committed various agrarian and other outrages about 1772-4. *Lecky*, *Eng. in 18th Cent.*, xvi.

steel-clad (stēl'klad), *a.* Clothed in armor of steel.

steelent, *a.* [*ME. stelen*, < *AS. stylan* (= *D. stalen, stelen*), < *stȳle*, < *stēle*, *steel*: see *steel*¹ and *-en*².] Of steel; made of steel.

The *stylene* brand. *Layamon*, l. 7634.

steel-engraving (stēl'en-grā'ving), *n.* 1. The art of engraving on steel plates for the purpose of producing prints or impressions in ink on paper and other substances.—2. The design engraved on the steel plate.—3. An impression or print taken from the engraved steel plate.

steel-finch (stēl'finch), *n.* A book-name of the small finch-like birds of the genus *Hypochæra*.

steelhead (stēl'hēd), *n.* 1. The ruddy duck, *Erismatura rubida*: so called from the steel-blue of the head, or perhaps for the same reason that it is called *hardhead*, *hickory-head*, and *toughhead*. See cut under *Erismatura*. [*Maryland*.]—2. The rainbow-trout, *Salmo irideus*. See cut under *rainbow-trout*. [*Local, U. S.*]

steel-head (stēl'hēd), *a.* Tipped with steel. *Spenser*, *F. Q.*, III. ix. 16.

steelification (stēl'i-fi-kā'shon), *n.* The process of converting iron into steel. *Jour. Franklin Inst.*, CXXV. 304.

steelify (stēl'i-fi), *v. t.*; pret. and pp. *steelified*, pp. *steelifying*. [*< steel*¹ + *-ify*.] To convert into steel. *Jour. Franklin Inst.*, CXXV. 304.

steeliness (stēl'i-nes), *n.* The state or character of being steely.

steeling (stēl'ing), *n.* [*Verbal n. of steel*¹, *v.*] 1. The process of welding a piece of steel on that part of a cutting-instrument which is to receive the edge.—2. The process of depositing a film of iron on engraved copperplates. The plates are placed in a bath of sulphate of iron and ammonium chloride, a plate of iron submerged in the solution being connected to the copper pole of the battery, and the engraved copperplate to the zinc pole. From such steeled plates from 5,000 to 15,000 impressions can be taken. The same method has been successfully applied to stereotype plates.

steelmaster (stēl'mās'tēr), *n.* A manufacturer of steel. *The Engineer*, LXIX. 343.

steel-mill (stēl'mil), *n.* A contrivance for giving light, in use previous to the invention of the safety-lamp, in English coal-mines infested with fire-damp. It consisted of a disk of steel which was made to revolve rapidly, a flint being held against it, from which a shower of sparks was given off and a feeble light furnished. This method of obtaining light was for a time quite popular.

steel-ore (stēl'ōr), *n.* A name given to various iron ores, and especially to spathic iron (siderite), because that ore was supposed to be particularly well adapted for making steel. Much of the so-called German steel was in fact formerly made from that ore.

steel-press (stēl'pres), *n.* A special form of press designed for compressing molten steel to form sound and dense castings.

steel-saw (stēl'sā), *n.* A disk of soft iron, revolving with great rapidity, used for cutting cold steel.

steelware (stēl'wār), *n.* Articles, collectively, made of steel. *The Engineer*, LXVIII. 642.

steelwork (stēl'wērk), *n.* Steel articles or objects, or such parts of any work as are made of steel. *The Engineer*, LXIX. 191.

steel-worker (stēl'wēr'kēr), *n.* One who works in steel.

steel-works (stēl'wērks), *n. pl. or sing.* A furnace or other establishment where iron is converted into steel. *The Engineer*, LXV. 38.

steely (stēl'i), *a.* [*< steel*¹ + *-y*.] 1. Consisting of steel; made of steel.

Full ill (we know, & every man may see)
A steely helm & Cardinals cap agree.
Times' Whistle (E. E. T. S.), p. 120.

A steely hammer crushes 'em to pieces.
Ford, *Perkin Warbeck*, i. 1.

2. Resembling steel in some of its essential properties; hard; firm; stubborn.

When he can beat it [Truth] off with most steely prowess, he thinks himself the bravest man; when in truth it is nothing but exsanguine feeble exility of spirit.
N. Ward, *Simple Cocker*, p. 74.

That steely heart [of Judas] yet relents not.
Bp. Hall, *Contemplations*, iv. 27.

3. Resembling steel in color, metallic luster, or general appearance; having more or less imperfectly the qualities or composition of steel: as, *steely iron*.

The beating of the steely sea.
W. Morris, *Earthly Paradise*, Apology.

Steely iron, a mixture of iron and steel; imperfect steel. *Blaxam and Huntington*, *Metals*, p. 109.

Steelyard¹ (stēl'yārd, colloq. stil'yārd), *n.* [Early mod. E. also *Stilyard*, *Stilliard*, *Steehiard*, *Steleard*, *Styliard*, and as two words *Steel yard*, *Stele yard* (also *Steel house*, *Stele house*); explained as orig. "the yard in London where steel was sold by German merchants," as if < *steel*¹ + *yard*²; but in fact an imperfect translation of the MD. *staelfhof*, later *staalhof*, = *MLG. stalhof*, an office or hall where cloth was marked with a leaden seal as being properly dyed, < MD. *staet*, a specimen, sample, test of dyeing, D. *staal*, a sample, = *MLG. stale*, LG. *stal*, > G. dial. *stahl*, a sample, pattern (hence MD. *staeten* = *MLG. stalen*, mark cloth with a leaden seal as being properly dyed) (connected with MD. *staeten*, *stallen* = *MLG. stallen* (OF. *estaler*, *etaler*), expose for sale on a stall, display or show on a stall, < MD. *stal*, etc., a stall: see *stall*¹), + *hof*, yard, court: see *hovel*¹. The notion that the MD. *staelfhof* is a contraction of **stapelhof* (which, moreover, does not occur; cf. *stapelhuys*, E. *staple-house*) is untenable.] A place in London, comprising great warehouses called before the reign of Edward IV. *Gildhalla Teutonico-rum*, 'Gildhall of the Germans,' where, until expelled in 1597, the merchants of the Hanseatic League had their English headquarters; also, the company of merchants themselves. The merchants of the Steelyard were bound by almost monastic gild-rules, under a separate jurisdiction from the rest of London, were exempt from many exactions and restrictions, and for centuries controlled most of the foreign trade of England.

This yere corn was verie dere, & had ben dearer if marchantes of y^e stiyarde had not been & Dutche shippes restrained, & an abstinence of warre betweene Englande & Flaunders.
Fabyan, *Chron.*, an. 1528-9.

From him come I, to entreat you . . . to meet him this afternoon at the Rhenish wine-house iⁿ the Stilliard.
Webster, *Westward Ho*, ii. 1.

steelyard² (stēl'yārd or stil'yārd), *n.* [Early mod. E. *stilyard*, *stilliard*, *stiliard*; appar. lit. 'a rod of steel,' < *steel*¹ + *yard*¹; but prob. an altered form, due to popular etymology, of the

equiv. early mod. E. *stelleere*, supposed to stand for *stiller* or **steller* (= G. *steller*, regulator): see *stiller*¹. The word seems to have been confused with *Steelyard*¹, and is generally explained, without evidence, as orig. the balance or weight used by the merchants of the Steelyard.] A kind of balance with two unequal arms, consisting of a lever in the form of a slender iron bar with

Steelyard.

a, rectangular bar, graduated both above and below; *b*, adjustable counterpoising weight; *c*, hook for supporting articles to be weighed (this can be turned easily over the end of the bar at *c*; *d* and *e*, hooks for support of the steelyard, according as one or other of the graduations is turned to the upper side for use in weighing.

one arm very short, the other divided by equidistant notches, having a small crosspiece as fulcrum, to which a bearing for suspension is attached, usually a hook at the short end, and a weight moving upon the long arm. It is very portable, without liability to become separated, and the process of weighing is very expeditious. It is much used for cheap commodities, but owing to its simple construction it is liable to be so made as to give false indications. Often used in the plural. Also called *Roman balance* or *beam*. Compare *Danish balance* (sometimes called *Danish steelyard*), under *balance*.

Crochet, a small hook. . . . A *Romane beame* or *stelleere*, a beame of yron or wood, full of nickes or notches, along which a certayne peize of lead, &c., playing, and at length settling towards the one end, shewes the just weight of a commodity hanging by a hooke at the other end.

Colgrave.

A pair of steelyards and a wooden sword.
Hallack, *Fanny*.

steem¹, *n.* An old form of *steam*. *Prompt. Parv.*
steen¹ (stēn), *v. t.* [*Also stean*, Sc. *stein*; < *ME. stenen*, cast stones, < *AS. stēnan* (= OHG. *steinōn* = Goth. *stainjan*), stone, < *stān*, stone: see *stone*, *n.* Cf. *stone*, *v.*, of which *steen*¹ is a doublet.] 1. To stone; pelt with stones.

Te stones thet me [men] stened him mide.
Anon. Rime, p. 122.

2. To fit with stones; mend, line, pave, etc., with stones. *Hallivell*. [*Prov. Eng. and Scotch* in both senses.]

steen¹ (stēn), *n.* [*Also stean*; a dial. var. of *stone*, due to the verb *steen*¹.] A stone. [*Prov. Eng. and Scotch*.]

steen² (stēn), *n.* [*Also stean*, *stein*; < *ME. steene*, *stene*, a stone jar, < *AS. stēna* (= OHG. *steinna*), a stone crock (cf. *stēnen*, of stone: see *stonen*), < *stān*, stone: see *stone*.] 1. A kind of jar or urn of baked clay or of stone, of the general type of the sepulchral urns of the Romans. *Jour. Brit. Archaeol. Ass.*, XXXV. 105.

Neuerthelatre ther weren not maad of the same monce the *stenys* [hydrie, Vulgate] of the temple of the Lord.

Wyctif, 4 Kl. [2 Kl.] xii. 13.

Upon an huge great Earth-pot *steane* he stood.
Spenser, *F. Q.*, VII. vii. 42.

2. A large box of stones used for pressing cheese in making it. *Hallivell*. [*Prov. Eng.*]

steenbok (stān'- or stēn'bok), *n.* [*< D. steenbok* = G. *steinbock*, the wild goat, < D. *steen*, = G. *stein* = E. *stone*, + D. *bok* = G. *bock* = E. *buck*: see *stone* and *buck*¹.] One of several small Afri-

Steenbok (*Nanotragus tragulus*).

can antelopes of the genus *Nanotragus*, fond of rocky places (whence the name). The common steenbok is *N. tragulus*, generally distributed in South Africa, about 3 feet long and 20 inches tall, with straight horns about 4 inches long in the male, none in the female,

large ears, and no false hoofs. It is of a general reddish-brown color, white below. The gray steenbok is *N. melanotis*. *N. orotragus* is the klip-springer (which see, with cut). Also *steenbok*, *steinbok*. Compare *steinbok* and *stonebuck*.

steening (stē'ning), *n.* [Also *steaming*; verbal *n.* of *steep*, *v.*] 1. Any kind of path or road paved with small round stones. *Halliwel*. [Prov. Eng.]—2. In *arch.*, the brick or stone wall or lining of a well or cesspool, the use of which is to prevent the irruption of the surrounding soil. Also *steining*.

steenkirk (stēn'kērk), *n.* [Also, less prop., *stein-kirk*; so called in allusion to the battle fought in 1692 near *Steenkerke*, *F. Steinkerque* (lit. 'stone church'), a town in Belgium.] A name brought into fashion, after the battle of Steenkirk, for several articles, especially of dress, as wigs, buckles, large neckties, and powder; especially, a cravat of fine lace, loosely and negligently knotted, with long hanging ends, one of which was often passed through a buttonhole.

Mrs. Cadico. I hope your Lordship is pleased with your *Steenkirk*.

Lord F. In love with it, stam my vitals! Bring your Bill; you shall be paid to-morrow. *Vanbrugh*, *The Relapse*, i. 3.

I had yielded up my cravat (a smart *Steenkirk*, by the way, and richly laced). *Scott*, *Kob Roy*, xxxi.

Ladies also wore them (neckcloths), as in "The Careless Husband" Lady Easy takes her *Steenkirk* from her Neck and lays it gently over his Head.

Ashton, *Social Life in Reign of Queen Anne*, I. 148.

steenstrupine (stēn'strup-in), *n.* [Named after K. J. V. *Steenstrup*, a Danish naturalist.] A rare mineral occurring in massive forms and rhombohedral crystals of a brown color in the sodalite syenite of Greenland. It is a silicate of the rare metals of the cerium group, also thorium, and other elements.

steep¹ (stēp), *a.* and *n.* [*< ME. stepe, step, stēp, steep, < AS. steap, steep, high, = OFries. stap, steep; < cf. Icel. steypthr, steep, lofty; Norw. stup, a steep cliff; akin to stoop: see stoop*¹, and *cf. steep*², *steep*.] I. *a.* 1. Having an almost perpendicular slope; precipitous; sheer.

Two of these lands are *steep* and upright as any wall, that it is not possible to climb them.

Purchas, *Pilgrimage*, p. 748.

Thus far our ascent was easy; but now it began to grow more *steep*, and difficult.

Maunderell, *Aleppo to Jerusalem*, p. 119.

2*t.* Elevated; high; lofty.

To a room they came,
Steep and of state. *Chapman*. (*Imp. Dict.*)

3. Excessive; difficult; forbidding; as, a *steep* undertaking; a *steep* price. [*Colloq.*]

Perhaps if we should meet Shakespeare we should not be conscious of any *steep* inferiority.

Emerson, *Essays*, 1st ser., p. 302.

Neither priest nor squire was able to establish any *steep* difference in outward advantages between himself and the commons among whom he lived. *Froude*, *Sketches*, p. 164.

4*t.* Bright; glittering; fiery.

His eyes *steep* and rollynge in his heede.

Chaucer, *Gen. Prolog.* to C. T., l. 201.

His Ene [eyes] leuenaund with light as a low fyn,
With stremys [gleams] full stithe in his *stepe* loke.

Destruction of Troy (E. E. T. S.), l. 7724.

II. *n.* A steep or precipitous place; an abrupt ascent or descent; a precipice.

Suddenly a splendor like the morn

Pervaded all the beetling gloomy *steeps*.

Keats, *Hyperion*, ii.

Yet up the radiant *steeps* that I survey

Death never climbed. *Bryant*, *To the Apennines*.

steep² (stēp), *v.* [*< ME. steppen, < Icel. steypa, cast down, overturn, pour out, cast (metals), refl. tumble down, = Sw. stōpa = Dan. stōbe, cast (metals), steep (corn); causal of Icel. stōpa = Sw. stupa, fall, stoop: see stoop*¹, and *cf. steep*¹.] I. *trans.* 1. To tilt (a barrel). *Halliwel*. [Prov. Eng.]—2. To soak in a liquid; macerate: as, to *steep* barley; to *steep* herbs.

A day afore her [almonds'] setting, hem to *stepe*
In meeth is good.

Palladius, *Husbandrie* (E. E. T. S.), p. 54.

The Gordons good, in English blood

They *steep'd* their hose and shoon.

Battle of Otterbourne (Child's Ballads, VII. 24).

The prudent Sibyl had before prepared

A sop in honey *steeped* to charm the guard.

Dryden, *Æneid*, vi. 567.

3. To bathe with a liquid; wet; moisten.

Then she with liquors strong his eyes did *steep*,
That nothing should him hastily awake.

Spenser, *F. Q.*, II. vi. 18.

His coursers, *steep'd* in sweat and stain'd with gore,

The Greeks' preserver, great Machaon, bore.

Pope, *Iliad*, xl. 728.

4. To imbue or impregnate as with a specified influence; cause to become permeated or pervaded (with): followed by *in*.

Is this a time to *steep*
Thy brains in drowsy slumbers?

Quarles, *Emblems*, i. 7.

Thou art so *steep'd* in misery,
Surely 'twere better not to be.

Tennyson, *The Two Voices*.

The habitual criminal, *steeped* in vice and used to ignominy, cares very little for disgrace, and accepts punishment as an incident in his career.

Bibliotheca Sacra, XLVII. 594.

II. *intrans.* To be bathed in a liquid; soak.

And now the midnight draught of sleep,

Where wine and spices richly *steep*,

In massive bowl of silver deep,

The page presents on knee.

Scott, *Marmion*, i. 30.

steep² (stēp), *n.* [*< steep*², *v.*] 1. The process of steeping; the state of being steeped, soaked, or permeated: used chiefly in the phrase *in steep*.

Strait to each house she hasted, and sweet sleep

Pour'd on each wooer; which so laid *in steep*

Their drowsie temples that each brow did nod.

Chapman, *Odyssey*, ii. 578.

Whilst the barley is *in steep* it is gauged by the excise officers, to prevent fraud.

Encyc. Brit., IV. 267.

2. That in which anything is steeped; specifically, a fertilizing liquid in which seeds are soaked to quicken germination.

When taken from the white bath, the skins, after washing in water, are allowed to ferment in a bran *steep* for some time in order to extract a considerable portion of the alum and salt.

C. T. Davis, *Leather*, p. 605.

3. Rennet: so called from being steeped before it is used. [Prov. Eng.]—*Rot's steep*, in bleaching cotton goods, the process of thoroughly saturating the cloth. The name is due to the former practice of allowing the flour or size with which the goods were impregnated to ferment and putrefy. Also called *wetting-out steep*.

steep-down (stēp'doun), *a.* Having a sheer descent; precipitous.

Wash me in *steep-down* gulfs of liquid fire!

Shak., *Othello*, v. 2. 280.

You see Him till into the *steep-down* West

He throws his course. *J. Beaumont*, *Psyche*, iii. 14.

steepen (stēp'pī), *v. i.* [*< steep*¹ + *-en*.] To become steep.

As the way *steepened*, . . . I could detect in the hollow of the hill some traces of the old path.

Hugh Miller. (*Imp. Dict.*)

steeper (stē'pēr), *n.* [*< steep*² + *-er*.] A vessel, vat, or cistern in which things are steeped; specifically, a vat in which the indigo-plant is steeped to macerate it before it is soaked in the beating-vat.

steepful (stēp'fūl), *a.* [*< steep*¹ + *-ful*.] Steep; precipitous.

Anon he stalks about a *steepful* Rock,

Where som, to shun Death's (never shunned) stroak,

Had clambred vp.

Sylvester, tr. of *Du Bartas's Weeks*, ii., *The Vocation*.

steep-grass (stēp'grās), *n.* The butterwort, *Pinguicula vulgaris*: so called because used like rennet. Also *steepweed*, *steepwort*. *Britten* and *Holland*, *Eng. Plant Names*.

steepiness (stē'pī-nēs), *n.* The state or quality of being steepy or steep; steepness. [*Rare.*]

The craginess and *steepiness* of places up and down . . . makes them inaccessible. *Howell*, *Forreine Travell*, p. 132.

steep¹ (stēp), *n.* [*< ME. steple, steple, stepylle, stepul, < AS. stēpel, stēpel, a steep, < steep, steep, high: see steep*¹.] 1. A typically lofty structure attached to a church, town-house, or other public edifice, and generally intended to contain the bells of such edifice. *Steep* is a general term applied to every secondary structure of this description, whether in the form of a simple tower, or, as is usual, of a tower surmounted by a spire.

Ydeleblisse is the grete wynd that thrauth down the grete towers and the huz *steepes* and the grete beches ine wodes thrauth to grounde.

At Paris all *steepes* are clangouring not for sermon.

Carlyle, *French Rev.*, III. i. 4.

2. A lofty head-dress worn by women in the fourteenth century. See *hennin*.

Some of the more popular of these strange varieties of head-gear have been distinguished as the "horned," the "mitre," the "*steep*,"—in France known as the "*hennin*"—and the "butterfly."

Encyc. Brit., VI. 469.

3. A pyramidal pile or stack of fish set to dry. Also called *pack*. See the quotation under *pack*¹, 10 (b).

steepbush (stēp'būsh), *n.* The hardhack; also, *Spiraea salicifolia*. See *Spiraea*.

steepchase (stēp'chās), *n.* A horse-race across a tract of country in which ditches,

hedges, and other obstacles must be jumped as they come in the way. The name is supposed to be originally due to any conspicuous object, such as a church-steeple, having been chosen as a goal, toward which those taking part in the race were allowed to take any course they chose. The limits of the steepchase-course are now marked out by flags.

steepchaser (stēp'chā'sēr), *n.* 1. One who rides in steepchases.—2. A horse running or trained to run in a steepchase.

"If you do not like hunting, you are to affect to," says Mamma. "You must listen to Captain Breakneck's stories at dinner, laugh in the right places, and ask intelligent questions about his *steepchasers*."

Nineteenth Century, XXVI. 780.

steeped (stē'pld), *a.* [*< steep* + *-ed*.] 1. Furnished or adorned with a steeple or steeples.

As we neared the provincial city [Worcester], we saw the *steeped* mass of the cathedral, long and high, rise far into the cloud-freckled blue. *H. James, Jr.*, *Past Pilgrim*, p. 44.

2. Having the form of a steeple; peaked; towering.

Steeped hatters.

Wright, *Passions of the Mind* (ed. 1621), p. 330. (*Halliwel*.)

A *steeped* turban on her head she wore. *Fairfax*.

steep-engine (stē'pl-en'jin), *n.* 1. A form of marine steam-engine used on side-wheel boats, in which the working-beam is the highest part, and the connecting-rod is above the crank-shaft.—2. A direct-acting engine in which the crank-shaft is located between the cylinder and the sliding-block or cross-head, the piston-rod is connected with the latter by two branches or limbs which straddle the crank-shaft and crank, and the connecting-rod or pitman plays between the limbs of the piston-rod. It is used for steam-pumps and donkey-engines, being very compact in form.

steep-fair[†], *n.* [Supposed to be a corruption, simulating *steep* (as if 'a church-fair' or 'ker-mess'), of 'staple-fair', *< staple*², market, + *fair*².] A common fair or mart.

These youths, in art, purse, and attire most bare,

Give their attendance at each *steep-faire*;

Being once hir'd he'll not displease his lord.

Taylor, *Works* (1630). (*Nares*.)

steep-hat (stē'pl-hat), *n.* A steeple-crowned hat.

An old doublet and a *steep* hat. *Browning*, *Stratford*.

steep-house[†] (stē'pl-hous), *n.* A church edifice: so called by the early members of the Society of Friends, who maintained that the word *church* applies properly only to the body of believers.

The reason why I would not go into their *steep-house* was because I was to bear my testimony against it, and to bring all off from such places to the Spirit of God, that they might know their bodies to be the temples of the Holy Ghost.

George Fox, *Journal* (Phila.), p. 167.

There are *steep-houses* on every hand,

And pulpits that bless and ban;

And the Lord will not grudge the single church

That is set apart for man. *Whittier*, *The Old South*.

steep-hunting (stē'pl-hun'ting), *n.* Same as *steepchasing*. *Carlyle*, *Sterling*, v.

steganophthalmic (steg'a-nof-thal'mik), *a.* [*< steganophthalmate + -ic.*] Same as *steganophthalmate*.

steganophthalmous (steg'a-nof-thal'mus), *a.* [*< Gr. stēganós*, covered, + *ophthalmos*, eye.] Same as *steganophthalmate*.

steganopod (steg'a-nop'od), *a. and n.* [*< NL. steganopodus (-pod-)*, *< Gr. stēganopous (-pod-)*, web-footed, *< stēganós*, covered, + *πους* (pod-) = E. foot.] 1. *a.* In *ornith.*, having all four toes webbed; totipalmate.

II. *n.* A member of the *Steganopodes*.

Steganopoda (steg-a-nop'ō-dā), *n. pl.* [NL.: see *steganopod*.] An Aristotelian group of birds, approximately equivalent to the Linnæan *Anseres*, or web-footed birds collectively.

steganopodan (steg-a-nop'ō-dan), *a.* [*< steganopod + -an.*] In *ornith.*, totipalmate; steganopod.

Steganopodes (steg-a-nop'ō-dēz), *n. pl.* [NL.: see *steganopod*.] An order of natatorial birds, consisting of those which have all four toes webbed and a more or less developed gular pouch; the *Totipalmatæ*. It is now usually divided into six families, *Sulidæ*, *Pelecanidæ*, *Phalacrocoracidæ*, *Platidæ*, *Tachypetidæ*, and *Phaethontidæ*, respectively represented by the gannets, pelicans, cormorants, darters, frigates, and tropic-birds. *Dysporomorphæ*, *Pinnipedes*, and *Picacores* are synonyms. See cuts under *anhinga*, *cormorant*, *frigate bird*, *gannet*, *pelican*, *Phaethon*, *rough-billed*, and *totipalmate*.

steganopodous (steg-a-nop'ō-dus), *a.* [*< steganopod + -ous.*] Same as *steganopod*.

Steganopus (steg-a-nop'ō-pus), *n.* [NL. (Vieillot, 1818): see *steganopod*.] A genus of phalaropes, having the toes margined with an even membrane, and the bill very long and slender.

Wilson's Phalarope (*Steganopus wilsoni*).

It includes Wilson's phalarope, *S. wilsoni*, a North American species, the largest and handsomest of the family. This genus has nothing to do with the order of birds that appears from the term *Steganopodes*, to be named from it.

Stegocarpi (steg-ō-kār'pī), *n. pl.* [NL.: see *stegocarpus*.] A division of bryaceous mosses in which the capsule opens in the upper part by a deciduous lid or operculum. It embraces the larger part of the true mosses.

stegocarpus (steg-ō-kār'pus), *a.* [*< NL. "stegocarpus"*, *< Gr. stēgēiv*, cover, + *καρπός*, fruit.] In *bot.*, of or belonging to the *Stegocarpi*; having an operculate capsule.

Stegocephala (steg-ō-sef'a-lā), *n. pl.* [NL., neut. pl. of **stegocephalus*: see *stegocephalous*.] Same as *Labyrinthodontia*. Also *Stegocephali*.

stegocephalian (steg'ō-se-fā'li-an), *a. and n.* [*< Stegocephala + -ian.*] 1. *a.* *Stegocephalous*.

II. *n.* A member of the *Stegocephala*.

stegocephalous (steg-ō-sef'a-lus), *a.* [*< NL. "stegocephalus"*, *< Gr. stēgēiv*, cover, + *κεφαλή*, the head.] Having the head mailed, loricate, or cataphract, as a labyrinthodont; having the characters of, or pertaining to, the *Stegocephala*.

Stegodon (steg'ō-don), *n.* [NL. (Falconer, 1857), *< Gr. stēgēiv*, cover, + *ὄδον* (odon-) = E. tooth.] 1. A genus of fossil elephants of the Tertiaries of India, intermediate in their dental characters between the existing elephants and the mastodons. They are, however, most nearly related to the former, belonging to the same subfamily, *Elephantinae*. *S. inermis* is an example.

2. [*l. c.*] An elephant of this genus.

stegognathous (ste-gog'nā-thus), *a.* [*< Gr. stēgēiv*, cover, + *γνάθος*, jaw.] In *conch.*, having a jaw composed of imbricated plates: noting the *Bulimulidæ*.

Stegoptera (ste-gop'te-rā), *n. pl.* [NL., neut. pl. of **stegopterus*: see *stegopterous*.] An order of neuropterous insects; the roof-winged insects. It included the *Panorpidae* or scorpion-flies, the *Raphidiidae* or snake-flies, the *Mantispidae* or mantis-flies, the *Myrmeleontidae* or ant-lions, the *Hemerobiidae* or lacewings, the *Stalidae* or May-flies, and the *Phryganeidae* or caddis-flies. The order is now broken up.

stegopterous (ste-gop'te-rus), *a.* [*< NL. "stegopterus"*, *< Gr. stēgēiv*, cover, + *πτερόν*, wing, = E. feather.] In *entom.*, roof-winged; holding the wings deflexed when at rest; of or pertaining to the *Stegoptera*.

Stegosauria (steg-ō-sā'ri-ā), *n. pl.* [NL., *< Gr. stēgēiv*, cover, + *σαῦρος*, a lizard.] An order or suborder of dinosaurs, represented by the families *Stegosauridae* and *Scelidosauridae*.

stegosaurian (steg-ō-sā'ri-an), *a. and n.* [*< Stegosauria + -ian.*] 1. *a.* Of or pertaining to the *Stegosauria*, or having their characters.

II. *n.* A dinosaur of the order *Stegosauria*.

Stegosauridae (steg-ō-sā'ri-dē), *n. pl.* [NL., *< Stegosaurus + -idae.*] A family of herbivorous dinosaurs, typified by the genus *Stegosaurus*, with biconcave vertebræ, ischia retrorse and meeting in mid-line, the astragalus coalesced with the tibia, and the metatarsals short. They were Jurassic reptiles of great size.

stegosauroid (steg-ō-sā'roid), *n. and a.* [*< Stegosaurus + -oid.*] Same as *stegosaurian*.

Stegosaurus (steg-ō-sā'rus), *n.* [NL. (Marsh, 1877), *< Gr. stēgēiv*, cover, + *σαῦρος*, a lizard.]

1. The typical genus of *Stegosauridae*. It contained species some 30 feet long, mailed with enormous bucklers and spines.—2. [*l. c.*] A dinosaur of this genus.

steik, *v. t.* See *steek*.

stellit, *n.* An obsolete Scotch spelling of *stale*¹.

steint, *v. and n.* An obsolete Scotch spelling of *steen*¹, *steen*².

Steinberger (stin'bér-gér), *n.* A white wine grown on the Rhine, near Wiesbaden in Prussia. The vineyard belongs to the Prussian national domain. Steinberger ranks in estimation second only to the Johannisberger, and in some years is considered better by connoisseurs.

steinbock (stin'bok), *n.* [G.: see *steenbok*.] 1. The ibex.—2. Same as *steenbok*.

Steinerian (sti-nē'ri-an), *a. and n.* [Named by Cremona from *Steiner* (see def.).] 1. *a.* Pertaining to the discoveries of the German geometer Jacob Steiner (1796–1863).—**Steinerian polygon**. See *polygon*.

II. *n.* In *math.*, the locus of points whose first polars with respect to a given curve have double points.

Steiner's surface. See *surface*.

steing, *n.* Same as *sting*².

steinhellite (stin'hi-lit), *n.* A variety of iolite.

steining (sti'ning), *n.* Same as *steening*, 2.

Steinitz gambit. See *Gambit*.

steinkirk (stin'kérk), *n.* See *steenkirk*.

steinmannite (stin'mān-it), *n.* [Named after *Steinmann*, a German mineralogist.] A variety of galena containing some arsenic and antimony. It commonly occurs in octahedral crystals.

steirk, *n.* See *stirk*.

steive, *v.* A variant of *stive*².

steket, *v.* An obsolete form of *stick*¹.

stel, *n.* An obsolete form of *steel*¹, *steal*², *stale*², etc.

stela (stē'lā), *n.* Same as *stele*³.

stele¹, *n.* An old spelling of *steal*¹, *steal*².

stele², *n.* An obsolete form of *stale*².

stela³ (stē'lē, sometimes stēl), *n.*; pl. *stelae* or *stelai*. [= F. *stèle*, < L. *stela*, < Gr. *στήλη*, an upright slab or pillar, < *stēnai*, stand, set: see *stand* and *stool*.] In *archaeol.*: (a) An upright slab or pillar, often crowned with a rich anthemion, and sometimes bearing more or less

Sculptured Stela.—Monument of the Knight Dexileos (who fell before Corinth 394 B. C.), on the Sacred Way, Athens.

elaborate sculpture or a painted scene, commonly used among the ancient Greeks as a gravestone. (b) A similar slab or pillar serving as a milestone, to bear an inscription in some public place, or for a like purpose.

stela (stē'lē), *n.* [= F. *stèle*, < Gr. *στήλη*, the crown of the root of a tree, stump, block, log, the trunk, + *-ite*.] A fine kind of stoneware, in larger pieces than the calamine. Also, erroneously, *stela*.

Stelidopteryx (stē-lī-dop'tē-riks), *n.* [NL. (S. F. Baird, 1858), < Gr. *στέλις* (*stēlis*), a scaper, + *πτερυξ*, a wing.] A genus of *Hirundinidae*, having the outer web of the first primary serrate by conversion of the barbs into a series of recurved hooks; the rough-winged swallows. *S. serripennis* is the common rough-winged swallow of the United States, of plain brownish coloration, greatly resembling the bank-swallow. Several others inhabit Central and South America. See cut under *rough-winged*.

stell (stēl), *v. t.* [*ME. stellan*, < AS. *stellan* (= MD. D. MLG. LG. OHG. MHG. G. *stellen*), set up, place, fix, < *steall* (= MD. D. *stal* = MLG. *stal*, LG. *stall* = OHG. MHG. *stal*, G. *stall*), a place, stall: see *stall*.] To set; place; fix. [Obsolete or dialectal.]

Mine eye hath play'd the painter, and hath *stell'd*
Thy beauty's form in table of my heart.
Shak., Sonnets, xxiv.

stell (stēl), *n.* [A var. of *stall*, after *stell*, *v.*] 1. A place; a station.
The said *stell* of Plessis.

Danet's Comines, sig. V 5. (*Nares*).
2. A stall; a fold for cattle. *Hallivell*; *Jamieson*. [Prov. Eng. and Scotch.]

stella (stē'lā), *n.*; pl. *stellae* (-ē). [NL., < L. *stella*, a star: see *star*.] A stellate spongespicule; an aster; a stellate.

stellar (stē'lār), *a.* [= F. *stellaire* = Sp. *estrelar* = It. *stellare*, < LL. *stellaris*, pertaining to a star, starry, < L. *stella*, a star: see *stella*.] Of or pertaining to stars; astral: as, *stellar* worlds; *stellar* space; *stellar* regions.

These soft fires
Not only enlighten, but . . . shed down
Their *stellar* virtue on all kinds that grow.

Milton, P. L., iv. 671.

Stellaria (stē-lā'ri-ā), *n.* [NL. (Linnaeus, 1753), name transferred, on account of the star-like blossoms, from a *Corispermum* so named by Dillenius (1719); < L. *stella*, a star.] A genus of polypetalous plants, of the order *Caryophyllaceae* and tribe *Alsineae*. It is characterized by the absence of stipules, by flowers usually with five deeply two-cleft petals and three styles, and by a one-celled globose or oblong capsule which commonly splits into three two-cleft or completely parted valves. There are about 85 species, scattered throughout the world; in the tropics they occur only on mountains. Seven species occur in

England and about 80 in North America, of which 7 are natives of the northeastern United States. They are com-

monly diffuse herbs, with weak, smooth, or hairy stems, loosely ascending or growing in matted tufts. Their flowers are usually white, and form terminal panicle cymes, sometimes mixed with leaves. Several species are known as *chickweed*, and several others as *starwort* or *stichwort*, especially *S. holostea* (see *stichwort*), a common English species, bearing such local names as *albone*, *break-bones*, *shirt-bulldozers*, *snap-jack*. *S. longifolia*, the long-leaved stichwort, frequent in the Northern Atlantic States, forms delicate tangled masses of light green overtopped by numerous small white flowers. *S. pubera*, the great chickweed or starwort, the most showy Atlantic species, forms conspicuous dark-green tufts along shaded banks in earliest spring, from Pennsylvania southward. See also cut under *ovary*.

stellary (stē'lā-ri), *a.* Same as *stellar*.

stellate (stē'lāt), *a.* and *n.* [*L. stellatus*, pp. of *stellare*, set or cover with stars, < *stella*, star: see *stella*.] 1. *a.* Star-like in form; star-shaped; arranged in the form of a conventional star; radiating from a common center like the rays or points of a star: as, *stellate* leaves; the *stellate* groups of natrolite crystals. — **Stellate bristle** or *hair*, a bristle or hair which branches at the end in a star-shaped manner. See cut under *hair*, 4. — **Stellate fracture**, a fracture, occurring usually in a flat bone, in which several fissures radiate from the central point of injury. — **Stellate leaves**, leaves, more than two in number, surrounding the stem in a whorl, or radiating like the spokes of a wheel or the points of a star. Also called *verticillate leaves*. See cut under *pipissera*. — **Stellate ligament**, a costovertebral ligament; the anterior costocentral ligament uniting the head of a rib with the body of a vertebra: so called from the radiated figure in man. — **Stellate spicule**, an aster; a stellate. — **Stellate veins**, very minute venous radicles situated just under the capsule of the kidney, arranged in a radiating or stellate manner.

II. *n.* A stellate microsclore, or flesh-spicule in the form of a star. *Encyc. Brit.*, XXII. 417.

stellated (stē'lāt-ed), *a.* [*L. stellatus* + *-ed*.] Same as *stellate*. — **stellated polygon**, *polyhedron*, etc. See the nouns.

stellately (stē'lāt-li), *adv.* Radiately; like a star; in a stellate manner.

stellate-pilose (stē'lāt-pī'ōs), *a.* In *bot.*, pilose with stellate hairs.

stellation (stē-lā'shōn), *n.* [*ML. stellatio(n)* (-i), < L. *stella*, a star: see *stella*.] 1. The act or process of becoming a star or a constellation.

The skaly Scorpion's fixt amongst the rest, . . .
The cause of it's *stellation* to enquire,
And why so beautify'd with heavenly fire,
Comes next in course.

Heywood, Hierarchy of Angels, p. 138.

2. Same as *constellation*.

Stars, and *stellations* of the heavens.
Rev. T. Adams, Works, II. 4.

stellature (stē'lātūr), *n.* [*ML. *stellatura*, irreg. taken as equiv. to *stellionatus*: see *stellionate*.] Same as *stellionate*.

Extortion and cozenage is proverbially called *crimen stellionatus*, the sin of *stellature*.

Rev. T. Adams, Works, I. 79.

stelled (stēld), *p. a.* [Pp. of *stell*: see *stell*, and cf. *stalled*, pp. of *stall*.] Fixed.

The sea, with such a storm as his bare head
In hell-black night endured, would have buoy'd up,
And quench'd the *stelled* fires. *Shak.*, Lear, iii. 7. 61.
[Some commentators define the word as 'stelled,' 'starry.']

stelleert, **stelleeret**, *n.* [See *steelyard*.] Same as *steelyard*. *Cotgrave*.

Stelleria (stē-lē'ri-ā), *n.* [NL., named after G. W. Steller: see *stellerine*.] In *ornith.*, a genus of sea-ducks, the type of which is Steller's eider, *S. dispar*, usually called *Polysticta stelleri*. *Bonaparte*, 1838.

Stellerida (stē-lē'ri-dā), *n. pl.* [NL., prop. *Stellarida*, < *stellaris*, starry, + *-ida*.] A class or other large group of echinoderms of obviously radiate figure; the starfishes and brittle-stars: synonymous with *Asteroida*, 2.

stelleridan (stē-lē'ri-dan), *a.* and *n.* [*L. Stellerida* + *-an*.] 1. *a.* Of or pertaining to the *Stellerida*.

II. *n.* A member of the *Stellerida*, as a starfish or brittle-star.

stelleridean (stē-lē'ri-dē-an), *n.* Same as *stelleridan*.

stellerine (stē-lē-rin), *n.* [Named after G. W. Steller, the traveler (1709-45).] The arctic or Steller's sea-cow, *Rhytina stelleri*. See *sea-cow*, 2, and cut under *Rhytina*.

Steller's eider. See *Polysticta*, 1, and *Stelleria*.
Steller's jay. A jay of northwestern North America, *Cyanocitta stelleri*, crested like the common blue jay, but chiefly of a blackish color, shading into dull blue on some parts.

Steller's sea-cow. See *sea-cow*, 2, and cut under *Rhytina*.

Steller's sea-lion. The northern sea-lion. See *Eumetopias* (with cut).

stellett, *n.* An obsolete form of *stylet*, 1. *Dalyell*, Frag. of Scottish History.

stelliferous (stē-lif'ē-rus), *a.* [*L. stellifer*, starry, < *stella*, a star, + *ferre* = E. *bear*.] Having or abounding with stars.

stelliform (stē-lī'fōrm), *a.* [*L. stella*, a star, + *forma*, form.] Star-like in shape; stellate in form; asteroid; radiated.

stellify (stē-lī'fī), *v. t.* [*ME. stellifyen*, < OF. *stellifier*, < ML. *stellificare*, place among the stars, convert into a constellation, < L. *stella*, a star, + *facere*, make, do (see *-fy*).] To turn into or cause to resemble a star; convert into a constellation; make glorious; glorify.

No wonder is thogh Jove her *stellifye*.
Chaucer, Good Women, l. 525.

Some think this foud to be Nilus, which is also Gyon; and therefore *stellified*, because it directeth his course from the Meridian. It consisteth of many stars, and lieth just beneath the star called Canopus, or Ptolomea.

Heywood, Hierarchy of Angels, p. 176.

Stellio (stē-lī'ō), *n.* [NL., < L. *stellio* (n-), a lizard: see *stellion*.] 1. A genus of agamoid lizards, giving name to the *Stellionidae*. They have acrodont dentition, naked tympanum, no pores, and

Common Stellion (*Stellio vulgaris*).

the scales of the tail disposed in whorls or verticils. There are several species, ranging from countries bordering the Mediterranean to India. The common stellion or star-lizard, the hardim of the Arabs, *S. vulgaris*, is abundant in ruins. *S. tuberculatus* is an Indian species.

2. [*l. c.*] A lizard of this genus.

stellion (stē'lī-on), *n.* [*L. stellio*, a newt, a lizard marked with star-like spots, also a crafty, knavish person (cf. *stellionate*), < *stella*, a star: see *stella*.] An agamoid lizard of the genus *Stellio* or family *Stellionidae*; a star-lizard.

When the *stellion* hath cast his skin, he greedily devours it again.
Rev. T. Adams, Works, I. 79.

stellionate (stē'lī-on-āt), *n.* [*LL. stellionatus*, cozenage, trickery, < L. *stellio* (n-), a crafty, knavish person, lit. a newt, lizard: see *stellion*.] In *Scots* and *civil law*, a word used to denote all such crimes in which fraud is an ingredient as have no special names to distinguish them, and are not defined by any written law.

Stellionidae (stē-lī-on'ī-dē), *n. pl.* [NL., < *Stellio* (n-) + *-idae*.] A family of Old World acrodont agamoid lizards, named from the genus *Stellio*, properly merged in *Agamidae*; the stellions or star-lizards. See cut under *Stellio*.

stellular (stē'lū-lār), *a.* [*L. stellula*, a little star, dim. of *stella*, a star: see *stella*.] Finely or numerously stellated, as if spangled with little stars; stelliferous, as the surface of a coral; shaped like a little star; resembling little stars; small and stelliform in figure or appearance. *Encyc. Brit.*, XVI. 370.

stellulate (stē'lū-lāt), *a.* [*L. stellula*, a little star (see *stellular*), + *-ate*.] Resembling little stars or a little star; stellular.

Stellwag's symptom. See *symptom*.

Stelmatopoda (stē-mā-top'ō-dā), *n. pl.* A division of *Polyzoa* or *Bryozoa*, corresponding to the *Gymnolemata*: contrasted with *Lophopoda*.

stelochite (stél'ô-kit), *n.* See *steelechite*.

stelography (stê-log'ra-fi), *n.* [*LGr. στειλογραφία*, an inscription on a stèle or upright slab, *< Gr. στειλν*, a stèle (see *stèle*), + *-γραφία*, *< γράφειν*, write.] The practice of writing or inscribing on stèles or pillars.

Jacob's pillar . . . thus engraved . . . gave probably the origin to the invention of *stelography*.

Stackhouse, Hist. Bible, p. 323.

stem¹ (stem), *n.* [*ME. stem, stam, < AS. stemn, stefn, also stofn (> E. dial. storin), stem, trunk (of a tree), = D. stam, stem, trunk, stock (of a tree or family), = MLG. stam, stamme, stem, stock, = OHG. MHG. stam (stamm-), G. stamm, stem (of a tree), trunk, tree, stock, race, = Icel. stofn, stömn, stem, trunk of a tree, = Sw. stam = Dan. stamm (in comp. stam-), stem, trunk, stock (of a tree), stock, race, family (also with some variation of form in a particular sense, 'the prow of a vessel': see *stem*²); = OIr. tamón, Ir. tamhán (for 'stamon), stem, trunk; cf. Gr. στέμνος, an earthen jar; with formative -m-, < *√ sta*, stand: see *stund*. Not related to *staff*, except remotely.] 1. The body of a tree, shrub, or plant; the firm part which supports the branches; the stock; the stalk; technically, the ascending axis, which ordinarily grows in an opposite direction to the root or descending axis. The stem is composed of fibrous, spiral, and cellular tissues, arranged in various ways; it typically assumes a cylindrical form and a perpendicular position, and bears upon it the remaining aerial parts of the plant. Its form and direction, however, are subject to much variation in particular cases. In regard to internal structure, there are three principal modifications of stems characteristic of three of the great natural classes into which the vegetable kingdom is divided—namely, exogens, endogens, and acrogens. Stems are herbaceous or woody, solid or hollow, jointed or unjointed, branched or simple. Sometimes they are so weak as to be procumbent, although more generally firm and erect; sometimes weak stems are upheld by twining or by other methods of climbing. In some plants the stem is so short as to seem to be wanting, the leaves and flower-stalks appearing to spring from the top of the root. There are also stems, such as the rhizome and tuber, which, being subterranean, have been mistaken for roots. See cuts under *barbary, esparto, internode, pipsissewa, makeroot, rhizome, and tuber*. 2. The stalk which supports the flower or the fruit of a plant; the peduncle of the fructification, or the pedicel of a flower; the petiole or leaf-stem. See cuts under *pedicel, peduncle, and petiole*.*

Two lovely berries moulded on one stem.

Shak., M. N. D., iii. 2. 211.

For I maun crush among the stoure
Thy slender stem.

Burns, To a Mountain Daisy.

3. The stock of a family; a race; ancestry.

Ye may all, that are of noble stem,
Approach, and kiss her sacred vesture's hem.
Milton, Arcades, l. 82.

4. A branch of a family; an offshoot.

Richard Plantagenet, . . .
Sweet stem from York's great stock.
Shak., 1 Hen. VI., ii. 5. 41.

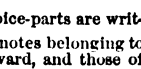

5. Anything resembling the stem of a plant. Specifically—(a) The handle of a tool. *Hallivell, [Prov. Eng.] (b)* That part of a vase, cup, or goblet which unites the body to the foot or base, in examples where the body is not immediately set upon the latter.

Wine-glasses or goblets are classified by the nature of their stems, or by the nature of their feet.

H. J. Powell, Glass-Making, p. 61.

(c) In *type-founding*, the thick stroke or body-mark of a roman or italic letter. See cut under *type*. (d) In a vehicle, a bar to which the bow of a falling hood is hinged. (e) The projecting rod of a reciprocating valve, serving to guide it in its action. See cut under *slide-valve*. (f) In *zool.* and *anat.*, any slender, especially axial, part like the stem of a plant; a stalk, stipe, rachis, footstalk, etc. (g) In *ornith.*, the whole shaft of a feather. (h) In *entom.*, the base of a clavate antenna, including all the joints except the enlarged outer ones: used especially in descriptions of the *Lepidoptera*.

6. In *musical notation*, a vertical line added to the head of certain kinds of notes. Of the kinds of note now in use, all but two, the breve and the semi-breve, have stems. It may be directed either upward or

downward, thus, . When two voice-parts are written on the same staff, the stems of the notes belonging to the upper part are often directed upward, and those of the lower part downward, particularly when the parts cross, or both use the same note (see figure). The latter note is said to have a *double stem*. See *note*, 13. Also called *tail*.

7. In *philol.*, a derivative from a root, having itself inflected forms, whether of declension or of conjugation, made from it; the unchanged part in a series of inflectional forms, from which the forms are viewed as made by additions; base; crude form.—*Aerial stem*, the above-ground axis of a plant, as opposed to the rootstock or other subterranean form of the stem.—*Ancipital, compound, erect, herbaceous, pituitary, secondary, etc., stem*. See the adjective.

stem¹ (stem), *v. t.*; pret. and pp. *stemmed*, ppr. *stemming*. [*< stem*¹, *n.*] To remove the stem of; separate from the stem: as, to *stem* tobacco.

stem² (stem), *n.* [*< ME. *stem, stam, < AS. *stemn, stefn, also stofn, the prow of a ship (steorstefn, the poop, lit. 'steer-stem'), = OS. stamm = D. steren = MLG. LG. steren, prow of a ship (> G. steren, stem (vorder-steren, 'fore stem,' prow, hinter-steren, 'hind stem,' stern-post)), = Icel. stafn, stamm, also stefn, stemn, stem of a ship (prow or stern), = Dan. stavn, stavn = Sw. stuf, prow (fram-stam, 'fore stem,' prow, bakstam, 'back stem,' stem); a particular use, with variations of form, of AS. stemn, stefn, E. stem¹, etc., stem, trunk, post: see *stem*¹. The naut. use in E. is prob. in part of Scand. origin.] 1. A curved piece of timber or metal to which the two sides of a ship are united at the foremost end. The lower end of it is scarfed or riveted to the keel, and the bowsprit, when present, rests on its upper end. In wooden ships it is frequently called the *main stem*, to distinguish it from the false stem, or cutwater. The outside of the stem is usually marked with a scale showing the perpendicular height from the keel, for indicating the draft of water forward. See also cut under *forecastle*.*

Pretious jewells fecht from far

Peter Martyr (tr. in Eden's First Books on America, ed. Arber, p. 66).

False stem, a stem fitted closely to the forward side of the main stem, generally sharp, and introduced for the purpose of decreasing a vessel's resistance and increasing her speed; a cutwater.—**From stem to stern**, from one end of the ship to the other, or through the whole length.

They skip

From stem to stern; the boatswain whistles.
Shak., Pericles, iv. 1. 64.

stem³ (stem), *v.*; pret. and pp. *stemmed*, ppr. *stemming*. [*< stem*², *n.*] 1. To dash against with the stem (of a vessel).

They stood off again, and returning with a good gale, they stemmed her upon the quarter, and almost overset her.
Winthrop, Hist. New England, l. 226.

2. To keep (a vessel) on its course; steer.

He is the master of true courage that all the time sedately stems the ship.
Cornelius Nepos in English (1723), Ded. (Encyc. Dict.)

3. To make headway against by sailing or swimming, as a tide or current; hence, in general, to make headway against (opposition of any kind).

The breathless Muse awhile her wearied wings shall ease,
To get her strength to stem the rough Sabrinian seas.
Drayton, Polyolbion, iii. 434.

II. intrans. 1. To make headway (as a ship); especially, to make progress in opposition to some obstruction, as a current of water or the wind.

They on the trading flood,
Through the wide Ethiopian to the Cape,
Ply, stemming nightly toward the pole.
Milton, P. L., ii. 642.

2. To head; advance head on.

At first we could scarce lie S. W., but, being got a degree to the Southward of the Line, the Wind veer'd most Easterly, and then we stemmed S. W. by S.

Dampier, Voyages, l. 79.

stem³ (stem), *v. t.*; pret. and pp. *stemmed*, ppr. *stemming*. [*< ME. stemmen; < Icel. stemma = Sw. stämma = Dan. stemme, stem, = OHG. MHG. stemmen, stemen, G. stemmen, stämmen, stop, stem, dam; < √ stam in stam², stammer, etc.: see stammer. Not connected with stem¹ or stem².*] 1. To stop; check; dam up, as a stream.

And loke ze stemme no stepe [step], bot strechez on faste,
Til ze reche to areset [stopping-place], rest ze neuer.
Alliterative Poems (ed. Morris), ll. 905.

The best way is, ever, not to attempt to stem a torrent, but to divert it.

A. Hamilton, To Washington (Works, l. 345).

He who stems a stream with sand.

Scott, L. of the L., iii. 28.

Stem and allied parts.

A, apron; B, deadwood; C, stem; D, deck; E, deck-beams; F, false keel; G, gripe; H, breast-hooks; I, stem-piece; J, main-piece; K, keel; L, bowsprit; M, main-piece; N, false keel; O, bowsprit; P, false keel; Q, bowsprit; R, false keel; S, bowsprit; T, false keel; U, bowsprit; V, false keel; W, bowsprit; X, false keel; Y, bowsprit; Z, false keel.

He sat down to his milk-porridge, which it was his old frugal habit to stem his morning hunger with.

George Eliot, Mill on the Floss, l. 12.

2. To tamp; make tight, as a joint, with a lute or cement.

stem⁴, *n.* and *v.* An old spelling of *steam*.

stemapod (stem'a-pod), *n.* [*< Gr. στήμα, filament (see stamen¹), + ποὺς (pous) = E. foot.*] One of the caudal filaments of the caterpillars of certain moths, as *Cerura* and *Heterocampa*, whose last pair of legs are thus modified into deterrent or repugnatorial organs. *A. S. Packard.*

stem-character (stem'kar'ak-tér), *n.* In *gram.*, same as *characteristic letter* (which see, under *characteristic*).

stem-clasping (stem'klás'ping), *a.* Embracing the stem with its base; amplexicaul, as a leaf or petiole.

stem-climber (stem'kli'mér), *n.* In *bot.*, see *climber*¹, 2.

stemet, *v. t.* A Middle English form of *steam*.

stem-eelworm (stem'el'wèrm), *n.* A minute nematoid, *Tylenchus decastatrix*, which causes stem-sickness in certain plants. See *Tylenchus*.

stem-end (stem'end), *n.* That part or point in a fruit which is attached to the stem: opposed to the blossom-end, which frequently bears the remains of the calyx, as in a pear or an apple. The stem-end is usually inferior to the blossom-end in sweetness and flavor.

stem-head (stem'héd), *n.* In *ship-building*, the top of the stem, or continuation of the forward extreme of the keel.

stem-knee (stem'nē), *n.* In *ship-building*, a knee uniting the stem with the keel.

stem-leaf (stem'lēf), *n.* A leaf growing from the stem; a cauline leaf.

stemless (stem'les), *a.* [*< stem*¹ + *-less*.] Having no stem; having the stem so little developed as to appear to be wanting; acaulescent.—**Stemless lady's-slipper, thistle, violet**. See the nouns.

stemlet (stem'let), *n.* [*< stem*¹ + *-let*.] A little stem or stalk; a young stem.

Gives insertion to two multarticulate stemlets.

English Cyc., Nat. Hist. Division (1855), III. 87.

stemma (stem'î), *n.*; pl. *stemmata* (-a-tî). [*< L. stemma, < Gr. στέμμα, a wreath, garland, < στρίφειν, put around, encircle, wreath, crown.*] 1. A family tree, or pedigree; specifically, such a pedigree made more or less decorative with heraldic or other ornaments; also, pedigree in general; order of descent; family: as, a man of the *stemma* of the Cecils.—2. The simple as distinguished from the compound eye of an invertebrate; an ocellus: always sessile and immovable.—3. One of the facets or corneules of a compound eye.—4. In *entom.*, the tubercle from which an antenna arises.—**Spurious stemma**, a small flat space, covered with semi-transparent membrane, above the bases of the antennæ of certain *Orthoptera*: it has been supposed to represent a stemma, or simple eye, in a rudimentary form.

Stemmatopteris (stem-a-top'te-ris), *n.* [NL., *< Gr. στέμμα (stemma), a wreath, + πτερίς, a fern.*] A genus of fossil plants, established by Corda, under which various stems or trunks of tree-ferns have been grouped, but little being known in regard to them, except the form of the scars or impressions marking the points of attachment of the petioles. Lesquereux describes remains of this kind under the names of *Stemmatopteris, Caulopteris, Megaphyton*, and *Pearsonius*; but, as he remarks, they could all have been described without inconvenience under the name of *Caulopteris*. These fossil remains are common in the coal-measures. See *Caulopteris*.

stemmatous (stem'a-tus), *a.* [*< stemma* (t) + *-ous*.] Pertaining to a stemma, or having its character; ocellar.

stemmed (stemd), *a.* [*< stem*¹ + *-ed*.] Furnished with or bearing a stem: used chiefly in composition: as, a straight-stemmed plant.

stemmer (stem'ér), *n.* [*< stem*³ + *-er*.] 1. Same as *blasting-needle*. [Eng.]—2. An implement used in making joints tight by means of cement.

stemmery (stem'er-i), *n.*; pl. *stemmeries* (-iz). [*< stem*¹ + *-ery*.] A factory where tobacco is stripped from the stem. *New York Herald, July 17, 1884. [Local, U. S.]*

stemming (stem'ing), *n.* [Verbal *n.* of *stem*³, *v.*] 1. The operation of tamping.—2. The material used in tamping. [Eng. in both uses.]

Stemodia (stê-mô'di-ä), *n.* [NL. (Linnæus, 1763), shortened from *Stemodiaca* (P. Browne, 1756), so called from the two-forked stamens; *< Gr. στήμων, taken for 'stamen' (see stamen¹),*

+ *dic*, *di*-, two-, + *ἀκρον*, a point, tip.] A genus of gamopetalous plants, of the order *Scrophulariaceae* and tribe *Geraniaceae*, type of a subtribe *Stemodiaceae*. It is characterized by flowers with five nearly equal calyx-lobes, and four perfect didynamous stamens included within the corolla-tube, and by a capsule splitting partly or completely into four valves, the two placentae separating or remaining united in a column. There are about 30 species, mostly tropical, occurring in all continents except Europe. They are glandular-hairy or downy herbs, sometimes shrubby and often aromatic. They bear opposite or whorled leaves and solitary or spiked and crowded, usually bluish flowers, sometimes with bracted pedicels. *S. maritima* is known in Jamaica as *bastard* or *seaside germander*, and *S. durantifolia* as *goatweed*; the latter, a low clammy plant with purplish spiked flowers, extends also from southern Arizona to Brazil.

Stemona (stō'mō-nā), *n.* [NL. (Loureiro, 1790), so called from the peculiar stamens; < Gr. *στήμων*, taken for 'stamen.')] A genus of monocotyledonous plants, type of the order *Stemonaceae*. It is distinguished by erect ovules and seeds, and stamens with very short filaments more or less united into a ring, having linear erect anthers with a thickened connective, continued above into an erect appendage. There are 4 or 5 species, natives of India, Malaysia, and tropical Australia. They are smooth, lofty-climbing twiners, growing from a fusiform tuberous root, and bearing shining alternate leaves which are cordate, ovate, or narrower, with three or more nerves and numerous cross-veinlets. The flowers form racemes, or are few or solitary in the axils; the perianth-segments are rather large, distinct, and erect, marked by many nerves. Formerly called *Roxburghia*.

Stemonaceae (stē-mō-nā'sē-ē), *n. pl.* [NL. (Durand, 1888), < *Stemona* + *-aceae*.] A small order of monocotyledonous plants, of the series *Coronarieae*, by many formerly called *Roxburghiaceae*. It is characterized by regular bisexual flowers with four-parted perianth of two rows, with four stamens and a one-celled ovary which contains two or more ovules and ripens into a two-valved capsule. It includes 8 species, belonging to 3 genera, of which *Stichoneuron* and *Stemona* (the type) are largely Indian; the other genus, *Crotonia*, includes one species in Japan, and another, *C. pauciflora*, in Florida and adjacent States.

Stemonitaceae (stē'mō-nī-tā'sē-ē), *n. pl.* [NL., < *Stemonitis* + *-aceae*.] A family of myxomycetous fungi, belonging, according to the classification of Rostafinski, to the order *Amaurogasterales*, which has a single sporangium or aethalium, without the peculiar deposits of lime carbonate that characterize the fructification of other orders, and the spores, capillitium, and columella usually uniformly black, or rarely brownish-violet.

Stemonitis (stē-mō-nī'tis), *n.* [NL. (Gleditsch), < Gr. *στήμων*, taken for 'stamen.')] A genus of myxomycetous fungi, giving name to the family *Stemonitaceae*.

stem-pessary (stem'pēs'ā-ri), *n.* A pessary with a rod or stem which is passed into the cervix uteri.

stem-piece (stem'pēs), *n.* In ship-building, a piece between the stem and the chocks, also called *independent piece*. See cut under *stem*².

stemple (stem'pl), *n.* [Cf. D. *stempel* = MHG. *stempfel*, G. *stempel* (< D.), a mark, stamp; see *stamp*.] In mining, a small timber used to support the ground by being laid across the stulls, or in other ways: in some mining districts of England nearly the same as *lacing* or *lagging*.

stem-sickness (stem'sik'nes), *n.* A disease of clover in England. It is caused by a nematoid worm, *Tylenchus decastatrix*, known as the *stem-ecicorn*, and brings about first a stunted condition and finally the death of the plant.

stemson (stem'son), *n.* [Perhaps a var. of *stanchion*, confused with *stem*². Cf. *kelson*, *sternson*.] In ship-building, a piece of curved timber fixed on the after part of the apron inside. The lower end is scarfed into the keelson, and receives the scarf of the stem, through which it is bolted.

stem-stitch (stem'stich), *n.* In pillow-lace making, a stitch by which a thick braid-like stripe is produced: used for the stems of flowers and sprigs, tendrils, etc.

stem-winder (stem'win'dēr), *n.* A watch which is wound up or regulated by means of a contrivance connected with the stem, and not by a key.

sten, *v.* and *n.* See *stend*.

stench¹ (stēnch), *n.* [ME. *stēnch*, *stunch*, < AS. *stenc* (= OHG. *stanc*, *stanch*, MHG. *stanc*, *stēnke*, G. *stank* = Sw. Dan. *stank*), a smell, odor (pleasant or unpleasant), < *stincan*, smell: see *stink*, *v.*, and cf. *stink*, *n.* Cf. Icel. *stakja*, a stench.] An ill smell; an offensive odor.

In our way to Tivoli I saw the rivulet of Salforata, formerly called Albula, and smelt the stench that arises from its waters some time before I saw them.

Addition. Remarks on Italy (Bohn), I. 482. = Syn. *Stink*, etc. See *smell*.

stēnch¹ (stēnch), *v. t.* [< *stēnch*¹, *n.*] To cause to emit a stench; cause to stink.

Dead bards stēnch every coast.

Young, Resignation, I. 24.

stēnch² (stēnch), *v. t.* An obsolete variant of *stēnch*¹. Harvey.

stēnchful (stēnch'fūl), *a.* [< *stēnch*¹ + *-ful*.] Full of bad odors. Rev. T. Adams, Works, II. 56.

stēnchil (stēn'chil), *n.* A Scotch form of *stēnch*¹ for *stanchion*.

stēnch-pipe (stēnch'pīp), *n.* In plumbing, an extension of a soil-pipe through and above the roof of a house, to allow foul gases to escape.

stēnch-trap (stēnch'trap), *n.* In a drain, a depression or hollow in which water lies, introduced to prevent the reflex passage of foul air or gas.

stēnchy (stēn'chi), *a.* [< *stēnch*¹ + *-y*.] Having a stench or offensive smell. Dyer, The Fleecce, I.

stencil¹ (stēn'sil), *v. t.*; pret. and pp. *stenciled*, *stencilled*, ppr. *stenciling*, *stencilling*. [Origin uncertain: (a) According to Skeat, prob. < OF. *estinceller* (for **escinteller*), cover with stars, powder (used in heraldry), lit. 'sparkle,' F. *étinceler*, sparkle, < L. *scintillare*, sparkle: see *scintillate*. Cf. *insel*.] (b) In another view, orig. as a noun, identical with *stencil*², a dial. var. of *stanchel*¹, var. of *stanchion*, ult. < OF. *estance*, a support: see *stance* and *stanchion*.] To mark out or paint by means of a stencil.

stencil² (stēn'sil), *n.* [See *stencil*¹, *v.*] 1. A thin plate or sheet of any substance in which a figure, letter, or pattern is formed by cutting through the plate. If the plate thus cut is placed upon a surface and rubbed with color or ink, the pattern or figure will be marked on the underlying substance. For many purposes, the letters, etc., are cut through completely; for transferring a pattern, as in embroidery, the lines of the pattern are often indicated by small holes. In wall-decoration, etc., both these plans are employed. Different stencils are often used in the same design, each for a different color.

2. The coloring matter used in marking with a stencil-plate. C. T. Davis, Bricks and Tiles, p. 90.—3. In *ceram.*, a preparation laid upon the biscuit to keep the oil used in transfer-printing or enameling from adhering to the surface; hence, the pattern traced by this preparation, reserving a panel or medallion of the unaltered color of the biscuit.

stencil³ (stēn'sil), *n.* [A var. of *stanchel*¹.] A door-post; a stanchion. Halliwell. [Prov. Eng.]

stenciler, stenciller (stēn'sil-ēr), *n.* [< *stencil*¹ + *-er*.] One who works with a stencil, especially a decorative painter who applies patterns with a stencil.

stencil-pen (stēn'sil-pen), *n.* A pricking-machine for perforating paper to form a stencil. It consists of a hollow stylus carrying a needle having a reciprocating motion. See *electric pen*, under *pen*².

stencil-plate (stēn'sil-plāt), *n.* A stencil.

stend (stēnd), *v. i.* [< OF. *estendre*, F. *étendre* = It. *stendere*, < L. *extendere*, stretch forth, extend: see *extend*.] 1. To extend. [Prov. Eng.]—2. To walk with long steps.—3. To leap; bound; rear; spring. Also *sten*. [Scotch and prov. Eng.]

stend (stēnd), *n.* [< *stend*, *v.*] A leap; a spring; a long step or stride. Also *sten*. Burns, Tam Glen. [Scotch and prov. Eng.]

Stenelytra (stē-nel'i-trā), *n. pl.* [NL., neut. pl. of **stenelytrus*: see *stenelytrous*.] In entom., in Latreille's system, the third family of heteromorous *Coleoptera*, divided into 5 tribes, corresponding to the old genera *Helops*, *Cistela*, *Dircaea*, *Edemera*, and *Mycterus*.

stenelytrous (stē-nel'i-trus), *a.* [< NL. **stenelytrous*, < Gr. *στενός*, narrow, strait, + *ἐλντρον*, a cover: see *elytrum*.] Having narrow elytra; of or pertaining to the *Stenelytra*.

Stenobothrus (stēn-ō-both'rus), *n.* [NL. (Fischer, 1833), < Gr. *στενός*, narrow, strait,

Stenobothrus maculipennis.
a, mature insect; b, pupa; c, larva. (All natural size.)

close, + *βόθρος*, a hole.] A notable genus of grasshoppers, of the family *Aceridiidae*, contain-

ing such species as *S. maculipennis*. This is a common grasshopper in most parts of the United States, and resembles the hateful grasshopper or Rocky Mountain locust (*Melanoplus spretus*) so closely that it has often been mistaken for the latter.

stenocardia (stēn-ō-kār'di-ā), *n.* [NL., < Gr. *στενός*, narrow, + *καρδιά*, the heart.] Angina pectoris.

Stenocarpus (stēn-ō-kār'pus), *n.* [NL. (R. Brown, 1810), so called from the usually narrow fruit; < Gr. *στενός*, narrow, + *καρπός*, fruit.] A genus of apetalous trees, of the order *Proteaceae* and tribe *Embothriaceae*. It is characterized by umbellate flowers, and numerous ovules downwardly imbricated and ripening into seeds which are winged below. There are 14 species, 11 of which are natives of New Caledonia and 3 of Australia. They are trees with alternate or scattered leaves, which are entire or deeply divided into a few pinnate segments, and mostly yellow or red flowers with a somewhat irregular perianth-tube and a nearly globular recurved and at length divided border, disposed in terminal or axillary umbels which are solitary or clustered in a short raceme or a compound umbel, and are followed by coriaceous stalked follicles. *S. sinuatus* is known in Queensland as *tulip-tree* and *fire-tree*. *S. salignus*, native of the same regions, is known as *beefwood*, *silly oak*, and *meleyn*.

stenocephalous (stēn-ō-sef'ā-lus), *a.* [< Gr. *στενός*, narrow, + *κεφαλή*, head.] Narrow-headed.

stenochemistry (stēn-ō-kro-mī), *n.* [< Gr. *στενός*, narrow, + *χρῶμα*, color.] The art of printing several colors at one impression. This is accomplished by various methods: (1) by dividing the ink-fountain of a printing-press into compartments, one for each color, and allowing the rollers to blend the inks on the distributing-table; (2) by cutting or trimming the rollers of a printing-press in such a way that only the desired parts may take and distribute ink—a different color for each roller or set of rollers; (3) by lithographic methods.

stencoronine (stēn'ō-kō-rō'nin), *a.* [< Gr. *στενός*, narrow, + *κορώνη*, a crown, also a crown.] Having narrow-crowned molars: noting the hippopotamine type of dentition, as distinguished from the eurycoronine or dinotherian. Falconer.

sténoderm (stēn'ō-dēr'm), *n.* [< *Stenoderma*.] A bat of the genus *Stenoderma*; a stenodermine. — **Spectacled stenoderma**, *Stenoderma perspicillatum*, a tropical American bat marked about the eyes as if wearing spectacles. Also called *spectacled vampire*.

Stenoderma (stēn-ō-dēr'mā), *n.* [NL. (Geoffroy), < Gr. *στενός*, narrow, + *δέρμα*, skin, hide.] A genus of American phyllostomine bats, of the subfamily *Phyllostomatinae*, having a short, broad, obtuse muzzle, short but distinct nose-leaf, no tail, and the interfemoral membrane concave behind. *S. achradoptilum* of the West Indies is so called from its fondness for the berries of *Achras sapota*, the naseberry.

Stenodermata (stēn-ō-dēr'mā-tā), *n. pl.* [NL.: see *Stenoderma*.] A section of phyllostomine bats, of which the genera *Stenoderma*, *Artibeus*, and *Centurio* are leading forms. It includes about 20 species, of 9 genera, of Neotropical bats. See cut under *Centurio*.

stenodermatous (stēn-ō-dēr'mā-tus), *a.* Pertaining to the *Stenodermata*, or having their characters; resembling a stenodermin.

stenodermine (stēn-ō-dēr'min), *a.* and *n.* [< *Stenoderma* + *-ine*.] I. a. Having a contracted wing-membrane, as a bat; or of pertaining to the *Stenodermata*.

II. *n.* A stenodermin bat; a stenodermin.

Stenodus (stēn'ō-dus), *n.* [NL. (Richardson, 1836), < Gr. *στενός*, narrow, + *ὄδους* = E. *tooth*.] A genus of salmonoid fishes, related both to *Salmo* and to *Coregonus*, having an elongate body, projecting lower jaw, and weak teeth. The inconnu, or Mackenzie river salmon, is *S. mackenzii*, attaining a weight of 20 pounds or more, esteemed as a food-fish. See cut under *inconnu*.

stenograph (stēn'ō-gráf), *n.* [< Gr. *στενός*, narrow, + *γράφειν*, write.] 1. A character used in stenography; a writing, especially any note or memorandum, in shorthand.

I saw the reporters' room, in which they redact their hasty stenographs. Emerson, Eng. Traits, p. 265.

2. A stenographic machine; a form of typewriter in which signs and marks of various kinds—dots, dashes, etc.—are used in place of ordinary letters. A number of different machines have been made, essentially typewriters operated by means of a keyboard.

stenograph (stēn'ō-gráf), *v. t.* [< *stenograph*, *n.*] To write or represent by stenography. Ill. London News. [Rare.]

stenographer (stē-nog'ra-fēr), *n.* [< *stenograph* (y) + *-er*.] One who writes shorthand.

stenographic (stēn-ō-gráf'ik), *a.* [= F. *sténographique*; as *stenography* + *-ic*.] Of or pertaining to stenography; shorthand.— **Stenographic machine**. Same as *stenograph*, 2.

stenographical (stēn-ō-gráf'ī-kal), *a.* [< *stenographic* + *-al*.] Same as *stenographic*.

stenographically (stén-ō-graf'i-kāl-i), *adv.* In shorthand; by means of stenography.

stenographer (stē-nog'ra-fist), *n.* [*< stenograph-y + -ist.*] A stenographer; a shorthand-writer.

stenography (stē-nog'ra-fi), *n.* [= *F. sténographie*, *< Gr. stēnōs*, narrow, close, + *-γραφία*, *< γραφειν*, write.] The art of writing by means of brief signs which represent single sounds, groups of sounds, whole words, or groups of words; shorthand; brachygraphy: a generic term embracing all systems of shorthand, or brief writing.

Did throng the Seates, the Boxes, and the Stage
So much that some by Stenography drew
The plot: put it in print.
Heywood, If you Know not Me (Works, ed. Pearson, I. 191).
Sure 'tis Stenographie, everie Character a word, and here
and there one for a whole sentence.
Brome, Northern Lass, III. 2.

Stenonian duct. See *Stenson's duct*.

stenopaic, stenopæic (stén-ō-pā'ik, -pē'ik), *a.* [*< Gr. stēnōs*, narrow, + *παῖς*, an opening, + *-ic.*] Having a small or narrow opening.—**Stenopaic slit**, a narrow slit in an opaque lamina, placed before an eye to test the degree of its astigmatism by determining the difference of its refraction in different meridians.—**Stenopaic spectacles**, spectacles having an oval metal plate with a small central aperture.

Stenopelmatus (stén-ō-pel'mā-tus), *n.* [NL. (Burmeister, 1838), *< Gr. stēnōs*, narrow, + *πέλας*, the sole of the foot.] A curious genus of *Locustidae*, containing forms known in the western United States as *sand-cricket*s. They are fierce-looking insects with large head and jaws, and live under stones or in burrows in the sand. They are carnivorous, and in New Mexico are commonly but erroneously reputed to be poisonous. Several species are known in the western

Sand-cricket (*Stenopelmatus fasciatus*), about half natural size.

United States, of which *S. fasciatus* is the commonest. The genus is also represented in Mexico, South America, and Australia.

stenopetalous (stén-ō-pet'ā-lus), *a.* [*< Gr. stēnōs*, narrow, + *πέταλον*, a leaf (petal): see *petal*.] In bot., having narrow petals; narrow-petaled.

stenophyllous (stén-ō-fil'us), *a.* [*< Gr. stēnōphyllos*, narrow-leaved, *< stēnōs*, narrow, close, + *φύλλον*, a leaf.] In bot., having narrow leaves.

Stenopsis (stē-nop'sis), *n.* [NL. (John Cassin, 1851), *< Gr. stēnōs*, narrow, + *ὄψις*, look, appearance.] A genus of South American setirostral goatsuckers, of the family *Caprimulgidae*, containing numerous species, as *S. cayennensis*.

Stenorhynchinae (stén-ō-ring'kī-nē), *n. pl.* [NL., *< Stenorhynchus + -inae.*] A subfamily of *Phocidae*, or seals, typified by the genus *Stenorhynchus* (or *Ogmorhinus*); the sterrincks. These seals exclusively inhabit southern seas, for *Monachus*, sometimes considered stenorhynchine, does not belong here. The only genera besides the type are *Lobodon*, *Leptonychotes* (or *Leptonyx* of Gray, not of Swainson), and *Ommatophoca*. As explained under *sea-leopard*, the current name is untenable. See cut under *sea-leopard*.

stenorhynchine (stén-ō-ring'kin), *a.* [*< Stenorhynchus + -ine.*] Of or pertaining to the *Stenorhynchinae*.

stenorhynchous (stén-ō-ring'kus), *a.* [*< Gr. stēnōs*, narrow, + *πίγος*, snout.] In ornith., narrow-billed; having a compressed beak.

Stenorhynchus (stén-ō-ring'kus), *n.* [NL., *< Gr. stēnōs*, narrow, + *πίγος*, snout.] In zool.: (a) A genus of crabs, containing the British spider-crab, *S. phalangium*: same as *Macropodia*. Latreille, 1819. (b) A genus of seals. See *Stenorhynchinae*. F. Currier, 1826. (c) A name of other genera, of birds, reptiles, and insects respectively.

Steno's duct. See *Stenson's duct*.

stenosed (stē-nōst'), *a.* [*< stenosis + -ed.*] Characterized by stenosis; morbidly narrowed.

stenosis (stē-nō'sis), *n.* [NL., *< Gr. stēnōsis*, a straitening, *< stēnōiv*, make narrow, straiten, *< stēnōs*, narrow, strait, close.] The pathological narrowing of a passage.

Stenostomata (stén-ō-stō'mā-tā), *n. pl.* [NL., *< Gr. stēnōs*, narrow, + *στόμα* (τ-), mouth.] A suborder of *ctenophorans*, containing the sacate, lobate, and teniate comb-jellies, collectively contrasted with the *Eurytomata* (which see). Most of the comb-bearers belong to this division.

stenostomatous (stén-ō-stom'ā-tus), *a.* [NL., *< Gr. stēnōs*, narrow, + *στόμα* (τ-), mouth.] Having a small, narrow, or contracted mouth; not eurystomatous. Also *stenostomous*.

Stenotaphrum (stén-ō-taf'rum), *n.* [NL. (Trinius, 1820), so called in allusion to the alternate notches of the rachis, in which the flowers are embedded; *< Gr. stēnōs*, narrow, + *τάφος*, a ditch or trench.] A genus of grasses, of the tribe *Panicææ*. It is characterized by flowers with only three glumes or with a fourth smaller one, the spikelets acute, borne in small fascicles sessile or half-immersed in excavations along a flattened or angled rachis. There are 3 or 4 species, very widely dispersed along sea-shores of tropical regions, and most frequent on the islands of the Indian and South Pacific Oceans. They are creeping grasses sending up short ascending and often compressed branches with spreading, flat, or convolute leaves, and a terminal spike of flowers. *S. Americanum*, locally known as *buffalo-grass*, is valued as a means of covering shifting sands with a firm turf, and has proved useful as a fodder-plant, especially on Ascension Island. See *St. Augustine grass* (under *saint*), and cut under *petiole*.

stenotelegraphy (stén-ō-tē-leg'ra-fi), *n.* [*< Gr. stēnōs*, narrow, + *E. telegraphy.*] A rapid telegraphic transmission of words and sentences by a system of shorthand.

stenoterosus (stē-not'ē-rus), *a.* [*< Gr. stēnōtēros*, compar. of *stēnōs*, narrow, strait, close.] Becoming more and more contracted from the center to the circumference, relatively to the radii represented.—**Stenoterosus map-projection**. See *projection*.

 The meteor of a splendid season, she . . .
Stept thro' the stately minuet of those days.
Tennyson, Aylmer's Field.

5. To go in imagination; advance or recede mentally: as, to *step* back to the England of Elizabeth.

They are *stepping* almost three thousand years backward into the remotest antiquity.
Pope, Iliad, Pref.

To *step aside*. (a) To walk to a little distance; retire for the occasion. (b) To deviate from the right path; err.
 To *step aside* is human. *Burns*, To the Unco Guid.

To *step awry*. See *awry*.—To *step out*, to increase the length of the step and the rapidity of motion.
 Jack or Donald marches away, . . . *stepping out* briskly to the tune of "The Girl I left behind me."
Thackeray, Vanity Fair, xxx.

II. *trans.* 1. To set; plant, as in stepping: as, *step* your foot on this thwart; he has never *stepped* foot in the city. [Familiar.]—2. To measure by stepping: as, to *step* off the distance.—3. To perform by stepping, as a dance: as, he *stepped* a stately galliard.—4. To place or set (two or more cutting-tools) in a tool-post or -rest in such manner that they simultaneously make successive cuts each respectively deeper than the preceding one, so that these cuts present the appearance of a series of ledges or steps.—5. *Naut.*, to fix the foot of (a mast) in its step, as in readiness for setting sail.

step (step), *n.* [*ME.* *steppe*, < *AS.* *stæpe*, a step, footstep, = *MD.* *stappe*, *steppe*, *step*, *step*, *D.* *stap* = *OHG.* *stapfo*, *stapfo*, *MHG.* *G.* *stapfe* (> *It.* *stapfa*, a stirrup, > *ult. E.* *stapfer*), a footstep, footprint; from the verb.] 1. A pace; a completed movement made in raising the foot and setting it down again, as in walking, running, or dancing.

I'll . . . turn two mincing *steps*
 Into a manly stride. *Shak.*, M. of V., iii. 4. 67.
 An inadvertent *step* may crush the snail.
Cowper, Task, vi. 564.

Hence—2. In the plural, walk; passage; course or direction in which one goes by walking.

Conduct my *steps* to find the fatal tree
 In this deep forest. *Dryden*, Æneid, vi. 276.
 But not by thee my *steps* shall be,
 For ever and for ever.
Tennyson, A Farewell.

3. A support for the foot in ascending or descending: as, *steps* cut in a glacier; a structure or an appliance used to facilitate mounting from one level to another, whether alone or as one of a series: as, a stone *step* (a block of stone having a horizontal surface for the foot); a *step* of a staircase (one of the gradients composed of the tread and riser taken together); the *step* of a ladder (one of the rungs or rounds, or one of the treads or foot-pieces in a step-ladder).

The breadth of every single *step* or stair [should] be never less than one foot.
Sir H. Wotton, Reliquie, p. 36.

An hundred winding *steps* convey
 That conclave to the upper day.
Scott, Marmion, ii. 33.

On the *step* of the altar, in front of the railing, were kneeling a band of the Fraterns Penitentiae.

C. E. Norton, Travel and Study in Italy, p. 6.
 Specifically—(a) *pl.* A step-ladder. Also called *pair of steps* and *set of steps*. (b) A foot-piece for entering or alighting from a vehicle.

4. The space passed over or measured by one movement of the foot, as in walking; the distance between the feet in walking when both feet are on the ground; a half-pace.

If you move a *step*
 Beyond this ground you tread on, you are lost.
Fletcher, Spanish Curate, v. 3.

The gradus, a Roman measure, may be translated a *step*, or the half of a passus or pace.
Arbutnot.

5. An inconsiderable space; a short distance; a distance easily walked.

'Tis but a *step*, sir, just at the street's end.
Cowper, To Joseph Hill, Esq.

It is but a *step* from here to the Wells, and we can walk there.
Thackeray, Book of Snobs, xxxv.

stepfather (step'fä'thër), *n.* [*ME.* *stepfader*, *stepfadyr*, corruptly *stifadre*, < *AS.* *steópfæder* (= *OFries.* *stiapfeder*, *stiapfader* = *D.* *stiefvater* = *MLG.* *stiefvader* = *OHG.* *stiuifater*, *stioifater*, *MHG.* *G.* *stiefvater* = *Icel.* *stjüpfadur* = *Sw.* *stjufvader* = *Dan.* *stifvader*), < *steóp*, *step*, + *fæder*, father: see *step*- and *father*.] A man who is the husband of one's mother, but is not one's father.

I schel the telle altogadre,
 Beten Ichaue me *stifadre*.

Beves of Hamtoun, l. 464.

"He was delighted at his mother's marriage." "Odd, for he knew already what a *stepfather* was."

Jean Ingelow, Off the Skelligs, xvii.

step-fault (step'fält), *n.* One of a series of small, nearly parallel faults by which strata have been dislocated so as to occupy a position resembling a series of steps or stairs.

step-gage (step'gāj), *n.* A gage, arranged in the form of steps, for testing and correcting fixed caliper-gages, etc. See *cut* under *gage*.

step-grate (step'grät), *n.* See *grate*.

stephane (stef'a-nē), *n.* [*Gr.* *στέφαν*, the brim of a helmet, a stephane (see *def.*), crown. Cf. *στέφανος*, a wreath, garland, crown: see *stephanos*.] In *Gr. archæol.*, a head-dress or ornament consisting of a band or coronet typically high in the middle, over the brow, and diminishing toward either side of the head. It is characteristic of the goddess Hera, though often represented as worn by other goddesses, as well as by mortals, and is frequently ornamented with an anthemion, as in the example figured on the following page.

stephanial (ste-fä'ni-äl), *a.* [*Gr.* *στέφανιον* + *-äl*.] Of or pertaining to the stephanion: as, a *stephanial* point.

stephanic (ste-fan'ik), *a.* [*Gr.* *στέφανος*, a wreath, crown: see *stephanos*.] Same as *stephanial*.

Hera Ludovisi, wearing Stephane.

The arch of the top of the cranium is markedly flat, giving the *stephanic* region a somewhat angular appearance. *H. O. Forbes*, *Eastern Archipelago*, p. 262.

stephanion (stef-fā'ni-on), *n.*; pl. *stephanion* (-ia). [NL., < Gr. *στεφάνιον*, dim. of *στέφανος*, a wreath: see *stephanos*.] In *craniom.*, the point where the coronal suture crosses the temporal ridge. An upper *stephanion* and a lower are distinguished, corresponding to the upper and lower temporal ridges. See cut under *craniometry*.

stephanite (stef'an-it), *n.* [Named after *Stephan*, Archduke of Austria.] A native sulphid of silver and antimony, a mineral of iron-black color and metallic luster. It crystallizes in the orthorhombic system, and is often pseudo-hexagonal through twinning. Also called *black silver* or *brillie silver ore*.

stephanome (stef'a-nōm), *n.* [For **stephanonome*, < Gr. *στέφανος*, crown (corona), + *μέτρον*, take, *νόμος*, law.] An instrument for measuring the angular dimensions of fog-bows—for example, as observed at mountain observatories. See the quotation.

This instrument, named a *stephanome*, consists of a graduated bar, at one end of which the eye is placed, and in which slides a cross-bar carrying certain projections. With its aid faint objects, for which a sextant would be useless, may be measured to within 5 minutes.

Phil. Mag., 5th ser., XXIX. 454.

Stephanophorus (stef-a-nof'ō-rus), *n.* [NL. (Strickland, 1841), < Gr. *στέφανοφόρος*, < *στέφανος*, crown, + *φέρειν* = E. *bear*.] 1. In *ornith.*, a monotypic Neotropical genus of tanagers, having a short, turgid, almost pyriform bill. *S. leucocephalus* is bluish-black, with the lesser wing-coverts blue, the vertical crest crimson, the hindhead

Stephanophorus leucocephalus.

silky-white, the forehead, lores, and chin black. The length is seven inches. The bird is confined to southern Brazil, Paraguay, Uruguay, and northern parts of the Argentine Republic.

2. In *entom.*, a genus of coleopterous insects. *Chevrolat*, 1873.

stephanos (stef'a-nos), *n.*; pl. *stephanoi* (-noi). [< Gr. *στέφανος*, a wreath, crown, < *στέφειν*, put around, encircle, wreath, crown. Cf. *stemma*.] In *Gr. archæol.*: (a) A wreath awarded as a prize to the victor in a public contest, or as a token of honor, especially in recognition of some public service. Such wreaths

Stephanos (b). Head of Hera on Silver Stater of Elis; 5th century B. C.

were sometimes of natural leaves, as of the olive, laurel, oak, parsley, or pine, and sometimes of leaves of metal, as gold, and their award was a very usual distinction among the Greeks. In this sense very commonly expressed by the translators as 'crown,' as in the famous oration "On the Crown" of Demosthenes. (b) A head-ornament or crown akin to the *stephane*, from which it differs in that it preserves the same height all round, instead of diminishing toward the sides. See cut in preceding column.

Stephanotis (stef-a-nō'tis), *n.* [NL. (Thouars, 1806), so called in allusion to the corona of five flattish petaloid bodies or auricles; < Gr. *στέφανος*, a crown, + *οὖς* (ōr-), ear.] 1. A genus of asclepiadaceous plants, of the tribe *Marsdeniæ*, distinguished from *Marsdenia* by its large white salver-shaped or funnelliform corolla. There are about 14 species, of which 5 are natives of Madagascar, 5 of the Malay archipelago and southern China, 3 of Cuba, and 1 of Peru. They are smooth shrubby twiners, often high-climbing, bearing opposite deep-green fleshy or coriaceous leaves, and beautiful fragrant waxy flowers in umbelliform cymes between the petioles. The cylindrical corolla-tube is dilated at the base and often again at the throat, and spreads into five overlapping oblique lobes. The fruit consists of two thick horizontal follicles, with numerous comose seeds. *S. floribunda* is a favorite evergreen greenhouse climber, commonly known by its generic name *stephanotis*, also as *waxflower*, and sometimes, from its native country, as *Madagascar jasmine* or *chapel-flower*.

2. [*l. c.*] A plant of this genus.

step-ladder (step'lad'ēr), *n.* A ladder having flat steps, or treads, in place of rungs, and usually provided with an adjustable supporting frame.

stepmother (step'muth'ēr), *n.* [ME. *stepmoder*, *stepmodyr*, < AS. *steopmōdor* (= OFries. *stiepmoder* = D. *stiefmoeder* = MLG. *stiefmutter* = OHG. *stiuvmuoter*, MHG. *stiefmuoter*, G. *stiefmutter* = Icel. *stjúpmóðir* = Sw. *stifmoder* = Dan. *stifmoder*), < *steop-*, step-, + *mōdor*, mother.] 1. A woman who is the wife of one's father, but is not one's mother.

No, be assured you shall not find me, daughter,
After the slander of most *stepmothers*,
Evil-eyed unto you. *Shak.*, *Cymbeline*, I. 1. 71.

2. A horny filament shooting up by the side of the nail. *Halliwel*. [Prov. Eng.]-3. The pansy. *Britten and Holland*, Eng. Plant Names. [Prov. Eng.]-**Stepmother's blessing**, a hangnail. *Halliwel*. [Prov. Eng.]

stepmotherly (step'muth'ēr-li), *a.* [< *stepmother* + *-ly*.] Pertaining to or befitting a stepmother; hence, figuratively, harsh or neglectful: in allusion to the behavior popularly attributed to stepmothers.

step-parent (step'pār'ēnt), *n.* A stepfather or stepmother.

steppe (step), *n.* [= F. D. G. Dan. *steppe* = Sw. *stepp*, < Russ. *stept*, a waste, heath, steppe.] A more or less level tract devoid of trees: a name given to certain parts of European and Asiatic Russia, of which the most characteristic feature is the absence of forests. The word *steppe* was introduced into the scientific literature of western Europe by Humboldt, in whose "Ansichten der Natur"—a work widely circulated, and translated into all the most important European languages—there is a chapter entitled "Steppen und Wüsten" (*Steppes and Deserts*). The *steppe* region in Europe begins on the borders of Holland, and extends through northern Germany—where such lands are called *Heiden* (heaths)—into Russia in Europe, and beyond the Ural Mountains almost to the Pacific Ocean, for a distance of about 4,500 miles. Although the *steppes* are in general characterized by the lack of an arboreal and the presence of a grassy vegetation, and by a pretty uniformly level surface, there are many breaks in this botanical and topographical monotony, in the form of forests extending along the streams, large patches of dense and sometimes tall shrubbery, lakes (both fresh and saline), rolling hills, ridges, barren sands, and patches covered with saline efflorescence. The general character of the region is pastoral, and the population (especially of the Asiatic *steppes*) nomadic; but all this has been to a considerable extent interfered with by the spread of Russian civilization and the domination of Russian authority. The Russian and Siberian *steppes* pass southward into the deserts of central Asia, and northward into the tundra region of the extreme north. Humboldt, in the work named above, occasionally uses the term *steppe* in describing the pampas and llanos of South America, and the plains, prairies, and barrens of the northern division of the New World, and his example has been followed to a certain extent by other physical geographers writing in regard to America; but the word *steppe* is nowhere in popular use except as to places where Russian is the dominating language.

Some of the Asiatic *Steppes* are grassy plains; others are covered with succulent, evergreen, articulated soda-plants: many glisten from a distance with flakes of exuded salt which cover the clayey soil, not unlike in appearance to fresh fallen snow.

Humboldt, *Aspects of Nature* (trans.).

Steppe murrain, rinderpest.

stepped (step), *a.* [< *step* + *-ed*.] 1. Formed in or forming a step or a series of steps.—2. Supported, as a vertical shaft, by a step, step-like bearing, or shoe.—**Stepped cone**. Same as *con-*

pulley.—**Stepped gable, gage, gearing**. See the nouns.—**Stepped pyramid**, a form of pyramid of which the faces, instead of continuing in one slope from base to apex,

Stepped Pyramid, Sakkarah, Egypt.

are formed in a more or less even series of enormous steps. Some of the oldest of the Egyptian pyramids present this form.

stepper (step'ēr), *n.* [< *step* + *-er*.] One who or that which steps (with a certain gait or carriage expressed or implied); specifically, a fast horse: often in composition: as, a *high-stepper*; that horse is a *good stepper*.

The mare's a *stepper*, and Phil King knows how to handle the ribbons. *The Century*, XXXVIII. 377.

stepping (step'ing), *n.* 1. Collectively, the steps of a joint in which the parts at their junction form a series of reëntrant angles, thus resembling a flight of steps, as in the fitting of the doors to the front frames of safes.—2. Collectively, a series of step-like bearings, as the bearings for the spindles of a spinning-frame or spooling-machine, or of a ball-winding machine.

stepping-point (step'ing-point), *n.* Same as *bearding*, 1.

stepping-stone (step'ing-stōn), *n.* 1. A raised stone in a stream or in a swampy place designed to save the feet in walking.—2. A horse-block. *Halliwel*. [Prov. Eng.]-3. An aid or means by which an end may be accomplished or an object gained; an assistance to progress.

stepsister (step'sis'tēr), *n.* [ME. *stepsystyr* (= D. *stiefzuster* = MHG. *stiefschwestern* = Sw. *stiftsyster* = Dan. *stiftsoster*); < *step-* + *sis-*.] One's stepfather's or stepmother's daughter by a former marriage.

stepson (step'sun), *n.* [ME. *stepsone*, *stepsune*, < AS. *steopsumu* (= D. *stiefzoon* = MLG. *stiefsone* = OHG. *stiuvsun*, MHG. *stiefsun*, G. *stiefsohn* = Icel. *stjúpson* = Sw. *stifson* = Dan. *stifsohn*), < *steop-*, step-, + *sunu*, son.] A son of one's husband or wife by a former marriage.

step-stone (step'stōn), *n.* Same as *stepping-stone*. [Rare.]

step-vein (step'vān), *n.* In *mining*, a vein filling a fissure, consisting alternately of flats, or horizontal, and steeply inclined or vertical parts, resembling in form a flight of steps.

-ster. [ME. *-ster*, *-stre*, *-cstre*, *-estere*, < AS. *-estre*, used fem. of *-ere*, as in *webbestre*, a female weaver (E. *webster*), *fithelstre*, a female fiddler, *witegestre*, a female prophet, etc.; = D. *-ster*, as in *spinster*, a female spinner (= E. *spinster*), etc., = LL. *-ster*, as in *poetaster* (see *-aster*, *poetaster*, *criticaster*, etc.), also in *oleaster*; < Indo-Eur. *-as* + *-tar*.] A termination denoting occupation, as in *mailster*, *gamester*, *spinster*, *songster*, etc. In the earliest times, and up to about the end of the thirteenth century, it was generally the sign of the feminine gender, corresponding to the masculine *-ere* or *-er*. In the fourteenth century it began to give place as a feminine termination to the Norman *-ess*, with which it was later often combined, as in *seamstress*, *sempstress*, *songstress*, or, if it survived, was used chiefly as masculine, and took on new meanings of contempt or depreciation, as in *trickster*, *gamester*, *punter*, etc., or indicated simple agency or existence, as in *deemster*, *doomster*, *huckster*, *tapster*, *teamster*, *upholder*, *roadster*, *youngster*, etc. Some of the older nouns with this suffix survive as surnames, as *Baxter*, *Webster*, *Sangster*, *Dempster*, etc.

ster. An abbreviation of *sterling*².

steraclet, *n.* [Early mod. E., also *sterracle*, *sterakel*; < ME. *steracle*; origin obscure.] A strange thing, sight, or performance; a prank.

Whan thou art sett upon the pynnaie,
Thou xalt ther pleya a qweynt *steracle*,
Or ellys shewe a grett meracle,
Thysself from hurte thou save.

Coventry Mysteries, p. 208. (*Halliwel*.)

stercobilin (stēr'kō-bil-in), *n.* [L. *stercus* (*stercor*-), dung, + *bilis*, bile, + *-in*.] The brown coloring matter of the feces.

stercoraceous (stēr-kō-rā'shius), *a.* [L. *stercus* (-or-), dung, + *-aceus*.] 1. Pertaining to, composed of, or in any way resembling dung, ordure, or feces; excrementitious; fecal.—2. In *entom.*, frequenting or feeding on dung, as many beetles, flies, etc.—**stercoraceous vomiting**, in *pathol.*, vomiting of fecal matter.

stercoræmia, *n.* See *stercoræmia*.

stercoral (stér'kô-rál), *a.* and *n.* [*L. stercus* (-or-), dung, + *-al*.] *I. a.* Of or pertaining to feces; stercoraceous.

II. n. Dung; excrement.

Stercoranism (stér'kô-rân-izm), *n.* [*L. Stercoran-ist* + *-ism*.] In *eccles. hist.*, the doctrine or belief of the Stercoranists. Also *Stercorianism*, *Stercorarianism*.

Stercoranist (stér'kô-rân-ist), *n.* [= *F. stercoraniste*, *ML. Stercoranistæ*, *L. stercus* (-or-), dung.] A name applied by opponents to various persons in the church who were said to hold a grossly materialistic conception of the Lord's Supper. They were alleged to believe that the Lord's body was like other food consumed, digested and evacuated. The word was first used by Cardinal Humbert in 1054. Also *Stercorianist*, *Stercorarian*.

stercoraceous (stér'kô-râ-rê-us), *a.* Same as *stercoraceous*.

Stercorarian (stér'kô-râ-rî-an), *n.* [*L. stercorarius*, pertaining to dung (< *stercus* (-or-), dung), + *-an*.] Same as *Stercoranist*.

Stercorarianism (stér'kô-râ-rî-an-izm), *n.* [*L. Stercorarian* + *-ism*.] Same as *Stercoranism*.

Stercorariinae (stér'kô-râ-rî-i-nê), *n. pl.* [*NL.*, < *Stercorarius* + *-inae*.] The dung-hunters, a subfamily of *Laridæ*, typified by the genus *Stercorarius*: same as *Lestridinae*. See cuts under *skua* and *Stercorarius*.

Stercorarius (stér'kô-rî-us), *n.* [*NL.* (Brisson, 1760), < *L. stercorarius*, pertaining to dung: see *stercorary*.] The dung-hunters, skuas, or jagers, a genus of *Laridæ*, typical of the subfamily *Stercorariinae*. Also called *Lestris*. The name is used (*a*) for all the species of the subfamily; (*b*) for the larger species, as *S. skua*, the smaller being called *Lestris* (see cut under *skua*); (*c*) for the smaller species, *S.*

Parasitic Jaeger (*Stercorarius parasiticus*).

pomatorhinus, *S. parasiticus*, and others, the larger being called *Buphagus* or *Megalestria*.

stercorary (stér'kô-râ-rî), *a.* and *n.* [*L. stercorarius*, pertaining to dung (*ML. neut. *stercorarium*, a place for dung), < *stercus* (-or-), dung.] *I. a.* Pertaining or relating to dung or manure; consisting of dung. *D. G. Mitchell*, *Wet Days*, p. 17.

II. n.; *pl. stercoraries* (-riz). A place, properly secured from the weather, for containing dung.

stercorate (stér'kô-rât), *v. t.*; *pret.* and *pp. stercorated*, *ppr. stercorating*. [*L. stercoratus*, *pp. of stercorare*, dung, manure, < *stercus* (-or-), dung.] To manure or dung. *Scott*, *Pirate*, iv.

stercorate (stér'kô-rât), *n.* [*L. stercorate*, *v.*] Dung; excrement. *Imp. Dict.*

stercoration (stér'kô-râ-shon), *n.* [*L. stercoratio* (-n-), a dunging or manuring, < *stercorare*, *pp. stercoratus*, dung, manure, < *stercus* (-or-), dung.] The act of manuring with dung. *Evelyn*, *To Mr. Wotton*.

stercoremia, **stercoræmia** (stér'kô-rê-mi-ä), *n.* [*NL. stercoræmia*, < *L. stercus* (-or-), dung, + *Gr. aima*, blood.] Contamination of the blood from retained feces.

Stercorianism, **Stercorianist** (stér'kô-rî-an-izm, -ist). Same as *Stercoranism*, *Stercoranist*.

stercoricolous (stér'kô-rik'ô-lus), *a.* [*L. stercus* (-or-), dung, + *colere*, inhabit.] Inhabiting excrement; dwelling in dung. *Encyc. Brit.*, XIX, 842.

Stercorist (stér'kô-rist), *n.* [*L. stercus* (-or-), dung, + *-ist*.] A Stercoranist.

stercorite (stér'kô-rit), *n.* [*L. stercus* (-or-), dung, + *-ite*.] A hydrous phosphate of ammonium and sodium, found in guano on the island Ichaboe, off the west coast of Africa.

stercory (stér'kô-rî), *n.* [*L. stercus* (-or-), dung.] Excrement; dung. *Mir. for Mags.*, III, 246.

Sterculia (stér'kû-li-ä), *n.* [*NL.* (Linnaeus, 1753), so called from the fetid flowers or fruit of certain species; < *L. Sterculius*, a deity so

named, < *stercus* (*stercor-*), excrement.] *1. A* genus of plants, type of the order *Sterculiaceæ* and of the tribe *Sterculiæ*. It is characterized by a stamen-column usually with fifteen anthers crowded without regular order, a five-celled ovary with two or more

Flowering Branch of *Sterculia platanifolia*. *a*, a male flower; *A*, the same before anthesis; *c*, the stamens; *d*, the fruit.

ovules in each cell, and a fruit of distinct spreading dehiscent carpels. There are about 85 species, natives of warm climates, especially of tropical Asia. They are most commonly large trees, with simple feather-veined leaves, and unisexual flowers in drooping panicles, with a colored bell-shaped calyx, and a fruit of five radiating woody follicles opening on the upper edge; but none of these characters is universal. Their inner bark is composed of a tough fiber which is not affected by moisture, and is in many species a valuable material for cordage, mats, bags, paper, or tow for upholstery. Their seeds are filled with an oil which may be used for lamps, and are slightly acid but often edible. They are mucilaginous, and often exude an abundance of gum resembling gum tragacanth, swelling into a jelly in cold water without dissolving. *S. urens*, and perhaps other species, furnish a share of the Indian tragacanth, or kutera gum; *S. Tragacantha* of western Africa yields the African gum; *S. acerrifolia* of New South Wales, a large tree sometimes 80 feet high and 8 feet in girth, with large lobed leaves and racemes of showy red flowers, is known as *flame-tree*, and also as *lacebark* from its beautiful lace-like inner bark, which becomes 2 inches thick and is valued for many uses. *S. diversifolia*, the Victorian bottle-tree, or currlong, is a stout tree with coarser fiber: for the similar *S. rupestris*, see *bottle-tree*, and for *S. villosa*, see *oadal*. *S. lurida*, the sycamore of New South Wales, also yields a fiber, there made into fancy articles. *S. quadrifida*, the calool of eastern and northern Australia, produces clusters of brilliant scarlet fruits, each with ten or eleven black seeds resembling filberts in taste, and eaten as a substitute for them. *S. Carthaginensis* (*S. Chicha*), the chicha or panama, yields seeds eaten as nuts in Brazil and northward; it is a handsome tree with yellowish purple-spotted flowers. *S. foetida* (see *stave-wood*) is the source of some native remedies in Java. *S. alata* has been called *Buddha's cocoonut*; *S. platanifolia* of Japan and China, *sultan's parasol*. See *mahoe* and *assoumba*.

2. In entom., a genus of coleopterous insects. *Laporte*, 1835.

Sterculiaceæ (stér'kû-li-ä-sê-ë), *n. pl.* [*NL.* (Ventenat, 1799), < *Sterculia* + *-aceæ*.] An order of polypetalous plants, of the cohort *Malvales*, intermediate between the two orders *Malvaceæ* and *Tiliaceæ*, resembling the former in its variety of habit and foliage and its frequently monadelphous stamens, and the latter in its two-celled anthers. It includes about 730 species, belonging to 49 genera, classed in 8 tribes, natives mostly of the tropics, or occurring further to the south in Africa and Australia.

sterculiaceous (stér'kû-li-ä-shius), *a.* Of or pertaining to the plant-order *Sterculiaceæ*.

sterculiad (stér'kû-li-äd), *n.* A plant of the order *Sterculiaceæ*. *Lindley*.

Sterculiæ (stér'kû-li-ä-ë), *n. pl.* [*NL.* (A. P. de Candolle, 1824), < *Sterculia* + *-ææ*.] A tribe of plants, of the order *Sterculiaceæ*. It is characterized by unisexual or polygamous flowers without petals, commonly with a colored calyx, and five to fifteen anthers adnate at the summit of a long or short column of united filaments, and either crowded or arranged in a definite series or a ring. It includes 8 genera, of which *Sterculia* is the type. They are natives mostly of tropical Asia and Africa, extending into Australia and Java. See *Sterculia*.

stere¹. A Middle English form of *steer¹*, *steer²*, *stir¹*, *stoor²*.

stere² (stär), *n.* [= *F. stère*, < *Gr. στερεός*, solid, cubic; prob. < *√ stu* as in *istavai*, stand.] A cubic meter: the French unit for solid measure, equal to 35.31 cubic feet. The word *stère* is but little used, except with reference to cordwood, *cubic meter* being the expression in universal use for the solid unit.

Sterelmintha (ster-el-min'thā), *n. pl.* [*NL.*, irreg. < *Gr. στερεός*, stiff, hard, solid, + *ἐλμινς* (él-

μινθ-), a worm.] The parenchymatous endoparasitic worms, having no intestinal canal. They formed one of two main divisions, the other being *Cestelmintha*, into which the *Entozoa* were divided by Owen in 1843, corresponding to the parenchymatous intestinal worms or *vers intestinaux* of Cuvier. They are such as the cestoid and trematoid worms, or tapes and flukes.

sterelminthic (ster-el-min'thik), *a.* [*L. Sterelmintha* + *-ic*.] Of or pertaining to the *Sterelmintha*.

sterelminthous (ster-el-min'thus), *a.* Same as *sterelminthic*.

stereo- (stér'ë-ô, also, especially in trade use, stê'rê-ô). An element of Greek origin, meaning 'solid.'

stereo (stér'ë-ô), *n.* and *a.* [Short for *stereotype*.] Same as *stereotype*: as, a stereo plate; stereo apparatus.

stereobate (stér'ë-ô-bât), *n.* [= *F. stéréobate*, < *Gr. στερεός*, solid, firm, + *βάτος*, verbal adj. of *βαίνω*, go, step: see *base²*.] In arch., the substructure, foundation, or solid platform upon which a building is erected. In columnar

Stereobate of the Parthenon, east front (illustrating the convex curvature of the best Greek Doric temple-foundations).

buildings it includes the *stylobate*, which is the uppermost step or platform of the foundation upon which the column stand.

stereobatic (stér'ë-ô-bat'ik), *a.* [*L. stereobate* + *-ic*.] Of, pertaining to, or resembling a stereobate; of the character of a stereobate. *Encyc. Brit.*, II, 408.

stereoblastula (stér'ë-ô-blas'tû-lä), *n.*; *pl. stereoblastulæ* (-lê). [*NL.*, < *Gr. στερεός*, solid, + *βλαστός*, a germ.] A solid blastula; a blastula in which there is no cavity. *J. A. Ryder*.

stereochrome (stér'ë-ô-krôm), *n.* [*L. Gr. στερεός*, solid, + *χρῶμα*, color.] A stereochromatic picture. See *stereochromy*.

stereochromic (stér'ë-ô-krô'mik), *a.* [*L. stereochrom-y* + *-ic*.] Of or pertaining to stereochromy; produced by stereochromy.—**Stereochromic process**, the method of painting by stereochromy.

stereochromy (stér'ë-ô-krô-mi), *n.* [*L. Gr. στερεός*, solid, + *χρῶμα*, color.] A method of painting in which water-glass serves as the connecting medium between the color and its substratum.

stereo-clumps (stér'ë-ô-klumps), *n. pl.* [*L. stereo* + *clump*.] Sectional blocks of type-metal or wood, usually three fourths of an inch high, made of different sizes so that they can be combined to fit and uphold any size of stereotype plate. When clamps are added, they keep the plate secure in the process of printing. [*Eng.*]

stereo-electric (stér'ë-ô-ëlek'trik), *a.* [*L. Gr. στερεός*, solid, + *E. electric*.] Noting the electric current which ensues when two solids, especially two metals, as bismuth and antimony, are brought together at different temperatures.

stereogastrula (stér'ë-ô-gas'trô-lä), *n.*; *pl. stereogastrulæ* (-lê). [*NL.*, < *Gr. στερεός*, solid, + *NL. gastrula*, *q. v.*] A solid gastrula; a form of gastrula in which no cleavage-cavity is developed. *J. A. Ryder*.

Stereognathus (stér'ë-ôg'nâ-thus), *n.* [*NL.* (Charlesworth, 1854), < *Gr. στερεός*, solid, + *γνάθος*, jaw.] A genus of fossil mammals of problematical character from the Lower Oolite of Oxfordshire, England, later identified with *Microlestes*. The original fossil was named *S. ooliticus*.

stereogram (stér'ë-ô-gram), *n.* [*L. Gr. στερεός*, solid, + *γράφω*, a writing, < *γράφειν*, write: see *gram²*.] A diagram or picture which represents objects in such a way as to give the impression of relief or solidity; specifically, a double photographic picture or a pair of pictures mounted together for the stereoscope; a stereoscopic picture.

stereograph (stér'ë-ô-gráf), *n.* [*L. Gr. στερεός*, solid, + *γράφω*, write.] Same as *stereogram*.

stereographic (stér'ë-ô-gráf'ik), *a.* [= *F. stéréographique*; as *stereograph-y* + *-ic*.] Showing the whole of a sphere on the whole of an

infinite plane, while preserving the angles.—

Stereographic map-projection. See *projection*.

stereographical (ster'ē-ō-graf'i-kāl), *a.* [*< stereographic + -al.*] Same as *stereographic*.

stereographically (ster'ē-ō-graf'i-kāl-i), *adv.* In a stereographic manner; by delineation on a plane.

stereography (ster'ē-ō-gra-fi), *n.* [= *F. stéréographie*, *< Gr. στερεός*, solid, + *-γραφία*, *< γράφειν*, write.] The art of delineating the forms of solid bodies on a plane; a branch of solid geometry which demonstrates the properties and shows the construction of all solids which are regularly defined.

Stereolepis (ster'ē-ol'e-pis), *n.* [NL. (Ayres, 1859), *< Gr. στερεός*, solid, + *λεπίς*, a scale.] 1. A genus of serranoid fishes of enormous size in comparison with related forms. *S. gigas*, the jew-fish or black sea-bass of the Californian coast, reaches a

Jew-fish (*Stereolepis gigas*).

length of 5 feet. It is brownish or greenish-black with large black blotches, most evident in the young.

2. [*l. c.*] A fish of this genus.

stereome (ster'ē-ō-m), *n.* [*< Gr. στερεωμα*, a solid body, *< στερεός*, solid.] In *bot.*, a name proposed by Schwendener for those elements which impart strength to a fibrovascular bundle. Compare *metome*.

stereometer (ster'ē-ō-m'e-tēr), *n.* [*< Gr. στερεός*, solid, + *μέτρον*, a measure.] 1. An instrument for measuring the solid capacity of a vessel.—2. An instrument for determining the specific gravity of liquids, porous bodies, etc.

stereometry (ster'ē-ō-m'e-trik), *a.* [*< stereometrie*, *< Gr. στερεός*, solid, cubic, + *-μετρία*, *< μέτρον*, measure.] 1. The art of measuring volumes.—2. The metrical geometry of solids.—3. The art or process of determining the specific gravity of liquids, porous bodies, powders, etc.

stereometrical (ster'ē-ō-met'ri-kāl), *a.* [*< stereometric + -al.*] Same as *stereometric*.

stereometrically (ster'ē-ō-met'ri-kāl-i), *adv.* By or with reference to stereometry.

stereometry (ster'ē-ō-m'e-tri), *n.* [= *F. stéréométrie*, *< Gr. στερεός*, solid, cubic, + *-μετρία*, *< μέτρον*, measure.] 1. The art of measuring volumes.—2. The metrical geometry of solids.—3. The art or process of determining the specific gravity of liquids, porous bodies, powders, etc.

stereo-mold (ster'ē-ō-mōld), *n.* [*< stereo + mold*.] A mold used in stereotyping.

stereomonoscope (ster'ē-ō-mon'ō-skōp), *n.* [*< Gr. στερεός*, solid, + *μόνος*, single, alone, + *σκοπεῖν*, view.] An instrument with two lenses for exhibiting on a screen of ground glass a single picture so as to give it all the effect of solidity.

stereoneural (ster'ē-ō-nū'ral), *a.* [*< Gr. στερεός*, solid, + *νεῦρον*, a nerve.] Having the nervous center, if any, solid.

stereoplasma (ster'ē-ō-plaz'm), *n.* [*< NL. stereoplasma*, *< Gr. στερεός*, solid, + *πλάσμα*, anything molded or formed; see *plasm*.] 1. In corals, a delicate endothelial structure occupying different positions in the corallite, often forming vertical processes in the interseptal loculi or encircling septa, or acting as true endotheca. This substance, which connects septa (envirning their free edges in some paleozoic corals), stretches across interseptal loculi irregularly, and sometimes fills up the lower part of the inside of the corallum, constituting a solid mass there. It is to be distinguished from the true endotheca.

2. In *bot.*, same as *stereoplasma*.

stereoplasma (ster'ē-ō-plas'mā), *n.* [NL.: see *stereoplasma*.] 1. Same as *stereoplasma*, 1. *Lindström*.—2. In *bot.*, a term proposed by Naegeli for the solid part of protoplasm. Compare *hygroplasma*.

stereoplastic (ster'ē-ō-plaz'mik), *a.* [*< stereoplasma + -ic.*] Of the nature of or formed by stereoplasma; consisting of that substance.

stereopticon (ster'ē-ōp'ti-kon), *n.* [*< Gr. στερεός*, solid, + *οπτικός*, pertaining to seeing or sight; see *optic*.] An improved form of magic lantern, consisting essentially of two complete lanterns matched and connected. The object of the reduplication is to permit the pictures shown to pass from one to the next by a sort of dissolving effect which is secured by alternate use of the two lenses, and at the same time to avoid the delay or the unpleasant sliding of the pictures across the field in view of the audience, but imperfectly avoidable when the simple magic lantern is used. The two lanterns may be either superposed or

Double-tier Stereopticon.

A, A', tubes containing objectives; B, B', covers for condensers; C, C', collapsible bellows fronts of the lanterns, which are mounted one above the other and hinged together at the rear standards (as shown at D) to provide for the elevation or depression necessary to bring the views on the screen into exact superposition; E, E', line-light boxes, one of the lime-cylinders P and oxyhydrogen jets G being shown in the upper box, a part of which is removed; H, oxygen-holder; I, hydrogen-holder; J, J', flexible tubes for separately conveying these gases to the burners and mixing them only as they are needed to supply light; L, set-screw for elevating or depressing; M, milled heads of shaft operating gear for extending or shortening the lens-tubes A, A' in adjustment of the focus; N, openings for insertion of slides, with inclined bottoms for insuring exact position.

placed side by side. Some forms of stereopticon are made with three lanterns. See *triplexicon*.

stereoscope (ster'ē-ō-skōp), *n.* [= *F. stéréoscope*, *< Gr. στερεός*, solid, + *σκοπεῖν*, view.] An optical instrument illustrating the phenomena of binocular vision, and serving to produce from two nearly similar pictures of an object the effect of a single picture with the appearance of relief and solidity belonging to ordinary vision. It depends upon the fact that in ordinary vision, while the respective images of an object formed upon the retinas of the two eyes differ slightly because of the divergence of the rays from each point of the object, yet the effect upon the brain is that of a single object seen in perspective relief which the monocular image lacks. The slide of the stereoscope shows two pictures side by side taken under a small difference of angular view, each eye looking upon one picture only; thus, as in ordinary vision, two images are conveyed to the brain which unite into one, exhibiting the objects represented under a high degree of relief. A reflecting form of stereoscope was invented by Sir Charles Wheatstone in 1838. Subsequently Sir David Brewster invented the lenticular or refracting stereoscope, based on the refractive properties of semi-double-convex lenses. This is the one now in general use. There are many forms of it, one of which is shown in the figure. The action is illustrated by

the diagram beneath. The light-rays from corresponding points of the two pictures P and P' are refracted in passing through the lenses L, L', and their directions changed so that they now seem to the eyes E, E' to diverge from a common point A beyond the plane of the card. By special effort a skilled observer can combine stereoscopic pictures into one without the use of the instrument, each eye being directed to one picture only and (to produce the normal stereoscopic effect) the one on its own side; the process may be facilitated by interposing a card screen between the pictures so that, for example, the left picture is entirely cut off from the right eye, etc. If the eyes are crossed so that the right eye sees the left picture and the left eye the right only, and the images combined by special effort, the usual stereoscopic effect is reversed—a convex surface becomes concave, etc. A similar pseudoscopic result is obtained with the ordinary stereoscope if the positions of the two pictures are exchanged.

stereoscopic (ster'ē-ō-skōp'ik), *a.* [= *F. stéréoscopique*; as *stereoscope + -ic*.] Of, pertaining to, or resembling the stereoscope; adapted to the stereoscope; having the form in relief, or proper perspective, as of an object seen in the stereoscope: as, *stereoscopic pictures*; *stereoscopic views*.—**Stereoscopic camera, diagrams, projection.** See the nouns.

stereoscopical (ster'ē-ō-skōp'i-kāl), *a.* [*< stereoscopic + -al.*] Same as *stereoscopic*.

stereoscopically (ster'ē-ō-skōp'i-kāl-i), *adv.* By or as by a stereoscope.

stereoscopist (ster'ē-ō-skōp'ist), *n.* [*< stereoscope + -ist.*] One versed in the use or manufacture of stereoscopes.

stereoscopy (ster'ē-ō-skō-pi), *n.* [= *F. stéréoscopie*, *< Gr. στερεός*, solid, + *-σκοπία*, *< σκοπεῖν*, view.] The use or construction of stereoscopes.

stereotomic (ster'ē-ō-tom'ik), *a.* [*< stereotom-y + -ic.*] Pertaining to or performed by stereotomy.

stereotomical (ster'ē-ō-tom'i-kāl), *a.* [*< stereotomic + -al.*] Same as *stereotomic*.

stereotomy (ster'ē-ō-tō-mi), *n.* [= *F. stéréotomie*, *< Gr. στερεός*, solid, + *-τομία*, *< τέμνειν*, turn, cut.] The science or art of cutting solids into certain figures or sections.

stereotrope (ster'ē-ō-trōp), *n.* [*< Gr. στερεός*, solid, + *τροπή*, a turning, *< τρέπειν*, turn.] An instrument by which an object is perceived as if in motion and with an appearance of solidity or relief as in nature. It consists of a series of stereoscopic pictures, generally eight, of an object in the successive positions it assumes in completing any motion, affixed to an octagonal drum revolving under an ordinary lenticular stereoscope, and viewed through a solid cylinder pierced in its entire length by two apertures, which makes four revolutions for one of the picture-drum. The observer thus sees the object constantly in one place, but with its parts apparently in motion and in solid and natural relief.

stereotype (ster'ē-ō-tīp), *n.* and *a.* [= *F. stéréotype*, *< Gr. στερεός*, fixed, + *τύπος*, impression, type; see *type*.] 1. The duplicate, in one piece of type-metal, of the face of a collection of types composed for printing. Three processes are used. (a) The plaster process, in which a mold taken from the composed types in fluid plaster of Paris is baked until dry, and is then submerged in melted type-metal. The cast taken in this mold, when cooled, is shaved to proper thickness, making the stereotype plate. (b) The clay process, in which the mold, taken by a press on a prepared surface of stiff clay, is

A, Stereotype Founding Apparatus. B, Stereotype Plates from the mold. a, furnace by which the water-jacketed mold *b* is uniformly heated. The mold is supported on the frame *d* and on the rollers *f*; the parts of the mold are held together by a clamping screw *c*; the water is supplied to the water-jacket through the funnel *e*. In pouring the metal, the mold is placed in position shown in dotted outline.

baked until dry, and filled by pouring into it fluid metal. (c) The papier-mâché process, in which the mold is made by covering the type with a preparation of paper-pulp and clay, which is beaten into the interstices of the type-surface by a stiff brush. This mold when baked by steam-heat is put in a casting-box, which is filled with melted metal. This is the rudest but quickest process. Stereotypes for daily newspapers are usually made in fifteen minutes. For newspaper-work the plates for rotary presses are molded and cast with a curved surface that fits them to the impression-cylinder. The practice of stereotyping is now confined to newspapers and the cheaper forms of printed work. Plates of books, woodcuts, and the finer forms of printing are now made by the electrolyte process. (See *electrotype*.) Stereotype plates were first made, but imperfectly, by William Ged, at Edinburgh, in 1725. The plaster process, which was the first to become popular, was invented by Willdon and Lord Stanhope in 1810.

2. Loosely, an electrolyte.—3. The art of making plates of fixed metallic types; the process of producing printed work by means of such plates.

II. *a.* Of or pertaining to stereotype, or stereotyping, or stereotype printing: as, *stereotype work*; *stereotype plates*.

stereotype (ster'ē-ō-tīp), *v. t.*; pret. and pp. *stereotyped*, ppr. *stereotyping*. [*< stereotype, n.*]

1. To cast a stereotype plate from: as, to *stereotype* a page or a form.—2. To prepare for printing by means of stereotype plates: as, to *stereotype* the New Testament.—3. To fix or establish firmly or unchangeably.

If men cannot yet entirely obey the law, . . . it does not follow that we ought therefore to *stereotype* their incompetency, by specifying how much is possible to them and how much is not.

H. Spencer, *Social Statics*, p. 506.

stereotype-block (ster'ē-ō-tīp-blok), *n.* A block of iron or of hard wood, bound with brass, about three fourths of an inch high, on which a stereotype plate is fixed for use.

stereotyped (ster'ē-ō-tīpt), *p. a.* 1. Made or printed from stereotype plates.—2. Formed in an unchangeable manner; fixed; set: as, *stereotyped opinions*.

The entablatures show considerable progress, but the capitals were so *stereotyped* that it is evident, if any Greek or Roman artists had designed capitals in Gandhara during the period just alluded to, we could predicate exactly what they would have been.

J. Ferguson, *Hist. Indian Arch.*, p. 178.

stereotype-metal (ster'ē-ō-tīp-met'al), *n.* An alloy for stereotype plates; type-metal.

stereotyper (ster'ē-ō-tī-pēr), *n.* [*< stereotype + -er*.] One who stereotypes, or who makes stereotype plates.

stereotypery (ster'ē-ō-tī'pēr-i), *n.* [*< stereotype + -ery.*] 1. The art or work of making stereotype plates.—2. Pl. *stereotyperies* (-iz). A place where stereotype plates are made; a stereotype foundry.

stereotypic (ster'ē-ō-tī'pik), *a.* [*< stereotype + -ic.*] Of or relating to stereotype or stereotype plates.

stereotyping (ster'ē-ō-tī'ping), *n.* The art, act, or process of making stereotypes.—**Paper process of stereotyping.** See *paper*.

stereotypist (ster'ē-ō-tī'pist), *n.* [*< stereotype + -ist.*] One who makes stereotype plates; a stereotyper.

stereotypographer (ster'ē-ō-tī'pog'ra-fēr), *n.* [*< stereotypograph + -er.*] A stereotype-printer.

stereotypography (ster'ē-ō-tī'pog'ra-fī), *n.* [*< Gr. στερεός, fixed, + E. typography.*] The art or practice of printing from stereotype. *Imp. Dict.*

stereotypy (ster'ē-ō-tī'pi), *n.* [= *F. stéréotypie*; as *stereotype* + *-y*.] The art or business of making stereotype plates.

sterhydraulic (stēr-hi-drā'lik), *a.* [*Irreg. < Gr. στερεός, solid, + E. hydraulic.*] Pertaining to or having an action resembling that of a sterhydraulic press. See the phrase.—**Sterhydraulic press**, a peculiar form of hydraulic press in which pressure is generated in a hydraulic cylinder by the displacement of a part of the contained liquid through the entrance into its mass of a rod working through a stuffing-box, a screw working in a packed nut, or in some cases a rope wound upon a barrel in the inclosure and pulled into it through a packed hole, the shaft of the winding-barrel or -drum also extending through a stuffing-box in the side of the cylinder, and fitted on the exterior with a winch or a driving-wheel. Of these forms that using a screw is the simplest and best.

sterigma (stēr-ig'mā), *n.*; pl. *sterigmata* (-ma-tā). [*NL., < Gr. στήριγμα, a prop, support, < στήριξις, prop.*] In *bot.*, a stalk or support of some kind: a term of varying application. (a) Same as *basidium*. (b) The stalk-like branch of a basidium which bears a spore. (c) The footstalk of a spore, especially of a spore of minute size. (d) The cell from which a spermatium is cut off. (e) A ridge or foliaceous appendage proceeding down the stem below the attachment of a decurrent leaf.

sterigmatic (ster-ig-mat'ik), *a.* [*< sterigma + -ic.*] In *bot.*, resembling, belonging to, or of the nature of a sterigma.

sterile, *a.* An obsolete spelling of *sterile*.

sterile (ster'il), *a.* [Formerly also *steril*; *< F. stérile* = Sp. Pg. *esteril* = It. *sterile*, *< L. sterilis*, unfruitful, barren; cf. Gr. *στερεός*, stiff, hard, solid, *στερής*, hard, unfruitful, barren.] 1. Unfruitful; unproductive; not fertile.

Indeed it goes so heavily with my disposition that this goodly frame, the earth, seems to me a *sterile* promontory. *Shak., Hamlet*, II. 2. 310.

It is certain that in *sterile* years corn sown will grow to an other kinde. *Bacon, Nat. Hist.*, § 225.

2. Barren; not reproducing its kind.

She is grown *sterile* and barren, and her births of animals are now very inconsiderable.

Dr. H. More, Antidote against Atheism.

3. In *bot.*, of a flower, producing only stamens—that is, staminate or male (compare *neutral*); of a stamen, having no anther, or a functionless one; of an anther, without pollen; of an ovary, without perfect seeds; of a seed, without an embryo; of a frond, without sori. See cuts under *Unioleae*, *Ophioglossum*, *sassafras*, and *smoke-tree*.

4. Free from living germs.

I at first suspected that the biologically *sterile* tube might not be chemically clean. *Medical News*, XLIX. 400.

5. Leading to no results; fruitless; profitless; useless.

I will endeavour that the favour conferred on me rest not *sterile*. *Abbé Mann, in Ellis's Lit. Letters*, p. 431.

6. Lacking richness of thought or expression; bald; bare: as, a *sterile* style; *sterile* verse.—**Sterile wood**, a shrub or small tree, *Coprosma fetidissima*, of the *Rubiaceae*, found in New Zealand. It is extremely fetid when drying, though inodorous when alive and growing.

sterilisation, sterilise, etc. See *sterilization*, etc.

sterility (ste-ri'l'i-ti), *n.* [*< F. stérilité* = Sp. *esterilidad* = Pg. *esterilidad* = It. *sterilità*, *< L. sterilitas* (t-s), unfruitfulness, barrenness, *< sterilis*, barren, sterile: see *sterile*.] The state or character of being sterile. (a) Lack of fertility; unproductiveness; unfruitfulness, as of land, labor, etc.

For the Soil of Spain, the Fruitfulness of their Vallies recompences the *Sterility* of their Hills.

Howell, Letters, I. iii. 32.

(b) Lack of fecundity; barrenness: said of animals or plants.

Suspend thy purpose, if thou didst intend
To make this creature fruitful!
Into her womb convey *sterility*!

Shak., Lear, I. 4. 300.

(c) Fruitlessness; profitlessness.

The truthness of this formula is only equalled by its *sterility* for psychological purposes.

W. James, Prin. of Psychol., I. 551.

(d) Deficiency in ideas, sentiments, or expression; lack of richness or luxuriance, as in literary style; poverty; baldness; meagerness.

He had more frequent occasion for repetition than any poet; yet one cannot ascribe this to any *sterility* of expression, but to the genius of his times, which delighted in these reiterated verses. *Pope, Essay on Homer.*

sterilization (ster'il-i-zā'shon), *n.* [*< sterilize + -ation.*] The act or operation of making sterile; specifically, the process of freeing from living germs. Also spelled *sterilisation*.

Sterilization of cow's milk must and will be a most valuable preventive of summer diarrhoea.

Medical News, LIII. 12.

sterilize (ster'il-iz), *v. t.*; pret. and pp. *sterilized*, ppr. *sterilizing*. [= *F. stériliser* = Sp. Pg. *esterilizar*; as *sterile* + *-ize*.] To render sterile or unproductive in any way; specifically, in bacteriology, to render free from living germs, as by heating or otherwise. Also spelled *sterilise*.

No, no—such wars do thou, Ambition, wage!
Go *sterilize* the fertile with thy rage!
Whole nations to depopulate is thine.

Savage, Public Spirit.

Prof. Tyndall found that he could not *sterilize* an infusion of old hay . . . without boiling it continuously for several hours.

W. B. Carpenter, Micros., § 309.

sterilizer (ster'il-i-zēr), *n.* [*< sterilize + -er.*] One who or that which sterilizes; especially, any apparatus for rendering substances free from living germs, as by means of heat. Also spelled *steriliser*.

sterkt. An old spelling of *stark*¹, *stirk*.

sterlet (stēr'let), *n.* [*< F. sterlet* = Dan. *sterlet* = Sw. *sterlett*, *< G. sterlet*, *< Russ. sterlyadi*, a sterlet.] A species of sturgeon, *Acipenser ruthenus*. It is of small size and slender form, with a long sharp snout and fringed barbels, and from sixty to seventy lateral shields. It rarely reaches a length of two

Sterlet (*Acipenser ruthenus*).

feet, and is generally not more than a foot long. It inhabits the Black Sea, Sea of Azof, Caspian Sea, and the rivers of Asiatic Russia, as well as certain rivers of Siberia. It is highly esteemed for its flavor, and its roe makes a superior caviar. Compare also cuts under *Acipenser*.

Sterletus (stēr'le-tus), *n.* [*NL. (Rafinesque, 1820), < F. sterlet, < Russ. sterlyadi, sterlet*: see *sterlet*.] A genus of sturgeons, the type of which is the sterlet, having the spines of the dorsal shield posterior, no stellate plates, and the lip emarginate.

sterling¹, *n.* An obsolete form of *starling*¹.

sterling² (stēr'ling), *n.* and *a.* [*< ME. sterling, steringe, sterynge, starling*, the coin so called; cf. D. *sterling* = Sw. Dan. *sterling*, *sterling* (as in mod. E. use) = Icel. *sterlingr*, a sterling (the English coin so called), = MHG. *sterline*, *sterline* (-ling), a coin so called, G. *sterling* (as in mod. E. use); = OF. *esterlin*, a sterling (the English coin so called), *sterlin*, *esterlin*, *estellin*, *estelin*, a weight of twenty-eight grains (of gold), the twentieth part of an ounce, = Sp. Pg. *esterlino*, in *libra sterlinga*, a pound sterling, = It. *sterlino*, in *libra sterlinga*, a pound sterling, also as a noun, *sterlino*, sterling coin, standard rate (of coin); ML. *sterlingus*, *sterlingum*, *sterlinus*, *stellinus*, *stelligus*, *sterlingus*, *sterlingus*, *esterlingus*, *estrilingus*, a sterling (the English coin so called), also a weight of twenty-eight grains, the twentieth part of an ounce; all *< E.*, unless, as Kluge asserts, the E. itself (and so in part the OF. and ML.) is *< MHG. sterline*, *sterline* (-ling), which is then *< sterl-* or *ster-*, origin unknown, + *-ing*³ or *-ling*¹ as in *shilling*, *farthing* (AS. *feorthing*, *feorhtling*), *penny* (AS. *pening*, etc.). In this view the word must have been introduced into ME. use by the Hanse merchants in London, who, according to the story, first stamped the coin in England. The accepted statement is that these merchants were called *Easterlings* as coming from "the east parts of Germany" (Camden), and that the coin received its name from them; but the similarity appears to be accidental, and the statement, besides other deficiencies, fails to explain the MHG. name, which could not have meant 'Easterling.' It seems more probable that the MHG. word is, like the rest, derived from the ME. word, which must then be due, in spite of unexplained difficulties, to *Easter-*

ling, or else is derived, as asserted in a statement quoted by Minshieu from Linwood, from the figure of a starling (ME. *sterling*) at one time engraved on one quarter of the coin so called: see *starling*¹. Historical evidence of the truth of this assertion is as yet lacking.] I. *n.* 1. A silver coin struck by English (and Scottish) kings from the time of Richard I. (1190).

Faste comen out of halle
And shoken nobles and *sterlings*.
Chaucer, House of Fame, I. 1315.

The oldest pieces [of the coinage of Scotland] are silver pennies or *sterlings*, resembling the contemporary English money, of the beginning of the 12th century.

Encyc. Brit., XVII. 656.

2. English money. [Rare.]

And Roman wealth in English *sterling* view. *Arbutnot.*

II. *a.* 1. Of fixed or standard national value; conforming to the national standard of value: said of English money, and, by extension, of the precious metals: as, a pound *sterling*; a shilling *sterling*. Abbreviated *ster.*, *stg.*

In the Canon Law mention is made of 5 shillings *sterling*, and a merke *sterling*, cap. 3. de Arbitris, & c. constitut. 12. de procurator.

When a given weight of gold or silver is of a given fineness, it is then of the true standard, and called *sterling* or *sterling* metal.

I lost between seven and eight thousand pounds *sterling* of your English money. *J. S. Le Fanu, Dragon Volant*, v.

2. Of acknowledged worth or influence; authoritative.

If my word be *sterling* yet in England,
Let it command a mirror hither straight,
That it may show me what a face I have.

Shak., Rich. II., IV. 1. 264.

3. Genuine; true; pure; hence, of great value or excellence.

His *sterling* worth, which words cannot express,
Lives with his friends and their distress.

Crabbe, Works, II. 27.

I might recall other evidence of the *sterling* and unusual qualities of his public virtue.

R. Choate, Addresses, p. 321.

sterling³ (stēr'ling), *n.* See *starling*².

Sterling's formula. See *formula*.

stern¹ (stēr'n), *a.* [*< ME. stern, sterin, sterne, sturne, < AS. styrn*, severe, austere, stern (also in comp. *stýrn-mōd*, stern-minded); akin to OHG. *stornēn*, be astonished, *sturni*, stupor; perhaps related to OHG. *storrēn*, MHG. *storren*, stand out, project, = Goth. **staurran*, in comp. *and-staurran*, murmur against, also to D. *stuursch*, stern, = Sw. *stursk*, refractory, and to Icel. *stúra*, gloom, despair, *stúra*, mope, fret.] 1. Severe in disposition or conduct; austere; harsh; rigorous; hard.

No Man was more gentle where there was Submission;
where Opposition, no Man more *stern*.

Baker, Chronicles, p. 132.

And *sterner* hearts alone may feel
The wound that time can never heal.

Byron, The Giaour.

2. Characterized by severity or rigor; especially, resulting from or expressive of harshness: as, a *stern* reply; a *stern* glance; a *stern* rebuke.

He herd their strakes, that war ful *stern*.
Ywaine and Gawayn, I. 3219. (*Halliwel.*)

If wolves had at thy gate howl'd that *stern* time,
Thou shouldst have said, "Good porter, turn the key."

Shak., Lear, III. 7. 63.

Gods and men
Fear'd her *stern* frown. *Milton, Comus*, I. 446.

3. Grim or forbidding in aspect; gloomy; repelling.

In passing through these *stern* and lofty mountains,
their path was often along the bottom of a baranco, or deep rocky valley.

Irving, Granada, p. 88.

4. Rough; violent; tumultuous; fierce.

The werre wox in that wondrously *stern*.

Aliaunder of Macedoine (E. E. T. S.), I. 337.

Those *stern* waves, which like huge mountains roll.

Drayton, Polyolbion, I. 435.

5. Rigid; stringent; strict.

Subjected to *stern* discipline by the rigid enforcement of uniform motives.

Maudsley, Body and Will, p. 8.

6. Stout; strong; heavy.

The hamur bothe *sterne* and gret
That drof the nayles thorow hond and fete.

Holy Rood (E. E. T. S.), p. 184.

Of bak & of brest al were his bodi *sterne*.

Sir Gawayne and the Green Knight (E. E. T. S.), I. 143.

7. Firm; unyielding; inflexible; hard.

When that the poor have cried, Caesar hath wept:
Ambition should be made of *sterner* stuff.

Shak., J. C., III. 2. 97.

The sterner sex. See *sex*¹. = Syn. 1. *Severe, Harsh, Strict*, etc. See *austere*.—1 and 2. Unrelenting, uncompromising, inflexible.

stern² stérn, *n.* [*< ME. sterne, steerne, steorne* (not found in AS., where only *stéor*, a rudder, appears: see *steer*¹, *n.*) = *OFries. stiorne, stiarne*, a rudder, = *Icel. stjörn*, a steering, steerage, rudder; with formative *-n*, from the root of AS. *stéor*, E. *steer*, etc., a rudder: see *steer*¹, *n.* and *v.*] 1†. The rudder or helm of a vessel.

stern² (stérn), *v.* [*< stern*², *n.*] I. *trans.* 1†. To steer; guide.

Hulke tower . . . is a notable marke for pilots, in directing them which wale to *sterne* their ships, and to eschew the danger of the craggle rocks.
Stanihurst, Descrip. of Ireland, iii. (Holinshed.)

2. To back (a boat) with the oars; back water; row backward.—**Stern all! stern hard!** orders to back water given by the officer of a boat to the crew. Also simply *stern*!

II. *intrans.* To draw back; back water: said of a boat or its crew.

Meantime Mr. Norton, the mate, having struck the fast whale, he and the second mate *sterned* off to wait for the whale to get quiet.
Fisheries of U. S., v. ii. 273.

stern³ (stérn), *n.* Same as *stern*¹.
stern⁴ (stérn), *n.* [A var. of *tern*: see *tern*, and *cf. Sterna*.] A tern.

Sterna (stér'nā), *n.* [NL. (Linnæus, 1758), appar. based on E. *tern*.] A Linnean genus of *Laridæ*, typical of the subfamily *Sterninæ*, and containing all the terns or sea-swallows, or variously restricted. It is now commonly confined to species of moderate and large size, white with usually a pearly-blue mantle and black cap, and having a long deeply-forked tail, whose outer feathers are more or less narrowly linear for much of their length. The species are numerous, and are found all over the world, as *S. hirundo*, the common tern of Europe and America; *S. arctica*, the arctic tern of the northern hemisphere; *S. paradisea* or *dougalii*, the roseate tern (see cut under *roseate*), very widely distributed; and *S. forsteri* and *S. trudeaui* of America. Among the large species, representing a subgenus *Thalasseus*, are *S. leucogaster* or *caesia*, the Caspian tern of Asia, Europe, and America; *S. maxima*, the royal tern (smaller than the last, in spite of its name) of America; *S. elegans*, the ducal tern of America. (See cut under *Thalasseus*.) A group of small species,

such as *S. minuta* of Europe and *S. antillarum* of America, are called *least terns*, and all have a white frontal crescent in the black cap: these represent a subgenus

Common Tern (*Sterna hirundo*).

Sternula. (See cut under *Sternula*.) Some middle-sized terns with dark upper parts, widely distributed in tropical and warm temperate regions, are the subgenus *Haliplana*, as the common sooty and bridled terns, *S. fuliginosa* and *S. anæthetica*. (See cut under *sooty*.) Gull-billed terns form a section *Gelochelidon* (see cut there). The wholly white terns, the black terns, and the noddies belong to other genera. See *Sterninæ* and *tern*.

sternadiform (stér'nā-di-fôrm), *a.* [*< NL. sternum*, the breast-bone, + *L. ad*, to, + *forma*, form.] In *ichth.*, characterized by a tendency to expansion or extension of the thoracic or sternal region, as exemplified in the John-dory and the *Serranidæ*. Gill.

sternage (stér'nāj), *n.* [*< stern*² + *-age*.] Steerage; direction; course, as of a ship or fleet.

Follow, follow:
Grapple your minds to *sternage* of this navy;
And leave your England, as dead midnight still.
Shak., Hen. V., iii. Prol., l. 18.

sternal (stér'nāl), *a.* [= *F. sternal*, *< NL. sternalis*, *< sternum*, the breast-bone: see *sternum*.]

1. Of or pertaining to the sternum, especially the breast-bone of vertebrates: as, the *sternal* end of the clavicle; the *sternal* keel of a bird's breast-bone; *sternal* articulation; a *sternal* segment.—2. In *Invertebrata*, of or pertaining to a sternite; sternitic.—3. Ventral; hemal; on the ventral surface or aspect, where the sternum is situated; on the same side with the sternum; in man, anterior; in other animals, inferior: opposed to *dorsal*, *tergal*, or *neural*.—**Sternal band**, in *embryol.* of insects, a longitudinal thickening of the ovum, which gives rise to the sternal region of the body.—**Sternal canal**, in *Crustacea*, a median passage between each pair of endosternites, arched over by the meeting of the mesophragmal apophyses of the apodemes of opposite sides. The sternal canal conveys the chain of nervous ganglia and the sternal artery. See cut under *Astacidae*.—**Sternal glands**, a chain of six to ten small lymphatic glands, situated along the course of the internal mammary blood-vessels.—**Sternal line**, the vertical line on the front of the chest lying over the edge of the sternum.—**Sternal region**, the region of the front of the chest lying between the sternal lines. It is divided into a *superior* and an *inferior sternal region* by a line passing through the uppermost points of the junctions of the third costal cartilages with the sternum.—**Sternal rib**, (a) A true or fixed rib; one that joins the sternum by its hemapophysis, or costal cartilage, as distinguished from a false rib. See cut under *Endosteum*. (b) The hemapophysis of a rib, as distinguished from the pleurapophysis; that part of a bony jointed rib answering to the costal cartilage of a mammalian rib, reaching from the end of the pleurapophysis to the sternum or toward it, as distinguished from a vertebral rib, which is the pleurapophysis alone. See cuts under *episternum* and *interclavicle*.

sternalgia (stér'nāl'jī-ā), *n.* [NL., *< Gr. stēp-vov*, the breast-bone, + *ālgos*, pain.] 1. Pain about the sternum or breast-bone.—2. Specifically, angina pectoris. See *angina*.

sternalgic (stér'nāl'jīk), *a.* [*< sternalgia* + *-ic*.] Pertaining to or affected with sternalgia; especially, affected with angina pectoris.

sternalis (stér'nāl'is), *n.*; pl. *sternales* (-lēz). [NL., sc. *musculus*, muscle: see *sternal*.] A sternal or presternal muscle; specifically, the rectus sternalis of various animals, more expressly called *sternalis brutorum* and *rectus thoracicus superficialis*. It is not infrequently present in man.

Sternaspida (stér-nas'pī-dā), *n. pl.* [NL., irreg. *< Sternaspis* (-aspīd-) + *-ida*.] An order of gephyreans, represented by the genus *Sternaspis*: distinguished from an order *Echiurina*, both being referred to a subclass *Echiuromorpha* of the class *Gephyrea*. Compare *Echiuroidæ*.

Sternbergia (stér-nér'jī-ā), *n.* [NL. (Waldstein and Kitaibel, 1805), named after Count Kaspar Maria von Sternberg, 1761–1838, author of various botanical and paleontological works.] A genus of monocotyledonous plants, of the order *Amayllidaceæ* and tribe *Amayllidæ*. It is characterized by a commonly solitary funnel-shaped perianth without a corona and with somewhat spreading lobes, and by a fleshy nearly indehiscent fruit with roundish and

often strophilate seeds. About 12 species have been described, now by some reduced to 5, all native of Europe and the Mediterranean region. They produce a short flower-stalk from a coated bulb, with leaves at the same time or earlier. *S. lutea* and several other dwarf species with handsome yellow flowers are cultivated under the name of *star-flowers*. *S. lutea* is also known as *winter daffodil*, and *S. Etnensis* as *Mount Etna lily*; these are often sold under the name of *amaryllis*.

sternbergite (stér'nér'gīt), *n.* [Named after Count K. M. von Sternberg: see *Sternbergia*.] An ore of silver, a sulphid of silver and iron, having a pinchbeck-brown color and metallic luster. It occurs foliated, the laminae being soft and flexible. It leaves a mark on paper like that of graphite.

stern-board (stér'n'bôrd), *n.* *Naut.*, a backward motion of a vessel. See *to make a stern board*, under *board*.

stern-cap (stér'n'káp), *n.* An iron cap to protect the stern of a boat.

stern-chase (stér'n'chās), *n.* A chase in which two vessels sail on one and the same course, one following in the wake of the other: as, a *stern-chase* is a long chase.

stern-chaser (stér'n'chā'sér), *n.* A cannon placed in a ship's stern, pointing backward, and intended to annoy a ship that is in pursuit.

Sternæ (stér'nē-ē), *n. pl.* [NL., *< Sterna* + *-æ*.] A subdivision of *Sterninæ*, containing all the sea-swallows with forked tails and emarginate webs, as distinguished from the *Anoëæ* or noddies; the typical terns. *Coues*, 1862.

sternerber (stér'nē-bér), *n.* [*< NL. sternebra*, *< sternum* + (*vert*) *ebra*.] One of the pieces of which the breast-bone of a vertebrate usually consists; a bony segment of the sternum; a sternite, or sternbral element. The sternum is a serially segmented bone, made up of pieces, primitively separate bones, corresponding to pairs of ribs, every one of which is a sternerber. Thus, in man the manubrium sterni and the xiphoid or ensiform cartilage are each a sternerber; and the gladioli, the middle part of the breast-bone, is composed of four other sternerbers.

sternbral (stér'nē-brāl), *a.* [*< sternerber* + *-al*.] Entering into the composition of the breast-bone; of or pertaining to a sternerber.

sterned¹ (stérnd), *a.* [*< stern*² + *-ed*.] Having a stern (of a specified character). *Chapman*, *Iliad*, xi.

sterned² (stérnd), *a.* [ME., *< stern*³ + *-ed*.] Starred; starry. *Hampole*, *Prick of Conscience*.

sterner (stér'nér), *n.* [*< stern*² + *-er*.] A steersman; a guide or director. [Rare.]

He that is "regens sidera," the *sterner* of the stars.
Dr. Clarke, Sermons (1837), p. 15. (*Latham*.)

stern-fast (stér'n'fást), *n.* A rope or chain used to confine the stern of a ship or other vessel to a wharf or quay.

stern-frame (stér'n'frām), *n.* The several pieces of timber or iron which form the stern of a ship—the stern-post, transoms, and fashion-pieces.

sternfully (stér'n'fūl-i), *adv.* [*< "sternful"* (irreg. *< stern* + *-ful*) + *-ly*.] Sternly. *Stanihurst*, *Conceites*. [Rare.]

stern-gallery (stér'n'gal'ē-ri), *n.* *Naut.* See *gallery*, 9.

stern-hook (stér'n'hūk), *n.* In *ship-building*, a curved timber built into the stern of a ship to support the stern-frame.

Sternidæ (stér'ni-dē), *n. pl.* [NL., *< Sterna* + *-idæ*.] The *Sterninæ* rated as a family apart from *Laridæ*.

Sternidius (stér-nid'i-us), *n.* [NL. (Le Conte, 1873).] A genus of longicorn beetles, of the family *Cerambycidæ*, equivalent to *Liopus* (*Leipopus* of Serville, 1835). *S. acutiferus* is a common North American species now placed in *Leptostylus*. Its larva burrows under the bark of various trees.

Sternidius acutiferus.

sterniform (stér'ni-fôrm), *a.* [*< NL. sternum*, the breast-bone, + *L. forma*, form.] In *entom.*, having the form or appearance of a thoracic sternum.—**Sterniform process** or *horn*, an anterior projection of the first ventral segment of the abdomen, between the bases of the posterior legs: it is more commonly called the *intercoaxal process*.

Sterninæ (stér-nī'nē), *n. pl.* [NL., *< Sterna* + *-inæ*.] A subfamily of *Laridæ*, typified by the genus *Sterna*, containing all the terns or sea-swallows. It differs from *Larinæ* in the average smaller size, slenderer form, relatively longer wings and tail, the forking of the tail, the small feet, and the slender sharp bill. The bill is paragnathous (not epignathous as is usual in *Larinæ*), with continuous horny covering, usually long and slender, very sharp, with straight commissure or nearly so, gently curved culmen, long gonyes, and slight symphyseal eminence. The wings are extremely long, narrow,

and pointed, with the first primary much the longest, and the secondaries all short. The tail is usually long, and forked or forkee, with attenuated outer feathers. The feet are small, and scarcely ambulatory. There are 60 or more species, of all parts of the world. They are divided into two groups, the *Sternae* or terns proper, including nearly all of the *Sterninae*, and the noddies or *Anoae*. Most of the species fall into the single genus *Sterna*. Other genera are *Hydrochelidon*, *Phaethon*, *Procelsterna*, *Gygis*, *Leuc*, and *Anous*. See *Sterna*, and cuts there noted.

sternine (stér'nin), *a.* [*< NL. sterninus, < Sterna, tern.*] Resembling or related to a tern; or of pertaining to the *Sterninae*.

sternite (stér'nit), *n.* [*< NL. sternum, the breast-bone, + -ite.*] 1. In *Arthropoda*, as an insect or a crustacean, one of the median ventral sclerites of the crust or body-wall; the median ventral piece of any segment, somite, or metamer, whether a distinct piece or only that undistinguished ventral part or region which lies between the insertions of any pair of legs or other appendages. The sternites are primitively and typically all alike, but may be variously modified in different regions of the body, or coalesced with one another or with other pieces of the exoskeleton, or suppressed. See cut under *cephalothorax*.

2. In *entom.*, specifically, the under or ventral sclerite of an abdominal segment. [Rare.]

3. One of the pieces of the sternum or breast-bone of a vertebrate; a sternite. [Rare.]

Antennary sternite. Same as *epistoma* (b).

sternitic (stér-nit'ik), *a.* [*< sternite + -ic.*] Of or pertaining to a sternite; sternal, as a sclerite of an arthropod.

stern-knee (stér'nē), *n.* The continuation of a vessel's keelson, to which the stern-post is secured by bolts. Also called *sternson* and *sternson-knee*.

stern-light, *n.* [*< stern + light.*] Starlight. It was mirk mirk night, and there was nac stern light. *Thomas the Rhymer* (Child's Ballads, I. 112).

sternly (stér'li), *adv.* [*< ME. sternelich, sternliche, sturneliche, < AS. styrnlíce, < styrne, stern: see stern + -ly.*] In a stern manner; with severity, harshness, austerity, or rigor.

sternmost (stér'nöst), *a. superl.* [*< stern + -most.*] Furthest in the rear; furthest astern: as, the *sternmost* ship in a convoy.

sterness (stér'nes), *n.* [*< ME. sternesse, sternnesse; < stern + -ness.*] The quality or character of being stern.

With *sterness* se comandeide to hem, and with power. *Wyclif, Ezek. xxxiv. 4.*

= *Syn.* See *stern*, *a.*

sternochondroscapularis (stér-nō-kon-drō-skap-ū-lā'ris), *n.*; pl. *sternochondroscapulares* (-rēz). [*< NL. sc. musculus, muscle; < Gr. στέρνον, the breast-bone, + χωνδρος, cartilage, + NL. scapularis, q. v.*] A muscle of some mammals, not infrequent in man, arising from the first costal cartilage and the sternum, and inserted into the superior border of the scapula. Also called *chondroscapularis*, *scapulocostalis minor*, *costoscapularis*, *subclavius posticus*.

sternoclavicular (stér-nō-kla-vik'ū-lā'ris), *a.* [*< NL. sternoclavicularis, < Gr. στέρνον, the breast-bone, + NL. clavicula: see clavicula.*] Pertaining to the sternum and the clavicle. Also *sternoclidal*, and sometimes *clidosternal*.

sternoclavicular fibrocartilage. See *fibrocartilage*.

sternoclavicular ligament, a band of ligamentous fibers uniting the sternum and the clavicle: an anterior and a posterior are distinguished in man.

sternoclavicularis (stér-nō-kla-vik'ū-lā'ris), *n.*; pl. *sternoclaviculares* (-rēz). [*< NL. see sternoclavicular.*] One of two anomalous muscles in man, anterior and posterior, extending over the sternoclavicular articulation.

sternoclidal (stér-nō-kli'dal), *a.* [*< Gr. στέρνον, the breast-bone, + κλεις (kleis), key (clavicle), + -al.*] Same as *sternoclavicular*.

sternoclidomastoid (stér-nō-kli-dō-mas'toid), *a. and n.* [*< NL. sternoclidomastoideus, < sternum, q. v., + clidomastoideus, q. v.*] 1. *a.* In *anat.*, of or belonging to the sternum, the clavicle, and the mastoid process. The sternoclidomastoid muscle arises from the summit of the sternum and the inner section of the clavicle, and is inserted into the mastoid process of the temporal bone. It is also called *sternomastoid*, *mastoides colli*, and *nutor capitis*. See cut under *muscle*.

2. *n.* The sternoclidomastoid muscle.

sternoclidomastoideus (stér-nō-kli-dō-mas'toi'dē-us), *n.*; pl. *sternoclidomastoidei* (-i). [*< NL. see sternoclidomastoid.*] The sternoclidomastoid muscle.

sternocoracoid (stér-nō-kor'a-koid), *a. and n.* [*< NL. sternocoracoideus, < sternum, q. v., + coracoideus, q. v.*] 1. *a.* Of or pertaining to the sternum and the coracoid: as, the *sternocoracoid* articulation of birds and reptiles; a *sternocoracoid* muscle.

2. *n.* The sternocoracoideus.

sternocoracoideus (stér-nō-kor-a-koi'dē-us), *n.*; pl. *sternocoracoidei* (-i). [*< NL. see sternocoracoid.*] The sternocoracoid muscle of various animals, arising from the sternum and inserted in the coracoid. It is represented in man by the pectoralis minor.

sternocostal (stér-nō-kos'tal), *a.* [*< NL. sternocostalis, < sternum, q. v., + L. costa, rib: see costal.*] Of or pertaining to the sternum and the ribs or costal cartilages; costosternal.

sternocostalis (stér-nō-kos-tā'lis), *n.*; pl. *sternocostales* (-lēz). [*< NL. see sternocostal.*] A thin median fan-shaped muscle within the thorax, behind the costal cartilages and breast-bone, arising from the lower part of the sternum. Also called *transversus thoracis*, and usually *triangularis sterni*.

sternocoxal (stér-nō-kok'sal), *a.* [*< NL. sternocoxalis, < sternum, q. v., + L. coxa, the hip: see coxal.*] Of or pertaining to the sternites and coxae of an arthropod.

sternofacial (stér-nō-fā'shal), *a. and n.* [*< NL. sternofacialis, < sternum, q. v., + L. facies, face: see facial.*] 1. *a.* Of or pertaining to the sternum and the face: as, a *sternofacial* muscle.

2. *n.* The sternofacialis.

sternofacialis (stér-nō-fā-shi-ā'lis), *n.*; pl. *sternofaciales* (-lēz). [*< NL. see sternofacial.*] A muscle of the hedgehog, arising over the fore part of the sternum and passing to the side of the lower jaw and integument of the face: it assists the action of the orbicularis puniculi.

sternoglossal (stér-nō-glos'al), *a. and n.* [*< NL. sternoglossalis, < Gr. στέρνον, breast-bone, + γλῶσσα, tongue.*] 1. *a.* Of or pertaining to the sternum and the tongue: as, a *sternoglossal* muscle.

2. *n.* The sternoglossus.

sternoglossus (stér-nō-glos'us), *n.*; pl. *sternoglossi* (-i). [*< NL. see sternoglossal.*] 1. A long retractor muscle of the tongue, as of the great ant-eater, *Myrmecophaga jubata*, attached behind to the sternum, and antagonizing the action of the protractor muscles, the genioglossus and stylohyoideus. 2. [*< cap.*] In *entom.*, a genus of coleopterous insects.

sternohyoid (stér-nō-hi'oid), *a. and n.* [*< NL. sternohyoideus, < sternum, q. v., + hyoides: see hyoid.*] 1. *a.* Of or pertaining to the sternum and the hyoid bone. 2. *n.* The sternohyoid muscle.

sternohyoidean (stér-nō-hi-oi'dē-an), *a.* [*< sternohyoid + -e-an.*] Same as *sternohyoid*.

sternohyoideus (stér-nō-hi-oi'dē-us), *n.*; pl. *sternohyoidei* (-i). [*< NL. see sternohyoid.*] The sternohyoid.

sternomastoid (stér-nō-mas'toid), *a. and n.* [*< NL. sternomastoideus, < sternum, q. v., + mastoideus, q. v.*] 1. *a.* Of or pertaining to the sternum and the mastoid process of the temporal bone. 2. *n.* The sternomastoid muscle.

sternomastoideus (stér-nō-mas-toi'dē-us), *n.*; pl. *sternomastoidei* (-i). [*< NL. see sternomastoid.*] The sternomastoid muscle.

sternomaxillaris (stér-nō-mak-si-lā'ris), *n.*; pl. *sternomaxillares* (-rēz). [*< NL. see sternomaxillary.*] The sternomaxillary muscle.

sternomaxillary (stér-nō-mak'si-lā-ri), *a.* [*< NL. sternomaxillaris, < sternum, q. v., + L. maxilla, jaw: see maxillary.*] Pertaining to the sternum and the mandible: applied to the sternomastoid muscle when, as in the horse, its anterior end is fixed to the mandible.

sternon (stér'non), *n.* [*< NL. see sternum.*] Same as *sternum*. *Wiseman, Surgery.* [Rare.]

sternopagus (stér-nop'a-gus), *n.*; pl. *sternopagi* (-ji). [*< NL. see sternopagus.*] A double monster with union at the sternum.

Sternoptichidae (stér-nop-tik'i-dē), *n. pl.* [*< NL. see Sternoptyx.*] A family of inious fishes, typified by the genus *Ster-*

noptyx. (a) In Günther's system it includes the typical *Sternoptichidae* and other families. (b) In Gill's system, a family of inious fishes with a compressed ventriform body, carinated contour, deeply and obliquely cleft or subvertical mouth whose upper margin is constituted by the supramaxillaries as well as intermaxillaries, branchiostegal arch near and parallel with lower jaw, scapular arch with an inferior projection, and one or more of the neural spines abnormally developed and projecting above the back in advance of the dorsal fin. There are 3 genera and about 7 species, small deep-sea fishes of remarkable appearance and organization, representing 2 subfamilies, *Sternoptichinae* and *Argyroplectinae*. Also *Sternoptygus*, *Sternotidit*, and *Sternoptygoides*.

sternoptichoid (stér-nop'ti-koid), *a. and n.* [*< Sternoptyx (-ptych-) + -oid.*] 1. *a.* Of, or having characteristics of, the *Sternoptichidae*.

2. *n.* A fish of the family *Sternoptichidae*.

Sternoptyx (stér-nop'tiks), *n.* [*< NL. (Hermann, 1781), < Gr. στέρνον, breast, chest, + πτερυξ, a fold.*] A genus of fishes, so named from the transverse folds on the pectoral or sternal region, typical of the *Sternoptichidae*.

sternorhabdite (stér-nō-rab'dit), *n.* In *entom.*, one of the lowermost or sternal pair of rhabdites.

sternoscapular (stér-nō-skap-ū-lār), *a. and n.* [*< NL. sternoscapularis, < sternum, q. v., + L. scapula, shoulder-blades: see scapular.*] 1. *a.* Of or pertaining to the sternum and the scapula: as, a *sternoscapular* muscle.

2. *n.* The sternoscapularis.

sternoscapularis (stér-nō-skap-ū-lā'ris), *n.*; pl. *sternoscapulares* (-rēz). [*< NL. see sternoscapular.*] A muscle of many animals, connecting the sternum and the scapula, and forming with the serratus magnus and the levator anguli scapulae a sling in which the fore part of the body is supported upon the anterior extremities.

Sternotheridae (stér-nō-thē'ri-dē), *n. pl.* [*< NL. see Sternotherus.*] A family of pleurodirous tortoises, typified by the genus *Sternotherus*, to which different limits have been assigned. As generally understood, they have eleven plastral bones, mesoplastrals being distinct, and the skull has no bony temporal roof. The species are confined to Africa and Madagascar.

Sternotherus (stér-nō-thē'rus), *n.* [*< NL. (Bell, 1825), < Gr. στέρνον, breast, chest, + θήρ, the hinge of a door or gate.*] A genus of tortoises, having a hinged plastron (whence the name).

sternothere (stér-nō-thēr), *n.* [*< NL. Sternotherus, q. v.*] An African turtle of the genus *Sternotherus*. *P. L. Sclater.*

sternothyroid (stér-nō-thi'roid), *a. and n.* [*< NL. sternothyroideus, < sternum, q. v., + thyroideus.*] 1. *a.* In *anat.*, of or pertaining to the sternum and the thyroid cartilage. 2. *n.* The sternothyroid muscle.

sternothyroideus (stér-nō-thi-roi'dē-us), *n.*; pl. *sternothyroidei* (-i). [*< NL. see sternothyroid.*] The sternothyroid muscle.

sternotracheal (stér-nō-trā'kē-āl), *a. and n.* [*< NL. sternotrachealis, < sternum, q. v., + trachea: see tracheal.*] 1. *a.* Of or pertaining to the sternum and the trachea; connecting the breast-bone and the windpipe, as a muscle.

2. *n.* The sternotrachealis.

sternotrachealis (stér-nō-trā'kē-ā'lis), *n.*; pl. *sternotracheales* (-lēz). [*< NL. see sternotracheal.*] A muscle which in birds passes from the sternum to the trachea or windpipe; one of a pair, or one pair of two pairs, of long slender muscular slips attaching the trachea to the sternum or the clavicle, or both.

sternotribe (stér-nō-trib), *a.* [*< Gr. στέρνον, the breast, + τριβειν, rub.*] In *bot.*, touching the breast, as of an insect: noting those zygomorphous flowers, especially adapted for cross-fertilization by external aid, in which the stamens and styles are so arranged as to strike the visiting insect on the breast. Compare *nototribe*, *pleurotribe*.

Sternoxi (stér-nok'si), *n. pl.* [*< NL. irreg. < Gr. στέρνον, breast, + ὄξιν, sharp.*] In *entom.*, in Latreille's system, a section of *Serricornes*, containing two tribes, the *buprestids* and *elaterids*, having the prosternum produced in front and pointed behind: distinguished among the serricorn beetles from *Malacodermi* and *Xylotragi*. It corresponds to the modern families *Buprestidae* and *Elateridae* in a broad sense. See cuts under *Agathus*, *Buprestis*, *click-beetle*, *Pyrophorus*, and *wireworm*. Also *Sternoxia*.

sternoxian (stér-nok'si-an), *a. and n.* [*< Sternoxi + -an.*] Same as *sternoxine*.

sternoxine (stér-nok'sin), *a.* and *n.* [*< Sternoxi + -ine*]. *I. a.* Pertaining to the *Sternoxi*, or having their characters.

II. n. A member of the *Sternoxi*.

stern-port (stér'n-pört), *n.* A port or opening in the stern of a ship.

stern-post (stér'n-póst), *n.* The principal piece of timber or iron in a vessel's stern-frame. Its lower end is tenoned into or riveted to the keel, and to it the rudder is hung and the transoms are bolted. See cuts under *rudder* and *stern*. — **Stern-post knee**, a large knee which unites the stern-post and the keel. See cut under *stern*.

stern-sheets (stér'n-shéts), *n. pl.* The space in a boat abaft the thwarts on which the rowers sit.

sternsman† (stérnz'man), *n.* [*< stern's*, poss. of *stern*, + *man*]. A steersman; a pilot.

Off from the sterne the sternsman diling fell,
And from his sinews flew his soule to hell.

Chapman, *Odyssey*, xii. 582.

sternson (stér'n-son), *n.* [Appar. *< stern* + *-son* as in *keelson*]. Same as *stern-knee*.

Sternula (stér'nū-lā), *n.* [NL. (Boie, 1822), *< Sterna* + dim. *-ula*]. The least terns, a genus of *Sterninae* containing species of the smallest size, with moderately forked tail, a white frontal crescent in the black cap, and the bill yellow tipped with black: of cosmopolitan distribution. *S. minuta* inhabits Europe, Asia, etc.; *S. balaenarum* is South African; *S. uereis*, *S. placens*, and *S. melananchus* are Asiatic, East Indian, Australian, and Polynesian; *S. superciliosa* is South American. The common bird of the United States and middle America is *S. antillarum*.

American Least Tern (*Sternula antillarum*).

larum, which is very abundant along the Atlantic coast. It is 9 inches long and 20 in extent of wings, white with pearly-blue mantle over all the upper parts, a black cap, and the usual white lunule.

sternule (stér'nūl), *n.* A sea-swallow of the genus *Sternula*.

sternum (stér'num), *n.*; *pl. sterna* (-nā) or *sternums* (-numz). [NL., also *sternon*, *< Gr. στέρνον*, the breast-bone.] *1.* The breast-bone of man and many other vertebrates; a bone or longitudinal series of bones in the middle line of the ventral aspect of the body, chiefly in its thoracic section, completing the thoracic wall by articulation with more or fewer ribs, or elements of the scapular arch, or both: theoretically, in Owen's system, the hemal spines of a series of vertebræ. (*a.*) In man and most mammals the sternum consists of an anterior piece, the "handle," manubrium, or presternum; of several (in man four) segments or sternebrae constituting the body of the sternum, gladiolus, or mesosternum; and of a terminal piece, the xiphoid or ensiform cartilage, or xiphisternum. It articulates in man with the clavicles and with seven costal cartilages. The sternebrae of a mammalian sternum may remain perfectly distinct, or be ankylosed in one. (See cut under *mesosternum*.) In cetaceans and sirenians the sternum is much reduced, and may be a single bone or quite rudimentary. In the monotrematous mammals a small median bone called prosteron is developed in front of the

Shoulder-girdle, or Pectoral Arch, and Sternum of a Lizard (*Iguana tuberculata*): upper figure, upper view; lower figure, side view. *sc*, scapula; *ssc*, suprascapula; *m sc*, mesoscapula; *per*, precoracoid; *mer*, mesocoracoid; *eer*, epicoracoid; *icl*, interclavicle; *gl*, glenoid; *st*, sternum; *xst*, xiphisternum.

presternum. The parts called episternum, omosternum, interclavicle, in the mammals just mentioned, or in various reptiles, or in batrachians, belong rather to the shoulder-girdle. There is no sternum in some reptiles, as serpents. See cuts under *Catarrhina*, *Elephantinae*, *interclavicle*, *omosternum*, and *skeleton*. (*b.*) In birds the sternum is a large single bone without trace of its original composition of several parts, highly specialized in form and function, in relation to the muscular apparatus of the wings, articulating with several ribs, with the coracoids, and sometimes ankylosed with the clavicle; it appears under two principal modifications, known as the *carinate* and *ratite*. (See these words.) The carinate sternum normally develops from five ossific centers, having consequently as many separate pieces in early life. The single median ossification, which includes the keel, is the lophosteon; the anterior lateral pieces, a pair, are the pleurostea, which become the costal or costiferous processes; the posterior pair are the metastea. In some birds are additional pieces, a pair of coracosteas and a urosteon. The ratite sternum has no median ossification, or lophosteon. The passerine sternum normally develops a prominent forked manubrium. In a few birds, as cranes and swans, the sternum is hollowed out to receive convolutions of the windpipe. See cuts under *carinate*, *Dinornis*, and *epipleuræ*. (*c.*) In *Chelonis*, the plastron of a turtle, consisting of several bones, normally nine, one median, and four lateral in pairs. These bones have no homology with the sternum of other vertebrates. Stevia (stē'vi-ā), *n.* [NL. (Cavanilles, 1797), named after *Estere*, a Spanish scientist.] 1. A genus of composite plants, of the tribe *Eupatoriaceae* and subtribe *Agerateae*. It is characterized by crowded corymbose or loosely panicle heads with five or six nearly equal involucre bracts, five flowers, appendaged anthers, and a variable pappus of several scales or awns or of both mingled in the same head. Over one hundred species have been described, natives of the warmer parts of America from Buenos Ayres to Mexico, and especially numerous westward; absent in tropical Brazil and nearly so in Guiana. They are herbs or shrubs, often somewhat rigid, or rarely diffuse. Their leaves are usually opposite, three-nerved, and serrate, sometimes entire or three-parted. The flowers are white or purplish, forming slender heads. Several species are cultivated as border-plants in Europe. In the United States *S. compacta* and *S. serrata*, bearing a profusion of small white fragrant flowers, the latter flowering later, are grown under glass in great quantities for cutting and for winter use in houses. *S. serrata* and five other species extend within the United States into Arizona or Texas.

And what not rare? Luxury being the steward, and the treasure unexhaustible.
Sandys, Travels, p. 26.

4. Formerly, in the English gilds, one of the officers in charge of the finances of the society; also, a corresponding functionary in municipal affairs. The title is still given in English towns to magistrates varying in functions, authority, rank, etc. In this latter case it is usually qualified by some limiting word: as, the city steward of York; the land steward of

Norwich; the town *steward* of Northampton; the lord high *steward* of Gloucester.

That the *stewards* of every craft that ben contributory shullen be called to the accompte to knowe the charge. *English Gilds* (E. E. T. S.), p. 385.

5. In the early church, same as *econome* or *oconomus*.—**6. A fiscal agent of certain bodies**; specifically, in the Methodist Church, an officer having charge of the finances and certain other material interests of the church.—**Hospital steward**. See *hospital*.—**Lord high steward of England**, one of the former great officers of state: his chief functions were at an early date assumed by the justiciar. This office was the inheritance of the Earls of Leicester, till forfeited by Simon de Montfort to Henry III., at the close of whose reign it was abolished as a permanent dignity. A lord high steward is now created only for particular occasions—namely, a coronation or the trial of a peer—the office to cease when the business requiring it is ended. In the former case the lord high steward is commissioned to settle matters of precedence, etc.; in the latter, to preside in the House of Lords.—**Lord steward of the household**, in England, one of the chief officers of the royal household. He is the head of the court called the Board of Green Cloth, which has the supervision of the household expenses and accounts and their payment, the purveyance of provisions, etc.; but his duties are practically performed by a permanent official called the master of the household. The lord steward is a peer and a member of the ministry.—**Steward, or high steward of Scotland**, an ancient officer of the crown of the highest dignity and trust. He had not only the administration of the crown revenues, but the chief oversight of all the affairs of the household, and the privilege of the first place in the army, next to the king, in battle.—**Steward of the Chiltern Hundreds**. See *Chiltern Hundreds*, under *hundred*.

stick1 (stik), *v.*; pret. and pp. *stuck*, ppr. *sticking*. [A verb confused in form and meanings with *stick*2, *stick*1 being more prop. *steck* (as in dial. uses) or **steak* (after the analogy of *break, speak*, etc.); *E. dial. steck, Sc. steik*, etc.; *< ME. stiken*, prop. *steken* (pret. *stak*, pp. *steken, i-steken, y-steke, stiken, stoken*; also, by conformity with *stick*2, pret. *stiked, stikede*, pp. *stiked*), *< AS. *steccan* (pret. **stæc*, pp. **steccen*), pierce, stab, = *OS. stekan* (pret. *stak*) = *OFries. steka* = *MD. D. steken* = *MLG. LG. steken* = *OHG. stechan, stehhan*, MHG. *G. stechen* (pret. *stech*, pp. *gestochen*), pierce; not found in *Scand.* or *Goth.* (the *Goth.* form would be **stikan*; cf. *Goth. staks*, a mark, stigma, *stiks*, a point, a moment of time); *Teut. √ stik* = *L. √ stig* (in *instigare*, prick, instigate, **stinguere* (in comp. *distinguere*, distinguish, *extinguere*, extinguish), *stimulus*, a prick, goad, *stilus*, a point, style, etc.) = *Gr. √ stichō* (in *stichō, prick, στιχμα, a prick, mark, spot*) = *Skt. √ tij* for **stij*, be sharp. From this root are ult. *E. stick*2, *stick*3, *stitch*, *steak*, *sting*, etc.,

and, through OF., *ticket*, *etiquette* (from a collateral Teut. root, *stake*¹, *stock*¹, *stang*¹, *stoke*², *stoker*, etc.); from the L. root are ult. E. *style*¹, *distinguish*, *extinguish*, *distinct*, *extinct*, *instinct*, *stimulate*, *stimulus*, *instigate*, *prestige*, etc. The verb *stick*¹, pierce, has been confused, partly in ME. and completely in mod. E., with its derivative *stick*². The reg. mod. pret. of *stick*¹ would be **stuck* or **stake* (as in ME.), but the pret. has yielded to the influence of the pp., and, becoming **stoke*, appears in mod. E. with shortened vowel *stuck*, as also in the pp. (cf. *break*, pret. *brake*, now *broke*, pp. *broken*; *speak*, pret. *spake*, now *spoke*, pp. *spoken* — verbs phonetically parallel to *stick*¹.) I. *trans.* 1. To pierce or puncture with a pointed instrument, as a dagger, sword, or pin; pierce; stab.

spines of the back. They are small fishes, a few inches long, of 5 genera, *Gasterosteus*, *Pygosteus*, *Eucalia*, *Apeltes*, and *Spinachia*, but very pugnacious and rapacious, being especially destructive to the spawn and fry of many larger fishes. They inhabit fresh waters and sea-arms of northern Europe, Asia, and North America

to the number of nearly 20 species. The common two- or three-spined stickleback, banstickle, burnstickle, or tit-lebat, is *G. aculeatus*, 4 inches long. Another is the nine- or ten-spined, *Pygosteus pungitius*. The fifteen-spined stickleback, or sea-stickleback, is *Spinachia vulgaris*, of the northerly coasts of Europe, a marine species, from 5 to 7 inches long, of very slender elongate form, with a tubular snout. They are among the most characteristic fishes of the northern hemisphere in the colder regions. Except in the breeding-season, they live in shoals, and are sometimes numerous enough to become of commercial value for their oil or for manure. They are noted for the construction of elaborate nests which the male builds for the eggs, in which several females often or generally deposit their burden. The eggs are comparatively few, and while being hatched are assiduously guarded by the male. The local or popular synonyms of the sticklebacks are numerous, among them *prickleback*, *spickleback*, *stickling*, and *sharping*.

She whisper'd, with a *stifled* moan.

Tennyson, Mariana in the South.

4. To suppress; keep from active manifestation; keep from public notice; conceal; repress; destroy: as, to *stifle* inquiry; to *stifle* a report; to *stifle* passion; to *stifle* convictions.

A record surreptitiously or erroneously made up, to *stifle* or pervert the truth. *Blackstone*, Com., III. xxv. = Syn. 2. Suffocate, Strangle, etc. See *another*.—4. To hush, muffle, muzzle, gag.

II. *intrans.* To suffocate; perish by asphyxia.

You shall *stifle* in your own report,

And smell of calumny. *Shak.*, M. for M., II. 4. 158.

stifle² (stif'l), *n.* [Formerly also *stifle*; appar. *< stiff*, dial. *stife*: see *stiff*.] 1. The stifle-joint.

If the horse be but hurt in the *stifle* with some stripe or straine.

Topsell, Four-Footed Beasts (1607), p. 405. (*Hallwell*.)

2. Disease or other affection of the stifle-bone or stifle-joint, as dislocation or fracture of the patella.

stifle-bone (stif'l-bōn), *n.* The patella of the horse; the kneepan, kneecap, or bone of the stifle-joint.

stifled (stif'ld), *a.* [Formerly also *stifled*; *< stifle*² + *-ed*.] Affected with stifle. See *stifle*², 2.

The horse is said to be *stifled* when the stiffling bone is removed from the place.

Topsell, Four-Footed Beasts (1607), p. 405. (*Hallwell*.)

stifle-joint (stif'l-jōint), *n.* The stifle or knee-joint of the horse; the joint of the hind leg between the hip and the hock, whose convexity points forward, which is close to the belly, and which corresponds to the human knee. See cut under *Equidae*.

stifler (stif'ler), *n.* [*< stifle*¹, *v.*, + *-er*]. Milit. See *camouflet*.

stifle-shoe (stif'l-shō), *n.* A form of horseshoe exposing a curved surface to the ground: used in treating a stifled horse. It is fixed on the sound foot, with the effect of forcing the animal to throw its weight on the weak joint, and thus strengthen it by exercise.

stiffling (stif'fling), *p. a.* Close; oppressive; suffocating: as, a *stiffling* atmosphere.

E'en in the *stiffling* bosom of the town.

Courper, Task, IV. 753.

stiffling-bonet, *n.* Same as *stifle-bone*.

stighti, *v.* [ME. *stigten*, *< AS. stihtan*, *stihtian* (for **stiftan*), order, rule, govern, = MD. D. *stichten*, found, build, impose a law, = OHG. MHG. G. *stiften* = Icel. *stifta*, *stifta*, *stifta* = Sw. *stifta*, *stifta* = Dan. *stifte*, found, institute; cf. Icel. *stött*, foundation, pavement, stepping-stone, foot-piece. Hence *stightle*.] To found; establish; set.

William of Palerne (E. E. T. S.), I. 1190.

II. *intrans.* To make arrangements; treat; direct; mediate; stickle.

When they com to the court keppte wern thay fayre,
Styghted with the stewart, stad in the hall.

Alliterative Poems (ed. Morris), II. 90.

stigma¹ (stig'mä), *n.*; E. pl. *stigmata* (stig'mäz), used chiefly in senses 1, 2, and 6; L. pl. *stigmata* (stig'mä-tä), used more or less in all the senses. [= F. *stigmata* = Sp. Pg. *estigma* = It. *stigma*, *stigma* = G. *stigma*, *< NL. stigma*, *< L. stigma*, *< Gr. στίγμα*, pl. *στιγματα*, a mark, esp. of a pointed instrument, a spot, brand, *< στίξω*, mark (with a point), prick, brand: see *stick*¹.] 1. A mark made with a red-hot iron, formerly in many countries upon criminals as a badge of infamy; a brand impressed on slaves and others.

The Devil, however, does not imprint any *stigma* upon his new vassal, as in the later stories of witch-compact.

Lowell, Among my Books, 1st ser., p. 95.

2. Any mark of infamy, slur, or disgrace which attaches to a person on account of evil conduct.

Happy is it for him that the blackest *stigma* that can be fastened upon him is that his robes were whiter than his brethren's.

Bp. Hall, Remains, Pref.

3. In *anat.* and *zool.*, a mark; a marked point or place: variously applied to marks of color, as a spot, and to many different pores or small holes. Specifically—(a) A birth-mark; a nevus. (b) The point or place on the surface of an ovary where a ma-

ture Graafian follicle ruptures. (c) In *ornith.*, the place where the calyx or ovisac of the ovary ruptures to discharge an ovum into the oviduct. See *calyx*, 3 (b). (d) In *entom.*: (1) The exterior orifice of a trachea; a spiracle. See cuts under *pulmonary*, *flesh-fly*, *sheep-bot*, and *Acarida*. (2) A chitinous spot or mark on the anterior margin of the forewings of many insects, formed by a special enlargement of a vein; a pterostigma. (e) In *Protozoa*, a spot of pigment; the so-called eye of an infusorian. (f) In *Annelida*, one of the pores or openings of the segmental organs. (g) In *Hydrozoa*, the pore by which a pneumatocyst opens to the exterior. See cut under *Hydrozoa*. (h) In *Pharyngopneusta*, as an ascidian, one of the ciliated openings by which the cavity of the pharynx is placed in communication with that of the atrial canal. See cuts under *Appendicularia* and *Tunicata*.

4. A place or point on the skin which bleeds periodically or at irregular intervals during some mental states. The spontaneous appearance of stigmata was formerly regarded superstitiously.—5. *pl.* In the *Rom. Cath. Ch.*, marks said to have been supernaturally impressed upon the bodies of certain persons in imitation of the wounds on the crucified body of Christ.

In the life of St. Francis of Assisi we have the first example of the alleged miraculous infliction of stigmata.

Encyc. Brit., XXII. 549.

6. In *bot.*, a modified part of the style or, when that is wanting, of the surface of the ovary, which in impregnation receives the pollen. In

1. Of *Cynodon Dactylon*. 2. Of *Vitis Labrusca*. 3. Of *Papaver Argemone*. 4. Of *Gordonia pubescens*. 5. Of *Tilia Americana*. 6. Of *Silene Pennsylvanica*. 7. Of *Tribulus terrestris*. 8. Of *Pionia muscipula*. 9. Of *Linum Virginianum*. 10. Of *Parietaria officinalis*. 11. Of *Rumex obtusifolius*.

the latter case the stigma is said to be sessile, as in the poppy and the tulip. When the style is present, the stigma may be terminal, occupying its summit, as in the plum and cherry, or lateral, running down its face in one or two lines, as in *Ranunculus*. Its form and appearance are very various. In many plants there is only one stigma, while in others there are two, three, five, or many, according to the number of styles or style-branches. The stigma is composed of delicate cellular tissue; its surface is destitute of true epidermis, and is usually moist. See *stigma* (with cut) and *pollen-tube*.

stigma² (stig'mä), *n.* [*Gr. στίγμα*, the ligature σ, an altered form, to bring in σ, of σίγμα or σίγμα, the letter σ, sigma: see *sigma*. The ligature was also called στί.] In *Gr. gram.* and *paleog.*, a ligature (σ) still sometimes used for σ (st), and also used as a numeral (6).

stigma-disk (stig'mä-disk), *n.* In *bot.*, a disk forming the seat of a stigma, sometimes produced by the fusion of two or more style-apices, as in *Asclepias*.

stigmat (stig'mäl), *a.* [*< stigma*¹ + *-al*.] Of or pertaining to a stigma; stigmatic. Specifically applied in entomology to a vein of the wings of some insects, whose modification makes a stigma (pterostigma).

Stigmara (stig-mä'ri-ä), *n.* [NL., *< L. stigma*, a mark (see *stigma*¹), + *-aria*.] A former genus of fossil plants, very abundant in many regions in the coal-measures, and especially in the under-clay, or clayey material (often mixed with more or less sand) by which most seams of coal are underlain; also [*l. c.*], a plant of this genus. These plants are cylindrical root-like bodies, usually starting from a center in four main branches, and afterward bifurcating irregularly, and extending sometimes to great distances. The bodies are covered with small round depressions or scars arranged in lozenge-shaped patterns, and each the point of attachment of a ribbon-shaped filament or rootlet. In some cases the stigmarae have been found attached to trunks of *Sinilaria*, in such a position as would naturally be occupied by the roots with reference to the stem of the plant or tree; hence they have been admitted by most paleobotanists to be in fact the roots of the widely distrib-

uted coal-plant called *Stigmaria*. Some who maintain this, however, admit that the relation of the stigmara to the plant itself was peculiar; while others believe that they were floating stems, able under favorable conditions to play the part of roots. This opinion has for its support the fact that thick beds of under-clay are frequently found almost entirely made up of remains of stigmara, while not even a fragment of *Stigmaria* can be found in the vicinity.

Stigmarian (stig-mā'ri-an), *a.* [*< Stigmara + -an.*] Relating to, containing, or consisting of *Stigmara*. *Geol. Mag.*, No. 267, p. 407.

stigmarioid (stig-mā'ri-oid), *a.* [*< Stigmara + -oid.*] In bot., resembling *Stigmara*.

stigmata, *n.* Latin plural of *stigma*.

stigmatal (stig-mā-tal), *a.* [*< stigmata + -al.*] In entom., pertaining to, near, or containing the stigmata or breathing-pores; stigmatic: as, the stigmatal line of a caterpillar.

stigmatic (stig-mat'ik, formerly also stig-mat'ik), *a. and n.* [*< ML. stigmaticus, < L. stigma, < Gr. στίγμα, a mark, brand: see stigma¹.*] **I.** *a.* Of or pertaining to a stigma, in any sense of that word. Specifically—(a) Having the character of a brand; ignominious.

Print in my face
The most stigmatike title of a villaine.

Heywood, Woman Killed with Kindness (Works, II. 110).
(b) Marked with or as with a stigma or brand; repulsive; abhorrent.

So the world is become ill favoured and shrewd-pated,
as politic in brain as it is stigmatic in limbs.

Rev. T. Adams, Works, I. 19.

(c) In nat. hist., belonging to or having the character of a stigma; stigmat. *Huxley, Anat. Invert.*, p. 374. (d) In bot., receptive of pollen: said of parts of the style which have the function without the form of a stigma, as the "silk" of maize. (e) Bearing the stigmata; stigmatized. See *stigma¹*, 5.—**Stigmatic cells**, in bot., same as *tid-cells*.

II. *n.* 1. A person who is marked with stigmata, in the ecclesiastical or the pathological sense; a stigmatist.—2. A criminal who has been branded; one who bears upon his person the marks of infamy or punishment; a notorious profligate.

Convalde him to a justice, where one swore
He had been branded stigmatic before.

Philomathie (1616). (Nares.)

3. One on whom nature has set a mark of deformity.

But like a foul, mis-shapen stigmatic,
Mark'd by the destinies to be avoided.

Shak., 3 Hen. VI., II. 2. 136.

stigmatical (stig-mat'ik-al), *a.* [*< stigmatic + -al.*] Same as *stigmatic*. *Shak., C. of E.*, iv. 2. 22.

stigmatically (stig-mat'ik-al-i), *adv.* With stigmata; with a mark of infamy or deformity.

If you spye any man that has a looke,
Stigmatically drawne, like to a furie,
(Able to fright) to such I'll give large pay.

Dekker, Wonder of a Kingdom, III. 1.

stigmatiferous (stig-mat'if-e-rus), *a.* [*< NL. stigma(-), a stigma, + L. ferre = E. bear¹.*] In bot., stigma-bearing.

stigmatiform (stig-mat'i-fōrm), *a.* [*< NL. stigma(-), stigma, + L. forma, form.*] In entom., having the structure or appearance of a stigma, spiracle, or breathing-pore; spiraculiform.

stigmatisation, **stigmatise**, etc. See *stigmatization*, etc.

stigmatist (stig-mat'ist), *n.* [*< Gr. στίγμα(-), a mark, a brand (see stigma¹), + -ist.*] One on whom the stigmata, or marks of Christ's wounds, are said to be supernaturally impressed.

stigmatization (stig-mat'i-zā'shon), *n.* [*< stigmatize + -ation.*] 1. The act of stigmatizing, or the condition of being stigmatized; specifically, the supposed miraculous impression of the marks of Christ's wounds on the bodies of certain persons.—2. The act, process, or result of producing, as by hypnotic suggestion, on the surface of the body points or lines which bleed. [Recent.]

Also spelled *stigmatisation*.

stigmatize (stig-mat'iz), *v. t.; pret. and pp. stigmatized, ppr. stigmatizing.* [*< F. stigmatiser = Sp. estigmatizar = Pg. estigmatizar = It. stigmatizzare, < ML. stigmatizare, < Gr. στίγμα(-), a mark, brand, < στίγμα(-), a mark, brand: see stigma¹.*] 1. To mark with a stigma or brand.

They had more need some of them . . . to have their cheeks stigmatized with a hot iron.

Burton, Anat. of Mel., p. 474.

2. To set a mark of disgrace on; disgrace with some mark or term of reproach or infamy.

It was thought proper to restrain it [comedy] within bounds by a law enacting that no person should be stigmatized under his real name.

Goldsmith, Essay, Origin of Poetry.

3. To produce red points, sometimes bleeding, in or on: as, a person or the skin stigmatized by hypnotic suggestion. [Recent.]

Also spelled *stigmatise*.

stigmatized (stig-mat'izd), *p. a.* 1. Marked with a stigma; branded; specifically, marked with the stigmata of the passion.—2. Resembling stigmata: as, the stigmatized dots on the skin in measles.

Also spelled *stigmatised*.

stigmatose (stig-mā-tōs), *a.* [*< NL. *stigmatosus, < stigma¹, a stigma: see stigma¹.*] 1. In bot., same as *stigmatic*.—2. Affected with stigmata; stigmatized.

stigma (stig'mō), *n.* [*< Gr. στίγμα, a prick, point.*] 1. In *Gr. paleog.*, a dot used as a punctuation-mark; especially, a dot placed at the top of the line, like the later Greek colon, and having the value of a period.—2. In *Gr. pros.*, a dot placed over a time or syllable to mark the ictus.

Stigmonema (stig-mō-nē'mā), *n.* [*< Gr. στίγμα, a mark, + νημα, a thread.*] A genus of cyanophycous algæ, giving name to the family *Stigmonemaceæ*.

Stigmonemæ (stig-mō-nē'mē-ē), *n. pl.* [*< NL. < Stigmonema + -æ.*] A family of cyanophycous algæ, embraced, according to late systematists, in the order *Scytonemaceæ*.

Stigmus (stig'mus), *n.* [*< NL. (Jurine, 1807), < Gr. στίγμα, a mark: see stigma¹.*] In entom., a genus of fossorial wasps, of the family *Pemphredonidae*, having a large stigma to the fore wing and a petiolate abdomen. *S. troglodytes* of Europe makes its cells in the hollow straws of thatched roofs, and provisions them with masses of immature *Thrips*.

stilar, *a.* See *stylar*.

Stilbeæ (stil'bē-ē), *n. pl.* [*< NL. < Gr. στίλβειν, glitter, shine, + -æ.*] A division of hyphomycetous fungi, characterized by the coloring of the spore-bearing hyphae into a dense and slender stipe.

stilbite (stil'bit), *n.* [*< Gr. στίλβειν, glitter, shine, + -ite².*] 1. A common zeolitic mineral, usually occurring in radiated or sheaf-like tufts of crystals having a pearly luster on the surface of cleavage. It varies in color from white to brown or red. It is essentially a hydrous silicate of aluminum and calcium. Also called *desmine*. See cut under *tufted*.

2. The mineral heulandite.

stile¹ (stil), *n.* [Early mod. E. also *style*; < ME. *stile, style, stigele*, < AS. *stigel* (= OHG. *stigila, stīgīl*, MHG. *stigel, stigele*, a step, G. dial. *stegel*, a step), a stile, < *stigan* (pp. *stigen*), climb, ascend. Cf. *styl¹*, *n.*, and *stair¹*.] 1. A series of steps, or a frame of bars and steps, for ascending and descending in getting over a fence or wall.

Jog on, jog on, the foot-path way,
And merrily hent the stile-a.

Shak., W. T., iv. 3. 133.

2. In carp., a vertical part of a piece of framing, into which the ends of the rails are fixed by mortises and tenons. See cut of panel-door, under *door*.

A Poet in still musings bound.

Wordsworth, Sonnets, III. 11.

3. Silent; quiet; calm; noiseless; hushed.

A man that sayth little shall perceiue by the speeche of another:
Be thou still and see, the more shalt thou perceiue in another.

Babees Book (E. E. T. S.), p. 85.

The trumpet's silver sound is still,
The warder silent on the hill!

Scott, Marmion, I. Int.

4. Soft; low; subdued: as, a still small voice.

The gentle blasts of western winds shall move
The trembling leaves, and through their close boughs
breathe
Still musick, whilst we rest ourselves beneath
Their dancing shade. *Carew, Poems*, p. 70. (*Latham.*)

5. Not sparkling or effervescing: said of wine, mineral water, and other beverages: contrasted with *sparkling*; by extension, having but little effervescence. Thus, still champagne is not the non-effervescent natural wine, but champagne which is only moderately sparkling.

6. Continual; constant.

But I of these will wrest an alphabet,
And by still practice learn to know thy meaning.

Shak., Tit. And., III. 2. 45.

Still alarm, an alarm of fire given by a person calling at a station, and not by the regular system of fire-signals.—**Still days**. See *day¹*.—**Still hunt**. See *hunt*.—**Still life**, inanimate objects, such as furniture, fruits, or dead animals, represented by the painter's art.

The same dull sights in the same landscape mixt,
Scenes of still life, and points for ever fixed,
A tedious pleasure on the mind bestow.

Addison, Epil. to British Enchanters.

II. *n.* 1. Calm; silence; freedom from noise.

He (Henry VIII.) had never any . . . jealousy with the King his father which might give any occasion of altering court or counsel upon the change; but all things passed in a still.

Bacon, Hist. Hen. VIII.

2. A still alarm. [Colloq.]

Many alarms were what the firemen called *stills*, where a single engine went out to fight the fire.

Elect. Rev. (Amer.), II. xxv. 6.

still¹ (stil), *v.* [Early mod. E. also *stille*, *style*; < ME. *stille*, < AS. *stilla* = OS. *stilla*, *stillōn* = MD. D. *stilla* = MLG. LG. *stilla* = OHG. *stilla*, *stillōn*, MHG. of water, which is heated by the condensation of vapor in the worm.

containing them, and recondensing them into
the liquid form. It assumes many forms, according to
the purposes for which it is used; but it consists essen-
tially of two parts, a vessel in which the substance to be
distilled is heated, and one in which the vapor is cooled
and condensed. The most important use of stills is for
the distillation of spirituous liquors. See *distillation*, and
cut under *petroleum-still*.

2. A house or works in which liquors are dis-
tilled; a distillery. S. Judd, *Margaret*, i. 15.—

1. A stand for casks.—2. In a brewery, a stand
on which the rounds or cleansing-vats are placed
in a trough, which serves to carry off the over-

flowing yeast.—3. A stand on which pottery is
placed in the drying-kiln preparatory to firing.

Stillingia (sti-lin'ji-ā), *n.* [NL. (Linnaeus, 1767),
named after Benjamin *Stillingfleet*, an English
botanist who published botanical papers in
1759.] 1. A genus of apetalous plants, of the
order *Euphorbiaceae*, tribe *Crotonaceae*, and subtribe
Hippomaneae.

It is characterized by monoclous flowers
in terminal bracted spikes, each bract bearing two glands
— the male flowers having a small calyx with two or three
broad shallow lobes, and two or rarely three free exerted
stamens, and the female flowers bearing an ovary of two or
three cells, which terminate in undivided styles united at
the base, and ripen into two-valved carpels which on fall-
ing leave the receptacle armed with three hard spreading
horns. There are about 13 species, natives of North and
South America, the Mascarene Islands, and the islands of
the Pacific. They are mostly smooth shrubs, usually with
alternate short-petioled leaves and a few small female
flowers solitary under the lower bracts of the dense ster-
ile spike, which bears usually three male flowers under
each of the short and broad upper bracts. One species,
S. sylvatica, occurs from Virginia southward, for which
see *queen's-delight* and *silver-leaf*.

2. [*l. c.*] A plant of the above genus, especially
the official *S. sylvatica*.

And on her fete went home reasonably well.
Joseph of Arimathe (E. E. T. S.), p. 47.

I have laughed a-good to see the cripples
Go limping home to Christendom on *stilts*.
Marlowe, *Jew of Malta*, II. 3. 215.

2. One of two props or poles, each having a step or stirrup at some distance from the lower end, by means of which one may walk with the feet raised from the ground, and with a longer stride: used for crossing sandy or marshy places, streams, etc., and by children for amusement. Stilts were sometimes merely props fastened under the feet, as if very high-heeled shoes. Those used by children are slender poles about 6 feet long, with steps or stirrups 12 inches or more from one end; the longer end of the pole can be held by the hand or passed behind the arm. In a modified form the upper end of the pole is much shorter, and is fitted with a cross-handle which can be grasped by the hand, or is strapped to the leg below the knee. Stilts are used by the shepherds of the marshy Landes in southwestern France.

In *ceram.*, a support, generally of iron, used to hold a piece of pottery in the kiln, to allow the fire free access to the bottom of the piece. Also called *cockspur* and *spur* (which see).—6. [Abbr. of *stilt-bird*.] In *ornith.*, any bird of the genus *Himantopus*: so called from the extremely long, slender legs. The bill is likewise very slender, straight, and sharp. The body is slender, the neck long, the wings are long and pointed, and the tail is short. The stilts are wading-birds living in marshes. They are white below, with most of the upper parts glossy-black, the bill is black, and the legs are of some bright tint. They are very generally distributed over the world, nest on the ground, and lay four dark-colored, heavily spotted eggs. Their food consists of small soft animals found in the mud and water, which they explore with their probe-like bills. The common stilt of the Old World is *H. candidus* or *melanocephalus*; that of the United States is *H. mexicanus*, a rare bird in the eastern regions of the coun-

W. James, *Prin. of Psychol.*, I. 648.

2. In *med.*, the act or method of stimulating; the condition of being stimulated; the effect of the use of stimulants.

The latent morbid predisposition [to delirium tremens] engendered in the nervous system by prolonged and abnormal *stimulation* is evoked or brought into activity by the depressing influence of the shock [of a corporeal injury].
J. M. Carnochan, *Operative Surgery*, p. 153.

=*Syn.* 1. See *stimulate*.

stimulative (stim'ū-lā-tiv), *a.* and *n.* [= *It.* *stimolativo*; as *stimulate* + *-ive*.] 1. *a.* Having the quality of stimulating; tending to stimulate.

II. *n.* That which stimulates; that which rouses into more vigorous action; a stimulant or incentive.

Then there are so many *stimulatives* to such a spirit as mine in this affair, besides love!

Richardson, *Clarissa Harlowe*, I. 225. (*Davies*.)

stimulator (stim'ū-lā-tor), *n.* [= *F.* *stimulateur* = *It.* *stimolatore*, < *LL.* *stimulator*, an instigator, < *L.* *stimulare*, prick, goad: see *stimulate*.] One who or that which stimulates.

stimulatress (stim'ū-lā-tres), *n.* [= *F.* *stimulatrice* = *It.* *stimolatrice*, < *L.* *stimulatrix*, fem. of (*LL.*) *stimulator*: see *stimulator*.] A woman who stimulates or animates.

stimulose (stim'ū-lōs), *a.* [*< F.* *stimuleux* = *It.* *stimoloso*, < *L.* *stimulosus*, abounding with prickles, < *stimulus*, a prick, goad, prickle: see *stimulus*.] In *bot.*, covered with stings or stimuli.

stimulus (stim'ū-lus), *n.*; pl. *stimuli* (-li). [= *F.* *stimulus*, *stimule* = *Sp.* *estimulo* = *Pg.* *estimulo* = *It.* *stimolo*, *stimulo*, < *L.* *stimulus*, a goad, a pointed stake, fig. a sting, pang, an incitement, spur, stimulus, < *√ stig-*, also in *instigare*, set on, incite, urge, = *Gr.* *στίξω*, pierce, prick, = *AS.* **stecan*, pierce: see *stick*¹.] 1. Literally, a goad.—2. In *bot.*, a sting: as, the nettle is furnished with *stimuli*.—3. The point at the end of a crozier, pastoral staff, precentor's staff, or the like. In the staves of ecclesiastical authority the stimulus or point is regarded as the emblem of judgment or punishment.

4. Something that excites or rouses the mind or spirits; something that incites to action or exertion; an incitement or incentive.

We went to dine last Thursday with Mr. —, a neighboring clergyman, a haunch of venison being the *stimulus* to the invitation. *Sydney Smith*, in *Lady Holland*, vi.

The infinitely complex organizations of commerce have grown up under the *stimulus* of certain desires existing in each of us. *H. Spencer*, *Social Statics*, p. 28.

5. In *physiol.*, something which evokes some functional or trophic reaction in the tissues on which it acts.

Light does not act as a *stimulus* to the nervous substance, either fibres or cells, unless it have an intensity which is nearly deadly to that substance.

G. T. Ladd, *Physiol. Psychology*, p. 179.

Absolute stimulus difference, in *psychophysics*, the actual difference in strength between two stimuli. — **Relative stimulus difference**, in *psychophysics*, the ratio of the difference between two stimuli to their mean. — **Stimulus receptivity**, in *psychophysics*, the power of appreciating stimuli, measured by the least intensity of stimulus giving the greatest conscious effect. — **Stimulus scope**, in *psychophysics*, the difference between the measure of stimulus receptivity and the stimulus threshold. — **Stimulus susceptibility**, in *psychophysics*, the power of perceiving a stimulus, so that the greater the stimulus susceptibility the lower the stimulus threshold. — **Stimulus threshold**, in *psychophysics*, the minimum amount of stimulus required to produce a conscious effect.

stincht, *v. t.* [A var. of *stanch*.] To stanch.

First, the blood must be *stinched*, and howe was that done? *Breton*, *Miseries of Maullia*, p. 39. (*Davies*.)

stine (stin), *n.* A dialectal form of *styan*.

sting¹ (sting), *v.*; pret. and pp. *stung* (pret. formerly *stang*), ppr. *stinging*. [*< ME. stingen* (pret. *stang*, *stong*, *stonge*, pp. *stungen*, *stongen*, *y-stongen*, *y-stonge*), *< AS. stingan* (pret. *stang*, pp. *stungen*) = *Ice. stinga* = *Sw. stinga* = *Dan. stinge*; cf. *Goth. us-stiggan*, push, push out, = *L. *stingere*, quench; see *stick*¹, *v.*] **I. trans.** 1†. To pierce; prick; puncture.

To the hert with a sharpe spere ye hym *stonge*, & with .iii. nayles made hym shede his gittles blade. *Joseph of Arimathe* (E. E. T. S.), p. 38.

Thel ben y-sewed with whigt silk, . . . *Y-stongen* with stiches.

Piers Plowman's Crede (E. E. T. S.), l. 553.

2†. To impale.

He *stingeth* him upon his speres orde. *Chaucer*, *Good Women*, l. 645.

3. To prick severely; give acute pain to by piercing with a sharp point; especially, to pierce and wound with any sharp-pointed weapon supplied with acrid or poisonous fluid, as a fang or sting, with which certain animals and plants are furnished; bite; urticate: as, to be *stung* by a bee, a scorpion, or a nettle, or by a serpent or a sea-nettle.

What, wouldst thou have a serpent *sting* thee twice? *Shak.*, *M. of V.*, iv. l. 69.

I often have been *stung* too with curst bees. *B. Jonson*, *Sad Shepherd*, II. 2.

4. To pain acutely, as if with a sting; goad: as, a conscience *stung* with remorse.

Unhappy Psyche, *stung* by these reproaches, Profoundly feels the wound dive in her heart. *J. Beaumont*, *Psyche*, v. 14.

5. To stimulate; goad.

She was trying to task herself up to her duty. At last she *stung* herself into its performance by a suspicion. *Mrs. Gaskell*, *North and South*, xxviii.

II. intrans. 1. To have a sting; be capable of wounding with a sting; use the sting: literally or figuratively: as, hornets *sting*; epigrams often *sting*; a *stinging* blow.

At the last it biteth like a serpent, and *stingeth* like an adder. *Prov.* xxiii. 32.

2. To give pain or smart; be sharply painful; smart: as, the wound *stung* for an hour.

Under the dust, beneath the grass, Deep in dim death, where no thought *stings*. *A. C. Swinburne*, *Félicie*.

sting¹ (sting), *n.* [= *Ice. stingi*, a pin, a stitch in the side, = *Sw. sting*, a sting (in sense 4), = *Dan. sting*, stitch; from the verb.] 1. A sharp-pointed organ of certain insects and other animals, capable of inflicting by puncture a painful wound.

I bring no tales nor flatteries: In my tongue, sir, I carry no fork'd *stings*. *Fletcher*, *Loyal Subject*, II. 1.

In *zoöl.*, specifically — (a) The modified ovipositor of the females of certain insects, as bees, wasps, hornets, and many other *Hymenoptera*; an aculeus; a terebra. This weapon is generally so constructed as to inflict a poisoned as well as punctured wound, which may become inflamed and very painful or even dangerous; an irritating fluid is injected through the tubular sting when the thrust is given. See cut under *Hymenoptera*. (b) The mouth-parts of various insects which are formed for piercing and sucking, as in the mosquito and other gnats or midges, gadflies, fleas, bedbugs, etc. In these cases the wound is often poisoned. See cuts under *gnat* and *mosquito*. (c) A stinging hair or spine of the larvæ of various moths, or such organs collectively. See cuts under *hag-moth*, *saddleback*, and *stinging*. (d) The fangs of spiders, with which these creatures bite — in some cases, as of the katipo or malmignatte, inflicting a very serious or even fatal wound. See

cuts under *chelicera* and *falx*. (e) The curved or claw-like telson of the tail of a scorpion, inflicting a serious poisoned wound. See cuts under *scorpion* and *Scorpionida*. (f) One of the feet or claws of centipeds, which, in the case of some of the larger kinds, of tropical countries, inflict painful and dangerous wounds. (g) The poison-fang or venom-tooth of a nocoous serpent; also, in popular misapprehension, the harmless forked tongue of any serpent. See cuts under *Crotalus* and *snake*. (h) A fin-spine of some fishes, capable of wounding. In a few cases such spines are connected with a venom-gland whence poison is injected; in others, as the tail-spines of sting-rays, the large bony sting, several inches long and sometimes jagged, is smeared with a substance which may cause a wound to fester. See cuts under *stone-cat*, *sting-ray*. (i) An urticating organ, or such organs collectively, of the jellyfishes, sea-nettles, or other cœlenterates. See cut under *nematocyst*.

2. In *bot.*, a sort of sharp-pointed hollow hair, seated upon or connected with a gland which secretes an acrid or poisonous fluid, which, when introduced under the skin, produces a stinging pain. For plants armed with such stings, see *cowhage*, *nettle*¹ (with cut), *nettle-tree*, 2, and *tread-softly*. — 3. The fine taper of a dog's tail. *Sportsman's Gazetteer*. — 4. The operation or effect of a sting; the act of stinging; the usually poisoned punctured wound made by a sting; also, the pain or smart of such a wound.

Their softest touch as smart as lizards' *stings*! *Shak.*, 2 *Hen. VI.*, iii. 2. 325.

5. Anything, or that in anything, which gives acute pain, or constitutes the principal pain; also, anything which goads to action: as, the *sting* of hunger; the *stings* of remorse; the *stings* of reproach.

The *sting* of death is sin. *1 Cor.* xv. 56.

Whose *sting* is sharper than the sword's. *Shak.*, *W. T.*, ii. 3. 80.

A bitter jest leaves a *sting* behind it. *Burton*, *Anat. of Mel.*, To the Reader, p. 77.

6. Mental pain inflicted, as by a biting or cutting remark or sarcasm; hence, the point of an epigram.

There is nothing harder to forgive than the *sting* of an epigram. *O. W. Holmes*, *The Atlantic*, LXVI. 667.

7. A stimulus, irritation, or incitement; a netting or goading; an impulse.

The wanton *stings* and motions of the sense. *Shak.*, *M. for M.*, i. 4. 59.

Exserted sting. See *exserted*.

sting² (sting), *n.* [Also *steing*; a var. of *stang*¹.]

1†. A pole. — 2†. A pike; a spear. — 3. An instrument for thatching. — 4. The mast of a vessel. [*Prov. Eng.* or *Scotch* in all uses.]

Stinging ant, an ant of the family *Myrmicidae*. — **Stinging bug**, the blood-sucking cone-nose, *Conorhinus sanguisuga*, a common bug of the family *Reduviidae*, which sucks the blood of man and domestic animals, and inflicts a painful wound. See cut under *Conorhinus*. — **Stinging caterpillar**, the larva of any one of certain bombycid moths in the United States, as *Saturnia mata*, *Hyperchiria io*, *Empretia stimulea*, *Phobetrion pithecium*,

Stinging Caterpillar, or Slug-caterpillar, and Moth of *Lagoa opercularis*, both natural size.

Limacodes scapha, and *Lagoa opercularis*, which are provided with stinging spines. — **Stinging hair**. See *hair* and *stinging spine*. — **Stinging nettle**. See *nettle*¹, 1. — **Stinging spine**, in *entom.*, one of the modified bristles of any stinging caterpillar, which are sharp and have an urticating effect. See cuts under *hag-moth* and *saddleback*. — **Stinging tree**. Same as *nettle-tree*, 2.

stinging-bush (sting'ing-būsh), *n.* Same as *tread-softly*.

stinging-cell (sting'ing-sel), *n.* The thread-cell or lasso-cell with which any cœlenterate, as a sea-nettle, urticates. See *nematophore*, and cuts under *cnida* and *nematocyst*.

stingingly (sting'ing-li), *adv.* With stinging effect.

stingless (sting'les), *a.* [*< sting*¹ + *-less*.] Having no sting, as an insect. *Shak.*, *J. C.*, v. l. 35. — **Stingless nettle**, the richweed or clearweed, *Pilea pumila*. See *clearweed*.

sting-moth (sting'môth), *n.* The Australian *Doratifera vulnerans*, whose larva is capable of inflicting a stinging wound.

stingo (sting'gō), *n.* [With a simulated *It.* or *Sp.* or *L.* termination, *< sting*¹: in allusion to its sharp taste.] Strong malt liquor. [*Colloq.*]

Come, let's in and drink a cup of *stingo*. *Randolph*, *Hey for Honesty*, II. 6.

sting-ray (sting'rā), *n.* [Also, corruptly, *stingaree*, *stingoree*; *< sting*¹ + *ray*².] A batoid fish of the family *Trygonidae*, as *Trygon* (or *Dasybatis*) *pastinaca*, having a long, smooth, flexible, lash-like tail armed near the base with a bony spine several inches long, sharp at the point, and serrated along the sides. It is capable of inflicting a severe and very painful wound, which appears to be poisoned by the slime with which the sting is covered. There are many species of sting-rays, in some of which there are two or three spines bundled together. The British species above named is locally known as *fire-flare* or *fiery-flare*. The commonest sting-ray of the North Atlantic coast of the United States is *T. centroura*, locally known as *clam-cracker*, and corruptly called *stingaree*.

Southern Sting-ray (*Trygon sabina*). (From Report of U. S. Fish Commission.)

T. sabina is a similar southern species. The name extends to any ray with a tail-spine. See *Myliobatidae* (a).

stingtail (sting'tāl), *n.* A sting-ray.

sting-winkle (sting'wing'kl), *n.* The hedgehog-murex, *Murex erinaceus* or *europæus*: so called by fishermen because it bores holes in other shell-fish, as if stinging them.

stingy¹ (sting'i), *a.* [*< sting*¹ + *-y*¹.] Stinging; piercing, as the wind; sharp, as a criticism. [*Colloq.* or *prov. Eng.*]

Art thou a seruing man? then serue againe,

And *stint* to steale as common souldours do.

Gascoigne (ed. Arber), p. 67.

Spare not to spur, nor *stint* to ride,

Until thou come to fair Tweedside.

Scott, L. of L. M., I. 22.

4. To limit; restrain; restrict; hence, to limit or confine to a scanty allowance: as, to *stint* one's self in food; to *stint* service or help.

[He] trauels halfe a day without any refreshment then water, whereof wisely and temperately he *stinted* himselfe.

Quoted in *Capt. John Smith's Works*, II. 135.

Was the infinite One to be confined to this narrow space? Could His love be *stinted* to the few to whom He had especially revealed His Will? *Channing*, Perfect Life, p. 61.

5. To assign a definite task to; prescribe a specified amount of labor for: as, to *stint* a pupil or a servant. See *stint*, *n.*, 2. — 6. To cover or serve (a mare) successfully; get with foal. See the quotation under *stinted*, 2.

II. *intrans.* 1. To cease; desist; stay; stop; hold.

Of this cry they wolde nevere *stenten*.

Chaucer, Knight's Tale, l. 45.

He *styntid* not, nor neuer wold he sese,

And with his sword where that his stroke glynt,

Owt of ther sadill full redely they went.

Generydes (E. E. T. S.), I. 2420.

And swears she'll never *stint*. *Shak.*, Pericles, IV. 4. 42.

2. To be saving or careful in expenditure.

It's in things for show they cut short; while for such as me, it's in things for life we've to *stint*.

Mrs. Gaskell, Mary Barton, xxxvii.

stint (stint), *n.* [Also obs. or dial. *stent*; *< stint*, *r.*] 1. Limit; bound; limitation; restriction; restraint: as, common without *stint* (that is, without limitation or restriction as to the extent of the pasturage, the number of cattle to be pastured, or the period of the year).

If the summe which the debtor oweth be above the *stint*, he shall not be released. *Coryat*, Crudities, I. 167.

I know not how, Divine Providence seemeth to haue set those Scythian *stints* to the Persian proceedings.

Purchas, Pilgrimage, p. 352.

By rallying round the throne the whole strength of the Royalists and High-Churchmen, and by using without *stint* all the resources of corruption, he [Danby] flattered himself that he could manage the Parliament.

Macaulay, Sir W. Temple.

2. Fixed amount or quantity; allowance; prescribed or allotted task or performance: as, a certain *stint* of work.

Put me to a certain *stint*, sir; allow me but a red hering a-day.

Fletcher (and another), Love's Cure, II. 1.

In the divided or social state, these functions are parcelled out to individuals, each of whom aims to do his *stint* of the joint work.

Emerson, Misc., p. 72.

Margaret had a new *stint* at quilling.

S. Judd, Margaret, I. 2.

If you are sick or weak, and can't finish your *stent*, you are given twenty blows with the cat.

The Century, XXXVII. 36.

3. One of several small species of sandpiper, especially of the genus *Actodromas*; a sandpeep. The common *stint* is the dunlin, purr, or ox-bird, *Feldina alpina*. (See *dunlin*.) This is an early, if not the first, application of the name, as by Ray, who called this bird also

American Least Stint (*Actodromas minutilla*).

ozeys and least snipe. The little stint is *Actodromas minutus*; the least stint is *A. minutilla*, which abounds in North America, and is also known as *Wilson's sandpiper*. Temminck's stint is *A. temminckii*; the red-necked, *A. ruficollis*. There are several others of the same genus. The broad-billed sandpiper, *Limicola platyrhynchos*, is a kind of stint, and the spoon-billed, *Eurynorhynchus pygmaeus*, is another. Extension of the name to the sanderling and to phalaropes is unusual.

stintance (stin'tans), *n.* [*< stint + -ance.*] Stint; limit; restriction; restraint. *London Prodigal*, p. 7. (*Hallucell.*) [*Rare.*]

stinted (stin'ted), *p. a.* 1. Limited; scanty; scrimped.

Oh! trifle not with wants you cannot feel,
Nor mock the misery of a stinted meal.
Crabbe, Works, I. 9.

2. In foal. See *stint*, *v. t.*, 6. *Hallucell.* [*Prov. Eng.*]

Stinted, 'in foal.' The word was printed, in this sense, in a catalogue of live-stock for sale at Nashville a year or two ago [1886]. *Hallucell* and Wright give it as an adjective, meaning in foal, used in the West of England.

Trans. Amer. Philol. Ass., XVII. 44.

stintedness (stin'ted-nes), *n.* The character or condition of being stinted.

stinter (stin'ter), *n.* [*< stint + -er.*] One who or that which stints, checks, or puts a stop to: as, a *stinter* of strife.

Let us now see whether a set form, or this extemporary way, be the greater hinderer and *stinter* of it.

South, Sermons, II. III.

stintingly (stin'ting-li), *adv.* Restrictedly; restrainedly; grudgingly. *George Eliot, Janet's Repentance*, viii.

stintless (stin'tles), *a.* [*< stint + -less.*] 1. Ceaseless.

His life was nothing else but *stintless* passion.
Rowland, Betraying of Christ (1598). (*Hallucell.*)

2. Without stint; unstinted; generous.

He gets glimpses of the same *stintless* hospitality.
The Century, XXVII. 201.

stinty (stin'ti), *a.* [*< stint + -y.*] Restricted; grudging; illiberal. [*Rare.*]

Those endowments which our Anglo-Saxon forefathers made to win for themselves and kindred such ghostly aids in another world were neither few nor *stinty*.

Rock, Church of our Fathers, II. 327.

stiony, *n.* See *styan*.

Stipa (sti'pā), *n.* [NL. (Linnaeus, 1753), named from the flaxen appearance of the feathery awns of *S. pennata*; < *L. stipa*, *stupa*, the coarse part of flax, tow: see *stupa*.] A genus of grasses, of the tribe *Agrostideae*, type of the sub-tribe *Stipeae*. It is characterized by one-flowered panicled spikelets, with their pedicels not continued beyond the flower, which contains three or perhaps sometimes only two lodicules and a narrow acuminate flowering glume indurated closely around the grain and prolonged, usually by a joint, into a long and commonly conspicuously twisted or bent awn. There are nearly 100 species, widely dispersed through both tropical and temperate regions. They are tufted grasses, usually tall, with convolute leaves and a slender, sparingly branched panicle of rather long scattered spikelets, with awns sometimes extremely attenuated. A general name of the species is *feather-grass*, applying particularly to the highly ornamental *S. pennata* of Europe. The only common species of the eastern United States is *S. avenacea*, the black oat-grass; westward the species are numerous—several, known as *bunch-beard*, or *feather-grass*, being somewhat valuable wild forage-plants of the mountains and great plains. Among these are *S. comata* (*silk-grass*) and *S. spartea* (*porcupine-grass*), the latter remarkable for its hygrometric awns, which are coiled when dry, but uncoil under moisture and, when resisted, tend to push the seed into the ground. *S. viridula*, var. *robusta*, of Mexico, New Mexico, etc., is reported to have a narcotic effect upon horses, and is called *sleepy-grass*. *S. aristatilis* of Australia is a valuable fodder-plant, of remarkably rapid growth; *S. micrantha* of Queensland borrows the name of *bamboo*. *S. tenacissima* and *S. arenaria*, on account of their large membranous spikelets and two-cleft flowering glume, are sometimes separated as a genus, *Macrochloa* (Kunth, 1835). See *esparto*, *alfa*, and *atocha-grass*.

stipate (sti'pāt), *a.* [*< L. stipatus*, pp. of *stipare*, crowd, press together. Cf. *constipate*.] In bot., crowded.

stipe¹ (stip), *n.* [A dial. var. of *steep*¹. Cf. *Stiper Stone group*.] A steep ascent. *Hallucell.* [*Prov. Eng.*]

stipe² (stip), *n.* [*< F. stipe*, a stipe, = Sp. *estipite*, a door-post, = It. *stipite*, a stock, trunk, post, door-post, < *L. stipēs* (*stipit-*), a stock, trunk, post, a tree, a branch of a tree; perhaps cognate with *E. stiff*.] 1. In bot., a stalk or support of some sort, the word being variously employed. (a) In flowering plants, the stalk formed by the receptacle or some part of it, or by a carpel. To distinguish further this kind of stipe, various other terms are employed, as *thecophore*, *gynophore*, *gonophore*, *anthophore*, *gynobase*, and *carphophore*. See cut under *Arachis*. (b) The stalk or petiole of a frond, especially of a fern or seaweed. See cut under *seaweed*. (c) In fungi, especially of the genus *Agaricus*, the stalk or stem which supports the pileus or cap. (d) The caudex of a tree-fern. Also *stipes*. See cut in next column.

a, Longitudinal section of the flower of *Gynandropsis pentaphylla*, showing the calyx, two of the petals, two of the stamens, and the stipitate ovary. b, Frond of *Asplenium Trichomanes*. c, *Agaricus campestris*. (d, Stipe in a, b, and c.)

2. In anat., a stem: applied to two branches, anterior and posterior, of the zygote or paroccipital fissure of the brain. *B. G. Wilder*.—3. In zool., a stipes.

stipel (sti'pel), *n.* [*< NL. *stipella*, for **stipitella*, dim. of *L. stipēs*, a post: see *stipe*².] In bot., a secondary stipule situated at the base of the leaflets of a compound leaf. Unlike stipules, there is only a single one to each leaflet, with the exception of the terminal leaflet, which has a pair.

stipellate (sti'pel-āt), *a.* [*< NL. *stipellatus*, < **stipella*, a stipel: see *stipel*.] In bot., bearing or having stipels.

stipend (sti'pend), *n.* [= Sp. Pg. *estipendio* = It. *stipendio*, < *L. stipendium*, a tax, impost, tribute; in military use, pay, salary; contr. for **stipendium*, < *stips*, a gift, donation, alms (given in small coin), + *pendere*, weigh out: see *pendent*.] A fixed periodical allowance or payment; settled or fixed pay; salary; pay; specifically, in Scotland, the salary paid to a clergyman; the income of an ecclesiastical living.

Americus Vesputius, . . . under the *stipende* of the Portuguese, hadde sayled towards the south pole many degrees beyond the Equinoctiall.

Peter Martyr (tr. in *Eden's First Books on America*, (ed. Arber, p. 184).

'Twas a wonder with how small a *stipend* from his father Tom Tusher contrived to make a good figure.

Thackeray, Henry Esmond, x.

= *Syn. Pay*, etc. See *salary*.

stipend (sti'pend), *v. t.* [*< F. stipendier* = Sp. Pg. *estipendiar* = It. *stipendiare*, pay, hire, < *L. stipendiari*, receive pay, serve for pay, < *stipendium*, pay: see *stipend*, *n.*] To pay by settled stipend or wages; put upon or provide with a stipend. *Shelton*, tr. of *Don Quixote*, xlvii. [*Rare.*]

stipendiarian (sti-pen-di-ā-ri-an), *a.* [*< stipendiarius + -an.*] Acting from mercenary considerations; hired; stipendiary. *Imp. Dict.* **stipendiary** (sti-pen-di-ā-ri), *a.* and *n.* [*< F. stipendiare* = Sp. Pg. *estipendiar* = It. *stipendiario*, < *L. stipendiarius*, pertaining to tribute, contribution, or pay, < *stipendium*, tribute, pay: see *stipend*.] 1. *a.* Receiving wages or salary; performing services for a stated price or compensation; paid.—**Stipendiary curate**. See *curate*¹.—**Stipendiary estate**, in law, a feud or estate granted in return for services, generally of a military kind.—**Stipendiary magistrate**, in Great Britain, a police justice sitting in large cities and towns, under appointment by the Home Secretary on behalf of the crown.

II. *n.*; pl. *stipendiaries* (-riz). 1. One who performs services for a settled payment, salary, or stipend.—2. A stipendiary magistrate. See under I.—3. In law, a feudatory owing services to his lord.

stipendiater (sti-pen-di-āt), *v. t.* [*< L. stipendiatu*, pp. of *stipendiari*, receive pay, serve for pay, < *stipendium*, tribute, salary: see *stipend*, *v.*] To endow with a stipend or salary.

Besides ye exercise of the horse, armes, dauncing, &c., all the sciences are taught in the vulgar French by professors *stipendiati* by the great Cardinal.

Evelyn, Diary, Sept. 14, 1644.

Stiper Stone group. [*< Stiper Stones* (see def.).] In geol., a subgroup, the equivalent of the Arenig series in Carnarvonshire: so called from the name *Stiper Stones* given to a prominent ridge of quartzose rocks rising above the moorland in Shropshire, and extending for about ten miles in length. The Arenig or Stiper Stone group, according to Murchison's original classification (1833-4), formed the base of the Silurian system. It is now considered to be the base of Lapworth's Ordovician, of the Cambro-Silurian of Jukes, and of the Middle Cambrian of other English geologists.

stipes (sti'pēz), *n.* [NL. < *L. stipēs*, *stips* (*stipit-*), a stock, trunk: see *stipe*².] 1. In bot., same as

*stipe*².—2. In zool., a stalk or stem, as an eye-stalk or a footstalk; a stipe. Specifically—(a) In entom., the footstalk of the maxilla of an insect, the outer or main division of that organ; the second joint of the maxilla, borne upon the cardo, and through the palpi and subgalea bearing the palpus, galea, and lacinia, when these organs exist. Also called *shaft*. See cuts under *galea* and *Insecta*. (b) In Myriapoda: (1) The proximal or median one of two pieces of which the protomala, or so-called mandible, consists, the other being the cardo. See *protomala*, and figure under *epilabrum*. (2) One of two sets, an inner and an outer, of broad plates into which the deutomala, or second pair of mouth-appendages, of a myriapod is divided. See *deutomala*. A. S. Packard, *Proc. Amer. Philos. Soc.*, June, 1883, pp. 198, 200.

stipiform (sti'pi-fōrm), *a.* [*< L. stipēs*, *stips* (*stipit-*), a stock, trunk, + *forma*, form.] In bot. and zool., having the form or appearance of a stipe or stipes. See *stipe*², *stipes*.

stipitate (sti'pī-tāt), *a.* [*< NL. *stipitatus*, < *L. stipēs* (*stipit-*), a stock, trunk: see *stipe*².] In bot. and zool., having or supported by a stipe or stipes; elevated on a stipe.

stipitiform (sti'pī-ti-fōrm), *a.* [*< L. stipēs* (*stipit-*), a stock, trunk (see *stipe*²), + *forma*, form.] In bot. and zool., having the form or character of a stipe or stipes; stipiform; stalk-like.

stipiture (sti'pī-tūr), *n.* A bird of the genus *Stipiturus*; an emu-wren.

Stipiturus (sti'pī-tū-rus), *n.* [NL. (Lesson, 1831), < *L. stipēs* (*stipit-*), a stock, trunk, + Gr. *οὐρά*, tail.] An Australian genus of warbler-like birds, assigned to the *Malurus* or placed elsewhere, having the tail curiously formed of ten feathers with stiffened shafts and loose decomposed barbs (whence the name); the emu-wrens.

Emu-wren (*Stipiturus malacurus*).

S. malacurus is a small brownish bird streaked with black, and with a blue throat, described by Latham in 1801 as the soft-tailed flycatcher. The immediate affinities of the genus are with such forms as *Sphenocercus* and *Sphenura* (see these words), and the true position of all these forms seems to be among or near the reed- or grass-warblers, especially such as have but ten tail-feathers. See *warbler*.

stipple (stip'l), *v. t.*; pret. and pp. *stippled*, ppr. *stippling*. [*< D. stippele*, speckle, dot over (cf. *stippel*, a speckle, dim. of *stip*, a point), freq. of *stippen* (> G. *stippen*), prick, dot, speckle, < *stip*, MD. *stip*, *stup*, a point, dot.] To produce gradation in color or shade in (any material) by means of dots or small spots. See *stippling*.

The interlaying of small pieces can not altogether avoid a broken, *stippled*, spotty effect.

Mūman, Latin Christianity, xiv. 10.

stipple (stip'l), *n.* [*< stipple*, *v.*] 1. In the *fine arts*, same as *stippling*.—2. In decorative art, an intermediate tone or color, or combination of tones, used to make gradual the passage from one color to another in a design.—**Stipple-engraving process**, the process of making an engraved plate by stippling. The first step is to lay an etching-ground on a copperplate; the next, after the subject has been transferred as in etching, is to dot in the outline; after which the darker parts are marked with dots, which are laid in larger and more closely in the deeper shades. The plate is then bitten in, the ground is removed, and the lighter parts are laid in with dry-point or the stipple-graver.

stippled (stip'ld), *p. a.* Spotted; shaded or modeled by means of minute dots applied with the point of the brush or in a similar way.

stipple-graver (stip'l-grā-vēr), *n.* An engraver's tool of which the point is bent downward so as to facilitate the making of small dots or indentations in the surface of a copperplate.

stippler (stip'lēr), *n.* [*< stipple + -er.*] 1. One who stipples.—2. A brush or tool used for stippling: as, a *stippler* made of hog's hair.

stippling (stip'ling), *n.* [Verbal *n.* of *stipple*, *v.*] In the *fine arts*, dotted work of any kind, whether executed with the brush-point, the pencil, or the stipple-graver.

stiptict, *a.* and *n.* See *stiptic*.

stipula (stip'ū-lā), *n.*; pl. *stipulæ* (-lō). [NL., < *L. stipula*, a stalk: see *stipule*.] In ornith., same as *stipule*.

stipulaceous (stip'ū-lā-shi-us), *a.* [*< stipula + -aceous.*] In bot., same as *stipular*.

stipular (stip'ū-lār), *a.* [*< NL. stipula + -ar.*] In bot., of, belonging to, or standing in the

place of stipules; growing on stipules, or close to them: as, *stipular glands*.—**Stipular buds**, buds which are enveloped by the stipules, as in the tulip-tree. **stipulary** (stip'ū-lā-rī), *a.* [*< NL. stipula + -ary.*] In *bot.*, relating to stipules; stipular. **stipulate**¹ (stip'ū-lāt), *v. t.*; pret. and pp. *stipulated*, ppr. *stipulating*. [*< L. stipulatus*, pp. of *stipulare* (*> It. stipulare* = Sp. Pg. *estipular* = F. *stipuler*), exact, bargain for; origin doubtful: by some referred to OL. **stipulus*, firm; by others to L. *stipula*, a straw.] To arrange or settle definitely, or by special mention and agreement, or as a special condition: as, it is *stipulated* that A shall pay 5 per cent.

Henry the Fourth and the king my master had *stipulated* with each other that, whosoever any one of them died, the survivor should take care of the other's child.

Lord Herbert of Chesham, *Life* (ed. Howells), p. 129.

Those Articles which were *stipulated* in their Favour. *Howell, Letters*, I. iii. 20.

It is *stipulated* also that every man shall be bound to obey his own lord "conveniently," or so far as is fitting and right. *Encyc. Brit.*, XXII. 782.

Stipulated damages. (*a*) In a general sense, a sum named in a contract or obligation as the damages to be paid in case of non-performance. (*b*) As commonly used in law, damages liquidated by a stipulation—that is, a sum fixed by a contract or obligation in such manner as to be the sum payable in case of breach, without any further question as to the amount of the actual damages.

stipulate² (stip'ū-lāt), *a.* [*< NL. *stipulatus*, *< L. stipula*, a stalk, stipule: see *stipule*.] In *bot.*, having stipules: as, a *stipulate* stalk or leaf.

Stipulateæ (stip'ū-lā'tē-ē), *n. pl.* [*NL. (J. von Sachs)*, *< *stipulatus*, stalked (see *stipulate*²), + *-æ*.] Sachs's name for the eusporangiate ferns, a division which embraces the *Ophioglossaceæ* and *Marattiaceæ*. The name is now abandoned, as it is known that there are no stipules in the *Ophioglossaceæ*, and that they are sometimes wanting in the *Marattiaceæ*.

stipulation¹ (stip'ū-lā'shon), *n.* [*< F. stipulation* = Sp. *estipulación* = Pg. *estipulação* = It. *stipulazione*, *< L. stipulatio(n)*, a promise, bargain, covenant, *< stipulari*, demand a formal promise, bargain, covenant, stipulate: see *stipulate*.] 1. The act of stipulating, agreeing, or covenanting; a contracting or bargaining. —2. That which is stipulated or agreed upon; a contract or bargain, or a particular article or item in a contract: as, the *stipulations* of the allied powers to furnish each his contingent of troops; a contract containing so many *stipulations*. —3. In law, specifically—(*a*) An agreement between counsel or attorneys in a cause, affecting its conduct. (*b*) An undertaking in the nature of bail taken in the admiralty courts. (*c*) In Roman law, a contract in which the form consisted in a question and answer, formalities which in course of time came to be recognized as making a valid contract which might dispense with the ceremonials required by the earlier law.

stipulation² (stip'ū-lā'shon), *n.* [*< L. stipula*, a stalk: see *stipule*.] In *bot.*, the situation and structure of the stipules.

stipulator (stip'ū-lā-tor), *n.* [*< L. stipulator*, one who stipulates, *< stipulari*, demand a formal promise, bargain, stipulate: see *stipulate*.] One who stipulates, contracts, or covenants; in *Rom. law*, one to whom a stipulation or promise was given in the form of contract known as *stipulatio*. See *stipulation*¹, 3 (*c*).

stipule (stip'ūl), *n.* [= F. *stipule* = It. *stipula*, *< L. stipula*, a stalk, stem, blade, dim. of *stipes*, stock, trunk: see *stipe*².] 1. In *bot.*: (*a*) One of a pair of lateral appendages found at the base of the petiole of many leaves. Stipules are normally flat organs, leaf-like in appearance and use, or colorless and scale-like, and without function—sometimes,

however, as in the magnolia, fig, and beech, serving as bud-scales and falling when the leaves expand. Stipules may be free from the petiole, or adnate by one edge, then passing by grades into mere wing-like expansions of its base; they may be free from one another, or variously united, sometimes so as to clasp the stem, sometimes fitting it and the leafstalk (then intrapetiolar), sometimes sheathing the stem, as in *Polygonum*, then forming ocreæ (see *ocrea*). The adjacent members of two opposite pairs may become connate around the stem, as in many *Rubiaceæ*. Stipules are sometimes reduced to mere bristles, or take the form of spines, as in the common locust; in *Smilax* they appear to be converted into tendrils. They are often wholly wanting, but where present they generally characterize whole families, as they do the *Malvaceæ*, *Leguminosæ*, and *Rosaceæ*. (*b*) In the *Characeæ*, one of certain unicellular tubes, of greater or less length, on the inner and outer sides of the so-called leaf. (*c*) Same as *paraphyllum* (*b*). —2. In *ornith.*, a newly sprouted feather; a pin-feather. Also *stipula*.

stipuled (stip'ūld), *a.* [*< stipule + -ed*.] In *bot.*, furnished with stipules, or lateral leafy appendages.

stipuliform (stip'ū-lī-fōrm), *a.* [*< L. stipula*, a stalk, + *forma*, form.] In *bot.*, having the form of a stipule.

stir¹ (stēr), *v.*; pret. and pp. *stirred*, ppr. *stirring*. [*Also dial. steer (and stoore)*; early mod. E. also *stirr*, *stirre*, *stire*, *stere*; *< ME. stiren*, *stieren*, *sturen*, *styren*, *< AS. styrian*, move, stir, = North Fries. *stiaren* = MD. *stooren*, D. *storen*, disturb, vex, = MLG. *stören*, disturb, hinder, = OHG. *stören*, *störren*, scatter, destroy, disturb, MHG. *stären*, G. *stören*, disturb, interrupt, hinder, = Sw. *störa*, disturb; cf. stirrup (stir' or stèr'up), *n.* [Early mod. E. also *stirrop*, *stirrop*, *sterope*; < ME. *stirrop*, *stirrop*, *styrope*, *sterepe*, < AS. *stirap*, *stigrap*, *stigerap* (= MD. *stegerep*, *steeghrecp*, also *stegelreep* = OHG. *stegarcif*, MHG. *G. stegreif* = Icel. *stigræip*), lit. 'mounting-rope,' < *stigan*, mount, + *rāp*, rope: see *styl* and *rope*. Cf. D. *stijg-beugel* = G. *stiegbügel* = Sw. *stig-bygel* = Dan. *stig-bøjle*, a stirrup, lit. a ring or loop for mounting (see *bail*).] 1. A support for the foot of a person mounted on a horse, usually a metal loop with the bottom part flat and corrugated or finished with points to give a hold to the sole of the boot and to aid in mounting. The metal loop is suspended from the saddle by a strap or thong, which in modern saddles is adjustable in length. The stirrup of Arab or other Eastern horsemen has a very broad rest for the foot; this projects sometimes beyond the heel, and the sharp edge of it serves instead of a spur. The stirrups of some modern military saddles have a strong front piece of leather or other material which prevents the foot from passing too far into the loop and protects the front of the leg. See also cut under *saddle*.

1, Stirrup for poulaine; 2, modern stirrup; 3, Mexican wooden stirrup; 4, Mexican wooden stirrup with taps.

Our hosts upon his stirrups stood anon. Chaucer, Prologue to Shipman's Tale, l. 1.

I'll hold your stirrup when you do alight,
And without grudging wait till you return.

Beau. and Fl., Honest Man's Fortune, iv. 1.

2. *Naut.*, a rope with an eye at its end, through which a foot-rope is rove, and by which it is supported. The ends of stirrups are securely fastened to the yard, and they steady the men when reefing or furling sails.

3. In *mach.*, any piece resembling in shape and functions the stirrup of a saddle, as the iron loop by which a mill-saw hangs from the

muley-head or in the sash.—4. In *carp.*, etc., an iron loop-strap or other device for securing a rafter-post or strut to a tie, or for supporting a beam, etc.—5. A hold for the foot at the end of the stock of a large crossbow, to keep it firm while the bow is bent and the string drawn to the notch. See cut under *arbalister*.—6. In *anat.*, the stapes or stirrup-bone.

stirrup-bar (stir'up-bār), *n.* The spring-bar or other device on a riding-saddle to which the upper end of the stirrup-strap is fastened.

stirrup-bone (stir'up-bōn), *n.* The stapes of a mammal: so called from its shape.

stirrup-hose (stir'up-hōz), *n. pl.* Heavy stockings worn over the other garments for the legs by men traveling on horseback in the seventeenth century, and probably earlier. They are described as made very large at the top, and secured by points to the girdle or the bag-breeches.

stirrup-iron (stir'up-i-ern), *n.* The stirrup proper—that is, the metal loop in which the foot is placed, as distinguished from the leather strap which suspends it.

stirrup-lantern (stir'up-lan'tern), *n.* A small lantern with an iron frame fastened below the stirrup to light the road at night and also to warm the rider's feet: a contrivance used in the fifteenth century and later.

stirrup-leather (stir'up-leth'ēr), *n.* The leather strap by which a stirrup hangs from the saddle.

stirrup-muscle (stir'up-mus'l), *n.* The stapedius.

stirrup-oil (stir'up-oil), *n.* A sound beating; a drubbing. Halliwell. [Prov. Eng.]

stirrup-piece (stir'up-pēs), *n.* In *carp.*, *mach.*, etc., anything which performs the office of a stirrup, in hanging from a fixed point of support and supporting anything else which lies in its loop or hollow.

stirret, *stirret*. Obsolete forms of the preterit and past participle of *stir*.

stitch (stich), *n.* [*stiche*, *stiche*, < AS. *stice*, a pricking sensation (also in comp. *in-stice*, an inward stitch, *fær-stice*, a sudden stitch or twinge, *stic-ād*, *stic-wærc*, stitch in the side), not found in lit. sense 'pricking,' 'piercing,' = OFries. *steke*, *stek* = OHG. *stih*, MHG. *G. stich*, a pricking, prick, sting, stab, stitch, = Goth. *stiks*, a point of time; from the verb, AS. **stecan*, etc., prick, sting, stick: see *stick*, *stick*.] 1. An acute sudden pain like that produced by the thrust of a needle; a sharp spasmodic pain, especially in the intercostal muscles: as, a stitch in the side. Such pains in the side may be myalgic, neuralgic, pleuritic, or due to muscular cramp.

'Twas but a stitch into my side,

And sair it troubles me.

The Queen's Marie (Child's Ballads, III. 117).

Corporal sickness is a perpetual monitor to the conscience, every pang a reproof, and every stitch reads a lesson of mortality. Rev. T. Adams, Works, I. 441.

2†. A contortion; a grimace; a twist of the face.

If you talk,

Or pull your face into a stitch again,

As I love truth, I shall be very angry.

Beau. and Fl., Captain, ii. 2.

8. A bit of clothing; a rag: as, he had not a dry stitch on. [Colloq.].—9. In *bookbind-*

ing, a connection of leaves or pieces of paper, through perforations an inch or so apart, with thread or wire. A *single stitch* is made with two perforations only, the thread being tied near the entering place of the stitching-needle. A *double stitch* has three and sometimes four perforations, the thread being reversed in and out on the upper and under side at each perforation. A *saddle-back stitch* has its perforations in the center of the creased folded double leaves. A *side-stitch* has perforations through the sides of the leaves, about one eighth of an inch from the back fold. A *French stitch* has two perforations only in each section of the pamphlet, the second perforation of the first section ending where the first perforation of the second section begins, in which diagonal line the stitching-needle is put through each succeeding section, and is then reversed and locked at the end. A *machine-stitch* is a succession of ordinary locked stitches made by the sewing-machine. A *wire stitch* has short staples of turned wire, which are forced through the leaves and clamped by one operation of the wire-stitching machine. See *kettle-stitch*.—**Blind stitch**. See *blind*.—**Damask stitch**. See *damask*.—**Dotted stitch**. stochastic (stō-kas'tik), *a.* [Gr. *στοχαστικός*, able to hit or to guess, conjecturing, < *στοχάζεσθαι*, aim at, endeavor after, < *στόχος*, aim, shot, guess.] Conjectural; given to or partaking of conjecture.

Though he [Sir T. Browne] were no prophet, . . . yet in that faculty which comes nearest to it he excelled, i. e. the *Stochastic*, wherein he was seldom mistaken as to future events, as well public as private.

Whitefoot, quoted in Sir T. Browne's Works, I. xlvii.

stock¹ (stok), *n.* and *a.* [ME. *stocke*, *stokke*, *stok*, *stoke*, *stoc* (pl. *stokkes*, the stocks), < AS. *stoc*, *stocce* (stocce-), a post, trunk, stock, = OFries. *stok* = MD. *stock*, D. *stok* = MLG. *stok*, LG. *stock* = OHG. *stoc*, *stoch*, MHG. *stoc* (> It. *stocco*, a rapier), G. *stock* = Icel. *stokkr* = Dan. *stok* = Sw. *stock* (not recorded in Goth.), a post, stock (hence, from Teut., OF. *estoc*, a stock, trunk of a tree, race, etc., = It. *stocco*, a stock, trunk of a tree, rapier, etc.: see *stocco*, *stoccade*, *stock*², *tuck*², etc.); generally supposed to be connected with the similar words, of similar sense, *stick*³, *stake*¹, and so with *stack*; but the phonetic connection is not clear. Assuming the sense 'stick' or 'club' to be original, a connection may be surmised with Skt. *√ tuj* (orig. **stug*?), thrust. The senses of this noun are numerous and complicated; the ME. senses are in part due to the OF. *estoc*.] I. *n.* 1. A wooden post; a stake; a stump.

The Cros of oure Lord was made of 4 manere of Trees, . . . and the *Stock*, that stode withn the Erthe, . . . was of Cedre. *Mandeville*, Travels, p. 10.

Lay this ronde plate upon an evene grond or on an evene ston or on an evene *stok* fix in the gronde. *Chaucer*, Astrolabe, li. 38.

They all went downward, fleetly and gally downward, and only he, it seemed, remained behind, like a *stock* upon the wayside. *R. L. Stevenson*, Will o' the Mill.

2. A wooden block; a block; a log; hence, something lifeless and senseless.

He swore hire yis, by *stokkes* and by stones, And by the goddes that in hevne dwelle. *Chaucer*, Troilus, iii. 589.

There was an exe, and a *stoke*, and oon of the lewdeste of the shippe badde hym ley down his hedde, and he should be fair ferd wyth, and dye on a swerd. *Paston Letters*, I. 125.

More than dead *stocks* would startle at such beauty. *Chapman*, Blind Beggar of Alexandria.

And those made thee forsake thy God, And worship *stocks* and stones. *Wanton Wife of Bath* (Child's Ballads, VIII. 155).

3. A person who is as dull and senseless as a block or a log.

Let's be no stoles nor no *stocks*. *Shak.*, T. of the S., I. i. 31.

Such a *stock* of a child, such a statue! Why, he has no kind of feeling either of body or mind. *Brooke*, Fool of Quality, iii.

What a phlegmatic sot it is! Why, sirrah, you'r an anchorite!—a vile insensible *stock*. *Sheridan*, Rivals, iii. 1.

4. A dull object or recipient of action or notice, as of wonder, scorn, or laughter; a butt: generally the second element in a compound: as, a gazing-stock; a laughing-stock.

Howsoever we are all accounted dull, and common jesting *stocks* for your gallants, there are some of us do not deserve it. *Beau.* and *Fl.*, Woman-Hater, iii. 3.

Thou art the *stock* of men, and I admire thee. *Fletcher*, Rule a Wife, iii. 5.

I know, and may presume her such, As, out of humour, will return no love; And therefore might indifferently be made The courting-stock for all to practise on. *B. Jonson*, New Inn, I. 1.

5. The stalk, stem, or trunk of a tree or other plant; the main body, or fixed and firm part.

Though the root thereof wax old in the earth, and the *stock* thereof die in the ground. *Job* xiv. 8.

There, in the *stocks* of trees, white foles do dwell. *B. Jonson*, Sad Shepherd, ii. 2.

You know him—old, but full Of force and choler, and firm upon his feet, And like an oaken *stock* in winter woods. *Tennyson*, Golden Year.

6. A stem in which a graft is inserted, and which is its support; also, a stem, tree, or plant that furnishes slips or cuttings.

You see, sweet maid, we marry A gentler scion to the wildest *stock*. *Shak.*, W. T., iv. 4. 93.

The scion ever over-ruleth the *stock*. *Bacon*, Nat. Hist., Int. to § 477.

Hence—7. The original progenitor of a family or race; the person from whom any given line of descent or inheritance is derived. See *stock of descent*, below.

This firste *stok* was ful of rightwisenesse, Trewe of his word, sobre, pitous, and free. *Chaucer*, Gentillesse, l. 8.

Brave soldier, yield, thou *stock* of arms and honour. *Fletcher*, Bonduca, v. 5.

8. Direct line of descent; race; lineage; family: as, children of the *stock* of Abraham.

What things are these! I shall marry into a fine *stock*! *Brome*, Northern Lass, ii. 2.

In his actions and sentiments he belied not the *stock* to which he pretended. *Lamb*, Two Races of Men.

They sprang from different *stocks*. They spoke different languages. *Macaulay*, Hist. Eng., vi.

9. The principal supporting or holding part; the part in which other parts are inserted, or to which they are attached in order to furnish a firm support or hold. Specifically—(a) The wooden support to which the barrel and lock of a rifle or like firearm are attached, or upon which the bow of the crossbow is mounted. See cuts under *gun* and *gun-carriage*. (b) The handle by which a boring-bit is held and turned; a bit-stock; a brace. See cut under *brace*. (c) The block of wood which constitutes the body of a plane, and in which the cutting iron is fitted. See cuts under *plane*, *rounding-plane*, and *router*. (d) The support of the block on which an anvil is fitted, or of the anvil itself. (e) The crosspiece of an anchor, perpendicular to the shank, formerly of wood, when the shank was passed through a hole cut in the stock, or the latter was made in two parts joggled to receive the shank: now usually of iron, in which case the stock slips through a hole made in the shank. See cut under *anchor*. (f) An adjustable wrench for holding screw-cutting dies. (g) That part of a plow to which the handles, irons, etc., are attached. (h) A beater, as used in a fulling-mill, in the manufacture of chamol-leather, etc. (i) An arm of a bevel-gage or of a square. (j) The wooden frame in which the wheel and post of a spinning-wheel are supported.

10. A stiff band of horsehair, leather, or the like, covered with black satin, cambric, or similar material, and made to imitate and replace the cravat or neckband: formerly worn by men generally, and, in some forms, still in military use. It was sometimes fastened behind with a buckle, which was often an ornamental object.

A shining *stock* of black leather supporting his chin. *Irving*, Knickerbocker, p. 321.

He wore a magnificent *stock*, with a liberal kind of knot in the front; in this he stuck a great pin. *W. Beant*, Fifty Years Ago, p. 98.

11. The front part, especially the front side-piece, of a bed. [Scotch.]

I winna lie in your bed, Either at *stock* or wa'. *Capt. Wedderburn's Courtship* (Child's Ballads, VIII. 12).

12. *pl.* An apparatus for the confinement of vagrants and petty offenders, formerly in use in different parts of Europe, and retained until recently in country villages in England. It consisted of two heavy timbers, one of which could be raised,

Stocks.

and when lowered was held in place by a padlock or the like; notches in these timbers, forming round holes when the upper timber was shut down in place, held firmly the legs of those upon whom this punishment was inflicted; in some cases a second row of openings could be used to restrain the hands, and even the neck, also. Compare *pillory*.

This yere was ordeyned in every warde [of London] a peyr *stockis*. *Arnold's Chronicle*, p. xxxvi.

Mars got drunk in the town, and broke his landlord's head, for which he sat in the *stocks* the whole evening. *Steele*, Tatler, No. 4.

13. The frame or timbers on which a ship rests while building; hence, generally, on the *stocks*,

in course of construction or preparation.—14. That part of the tally which the creditor took away as evidence of the king's debt, the part retained in the Exchequer being called the *counterstock*. See *tally*.

It was the custom when money was borrowed for State purposes to record the transaction by means of notches on a stick (commonly hazel), and then to split the stick through the notches. The lender took one half as a proof of his claim against the Exchequer, and it was called his *Stock*. The Exchequer kept the other half, which was called the counterstock, and which answered the same purpose as was served in after-times by the counterfoil. *Bithell*, Counting-House Dict., p. 290.

15. In finance: (a) The money represented by this tally; money lent to a government, or a fund consisting of a capital debt due by a government to individual holders who receive a fixed rate of interest. In modern usage, especially in Great Britain, the name is applied to a capital of which payment cannot be claimed, but on which interest is paid in perpetuity at a given rate; hence, to *buy stock* is simply to buy the right to this interest on a certain amount of this capital debt—a right which may be sold again. The various kinds of stocks are called the *public funds*. See *fund*¹, *n.*, 2.

I have known a Captain rise to a Colonel in two days by the fall of *stocks*. *Steele*, quoted in Ashton's Reign of Queen Anne, II. 206.

The term *Stock* was originally applied to the material sign and proof of money lent. But as the thing signified was of greater importance to both parties than the sign, it was at length transferred to the money itself, or rather, to the right to claim it. In this way *Stock* came to be understood as money lent to the government, and eventually to any public body whatever. *Bithell*, Counting-House Dict., p. 290.

(b) The share capital of a corporation or commercial company; the fund employed in the carrying on of some business or enterprise, divided into shares of equal amount, and owned by individuals who jointly form a corporation; in the plural, shares: as, bank *stock*; railway *stock*; *stocks* and bonds.—16. The property which a merchant, a tradesman, or a company has invested in any business, including merchandise, money, and credits; more particularly, the goods which a merchant or a commercial house keeps on hand for the supply of customers.

Who trades without a *stock* has naught to fear. *Cibber*.

"We must renew our *stock*, Cousin Hepzibah!" cried the little saleswoman. "The gingerbread figures are all gone, and so are those Dutch wooden milkmaids, and most of our other playthings." *Hawthorne*, Seven Gables, v.

17. Fund; sum of money.

Mr. John Whitson being Mayor, with his brethren the Aldermen, and most of the Merchants of the Citty of Bristol, raised a *stock* of 1000*l.* to furnish out two Barks. *Quoted in Capt. John Smith's Works*, I. 108.

It's proverbial He gave them an alms-penny, for which reason Judas carried the bag that had a common *stock* in it for the poor. *Barnard*, Heylin, § 104.

The money is raised out of the interest of a *stock* formerly made up by the nobility and gentry. *Butcher*, quoted in Strutt's Sports and Pastimes, p. 103.

18. Hoard or accumulation; store; supply; fund which may be drawn upon as occasion demands: as, to lay in a *stock* of provisions; a *stock* of information.

Though all my *stock* of tears were spent already Upon Pisano's loss. *Shirley*, Traitor, v. 1.

He set up as a Surgeon upon his bare natural *stock* of knowledge, and his experience in Kibes. But then he had a very great *stock* of confidence withal, to help out the other. *Dampier*, Voyages, I. 388.

A great *stock* of parliamentary knowledge. *Macaulay*, Hist. Eng., vi.

19. Share; portion.

Whilst we, like younger Brothers, get at best But a small *stock*, and must work out the rest. *Cowley*, To Lord Falkland.

Therefore nothing would satisfy him [a young prodigal] unless he were intrusted with the *Stock* which was intended for him, that he might shew the difference between his Father's Conduct and his own. *Stillingsfleet*, Sermons, III. 1.

20. Ground; reason; evidence; proof.

He pitties our infirmities, and strikes off much of the account upon that *stock*. *Jer. Taylor*, Works (ed. 1835), I. 914.

21. The part of a pack of cards which in certain games is not dealt out, but left on the table, to be drawn from as occasion requires.

Nay, then, I must buy the *stock*; send me good carding! I hope the prince's hand be not in this sport. *Fletcher*, Humorous Lieutenant, iv. 1.

22. In *agri.*: (a) The horses, cattle, sheep, and other useful animals raised or kept on a farm or ranch: distinctively known as *live stock*: as, a farmer's land and *stock*. The term is extended to any animals, as fish or oysters, artificially propagated.

Brandy was produced, pipes lighted, and conversation returned to the grand staple Australian subject—*stock*.

A. C. Grant, *Bush Life in Queensland*, I. 141.

(b) The implements of husbandry stored for use. Also called *dead stock*.—23. The raw material from which anything is made; stuff; material: as, paper-stock (rags, fiber, wood-pulp, etc.); soap-stock.

In its natural state, fat of animals is always associated with cellular tissue and other foreign matters, which must be separated before it can be used as candle stock.

Workshop Receipts, 1st ser., p. 350.

24. The liquor or broth prepared by boiling meat, with or without vegetables, etc., so as to extract the nutritious properties, and used as a foundation for different kinds of soup. Also called *soup-stock*.—25. A good kind of red and gray brick, used for the exterior of walls and the front of buildings.—26. A name of several species of *Matthiola*, or sometimes the species in general: originally *stock-pillyflower*. (b) By extension, the somewhat similar *Malcolmia maritima*, the Mahon stock, a low diffuse annual, in England called *Virginia* or *virgin stock*, though from the shores of the Mediterranean. The name has been applied also to the genus *Heliophila*.

27. A covering for the leg; a stocking. Compare *nether-stocks*.

A linen stock on one leg, and a kersey boot-hose on the other. *Shak.*, T. of the S., iii. 2. 67.

28. In *her.*, the stump of a tree used as a bearing: represented as cut square on top and eradicated—that is, torn up by the roots—with at least the main roots indicated.—29. (a) The pillar or post on which the holy-water vessel was fixed. *E. Peacock*. Hence—(b) A holy-water vessel, or aspersorium.

Item. cone hollywater stocke of glasse with a bayle.

Inventory 34, Henry VIII.

30. The proceeds of the sale of the catch of a fishing-trip; the net value of a cargo of fish. [New Eng.]—31. *pl.* A frame in which a horse or other animal can be secured or slung for shoeing or for a veterinary operation.—32. In *mining*, sometimes used as the equivalent of the German *stock* (plural *stücke*), especially in translating from that language. A "stock" is a mass of ore of irregular form, but usually thick in proportion to its other dimensions, and not having the characters of a true vein, but belonging more properly to the class of segregated veins or masses. Some "stocke" resemble very nearly the "carbonas" of the Cornish miner; others are akin to the "flats" of the north of England.

33. In early forms of feudalism, commendation. See *to accept stock*, below.—34. In *zool.*, a compound, colonial, or aggregate organism; an aggregate of persons forming one organic whole, which may grow by budding or cast off parts to start a new set of persons: as, a polyp-stock. A polydrom, a polyzoary, a chain of salps or dolloids, etc., are examples. Haeckel extends *stock* in this sense to the broader biological conception which includes those plants that propagate by buds or shoots. See *teology*.—*Dead stock*. See def. 22.—*Drop of stock*. See *drop*.—*Fancy stocks*. See *fancy*.—*Holy-water stock*, a vessel for holy water; a holy-water-stoup. See *water*.—*Live stock*. See def. 22.—*Lock, stock, and barrel*. See *lock*.—*Long of stock*. See *long*.—*Net stock*. See *net*.—*On or upon the stocks*. See def. 13.—*Preference or preferred stock*. See *preference*.—*Rolling stock*. See *rolling-stock*.—*Stock-and-bill tackle*. Same as *stock-tackle*.—*Stock and block*, everything; both capital and interest.

Before I came home I lost all *stock and block*.

Bailey, tr. of *Colloquies of Erasmus*, p. 236.

Stock and die, a screw-cutting die in its holder.—**Stock certificate**. (a) In the *law of corporations*, a certificate issued by a corporation or joint-stock company to a shareholder, as evidence of his title to a specified number of shares of the capital stock. (b) In *Eng. finance*, a certificate issued by or on behalf of the government, pursuant to the National Debt Act, 33 and 34 Vict., c. 71, to a holder of consols or of some other public indebtedness or annuities, as evidence of his title to such stock, with coupons annexed, entitling the bearer of the coupon to the corresponding dividend. A stock certificate is evidence of title to the stock, as distinguished from the stock itself, which is considered as an intangible right.—**Stock company**. (a) A commercial or other company or corporation whose capital is divided into shares, which are held or owned by individuals, generally with limited liability, as distinguished from a *partnership*: as, a stock company for the manufacture of window-glass. (b) A company of actors and actresses employed more or less permanently under the same management, and usually connected with a central or home theater.—**Stock dividend**. See *dividend*.—**Stock indicator**. See *indicator*.—**Stock in trade**, the goods kept for sale by a shopkeeper; hence, a person's mental equipment or resources considered as qualifying him for a special service or business.—**Stock of descent**, in the *law of inheritances*, the person with whose ownership any given succession of inheritance is considered as commencing. At common law, in order to determine who was entitled to succeed as heir, the inquiry was for the heir of the person last actually seized. This rule has been superseded by modern legislation.—**To accept stock**, in early feudal customs, the act of a lord in receiving another person as his vassal.—**To**

give stock, the act of a person in becoming the vassal of a lord.—**To have on the stocks**, to have in hand; be at work upon.—**To take stock**. (a) Same as *to accept stock*. (b) In *com.*, to make an inventory of stock or goods on hand; hence, with *of*, to make an estimate of; set a value upon; investigate for the purpose of forming an opinion; loosely, to notice.

In *taking stock* of his familiarly worn . . . nautical clothes, piece by piece, she took stock of a formidable knife in a sheath at his waist, . . . and of a whistle hanging round his neck, and of a short jagged knotted club.

Dickens, *Our Mutual Friend*, II. 12.

To take stock in. (a) To take a share or shares in; take or have an interest in. Hence—(b) To repose confidence in; believe in: as, *to take little stock in one's stories*. [Colloq.]

Captain Polly gives the right hand of fellowship to two boys in whom nobody else is willing to take stock, and her faith in them saves them.

Harper's Mag., Oct., 1889, Literary Notes.

To water stocks. See *water*, v. t.

II. a. Kept in stock; ready for service at all times; habitually produced or used; standing; as, a stock play; a stock anecdote; a stock sermon.

The old stock-oaths, I am confident, do not amount to above forty-five, or fifty at most.

stoic (stō'ik), *a.* and *n.* [Formerly also *stoick*; = *F. stoïque* = *Sp. estóico* = *Pg. estoico* = *It. stoico*, *< L. stoicus*, *< Gr. στωικός*, pertaining to a porch or portico, specifically pertaining to that called *Στοά Ποικίλη*, 'the Painted Porch' in the Agora at Athens, and to the school of philosophy founded by Zeno, who frequented this porch.] **I. a.** [*cap.*] Pertaining to the Stoics, or to their teaching: as, a *Stoic philosopher*; the *Stoic doctrine*; hence, manifesting indifference to pleasure or pain (compare *stoical*).

II. n. 1. [*cap.*] A disciple of the philosopher Zeno, who founded a sect about 308 B. C. He taught that men should be free from passion, unmoved by joy or grief, and submit without complaint to the unavoidable necessity by which all things are governed. The Stoics are proverbially known for the sternness and austerity of their ethical doctrines, and for the influence which their tenets exercised over some of the noblest spirits of antiquity, especially among the Romans. Their system appears to have been an attempt to reconcile a theological pantheism and a materialist psychology with a logic which seeks the foundations of knowledge in the representations or perceptions of the senses, and a morality which claims as its first principle the absolute freedom of the human will. The Stoics teach that whatever is real is material; matter and force are the two ultimate principles; matter is of itself motionless and unformed, though capable of receiving all motions and all forms. Force is the active, moving, and molding principle, and is inseparably joined with matter: the working force in the universe is God, whose existence as a wise thinking being is proved by the beauty and adaptation of the world. The supreme end of life, or the highest good, is virtue—that is, a life conformed to nature, the agreement of human conduct with the all-controlling law of nature, or of the human with the divine will; not contemplation, but action, is the supreme problem for man; virtue is sufficient for happiness, but happiness or pleasure should never be made the end of human endeavor. The wise man alone attains to the complete performance of his duty; he is without passion, although not without feeling; he is not indulgent, but just toward himself and others; he alone is free; he is king and lord, and is inferior in inner worth to no other rational being, not even to Zeus himself.

Certain philosophers of the Epicureans and of the Stoics encountered him. *Acts* xvii. 18.

Hence—2. A person not easily excited; one who appears or professes to be indifferent to pleasure or pain; one who exhibits calm fortitude.

Flint-hearted Stoics, you, whose marble eyes
Contemn a wrinkle, and whose souls despise
To follow nature's too affected fashion.

Quarles, Emblems, II. 4.

School of the Stoics, the Porch. See *porch*.

stoical (stō'i-kal), *a.* [*< stoic + -al*.] Of, pertaining to, or characteristic of the Stoics; hence, manifesting or maintaining indifference to pleasure or pain; exhibiting or proceeding from calm fortitude: as, *stoical indifference*.

It is a common imputation to Seneca that, though he declaimed with so much strength of reason, and a stoical contempt of riches and power, he was at the same time one of the richest and most powerful men in Rome.

Steele, Tatler, No. 170.

Stoical ethics. See *Stoic*, n. 1.

stoke¹, *v. t.* and *i.* [*< ME. stoken*, *< OF. estoquer* (= *It. stoccare*), stab, thrust, *< estoc*, a rapier, stock: see *stock*², *stoccade*.] To pierce; stick; thrust.

Ne short sward for to stoke with point bytynge.

Chaucer, Knight's Tale, l. 1688.

stoke² (stōk), *v.*; pret. and pp. *stoked*, ppr. *stoking*. [*< stoker*, taken as an *E. noun*, *< *stoke + -er*, but appar. *< D. stoker*, *< stoken*, kindle a fire, incite, instigate, *< MD. stock*, *D. stok*, a stick, stock, rapier: see *stock*¹. Cf. *stoke*¹.] **I. trans.** To poke, stir up, and maintain the fire in (a furnace, especially one used with a boiler for the generation of steam for an engine); supply with fuel; trim and maintain combustion in.

Much skill is needed to stoke the furnace of a steam-boiler successfully; and one stoker will often be able to keep the steam well up when another of equal strength and diligence will fail altogether.

Brande and Cox, Dict. Sci., Lit., and Art.

Cold stoking, in glass-manuf., the process of lowering the temperature of the oven until the glass attains the tough fluid consistency necessary for blowing.

II. intrans. To attend to and supply a furnace with fuel; act as a stoker or fireman.

stoke-hole (stōk'hōl), *n.* The compartment of a steamer in which the furnace-fires are worked: in the United States called *fire-room*.

stoker (stō'ker), *n.* [*< D. stoker*, one who kindles or sets on fire, *< stoken*, kindle a fire, stir a fire, *< stok*, a stock, stick (hence a poker for a fire): see *stock*¹, and cf. *stoke*².] 1. One who attends to and maintains suitable combustion in a furnace, especially a furnace used in generating steam, as on a locomotive or steamship; a fireman.—2. A poker. [Rare.].—**Mechanical stoker**, an automatic device for feeding fuel to a furnace, and for keeping the grate free from ashes and clinkers. Many such machines have been invented. Endless aprons or chains, or revolving toothed cylinders, are common feeders, distributing the coal to the grate in definite quantity as needed, while shaking grates, revolving grate-bars, and special bars called *picker-bars*, with teeth working in the air-spaces of the grate, are employed for the discharge of ashes and cinders.

Stokesia (stō-kē'si-ä), *n.* [NL. (L'Heritier, 1788), named after Dr. Jonathan Stokes (1755–1831), a British botanist.] A genus of composite plants, of the tribe *Vernoniaceæ*, sub-tribe *Eucernoniæ*, and series *Stilpnopapeæ*. It is characterized by large stalked heads of blue flowers, with smooth three- or four-angled achenes and a pappus of four or five long bristles. The corollas, unlike the tubular type otherwise prevalent in the tribe, are flattened above the middle and somewhat ligulate, and toward the outside of the head, by their increased size and deeply five-parted border, they suggest the tribe *Cichoriaceæ*. The only species, *S. cyanea*, is a native of the southern United States near the Gulf of Mexico, a rare plant of wet pine-barrens. It is an erect shrub, clad above with loose wool and alternate clasping leaves, and bearing petioled leaves below, which are entire or spiny-fringed. The handsome blue flowers form large terminal heads which are purplish in the

Roman Woman Clad in the Stola (over which is draped the palla).

bud, resemble those of the China aster, and are grown in large quantities for the London market, under the name of *Stokes's aster*.

stola (stō'lä), *n.*; pl. *stolæ* (-læ). [L.: see *stole*².] An ample outer tunic or dress worn by Roman women over the under-tunic or chemise: it fell as low as the ankles or feet, and was gathered in around the waist by a girdle. It was a characteristic garment of the Roman matrons, as the toga was of the men, and divorced women and courtesans were not permitted to wear it. See cut in preceding column.

stole¹ (stōl). Preterit and obsolete past participle of *steal*¹.

stole² (stōl), *n.* [*< ME. stole*, *stool*, *< OF. estole*, *F. étole* = *Sp. Pg. estola* = *It. stola*, *< L. stola*, a stola, robe, stole, *< Gr. στολή*, a long robe; orig., in a gen. sense, dress, equipment, sacerdotal vestment or vestments; *< στέλλειν*, set, array, despatch: see *stell*.] 1. A stola, or any garment of similar nature.

Forsoth the fadir seyde to his seruauantis, Soone brynge 3e forth the first stoule, and clothe 3e him.

Wyckif, Luke xv. 22.

Behind, four priests, in sable stole,
Sung requiem for the warrior's soul.

Scott, L. of L. M., v. 30.

2. In the Roman Catholic, Oriental, and Anglican churches, an ecclesiastical vestment, consisting of a narrow strip of silk or other material, worn over the shoulders (by deacons over one shoulder) and hanging down in front to the knees or below them. It is widened and fringed at the ends, and usually has a cross embroidered on it at the middle and at each extremity. Stoles are worn of different colors, according to the ecclesiastical season. When celebrating the eucharist a priest wears his stole crossed upon the breast and secured by the girdle, at other times simply pendent from the shoulders. A bishop, on account of his pectoral cross, wears it pendent even when celebrating. A deacon wears it over the left shoulder and tied on the right side. In the Greek Church the stole has been worn since early times in two different forms, the deacon's (*orariion*) and the priest's (*epitrachelion*). Originally the stole was of linen, and probably was a napkin or cloth indicative of ministering at the altar and at agapæ. The pall or omophoron is of entirely distinct origin. See *orarium*.

Forth comth the preest with stole aboute his nekke,
And bad hire be lyke to Sarra and Rebekke
In wysdom and in trouthe of mariage.

Chaucer, Merchant's Tale, l. 459.

3. A chorister's surplice or cotta: an occasional erroneous use.

Six little Singing-boys—dear little souls—
In nice clean faces, and nice white stoles.

Barham, Ingoldsby Legends, I. 210.

4. In *her.*, usually, a bearing representing a scarf with straight and parallel sides, fringed at each end.—**Groom of the stole**, the first lord of the bed-chamber in the household of an English king.—**Order of the Golden Stole**, a Venetian order, the badge of which was a stole of cloth of gold worn over the robes. It disappeared with the independence of the republic of Venice.—**Stole-fee**, a fee paid to a priest for religious or ecclesiastical service, as for marriages, christenings, and funerals.

stole³ (stōl), *n.* Same as *stolon*.

stole⁴, *n.* An obsolete form of *stool*.

stoled (stōld), *a.* [*< stole*² + *-ed*.] Wearing a stole. *G. Fletcher*, Christ's Triumph After Death.

stolen (stō'ln), *p. a.* [Pp. of *steal*¹.] Obtained or acquired by stealth or theft: as, *stolen goods*.

Stolen waters are sweet.

Prov. ix. 17.

Stolephoridae (stol-e-for'i-dē), *n. pl.* [NL., *< Stolephorus + -idae*.] A family of malacopterygian fishes, typified by the genus *Stolephorus*; the anchovies. The body is oblong or elongate; the snout is produced forward; the mouth is very large and inferior; the maxillaries are very narrow, and project backward; the dorsal fin is submedian and short; the anal fin is rather long; the pectorals are normal; and the ventrals are abdominal, but further advanced than usual, and of moderate size. There is no lateral line, but along the sides is generally developed a broad silvery band, to which the typical genus owes its name. The species are mostly of small size, rarely exceeding 6 inches, and often less. About 70 are known, some inhabiting almost all tropical and temperate seas. *Engraulididae* is a synonym.

stolephoroid (stō-lef'ō-roid), *n.* and *a.* [*< Stolephorus + -oid*.] **I. n.** A fish of the family *Stolephoridae*.

II. a. Of, or having characters of, the *Stolephoridae*.

Stolephorus (stō-lef'ō-rus), *n.* [NL. (Lacépède, 1803), *< Gr. στολή*, a stole, + *φέρω* = *E. bear*.] A genus of fishes, related to the herrings, but with a produced snout, and a broad silvery band which has been compared to the white stole or band worn by priests, typical of the family *Stolephoridae* (or *Engraulididae*). The common anchovy is *S. encrancholus*. There are several others, as *S. browni*, from Cape Cod to Brazil, abounding southward; *S. ringens*, from Vancouver Island to Peru, a large anchovy; *S. delicatissimus* and *S. compressus*, of the Californian and Mexican coasts, the latter locally known as *sprut* (see *sprut*²,

2 (c). This genus has been oftener called *Engraulis*. See cut under *anchovy*.

stolid (stol'id), *a.* [= Sp. *estólido* = Pg. *estólido* = It. *stólido*, < L. *stolidus*, unmovable, slow, dull, stupid; prob. akin to Gr. *στεῖρός*.] Heavy; dull; stupid; not easily moved; lacking in or destitute of susceptibility; denoting dullness or impassiveness: as, a *stolid* person; a *stolid* appearance.

But the *stolid* calm of the Indian alone
Remains where the trace of emotion has been.

Whittier, Mogg Megone, l.

= Syn. Doltish, wooden.

stolidity (stól'id-i-ti), *n.* [= It. *stolidità*, < L. *stoliditas*], dullness, stupidity, < L. *stolidus*, dull, stupid; see *stolid*.] The state or character of being stolid; dullness; stupidity.

These certainly are the fools in the text, indocile, intractable fools, whose *stolidity* can baffle all arguments, and be proof against demonstration itself.

Bentley, Sermons, l.

= Syn. See *stolid*.

stolidly (stól'id-li), *adv.* In a stolid manner: as, to gaze *stolidly* at one. *Bailey*.

stolidness (stól'id-nes), *n.* Stolidity.

stolo (stól'ō), *n.*; pl. *stolones* (stól'ō-nēz). [L.: see *stolon*.] In *zool.*, a *stolon*.—**Stolo** prolifer, the proliferating stolon of some animals, as certain ascidians; a germ-stock. See *stolon*, 2 (c).

stolon (stól'on), *n.* [NL., < L. *stolon*], a shoot, branch, sucker. 1. In *bot.*: (a) In phanerogams, a reclined or prostrate branch which strikes root at the tip, developing a new plant.

Carex vulgaris, var. *stolonifera*, showing the stolons.

A very slender naked stolon with a bud at the end constitutes a *runner*, as of the strawberry. See also cut under *Solidago*. (b) In mosses, a shoot running along or under the ground, and eventually rising into the air and producing fully leafed shoots. *Goebel*.—2. In *zool.*, some proliferated part or structure, likened to the stolon of a plant, connecting different parts or persons of a compound or complex organism, and usually giving rise to new zooids by the process of budding. See cuts under *Campanularia* and *Willsia*. (a) A process of protoplasm between the different compartments of a multicellular foraminifer. (b) The procumbent, adherent, or creeping basal section of the stock of some social infusorians. (c) One of the prolongations of the cenosarc of some actinozoans. (d) The second stage of the embryo of some hydrozoans. (e) The germ-stock or prolongation of the tunic of some compound ascidians, as a *salp*; a *stolo* prolifer. See cuts under *Salpa* and *cyathozoid*.

Also *stole*.

stolonate (stól'on-āt), *a.* [< *stolon* + -ate]. In *zool.*, giving rise to or provided with a stolon or stolons; originating in a stolon; stoloniferous.

stoloniferous (stól-lō-nif'e-rus), *a.* [< L. *stolo(n)-*, a shoot, sucker, + *ferre*, bear, carry; see -ferous.] Producing or bearing stolons; proliferating, as an ascidian or a hydroid; stolonate.

stolzite (stól'zit), *n.* [Named after Dr. Stolz of Teplitz in Bohemia.] Native lead tungstate, a mineral occurring in tetragonal crystals of a green, brown, or red color, and resinous or subadamantine luster. Sometimes called *scheelite*.

stoma (stóm'ä), *n.*; pl. *stomata* (-ma-tä). [NL., < Gr. *στόμα* (*stomat-*), pl. *στόματα*, the mouth, a mouth, opening, entrance or outlet, a chasm, cleft, etc., the face, front, fore part, etc.; = Zend *staman*, mouth. Cf. *stomach*, from the same source.] 1. In *zool.*, a mouth or ingestive opening; an oral orifice; an ostium or ostiole: chiefly used of small or simple apertures, as a cytostome; hence, also, a small opening of any kind through which something may pass in or out; a pore. Specifically—(a) An opening of

a lymphatic vessel; a lymphatic pore or orifice, as an interstice between the cells of a serous membrane. (b) The outer opening of a trachea or air-tube of an insect; a spiracle or breathing-hole. (c) A branchial pore of an ascidian or acranial vertebrate.

Longitudinal Section of a Stoma taken from the leaf of *Urtica perfoliata*. (Magnified.)

apparatus of the stoma consists usually of a pair of cells (there are several in the *Equisetaceae*, *Hepaticæ*, etc.) called *guard-cells* or *guardian-cells*, between the opposed concave sides of which lies the slit or opening, which extends through the whole height of the epidermis and permits free communication between the intercellular spaces and the external air. According to Van Tieghem, the stomata are always open in sunlight and closed in darkness.

These cells are strongly thickened on the upper and under walls of their opposed faces, while elsewhere their walls are relatively thin. The opening and closing of a stoma depend upon the difference in thickness of the parts of the walls. When the turgescence of the guard-cells increases, they curve more strongly, and consequently the cleft widens; but with decreased turgescence the cleft becomes narrower. See also cut under *Iris*.

3. In Swedenborg's philosophy, a cubical figure with hollowed surfaces, being the figure of the interstices of spheres arranged in what Swedenborg calls the fixed quadrilateral pyramidal position, supposed to be that natural to the spherical particles of water.

stomacace (stóm-ak'a-sē), *n.* [NL., < L. *stomacace*, < Gr. *στόμακας*, a disease of the mouth, scurvy of the gums, < *στόμα*, mouth, + *κάκη*, badness, < *καός*, bad.] Ulcerous stomatitis. See *stomatitis*.

stomach (stum'ak), *n.* [Now conformed terminally to the L. spelling, but pron. according to its ME. origin; early mod. E. *stomack*, *stomacke*, *stomak*, *stomake*; < ME. *stomak*, *stomake*, *stomoke*, < OF. *estomac*, *estomach*, F. *estomac* = Pr. *estomach* = Sp. *estómago* = Pg. *estomago* = It. *stomaco*, the stomach, < L. *stomachus*, the throat, gullet, also the stomach, fig. taste, liking, also distaste, dislike, irritation, chagrin, < Gr. *στόμαχος*, the throat, gullet, the orifice of the stomach, hence also the stomach, lit. (as shown also in other uses, the neck of the bladder or of the uterus, etc.) a mouth or opening, < *στόμα*, mouth, opening; see *stoma*.] 1†. The throat; the gullet; the mouth.

Spitful tongues in cankered *stomachs* placed.
Kaleigh. (Imp. Dict.)

2. A more or less sac-like part of the body where food is digested. In the lowest animals any part of the sarcode or protoplasmic substance of the body is capable of digesting food, and forms during the process a temporary stomach, as in an amoeba. In many infusorial animalcules special vacuoles containing food are formed. These are inconstant both in number and in position, whence Ehrenberg's name, *Polygastrica*, for these organisms. In the highest protozoans, which have a definite oral or ingestive area, there is likewise a more or less fixed digestive tract, constituting a stomach. A few of the metazoans have no true digestion, and consequently no stomach; such are the parenchymatous or anenterous worms, which imbibe or soak in nutriment already elaborated in the tissues of the host of which they are parasites. But the vast majority of animals above the protozoans have an intestinal digestive tract the whole or a part of which may properly be called a stomach. In most of these, again, a definite stomach exists as a specialized, usually dilated, part of the alimentary canal, in which food is subjected to a certain degree of digestion subsequent to mastication and insalivation and prior to further digestive changes which go on in the intestine. Among vertebrates more than one section of the alimentary canal is called a stomach, and many vertebrates have more than one. Thus, in birds there are a true glandular stomach, the *proventriculus*, in which the esophagus ends, and a muscular or grinding stomach, the gizzard or *gizzard*. In mammals the stomach always extends from the end of the gullet to the beginning of the gut. It is of extremely variable size and shape. Kinds of mammalian stomachs sometimes distinguished are the simple, as in man, the carnivores, etc.; the complex or plurilocular stomach, as in various marsupials, rodents, some monkeys, etc.; and the compound or pluripartite. The last is confined to the ruminants. (See *Ruminantia*.) In man the stomach is the most dilated and most distensible part of the alimentary canal. It occupies parts of the left hypochondriac and epigastric regions of the abdomen, immediately within the abdominal walls, below the diaphragm and partly under the liver, to the right of the spleen, and above the transverse colon. In form it is irregularly conoidal, and curved upon itself. When moderately distended, it is about 12 inches long and 4 wide; it weighs 3 or 4 ounces. But the size, shape, and hence the anatomical relations

vary greatly in different individuals and in different states of distention. It begins where the gullet ends, at the esophageal or cardiac orifice, and ends at the pyloric orifice, where the duodenum begins. From the cardiac orifice the stomach bulges to the left in a great cul-de-sac, the fundus cardiacus, or cardiac end, in contact with the spleen, and from this greatest caliber the organ lessens in diameter with a sweep to the right. The lesser curvature or short border of the stomach, between the cardiac and pyloric orifices, is uppermost, and is connected with the liver by the lesser or gastrophrenic omentum. The greater curvature or long border of the stomach is opposite the other, between the same two points, and gives attachment to the great or gastrosplenic omentum. These two curvatures separate the anterior and posterior surfaces. The stomach is held in place by folds of peritoneum, the gastrosplenic, gastrophrenic, gastrosplenic, and gastrophrenic omenta, the last of which gives it most fixity. The arteries of the stomach are the gastric (a branch from the celiac axis), the pyloric and right gastro-epiploic branches of the hepatic, the left gastro-epiploic, and short branches from the splenic artery. The veins end in the splenic, superior mesenteric, and portal veins. The numerous lymphatics consist of a deep set and a superficial set. The nerves are the terminal branches of both pneumogastrics and many branches from the sympathetic system. The coats of the stomach are four—serous, muscular, submucous, and mucous. The serous layer is the peritoneum, which covers the whole organ on both its surfaces, and is reflected away from it along each of its curvatures. The muscular coat includes three sets of fibers—longitudinal, circular, and oblique, the last chiefly limited to the cardia. The submucous coat is simply the connective tissue between the muscular layer and the mucous membrane lining the stomach. This mucous membrane is the so-called "coat" of the stomach. It is thick, pinkish, reddish, or brownish, with a soft velvety surface, thrown into longitudinal folds or rugæ when the organ is contracted. Studding the surface of the mucous membrane are numberless depressions or alveoli of polygonal tending to hexagonal form, $\frac{1}{16}$ to $\frac{1}{8}$ of an inch in diameter: these are the enlarged mouths of the tubular gastric glands, which secrete the gastric juice by the action of which gastric digestion is effected. Two kinds of these follicles are distinguished by their microscopic structure—the pyloric and the cardiac. The former are found chiefly at and near the pyloric end, the latter most typical at the cardiac, and there are intermediate forms in intermediate regions. The epithelium lining the mucous membrane and its alveoli is of the kind called *columnar*. Besides the four coats above described, a fifth, a layer of involuntary muscular fibers between the mucous membrane and the submucous layer, is distinguished as the *muscularis mucosæ*. The digestive activity of the stomach is intermittent, and depends upon the stimulus which the presence of food occasions. The muscular arrangement is such that food is continually rolled about, so that every part of the mass is submitted to the action of the gastric juice. In the stomach the proteids are converted into albumins and peptones by the pepsin, milk is curdled by the rennet-ferment, the gelatiniferous tissues are dissolved, and other less important changes are effected. See also cuts under *Alimentary*, *Asteroides*, *Appendicularia*, *Dibranchiata*, *Dolichotele*, *Intestine*, *Peritonæum*, *Plumetella*, *Pluteus*, *Protella*, *Pulmonata*, *Pycnogonida*, *Ruminantia*, *Salpa*, *Tragulus*, and *Tunicata*.

3. The digestive person or alimentary zooid of a compound polyp. See *Gasterozooid*.—4. In most insects of the orders *Lepidoptera*, *Diptera*, and some *Hymenoptera*, a bladder-like expansion of the esophagus, which can be dilated at the will of the insect; the sucking-stomach, by means of which the nectar of flowers or other liquid is sucked up, as water is drawn into a syringe. In mandibulate insects the ingluvie or crop takes the place of the sucking-stomach, and nearly all insects have two true stomachs, called *proventriculus* and *ventriculus*.

5. Appetite; desire or relish for food: as, to have a good *stomach* for one's meals.

The body is as so redly and penible
To wake, that my *stomak* is destroyed.

Chaucer, Summoner's Tale, l. 139.

Pray, seat you, lords; we'll bear you company,
But with small *stomach* to taste any food.

Beau. and Fl. (?), Faithful Friends, iii. 2.

I'll make as bold with your meat; for the trot has got me a good *stomach*.
Cotton, in Walton's Angler, ii. 234.

In some countries, where men and women have good travelling *stomachs*, they begin with porridge, then they fall to capon, or so forth, but if capon come short of filling their bellies, to their porridge again, 'tis their only course.

Webster and Dekker, Northward Hoe, l. 1.

Hence—6. Relish; taste; inclination; liking: as, to have no *stomach* for controversy.

He also hathe tolde me moche off bys *stomake* and tendre faver that he owyth to yow.
Paston Letters, III. 160.

Finding that the citizens had apparently no *stomach* for the fight, he removed his trophies, and took his departure.

Motley, Dutch Republic, II. 66.

Human Stomach and Beginning of Intestine, laid open to show rugæ.

a, esophagus or gullet; b, cardiac (left) dilatation of stomach; c, lesser curvature of stomach, opposite which is the (unlettered) greater curvature; d, pylorus, at right extremity of stomach; e, biliary or hepatic duct; f, gall bladder, whose duct, the cystic duct, forms with the hepatic duct the ductus communis choledochus, or common bile duct; g, pancreatic duct, opening into the last; h, i, duodenum, or beginning of the small intestine.

7. Disposition. (a) Spirit; temper; heart.

Though I bee not worthe to receive any favor at the hands of your maistership, yet is your excellent herte and noble *stomack* worthe to shewe favour.

Udall, in Ellis's *Lit. Letters*, p. 4.

This was no small Magnanimity in the King, that he was able to pull down the high *Stomachs* of the Prelates in that time.

Baker, *Chronicles*, p. 50.

(b) Compassion; pity.

Nere myn extorcoun I myghte nat lyven,
Nor of swiche japes wol I nat be shryven,
Stomak ne conscience ne knowe I noon.

Chaucer, *Friar's Tale*, l. 143.

(c) Courage; spirit.

For in them, as men of stowter *stomackes*, bolder spiritcs, and manly courages then handycraftes men and plowmen be, doth consiste the whole powre, strength, and puissance of oure army, when we muste fight in battayle.

Sir T. More, *Utopia*, tr. by Robinson, p. 39.

(d) Pride; haughtiness; conceit.

He was a man
Of an unbouded *stomach*, ever ranking
Himself with princes.

Shak., *Hen. VIII.*, iv. 2. 34.

(et) Spleen; anger; choler; resentment; sullenness.

From that time King Richard, mooved in *stomack* against King Philip, neuer shewed any gentle countenance of peace & amitie.

Hakluyt's *Voyages*, II. 23.

Many learned men have written, with moche diversitie for the matter, and therefore with great contrariety and some *stomack* amongst them selves.

Ascham, *The Scholemaster*, p. 123.

Which might teach these times not suddenly to condemn all things that are sharply spoken, or vehemently written, as proceeding out of *stomach*, virulence, and ill nature.

Milton, *Church-Government*, ii., Int.

Circulating stomach, one of the temporary food-vacuoles of an infusorian or other protozoan, which moves about with a kind of cyclosis. See *Polygastrea*.—**Frigidity of the stomach**, a state of gastric debility formerly considered to depend on sexual excesses.—**Fullness of the stomach**, a feeling of weight or distention in the epigastric region.—**Glandular stomach**. See *proventriculus*.—**Hypogenesia of the stomach**, unnatural smallness of the stomach, seen in some children.—**Masticatory stomach**. See *masticatory*.—**Muscular stomach**. See *muscular* and *gizzard*.—**Pit of the stomach**, the depression just below the sternum: same as *epigastrium*. 1. Also called *infrasternal fossa*, *serohiculus cordis*, and *anticardium*.—**Proud stomach**, a haughty disposition. Compare def. 7.

Truths whilk are as unwelcome to a proud *stomach* as wet clover to a cow's.

Scott, *Pirate*, xviii.

Rugæ of the stomach, folds of the mucous membrane, present when the organ is contracted, and extending for the most part in a longitudinal direction. See cut in def. 2.—**Sour stomach**, that condition of the stomach which causes acid eructations.—**Sucking-stomach**. See def. 4.—**To stay the stomach**. See *stay*.

stomach (stum'ak), *v.* [= OF. *estomaquer* = Sp. Pg. *estomagar* = It. *stomacare*, disgust, refl. feel disgust, < L. *stomachari*, feel disgust, be angry, < *stomachus*, distaste, dislike, stomach: see *stomach*, *n.*] **I. trans.** 1.† To encourage; hearten.

When he had *stomached* them by the Holy Ghost to shoot forth his word without fear, he went forward with them by his grace, conquering in them the prince of this world.

Bp. Bale, *Select Works* (Parker Soc.), p. 313.

2.† To hate; resent; remember or regard with anger or resentment.

If that any *stomach* this my deed,
Alphonso can revenge thy wrong with speed.

Greene, *Alphonso*, iii.

A plague on them all for me! . . . O, I do *stomach* them hugely.

B. Jonson, *Every Man in his Humour*, iii. 2.

3. To put up with; bear without open resentment or opposition: as, to *stomach* an affront.

"The priests talk," said he, "of absolution in such terms that laymen can not *stomach* it."

Motley, *Dutch Republic*, l. 76.

4. To turn the stomach of; disgust. [Rare.]

It is not because the restaurants are very dirty—if you wipe your plate and glass carefully before using them, they need not *stomach* you.

Hovell, *Venetian Life*, vi.

II.† intrans. To be or become angry.

What one among them commonly doth not *stomach* at such contradiction?

Hooker.

stomachal (stum'ak-al), *a.* and *n.* [= F. *stomacal* = Sp. Pg. *estomacal* = It. *stomacale*, < NL. **stomachalis*, < L. *stomachus*, stomach: see *stomach*.] **I. a.** 1. Of or pertaining to the stomach; gastric: as, *stomachal* tubes.

The body-wall, which encloses the *stomachal* cavity.

Gegenbaur, *Comp. Anat.* (trans.), p. 92.

2. Relating to the stomach, or to a region of the body which contains the stomach; gastric; epigastric; abdominal; ventral: as, the *stomachal* part of a crab's carapace.—**3.** Remedial of a disordered stomach; peptic or digestive; cordial; stomachic.—**Stomachal teeth**, sharp, horny processes of the lining of the proventriculus, and sometimes of other parts of the alimentary canal, found in many insects and crustaceans, and serving for the comminution of food.

II. n. A stomachic.

stomach-animals (stum'ak-an'i-malz), *n. pl.* The *Infusoria*. See *Polygastrea*. Öken.

stomach-brush (stum'ak-brush), *n.* A brush designed to be introduced into the stomach, by way of the esophagus, to stimulate secretion.

stomach-cough (stum'ak-kóf), *n.* A form of reflex cough excited by irritation of the stomach or small intestine.

stomacher (stum'ak-ér), *n.* [*< stomach, v., + -er*.] 1. One who stomachs, in any sense of the word.—2.† A stomachic; an appetizer.

In Sir Kenelm Digby's "Choice and Experimental Receipts in Physick and Chirurgery" (London, 1675) I find a preparation of herbs for external application with this heading: "To strengthen the stomach use the following *stomacher*."

N. and Q., 7th ser., IV. 173.

3. A part of the dress covering the front of the body, generally forming the lower part of the bodice in front and usually projecting down into the skirt or lapping over it—the name being given to the whole front piece covering the pit of the stomach and the breast. In some fashions the stomacher was richly embroidered, and ornamented with jewels, as in Europe in the sixteenth century.

Less fashionable ladies, between 1615 and 1625, discarded the tight and pointed *stomacher* and farthingale, and wore, over an easy jerkin and ample petticoat, a loose gown open in front, made high to meet the ruff.

Encyc. Brit., VI. 473.

4. A plaque or brooch, usually large, the name being derived from that part of the dress upon which the brooch was worn. J. B. Atkinson, *Art Jour.* (1867), p. 203.

stomachful (stum'ak-fül), *a.* [Early mod. E. also *stomackfull*; < *stomach* + *-ful*.] Full of stomach or wilfulness; proud; spirited; wilful; perverse; stubborn; sturdy.

From all those Tartars he hath had an Army of an hundred and twenty thousand excellent, swift, *stomachfull* Tartarian horse.

Capt. John Smith, *True Travels*, l. 39.

Nay, if I had but any body to stand by me, I am as *stomachful* as another.

Wycherley, *Plain Dealer*, iii. 1.

stomachfully (stum'ak-fül-i), *adv.* In a stomachful, or perverse or wilful, manner; stubbornly; perversely. Bp. Hall, *The Golden Calf*. **stomachfulness** (stum'ak-fül-ness), *n.* Stubbornness; perverseness; wilfulness.

Pride, *stomachfulness*, headiness—avail but little.

Granger, *On Eccles.* (1621), p. 248.

stomach-grief (stum'ak-gréf), *n.* Anger.

Stomach grief is when we will take the matter as hot as a taste. We need no examples for this matter, hot men have to many.

Sir T. Wilson, *Art of Rhetoric*.

stomachic (stô-mak'ik), *a.* and *n.* [= F. *stomachique* = Sp. *estomático* = Pg. *estomachico* = It. *stomachico*, < L. *stomachicus*, < Gr. *stomachikos*, pertaining to the stomach, < *stomachos*, the stomach: see *stomach*.] **I. a.** Of or pertaining to the stomach. (a) Stomachic; gastric: as, *stomachic* vessels or nerves. (b) Specifically, sharpening the appetite, and stimulating gastric digestion. See *stomachal*, 3.

He (Boswell) was . . . gluttonously fond of whatever would yield him a little solacement, were it only of a *stomachic* character.

Carlyle, *Boswell's Johnson*.

See *bezoar*.—**Stomachic fever**, gastric fever. See *fever*, 1.

II. n. A medicine which sharpens the appetite, and is supposed to stimulate digestion, as the bitter tonics; a stomachal.

stomachical (stô-mak'ik-al), *a.* [*< stomachic* + *-al*.] Same as *stomachic*. Wiseman, *Surgery*, i. 18.

stomaching (stum'ak-ing), *n.* [Verbal *n.* of *stomach*, *v.*] Resentment. Shak., *A. and C.*, ii. 2. 9.

stomachless (stum'ak-less), *a.* [Early mod. E. *stomacklesse*; < *stomach* + *-less*.] Lacking stomach; having no appetite. Bp. Hall, *Balm of Gilead*, ii. § 6.

stomachous (stum'ak-us), *a.* [*< L. stomachosus*, angry, choleric, < *stomachus*, distaste, dislike: see *stomach*.] Resentful; sullen; obstinate.

Young blood is hot: youth hasty; ingenuity open; abuse impatient; choler *stomachous*.

G. Harvey, *Four Letters*.

stomach-piece (stum'ak-pēs), *n.* In *ship-carp.*, same as *apron*, 3.

stomach-plaster (stum'ak-pläs'tēr), *n.* See *plaster*.

stomach-pump (stum'ak-pump), *n.* A small pump or syringe used in medical practice for the purpose of emptying the stomach or of introducing liquids into it. It resembles the common syringe, except that it has two apertures near the end, instead of one, in which the valves open different ways, so as

to constitute a sucking and a forcing passage. When the object is to empty the stomach, the pump is worked while its sucking orifice is in connection with a flexible tube passed into the stomach; and the extracted matter escapes by the forcing orifice. When, on the contrary, the object is to force a liquid into the stomach, the tube is connected with the forcing orifice, by which the action of the pump is reversed. It is now not much used, the stomach being emptied, when necessary, by the stomach-tube working as a siphon.

stomach-qualmed (stum'ak-kwämd), *a.* Same as *stomach-sick*. Shak., *Cymbeline*, iii. 4. 193.

stomach-sick (stum'ak-sik), *a.* Nauseated; qualmish; hence, having an aversion.

Receiving some hurt in his stomach by drinking those cold waters, he proued *stomach-sick* to his expedition also.

Purchas, *Pilgrimage*, p. 289.

stomach-staggers (stum'ak-stag'érz), *n.* A disease in horses, depending on a paralytic affection of the stomach. The animal so affected dozes in the stable, resting his head in the manger; on awaking, or being aroused, he falls to eating, and continues to eat voraciously, death from apoplexy or repletion often resulting.

stomach-sweetbread (stum'ak-swēt'bred), *n.* The pancreas of the calf, as used for food: distinguished from the *throat-sweetbread*, or thymus gland of the same animal.

stomach-timber (stum'ak-tim'bér), *n.* Same as *belly-timber*. [Slang.]

As Prior tells, a clever poet, . . .

The main strength of every member

Depends upon the *stomach timber*.

Combe, *Dr. Syntax's Tours*, xxxiii.

stomach-tooth (stum'ak-tôth), *n.* A lower canine milk-tooth of infants: so called because there is often gastric disturbance at the time of its appearance.

stomach-tube (stum'ak-tüb), *n.* A long flexible tube to be introduced into the stomach, through the gullet, as for washing out the stomach.

stomach-worm (stum'ak-wèrm), *n.* A common intestinal roundworm, *Ascaris lumbricoides*, sometimes found in the human stomach.

stomachy (stum'ak-i), *a.* [*< stomach* + *-y*.] Proud; haughty; irascible; easily offended.

Halliwel, [Prov. Eng.]

stomack, **stomak**, **stomaket**, *n.* Obsolete spellings of *stomach*.

stomapod (stô-ma-pôd), *a.* and *n.* Same as *stomatopod*.

Stomatopoda (stô-map'ô-dä), *n. pl.* [NL., < Gr. *στόμα*, mouth, + *ποὺς* (πόδ-) = E. *foot*.] Same as *Stomatopoda*. Latreille, 1817.

stomatopodiform (stô-ma-pôd'i-fôrm), *a.* [*< NL. Stomatopoda* + L. *forma*, form.] Resembling or shaped like a stomatopod, especially of the genus *Squilla*. Applied in entomology to certain elongate, somewhat flattened larvæ which have the abdomen wider than the thorax, long antennæ, and six legs, the anterior pair being large and raptorial. In aquatic species the body is furnished with lateral false gills. The larvæ of *Ephemera* are examples of this form.

stomatopodous (stô-map'ô-dus), *a.* [*< stomapod* + *-ous*.] Same as *stomatopod*.

stomata, *n.* Plural of *stoma*.

stomatal (stô-ma-tal), *a.* [*< NL. stoma(t)- + -al*.] In bot. and zool., relating or belonging to stomata.

stomate (stô-mät), *a.* and *n.* [*< NL. *stomatus* for **stomatatus*, < *stoma* (stomat-), a stoma: see *stoma*.] **I. a.** Having a stoma or stomata; stomatous.

II. n. A stoma.

stomatia, *n.* Plural of *stomatium*.

stomatic (stô-mat'ik), *a.* and *n.* [= It. *stomatico*, < Gr. *στοματικός*, of or pertaining to the mouth, < *στόμα* (τ-), mouth: see *stoma*.] **I. a.** In zool. and bot., of or pertaining to a stoma or stomata; oral.

II. n. A medicine for diseases of the mouth. **stomatiferous** (stô-ma-tif'e-rus), *a.* [*< NL. stoma(t)- + L. ferre*, bear, carry: see *-ferous*.] Bearing or provided with stomata; stomatophorous.

stomatitis (stô-ma-ti'tis), *n.* [NL., < Gr. *στόμα* (τ-), mouth, + *-itis*.] Inflammation of the interior of the mouth, including the mucous membrane of the lips, gums, tongue, cheeks, and palate.—**Aphthous stomatitis**, inflammation of the mucous membrane of the mouth-cavity, consisting in the formation of small superficial ulcers. Also called *aphthæ*, *canker sore*, *mouth*, *follicular* or *vesicular stomatitis*.—**Catarrhal stomatitis**, a simple local or general inflammation of the mucous membrane of the mouth-cavity. Also called *oral catarrh*, *erythema of the mouth*, and *erythematous*, *simple*, and *superficial stomatitis*.—**Gangrenous stomatitis**. See *noma*.—**Mercurial stomatitis**, an inflammation of the mucous membrane of the mouth, with ulceration, caused by mercurial poisoning.—**Parasitic stomatitis**, inflammation of the mouth due to or complicated with the growth on the mucous membrane of *Oridum albicans*. Also called *thrush*, *pseudomembranous stomatitis*.

—Ulcerous stomatitis, inflammation of the mucous membrane of the mouth-cavity, usually unilateral, resulting in the formation of multiple ulcers. Also called *stomatitis phlegmonosa stomatitis*, and *putrid sore mouth*.

stomatium (stō-mā'shi-um), *n.*; pl. *stomatia* (-iā). [NL., dim. of *stoma*: see *stoma*.] A stoma.

Stomatoda (stō-mā-tō'dā), *n. pl.* [NL., < Gr. *στόμα*(-τ-), mouth, + *είδος*, form.] Dujardin's name for the ciliate infusorians, regarded by him as the only animalcules with distinct stomata, or oral apertures: distinguished from *Astomata*, or the supposed mouthless flagellate infusorians.

stomatodæum (stō'mā-tō-dē'um), *n.*; pl. *stomatodæa* (-iā). [NL.: see *stomodæum*.] Same as *stomodæum*. [Rare.]

The *stomatodæum*: a sac-like involution of the epidermis abutting against the mesenteron, spacious, and well marked on account of its dense pigmentation.

Huxley and Martin, *Elementary Biology*, p. 171.

stomatode (stō'mā-tōd), *a. and n.* [*Gr. στόμα*(-τ-), mouth, + *είδος*, form.] *I. a.* Having a stoma or cytostome, as an infusorian; stomatophorous; or of pertaining to the *Stomatoda*.

As regards the classification of the Protozoa, a rough and useful division is into mouth-bearing or "stomatode" Protozoa, in which there is a distinct mouth, and mouthless or "astomatous" Protozoa. H. A. Nicholson.

II. n. A member of the *Stomatoda*.

stomatodendron (stō'mā-tō-den'dron), *n.*; pl. *stomatodendra* (-driā). [NL., < Gr. *στόμα*(-τ-), mouth, + *δένδρον*, a tree.] One of the dendritic branches of the *Rhizostomida*, ending in minute polypites. *Encyc. Diet.*

stomatodynia (stō'mā-tō-din'i-ā), *n.* [NL., < Gr. *στόμα*(-τ-), mouth, + *δύσπη*, pain.] Pain in the mouth.

stomatogastric (stō'mā-tō-gas'trik), *a.* [*Gr. στόμα*(-τ-), mouth, + *γαστήρ*, stomach: see *gastic*.] Of or pertaining to the mouth and stomach: applied to the set or system of visceral nerves which ramify upon the alimentary canal of many invertebrates. See figure and description.

The Crayfish possesses a remarkably well-developed system of visceral or stomatogastric nerves. See figure and description.

Stomatogastric and other Visceral Nerves of Crayfish (*Astacus fluviatilis*).

a, esophagus, around which is the esophageal ring; *b*, cardiac; *c*, pyloric parts of stomach; *d*, cæcæ; *e*, gæstric; *f*, pyloric; *g*, pyloric; *h*, commissural nerve of left side, in place of *h*; *i*, commissural nerve of right side, cut away and turned down these longitudinal commissures being completed in the esophageal ring by *r*; *j*, postesophageal transverse commissure; *k*, *l*, *m*, *n*, *o*, *p*, *q*, *r*, *s*, *t*, *u*, *v*, *w*, *x*, *y*, *z*, a ganglion; *h*, lateral branch, uniting with *g*; *a*, posterolateral nerve; *c*, *f*, anterolateral and mediolateral nerves; *k*, hepatic nerve.

stomatologi- (stō'mā-tō-loj'i-kal), *a.* [*Gr. stomatolog-y* + *-ic*.] Pertaining to stomatology.

stomatologist (stō'mā-tol'ō-jist), *n.* [*Gr. stomatolog-y* + *-ist*.] One versed in stomatology.

stomatology (stō'mā-tol'ō-jī), *n.* [*Gr. στόμα*(-τ-), mouth, + *λογία*, < *λόγος*, speak: see *-ology*.] The sum of scientific knowledge concerning the mouth.

stomatomorphous (stō'mā-tō-mōr'fus), *a.* [*Gr. στόμα*(-τ-), mouth, + *μορφή*, form.] In bot., mouth-shaped.

stomatonecrosis (stō'mā-tō-nek-rō'sis), *n.* [NL., < Gr. *στόμα*(-τ-), mouth, + *νέκρωσις*, deadness: see *necrosis*.] Gangrenous stomatitis. See *stomatitis* and *noma*.

Stomatophora (stō-mā-tōf'ō-rā), *n. pl.* [NL., neut. pl. of *stomatophorus*: see *stomatophorous*.] Protozoa which are provided with a mouth or its equivalent: a higher series of protozoans: same as *Infusoria*, 2: opposed to *Lipostomata*.

stomatophorous (stō-mā-tof'ō-rus), *a.* [*Gr. stomatophorus*, < Gr. *στόμα*(-τ-), mouth, + *φέρω*, = *E. bear*.] Having a mouth or stoma; of or pertaining to the *Stomatophora*; not lipostomatous.

stomatoplastic (stō'mā-tō-plas'tik), *a.* [*Gr. stomatoplast-y* + *-ic*.] Pertaining to stomatoplasty.

stomatoplasty (stō'mā-tō-plas'ti), *n.* [*Gr. στόμα*(-τ-), mouth, + *πλαστικός*, verbal adj. of *πλασσειν*, form, mold.] Plastic surgery of the mouth.

stomatopod (stō'mā-tō-pod), *a. and n.* [*Gr. stomatopoda* (-pod-), < Gr. *στόμα*(-τ-), mouth, + *πόδι* (-pod-), = *E. foot*.] *I. a.* Having some of the legs close by the mouth, as a mantis-shrimp; of or pertaining to the *Stomatopoda*. Also *stomatopodous*, *stomatopodous*.

II. n. A member of the *Stomatopoda*, in any sense.

Also *stomapod*.

Stomatopoda (stō-mā-top'ō-dā), *n. pl.* [NL., neut. pl. of *stomatopod* (-pod-): see *stomatopod*.] An order of malacostracous podophthalmic crustaceans, to which various limits have been assigned. (*a*) As constituted by Latreille in 1817, in the form *Stomopoda*, the second order of *Crustacea*, the so-called sea-mantes, or gastrurans, divided into two families, *Unipeltata* and *Bipeltata*, of which only the former are properly stomatopodous, the other being the so-called glass-crabs (*Phyllosoma*), or larval forms of other crustaceans. Hence — (*b*) An artificial order of the higher crustaceans, under which are included not only the *Squilla* or *Stomatopoda* proper, but also the *Mysidæ* or opossum-shrimps, and related forms, the *Luciferidæ*, etc. (*c*) Restricted by Huxley to the family *Squilla*. See cuts under *mantis-shrimp* and *Squilla*.

Squilla, *Gonodactylus*, and *Coronis* appear to me to differ so widely and in such important structural peculiarities, not only from the Podophthalmia proper, but from all other Crustacea, as to require arrangement in a separate group, for which the title of *Stomatopoda* may well be retained. Huxley, *Anat. Invert.*, p. 317.

stomatopodous (stō-mā-top'ō-dus), *a.* [*Gr. stomatopod* + *-ous*.] Same as *stomatopod*.

Stomatopora (stō-mā-top'ō-rā), *n.* [NL. (Brown, 1835). < Gr. *στόμα*(-τ-), mouth, + *πόρος*, pore: see *pore*.] Same as *Autopora*.

stomatoporeid (stō-mā-top'ō-roid), *a.* [*Gr. Stomatopora* + *-oid*.] Pertaining to or characteristic of a coral of the genus *Stomatopora*. *Geological Jour.*, XLV. iii. 566.

Stomatopterophora (stō-mā-top-te-rof'ō-rā), *n. pl.* [NL., < Gr. *στόμα*(-τ-), mouth, + *πτερόν*, feather, + *φέρω* = *E. bear*.] In J. E. Gray's classification (1821), the fourth class of mollusks, divided into two orders, *Pterobranchia* and *Dactylobranchia*; the *Pteropoda* or pteropods.

stomatorrhagia (stō'mā-tō-rā-jī-ā), *n.* [NL., < Gr. *στόμα*(-τ-), mouth, + *ραγία*, < *ρηννίω*, break, burst.] Hemorrhage from the mouth.

stomatoscope (stō'mā-tō-skōp), *n.* [*Gr. στόμα*(-τ-), mouth, + *σκοπεῖν*, view.] Any instrument for keeping the mouth open so as to permit the parts within to be inspected. *Dunglison*.

stomatotheca (stō'mā-tō-thē'kā), *n.*; pl. *stomatothecæ* (-sē). [NL., < Gr. *στόμα*(-τ-), mouth, + *θήκη*, box, chest.] In entom., the mouth-case, or that part of the integument of a pupa which covers the mouth.

stomatous (stō'mā-tus), *a.* [*Gr. στόμα*(-τ-), mouth, + *-ous*.] Provided with stomata; stomatophorous; stomate.

Stomias (stō'mi-as), *n.* [NL. (Cuvier, 1817), < Gr. *στόμα*, mouth.] A genus of deep-sea fishes, typical of the family *Stomiidae*, having a long compressed body with delicate deciduous scales, a row of phosphorescent or luminous spots along each side, and a rayed dorsal opposite the anal fin: so called from the large and deep mouth, armed with a formidable array of teeth. *S. ferox* is found from Greenland to Cape Cod. Specimens are taken at various depths from 450 to 1,800 fathoms.

Stomiidae (stō-mi-at'i-dē), *n. pl.* [NL., < *Stomias* (see *stomioid*) + *-idæ*.] A family of physostomous fishes, typified by the genus *Stomias*. They are deep-sea Atlantic fishes, of 5 or 6 species and 3 genera, divided into 2 subfamilies, according to the presence or absence of an adipose fin.

stomioid (stō'mi-ō-oid), *a. and n.* [*Gr. Stomias* (assumed stem *Stomi-*).] *I. a.* Resembling a fish of the genus *Stomias*; of or pertaining to the *Stomiidae*.

II. n. Any fish of the family *Stomiidae*.

stomodæal (stō-mō-dē'al), *a.* Same as *stomodæal*.

stomodæum (stō-mō-dē'um), *n.*; pl. *stomodæa* (-iā). [NL., < Gr. *στόμα*, mouth, + *δαίος*, by the way, < *δός*, way.] An anterior part of the alimentary canal or digestive tract, being so much of the whole enteric tube as is formed at the oral end by an ingrowth of the ectoderm: correlated with *proctodæum*, which is derived from the ectoderm at the aboral end, both being distinguished from *enteron* proper, which is of endodermal origin.

stomodeal (stō-mō-dē'al), *a.* [*Gr. stomodæum* + *-al*.] Pertaining to or having the character of a stomodæum. Also spelled *stomodæal*.

Stomoxys (stō-mok-si'is), *n. pl.* [NL., < *Stomoxys* + *-idæ*.] A family of brachycerous dipterous insects, typified by the genus *Stomoxys*, often merged in the *Muscidae*. It contains such genera as *Stomoxys*, *Hematobia*, and *Glossina*, and includes some well-known biting flies, as the horn-fly, stable-fly, and tsetse-fly. Also *Stomoxys* (Meigen, 1824) and *Stomoxys* (Westwood, 1840), and, as a subfamily of *Muscidae*, *Stomoxysinae* or *Stomoxysinae*.

Stomoxys (stō-mok'sis), *n.* [NL. (Geoffroy, 1764). < Gr. *στόμα*, mouth, + *ὄξίς*, sharp.] A notable genus of biting flies, typical of the family

Stomoxys, or merged with the *Muscidae*. They are gray, of medium size, and resemble the common house-fly in appearance. The mouth-parts are developed into a horny proboscis. *S. calcitrans*, common to Europe and North America, is a familiar example. See *stable-fly*, 1.

stomp¹ (stomp), *n.* A dialectal form of *stamp*; specifically, in coal-mining, one of the plugs of wood driven into the roof of the level, to which are fastened the "lines" serving to direct the miner in his proper course; they may also be used as bench-marks. *Gresley*. [Midland coal-field, Eng.]

stomp², *n. and v.* An obsolete form of *stamp*. **stompers** (stom'pērz), *n. pl.* A dialectal form of *stampers*. See *stamper*, 3.

stonaget (stō'nāj), *n.* [*Gr. stone* + *-age*.] A collection or heap of stones. *Halliwel*.

Would not everybody say to him, We know the *stonage* at Gilgal? Leslie. (*Nares*.)

stond (stond), *v. and n.* An obsolete or dialectal form of *stand*.

stondent. An obsolete past participle of *stand*.

stone (stōn), *n. and a.* [Also *E. dial. stean*, *steen*, *Sc. stane*, *stain*; < ME. *stoon*, *ston*, *stan*, < AS. *stān* = OS. *stēn* = OFries. *stēn* = D. *steen* = MLG. *stēn*, LG. *steen* = OHG. MHG. G. *stein* = Icel. *steinn* = Sw. Dan. *sten* = Goth. *stains*, a stone; prob. akin to OBulg. *stiena* = Russ. *stiena*, a wall, and to Gr. *στῆν*, *στῆν*, a stone. Hence *steen*¹, *steen*².] *I. n.* 1. A piece of rock of small or moderate size. The name *rock* is given to the aggregation of mineral matter of which the earth's crust is made up. A small piece or fragment of this rock is generally called a *stone*, and to this a qualifying term is frequently added: as, *cobble-stone* or *gravel-stone*. See *rock*.

Lo. heere be *stoonys* hard y-wrouz3te, Blake hereof breed.

Ulysses to Virgin, etc. (E. E. T. S.), p. 43.

Are there no *stones* in heaven?

But what serve for the thunder? Shak., *Othello*, v. 2. 234.

He is not a man, but a block, a very *stone*.

Burton, *Anat. of Mel.*, p. 450.

2. The hard material of which rock consists: in contradistinction to *metal*, *wood*, etc.

Al hem to-dryven ase *ston* doth the glas.

Finnish Insurrection (Child's Ballads, VI. 370).

He made a harp of her breast-bone, . . .

Whose sounds would melt a heart of *stone*.

The Cruel Sister (Child's Ballads, II. 236).

That we might see our own work out, and watch

The sandy footprint harden into *stone*.

Tennyson, *Princess*, III.

3. A piece of rock of a determined size, shape, or quality, or used for a defined purpose: as, a *grindstone*; a *hearthstone*; an *altar-stone*. Specifically — (*a*) A gun-flint.

About seven of the clocke marched forward the light peeces of ordinance, with *stone* and powder.

Hollinshead, *Chron.*, III. 947.

(*b*) A gravestone; a monument or memorial tablet.

You shall shine more bright in these contents

Than unswept *stone* besmeared with sluttish time.

Shak., *Sonnets*, IV.

(*c*) A millstone. (*d*) In printing, an imposing-stone. (*e*) In glass-manuf., a flattening-stone.

4. A precious stone; a gem. See *precious*.

Wedges of gold, great anchors, heaps of pearl,

Inestimable *stones*, unvalued jewels.

Shak., *Rich.* III., 1. 4. 27.

5. A small, hard, rounded object resembling a stone or pebble: as, a *hail-stone*; a *gall-stone*; an *ear-stone*. Specifically — (*a*) A calculeous concretion in the kidney or urinary bladder or gall-bladder, etc.; hence, the disease arising from a calculus. (*b*) A testicle: generally in the plural. [Vulgar.] (*c*) The nut of a drupe or stone-fruit, or the hard covering inclosing the kernel, and itself inclosed by the pulpy pericarp, as in the peach, cherry, or plum. See *drupe* and *endocarp* (with cuts). (*d*) A hard, compact mass; a lump or nugget.

Marvellous great *stones* of yron.

Berners, tr. of Froissart's *Chron.*, I. 498.

6. The glass of a mirror; a mirror of crystal.

Lend me a looking-glass;

If that her breath will mist or stain the *stone*,

Why, then she lives. Shak., *Lear*, v. 3. 202.

7. A common measure of weight in use throughout the northwest and central countries of Europe, but varying much in different countries. The English imperial standard stone is 14 pounds avoirdupois, and is commonly used in England in giving the weight of a man, but other values are in common use, varying with the article weighed: thus, the stone of butchers' meat or fish is 8 pounds, of cheese 16 pounds, of glass 5 pounds, of alum 134 pounds, of hemp usually 32 pounds, though a statute of George II. made it 16 pounds, and one of Henry VIII. 20 pounds; of lead 12 pounds, though the statute of *ponderibus* makes it 15 pounds of 25 "shillings" each, equal to 144 pounds avoirdupois. There were in the early part of the nineteenth century many local stones in use in England, but in the United States this unit is unknown. The stone of 14 pounds is not recognized in the statute of *ponderibus*, and first appears as a weight for wool. The old arithmetics call 14 pounds half a quarter,

and either do not mention the stone, or define it as 8 pounds. The only legal stone in Great Britain now is that of 14 pounds.

And sende ye me word how mech more yn value yn a stoon shall I syle my wolfe. *Paston Letters*, I. 155.

He was not a ghost, my visitor, but solid flesh and bone; He wore a Palo Alto hat, his weight was twenty stone.

O. W. Holmes, *Nux Postconatona*.

Alençon stone, pure rock-crystal cut in rose or brilliant form.—**Amazonian or Amazon stone**. See *Amazonian*.—**Arkansas stone**, a fine-grain whetstone found in Arkansas, and used to sharpen surgical and dental instruments.—**Armenian stone**. See *Armenian*.—**Artificial stone**, a material prepared for decorative and building purposes by consolidating sand with the aid of some chemical. The best-known and most extensively used artificial stone is Ransome's, which is made by mixing sand with silicate of soda in a pug-mill, so as to form a plastic substance, which is then rolled or pressed into any desired form. The articles as thus prepared are then immersed in a solution of calcium chloride, when double decomposition takes place, a calcium silicate being formed which firmly cements the particles of sand together, while the sodium chloride, the other product of the decomposition, is afterward removed by washing. This material has been somewhat extensively used in England and elsewhere. Other processes akin to this, but in which different chemicals were used, have also been patented in the United States, but the materials thus produced have not met with any extensive sale. Beton or concrete has also been employed as a building material, to take the place of stone or brick, especially the "béton-Coignet," which is extensively used in and near Paris and elsewhere. Beton and concrete, which are mixtures of sand, gravel, stone chippings, fragments of brick, etc., with common or hydraulic mortar or cement, are also frequently, but not correctly, designated *artificial stone*.—**Ayr stone**, a stone used for polishing marble and surfacing metals. The harder varieties are used as whetstones. Also called *water of Ayr*, *Scotch stone*, and *smoke-stone*.—**Bath stone**, a rock used extensively for building purposes in England, and especially near Bath (whence its name). It is a limestone, having an oolitic structure, and belonging to the Inferior Oolite, which lies directly upon the Lias, the lowest division of the Jurassic of Continental and American geologists. Also called *Bath oolite*.—**Beer stone**, a hard sandy chalk stratum of small thickness, occurring westward of Seaton in Devonshire, England. It forms a part of the Lower Chalk, and contains *Inoceramus mytiloides*. This series of beds, not having a thickness of more than 10 feet, is only of local importance, but it has been quarried as a building-stone for many hundred years, and parts of Exeter Cathedral are built of it.—**Bologna stone**, or **Bolognian stone**, a variety of barite, or barium sulphate, found in roundish masses, composed of radiating fibers, first discovered near Bologna. It is phosphorescent in the dark after being heated to ignition, powdered, and exposed to the sun's light for some time.—**Bristol stone**, rock-crystal, or Bristol diamond, small round crystals of quartz, found in the Clifton limestone, near the city of Bristol in England.—**Caen stone**, the French equivalent of the English Bath oolite. It is a cream-colored building-stone, of excellent quality, got near Caen in Normandy. Although soft in the quarry, it is of fine texture and hardens by exposure, so as to become extremely durable. Winchester and Canterbury cathedrals, Henry VII.'s chapel at Westminster, and many churches are built of it. It is still frequently used in England.—**Cambray stones**. See *carneian*.—**Centurial stones**. See *centurial*.—**Ceylon stone**, a dark-green, brown, or black spinel from Ceylon, also called *ceylonite*; the name is also given to other minerals or gems from Ceylon.—**Channel stone**. See *channel*.—**Charnwood Forest stone**, an oilstone found only in Charnwood Forest in Leicestershire, England. It is one of the best substitutes for the Turkey oilstone, and is much used to give a fine edge to knives and other tools.—**Cornish stone**. Same as *china-stone*, 2.

Cornish stone is used for almost all English wares, both in the body and the glaze. *Spence's Encyc. Manuf.*, p. 1560.

Crab's stones. Same as *crab's eyes* (which see, under *crab*).—**Crape stone**, a trade-name for onyx of which the surface is cut in imitation of crape and colored a lustrous black. A similar article is made from artificial silicious compounds cast in molds.—**Cut stone**, hewn stone, or work in hewn stone; ashler.—**Deaf as a stone**. See *deaf*.—**Dimension stone**, ashler.—**Drafted stone**, ashler stone having a chisel-draft around the face, the part inside the draft being left rough.—**Heracleian stone**. See *Heracleian*.—**Hewn stone**, blocks of stone with faces dressed to shape by the hammer.—**Holy stone**, a stone used in magical rites, whether as a magic mirror or show-stone, or as a sort of amulet.—**Infernal ledger**, lithographic Lydian stone. See the adjective.—**Maltese stone**, a limestone of a delicate brown cream-color, very compact, and almost as soft as chalk. The natives of the island of Malta turn and carve it into various ornamental objects.—**Memorial, meteoric, Moabite stone**. See the adjective.—**Mocha stone** (formerly also *Moco stone*; also *Mocha pebble*; so called from *Mocha* in Arabia, where the stone is plentiful), a variety of dendritic agate, containing dark outlines of arborescence, like vegetable filaments, due to the presence of metallic oxides, as of manganese and iron; moss-agate.—**Philosopher's stone**. See *elixir*, 1.—**Portland stone**, in England, a rock belonging to the Portlandian series: so named from the Isle of Portland, where it is typically developed. The Portlandian is a part of the Jurassic series, and lies between the Purbeckian, the highest member of that series, and the Kimmeridgian. The Portland group, or Portlandian, consists of two divisions, the Portland stone and the Portland sand; the former has several subdivisions, to which local names are attached, such as *curf*, *base-bee*, and *whit-bee*. The Portland stone, which is a nearly pure carbonate of lime, is an important building-stone in England, and was extensively used by Inigo Jones and Sir Christopher Wren, in important public buildings, especially in St. Paul's Cathedral.—**Precious stone**. See *precious*.—**Protean stone**. See *Protean*.—**Quarry-faced stone**, cut stone of which the face is left rough as it comes from the quarry, as distinguished from *tooled*, *hammer-faced*, *pitch-faced stone*, etc.—**Rocking stone**. See *rock*.—**Rosetta stone**, a stele or

tablet of black basalt, found in 1799 near Rosetta, a town of Egypt, on the delta of the Nile, by M. Bousnard, a French officer of engineers. This stone bears a trilingual inscription, a decree of Ptolemy V. (Epiphanes) in Greek and Egyptian hieroglyphic and demotic. The inscription was deciphered chiefly by Champollion, and afforded the key to the interpretation of Egyptian hieroglyphics. The monument is now in the British Museum.—**Rough-pointed stone**. See *rough*.—**Rubbed stone**, stone-work of which the surface is cut straight with the stone-saw, and afterward smoothed by rubbing with grit or sandstone.—**Samian stone**. See *Samian*.—**Saracen's or Sarsen's stone**. See *Saracen*.—**Scotch stone**. Same as *Ayr stone*.—**Shipman's stonet**. See *shipman*.—**Sonorous stone**. See *sonorous*.—**Standing stone**. See *standing*.—**Stick and stone**. See *stick*.—**Stone cancer**. Same as *scirrhous cancer* (which see, under *scirrhous*).—**Stone of the second class**. See *elixir*, 1.—**Stones of sulphur**. See *sulphur*.—**To leave no stone unturned**, to do everything that can be done; use all practicable means to effect an object; spare no exertions.

New crimes invented, left unturned no stone
To make my guilt appear, and hide his own.

Dryden, *Æneid*, II. 133.

To mark with a white stone, to mark as particularly fortunate, favored, or esteemed. The phrase arose from the custom among the Romans of marking their lucky days on the calendar with a white stone (as a piece of chalk), while unlucky days were marked with charcoal. *Brewer*.—**Syn. 1 and 2**. See *rock*.

II. a. 1. Made of stone: as, a stone house; a stone wall.

The lion on your old stone gates

Is not more cold to you than I.

Tennyson, *Lady Clara Vere de Vere*.

2. Made of stoneware: as, a stone jar; a stone mug.

Now mistress Gilpin (careful soul!)

Had two stone bottles found,

To hold the liquor that she loved,

And keep it safe and sound.

Conquer, *John Gilpin*.

Stone age. See *archæological ages*, under *age*.—**Stone ax**, an ax-head or hatchet-head made of hard stone. Such axes are found, belonging to prehistoric epochs, and have also been in use down to the present time among savage tribes in different parts of the world. Compare *stone-ax*.—**Stone brick**. serration of the spines of the anal and ventral fins. It inhabits moderately deep water in the Mediterranean and neighboring Atlantic. (Also called *wreck-fish* and *cernier*.) The corresponding stone-bass of Pacific waters is a very similar though distinct species, *P. oxygenius* (originally *oxygencius*). See *Polyprion*.

stone-bird (stōn'berd), *n.* **1.** The vinous grosbeak, or moro.—**2.** The stone-snipe, or greater yellowlegs. See cut under *yellowlegs*.

stone-biter (stōn'bi'ter), *n.* The common wolf-fish. See cut under *Anarrhichas*.

stone-blind (stōn'blind'), *a.* [= *Icel. stein-blindr* = *Sw. Dan. sten-blind*; as *stone* + *blind*.] Blind as a stone; wholly blind, either literally or figuratively.

I thought I saw everything, and was stone-blind all the while.
George Eliot, *Mr. Gull*, xviii.

stone-blue (stōn'blū), *n.* A compound of indigo and starch or whiting.

stone-boat (stōn'bōt), *n.* A drag or sled without runners, used for moving stones; also, a wagon-platform hung below the axles, used for the same purpose. [*U. S.*]

stonebuck (stōn'buk), *n.* Same as *steenbok*.

stone-boilers (stōn'boi'lēz), *n. pl.* A tribe or race of men who practise stone-boiling.

The Australians, at least in modern times, must be counted as stone-boilers.

E. B. Tylor, *Early Hist. Mankind*, ix.

stone-boiling (stōn'boi'ling), *n.* The act or process of making water boil by putting hot stones in it.

The art of boiling, as commonly known to us, may have been developed through this intermediate process, which I propose to call *stone-boiling*.

E. B. Tylor, *Early Hist. Mankind*, ix.

stone-borer (stōn'bōr'ēr), *n.* A mollusk that bores stones; a lithodomus, lithophagous, or saxicavous bivalve. See cuts under *accessory*, *date-shell*, *Glycymeris*, and *pidcock*.

stone-bow (stōn'bō), *n.* [*ME. stonbowe*; < *stone* + *bow*.] A weapon somewhat resembling a crossbow, for shooting stones; a catapult; also, a sort of toy.

O, for a stone-bow, to hit him in the eye!

Shak., *T. N.*, II. 5. 51.

Item, six stone bowes that shoot lead pellets.

Hakluyt's *Voyages*, I. 363.

Children will shortly take him for a wall,

And set their stone-bowes in his forehead.

Beau. and *Fl.*, King and No King, v. 1.

stone-bramble (stōn'brām'bl), *n.* Same as *roebuck-berry*.

stone-brash (stōn'brash), *n.* In *agri.*, a subsoil composed of shattered rock or stone.

stonebreak (stōn'brāk), *n.* The meadow-saxifrage, *Saxifraga granulata*: so called from the virtue, according to the doctrine of signatures, of its pebble-like bulbs against calculus. The name is also a general equivalent of *saxifrage*.—**stone-breaker** (stōn'brā'ker), *n.* One who or that which breaks stones; specifically, a ma-

Stone-breaker.

a, stationary jaw; *a'*, oscillating jaw; *b*, hopper; *c*, fly-wheel; *d*, short pitman connecting crank-wrist with toggles; *e*, *e'*, toggles; *f*, frame, strengthened at *g*, where the thrust of the toggles is received; *h*, base of machine; *i*, rubber spring which withdraws the lower end of the jaw *a'*.

chine for pounding or crushing stone; an ore-mill; a stone-crusher.

stone-bruise (stōn'brōz), *n.* A bruise caused by a stone; especially, a painful and persistent bruise on the sole of the foot, commonly in the middle of the ball of the foot, due to walking barefooted; also, a bruise produced on the hand, as by ball-playing. [*Local, U. S.*]

stonebuck (stōn'buk), *n.* [*ME. *stonbukke*, < *AS. stānbucca*, the ibex, < *stān*, stone, rock, + *bucca*, buck. In mod. use, tr. *D. steenbok*, *G. steinbock*: see *steenbok*.] The steenbok.

stone-butter (stōn'but'ēr), *n.* A sort of alum.

stone-canal (stōn'ka-nal'), *n.* In echinoderms, the duct leading from the madreporic plate to the circular canal: so called because it ordinarily has calcareous substances in its walls. Also *sand-canal*. *Gegenbaur*, *Comp. Anat.* (trans.), p. 220.

stone-cast (stōn'kást), *n.* The distance which a stone may be thrown by the hand; a stone's cast; a stone's throw.

About a stone-cast from the wall

A sluice with blacken'd waters slept.

Tennyson, *Mariana*.

stonecat (stōn'kat), *n.* A catfish of the genus *Noturus*, as *N. flavus*, common in many parts of the United States. *N. flavus* is one of the largest, sometimes exceeding a foot in length. *N. insignis* is an-

other, nearly as large, found in the Middle and Southern States. There are several more, a few inches long, all of fresh waters of the same country.

stone-centiped (stōn'sen'ti-ped), *n.* A centiped of the family *Lithobiidae*.

stonechacker (stōn'chak'ēr), *n.* Same as *stonechat*.

stonechat (stōn'chat), *n.* One of several different Old World chats, belonging to the genera *Saxicola* and (especially) *Pratincola*; a kind of bushchat: applied to three different English birds, and extended, as a book-name, to several others of the above genera. (a) Improperly, the wheatear, *Saxicola arncliffei*, and some other species of the restricted genus *Saxicola*. See cut under *wheatear*. (In this sense chiefly Scotch and American, the wheatear being the only bird of the kind which straggles to America.) (b) Improperly, the whin-bushchat or whinchat, *Pratincola rubetra*. [Eng.] (c) The black-headed bushchat, *Pratincola rubicola*, a common bird of Great Britain and

other parts of Europe. The true stonechat is about 5 inches long, the wing 2½, the tail scarcely 2. The male in full plumage has the head and most of the back black, the feathers of the back mostly edged with sandy brown; the upper tail-coverts white, varied with black and brown; the wings and tail blackish-brown, the former with a large white area on the coverts and inner secondaries; the sides of the neck and breast white; the rest of the under parts rufous-brown; the bill and feet black; and the eyes brown. It nests on the ground, and lays four to six bluish-green eggs clouded and spotted with reddish-brown. Also called *chickstone*, *stonechacker*, *stonechatter*, *stoneclink*, *stonesmich*, *stonesmitch*, or *stonesmickle*, and *stonesmich*.

The *Stonechat* closely resembles the Whinchat, . . . a circumstance which has caused much confusion; . . . for in almost all parts of England the Whinchat, by far the commonest species, popularly does duty for the *Stonechat*, and in many parts of Scotland the Wheatear is universally known by that name. Seebohm, *Hist. Brit. Birds*, I. 317.

stonechatter (stōn'chat'ēr), *n.* Same as *stonechat*.

stone-climber (stōn'kli'mēr), *n.* The dobson or hellgrammite. See cut under *sprawler*. [Local, U. S.]

stoneclink (stōn'klingk), *n.* Same as *stonechat*.

stone-clover (stōn'klō'vēr), *n.* The rabbit-foot or hare's-foot clover, *Trifolium arvense*, a low slender branching species with very silky heads, thence also called *puss-clover*. It is an Old World plant naturalized in America.

stone-coal (stōn'kōl), *n.* [= *G. steinkohle*; as *stone + coal*.] Mineral coal, or coal dug from the earth, as distinguished from charcoal: generally applied in England to any particularly hard variety of coal, and especially to that called in the United States *anthracite*. See *coal*.

stone-cold (stōn'kōld'), *a.* Cold as a stone. Fletcher and Shirley, *Night-Walker*, iv. 4.

stone-color (stōn'kul'qr), *n.* The color of stone; a grayish color.

stone-colored (stōn'kul'qr), *a.* Of the usual color of a large mass of stone, a cold bluish gray.

stone-coral (stōn'kor'al), *n.* Massive coral, as distinguished from branching coral, or tree-coral; hard, sclerodermatous or lithocoralline coral, as distinguished from sclerobasic coral. Most corals are of this character, and are hexacoralline (not, however, the red coral of commerce, which is related to the sea-fans and other octocorallines).

stonecrab (stōn'krab), *n.* 1. Any crab of the family *Homolidae*.—2. A European crab, *Li-*

thodes maia.—3. A large, stout, edible crab of the Atlantic coast of the United States, *Menippe*

Stonecrab (*Menippe mercenaria*).

mercenaria.—4. The dobson or hellgrammite. See cut under *sprawler*. [Local, U. S.]

stone-crawfish (stōn'krā'fish), *n.* A crawfish of Europe, specified as *Astacus torrentium*, in distinction from the common crawfish of that country, *A. fluviatilis*.

stone-cray (stōn'krā), *n.* A distemper in hawks. Imp. Dict.

stone-cricket (stōn'krik'et), *n.* One of the wingless forms of the orthopterous family *Locustidae*, living under or among stones and in dark places, and popularly confounded with true crickets (which belong to the orthopterous family *Gryllidae* or *Achetidae*). There are many species, of various parts of the world, some simply called *crickets*, and others *case-crickets*. The commonest American stone-cricket belongs to the genus *Ceuthophilus*, as *C. maculatus*, etc. See *case-cricket*, and cut under *Hadenæus*.

stonecrop (stōn'krop), *n.* [*ME. stoncrop*, < *AS. stancrop*, *stonecrop*, < *stān*, stone, + *crop*, the top or head of a plant, a sprout, a bunch or cluster of flowers: see *stone* and *crop*.] The wall-pepper, *Sedum acre*: so called as frequently growing upon walls and rocks. It is native throughout Europe and Asiatic Russia, and somewhat employed in ornamental gardening; in America called *moss*, *mossy stonecrop*, etc., from its creeping and matting stems beset with small sessile leaves. The flowers are bright-yellow in small terminal cymes. The name is also extended to other species of similar habit, especially *S. ternatum*, and not seldom to the whole genus.—*Ditch-stonecrop*, a plant of the genus *Penthorum*, chiefly the American *P. sedoides*, a weed-like plant with yellowish-green flowers, common in ditches and wet places.—*Great stonecrop*, an old designation of the kidneywort, *Cotyledon Umbilicus*, also of *Sedum album*.—*Mossy stonecrop*. See *def.*

stone-crush (stōn'krush), *n.* A sore on the foot caused by a bruise from a stone. [Local.]

stone-crusher (stōn'krush'ēr), *n.* A mill or machine for crushing or grinding stone or ores for use on roads, etc.; an ore-crusher; an ore-mill; a stone-breaker (which see).

stone-curlew (stōn'kēr'lū), *n.* 1. The stone-plover or thick-knee, *Edicnemus crepitans*. See cut under *Edicnemus*.—2. The whimbrel, *Numenius phæopus*.—3. In the southern United States, the willet, *Symphemia semipalmata*: a misnomer. Audubon.

stone-cutter (stōn'kut'ēr), *n.* 1. One whose occupation it is to hew or cut stones for building, ornamental, or other purposes.—2. A machine for shaping or facing stones.

stone-cutting (stōn'kut'ing), *n.* The business of cutting or hewing stones for walls, monuments, etc.

stoned (stōnd), *a.* [*< stone + -ed*.] Having or containing stones, in any sense.

Of stoned fruits I have met with three good sorts: viz., Cherries, plums, and persimmons. Beverley, *Hist. Virginia*, iv. ¶ 12.

stone-dead (stōn'ded'), *a.* [*< ME. standeed, standed* (= *Sw. Dan. stendöd*); < *stone + dead*.] Dead as a stone; lifeless.

The Geant was by Gaffray don bore, So discomfite, standed, and all cold. Rom. of Partenay (E. E. T. S.), I. 3121.

He cannot be so stupid, or stoned-dead. B. Jonson, *Volpone*, I. 1.

stone-deaf (stōn'def'), *a.* Deaf as a stone; totally deaf.

stone-devil (stōn'dev'l), *n.* The dobson or hellgrammite. See cut under *sprawler*. [Virginia.]

stone-dresser (stōn'dres'ēr), *n.* 1. One who tools, smooths, and shapes stone for building purposes. *Simmonds*.—2. One of a variety of power-machines for dressing, polishing, and finishing marbles, slates, and other building-stones.

stone-dumb (stōn'dum'), *a.* Perfectly dumb. *The Century*, XXXV. 622. [Rare.]

stone-eater (stōn'ē'tēr), *n.* Same as *stone-borer*.

stone-engraving (stōn'en-grā'ving), *n.* The art of engraving on stone. See *lithography*, *etching*, *gem-engraving*.

stone-falcon (stōn'fā'kn), *n.* See *falcon*, and cut under *merlin*.

stone-fern (stōn'fēr), *n.* A European fern, *Asplenium Ceterach*: so called from its habit of growing on rocks and stone walls.

stone-fish (stōn'fish), *n.* The shanny. *Parnell*. [Local, Scotch.]

stone-fly (stōn'fi), *n.* A pseudoneuropterous insect of the family *Perlidae*: so called because the larval forms abound under the stones of streams. (See cut under *Perla*.) *P. bicaudata*, whose larva is much used by anglers, is an example.

stone-fruit (stōn'frōt), *n.* [= *D. steenvrucht* = *G. steinfrucht* = *Sw. steinfrukt* = *Dan. stenfrugt*; as *stone + fruit*.] In bot., a drupe; a fruit whose seeds are covered with a hard shell enveloped in a pulp, as the peach, cherry, and plum. See *drupe*.

Bring with you the kernels of peares and apples, and the stones of such stonefruits as you shall find there. Hakluyt's *Voyages*, I. 439.

stonegale (stōn'gāl), *n.* Same as *staniel*.

stone-gall¹ (stōn'gāl), *n.* [*< stone + gall*.] A roundish mass of clay often occurring in variegated sandstone.

stone-gall² (stōn'gāl), *n.* Same as *staniel*.

stone-gatherer (stōn'gā'fēr-ēr), *n.* A horse-machine for picking up loose stones from the ground. It consists of a receiving-box with a toothed wheel and a traveling apron, or a fork with curved teeth, and a lever for emptying it into the box when loaded.

stone-gray (stōn'grā), *n.* A dark somewhat brownish-gray color.

stone-grig (stōn'grig), *n.* The pride or mud-lamprey, *Ammocetes branchialis*.

stone-hammer (stōn'ham'ēr), *n.* A hammer for breaking or rough-dressing stones.

stone-hard (stōn'hārd), *a.* 1. Hard as a stone; unfeeling. *Shak.*, *Rich. III.*, iv. 4. 227.—2. Firm; fast.

Steken the gates ston-harde wyth stalworth barres. *Alliterative Poems* (ed. Morris), II. 884.

stone-harmonicon (stōn'hār-mon'i-kon), *n.* Same as *lapideon* and *rock-harmonicon*.

stone-hatch (stōn'hach), *n.* The ring-plover, *Ægialites hiaticula*: so called from nesting on shingle. See cut under *Ægialites*. *Yarrell*. [Prov. Eng.]

stone-hawk (stōn'hāk), *n.* Same as *stone-falcon*.

stone-head (stōn'hed), *n.* The bed-rock; the solid rock underlying the superficial detritus. [Eng.]

stone-hearted (stōn'hār'ted), *a.* Same as *stony-hearted*.

Weepe, ye ston-hearted men! Oh, read and pittle! W. Browne, *Britannia's Pastorals*, II. 1.

stone-hore[†] (stōn'hōr), *n.* The common stone-crop, *Sedum acre*; also, *S. reflexum*. *Britten and Holland*.

stone-horse (stōn'hōrs), *n.* A stallion. [Obsolete or provincial.]

My grandfathers great stone-hors, flinging up his head, and jerking out his left legge. Marston, *Antonio and Mellida*, II., I. 3.

stone-leek (stōn'lēk), *n.* Same as *cibol*.

stone-lichen (stōn'li'ken), *n.* A lichen growing upon stones or rocks, as species of *Parmelia*, *Umbilicaria*, etc. See *lichen*.

stone-lily (stōn'li'i), *n.* A fossil crinoid; a crinite or encrinite, of a form suggesting a lily on its stem. Also called *lily-encrinite*. *A. Geikie*, *Geol. Sketches*, i.

stone-liverwort[†] (stōn'liv'ēr-wērt), *n.* The plant *Marchantia polymorpha*.

stone-lobster (stōn'lob'stēr), *n.* See *lobster*. [Local, U. S.]

stone-lugger (stōn'lug'ēr), *n.* 1. A catostomid fish of the United States, *Catostomus* or *Hypentelium nigricans*; the hog-sucker or hog-molly. Also called *stone-roller* and *stone-toter*.—2. A cyprinoid fish of the United States, *Campostoma anomalum*, or some other member of that genus. It is 6 or 8 inches long; in the males in spring some of the parts become fiery-red, and the head and often the whole body is studded with large rounded tubercles. It is herbivorous, and abounds in deep still places in streams from New York to Mexico. Also *stone-roller*. See cut under *Campostoma*.

stoneman (stōn'man), *n.* [*< stone + dial. man*, a heap of stones, < *W. maen*, a stone. Cf. *dol-*

men.] A pile of rocks roughly laid together, usually on a prominent mountain-peak or -ridge, and intended to serve either as a landmark or as a record of a visit; a cairn.

stone-marten (stōn'mär'ten), *n.* Same as *beech-marten*.

stone-owl (stōn'oul), *n.* The Acadian or saw-whet owl, *Nyctala acadica*, which sometimes hides in quarries or piles of rock. See cut under *Nyctala*. [Pennsylvania.]

stone-parsley (stōn'pär'sli), *n.* The plant *Sison Amomum*; also, *Seseli Libanotis* and other species of the genus *Seseli*. See *Seseli*.

stonepecker (stōn'pek'ēr), *n.* 1. The turnstone, *Streptopelia interpres*. See cut under *turnstone*. [Local, Great Britain.] — 2. The purple sandpiper, *Tringa maritima*, a bird of similar resorts and habits. [Shetland Islands.]

stone-pine (stōn'pīn), *n.* See *pine*1, also *oil-tree*, 5, and *pignon*, 1.

stone-pit (stōn'pit), *n.* A pit or quarry where stones are dug.

stone-pitch (stōn'pieh), *n.* Hard inspissated pitch.

stone-plover (stōn'pluv'ēr), *n.* 1. The stone-curlew, thick-kneed plover, or thick-knee, a charadriomorphie or plover-like wading bird of the family *Edicnemidae*, *Edicnemus crepitans*, a common bird of Europe. See cut under *Edicnemus*. — 2. Hence, one of various limicoline birds of the plover and snipe families. (a) The Swiss, gray, or bullhead plover, *Squatarola helvetica*. See cut under *Squatarola*. (b) The ring-plover, *Egialitis hiaticula*, or the dotterel, *Euloniis morinellus*; a stone-runner. See cuts under *Egialitis* and *dotterel*. (c) A shore-plover of the genus *Esacus*, as *E. recurvirostris*. (d) The bar-tailed godwit, *Limosa lapponica*. See cut under *Limosa*. (e) The whimbrel, *Nanienus phaeopus*.

stone-pock (stōn'pok), *n.* A hard pimple which suppurates; acne.

stone-priest (stōn'prēst), *n.* A lascivious priest. *Grim the Collier*. (Davies.)

stoner (stō'nēr), *n.* [*< stone* + *-er*1.] One who or that which stones, in any sense of that word.

stone-rag (stōn'rag), *n.* A lichen, *Parmelia saxatilis*.

stone-raw (stōn'rā), *n.* 1. Same as *stone-rag*. — 2. The turnstone, *Streptopelia interpres*. [Armagh, Ireland.]

stonern (stō'nēr), *a.* [Var. of *stonen*.] Consisting or made of stone. [Scotch.]

The West Port is of *stonern* work, and mair decorated with architecture and the policy of bigging.
Scott, *Fortunes of Nigel*, ii.

stone-roller (stōn'rō'lēr), *n.* Same as *stone-lugger*.

stone-root (stōn'rüt), *n.* See *horse-balm* and *heal-all*.

stone-rue (stōn'rō), *n.* The fern *Asplenium Ruta-muraria*. [Eng.]

stone-runner (stōn'run'ēr), *n.* Same as *stone-plover*, 2 (b). [Prov. Eng.]

stone-saw (stōn'sā), *n.* A tool or a sawing-machine for cutting marble, millstones, and building-stones into slabs, disks, columns, and blocks, either from the live rock in the quarry or in a stone-yard. The most simple form of machine is a flat blade of iron strained tight in a saw-frame, and reciprocated by means of suitable mechanism. The cutting is done by particles of sand continually supplied to the saw by means of a stream of water. Stone-saws of this type are usually arranged in gangs, the frame supporting

a number of saws, and being suspended by chains over the block to be cut, the spaces between the blades regulating the thickness of the slabs. Circular saws have also been used to cut thin slabs of stone into narrow pieces by the agency of wet sand. An improvement on this method is the use of circular saws armed with black diamonds or carbon-points. The saw is placed in a frame resembling an iron-planer, the saw-arbor having a vertical motion; and the block of stone, dogged to a traversing table, is fed to the saw as the cut is made. Diamond stone-cutting machines have also been made in the form of reciprocating saws. In one new stone-sawing machine, called a *channeling-machine*, used to cut out large blocks and columns in a quarry, a circular saw having carbon-points is employed, the power being applied by means of gearing to the edge of the saw instead of at the arbor. Another form of quarrying stone-saw consists of an endless band of twisted wire rope passing in a horizontal direction over large pulleys, like a band-saw, and employing wet sand as the cutting-material.

stone-s-cast (stōnz'kást), *n.* Same as *stone-cast*.
stoneseed (stōn'séd), *n.* A plant of the genus *Lithospermum*, particularly the gromwell, *L. officinale* and *L. arvense*. The name, as also that of the genus, refers to the hardness of the seeds.

Stonesfield slate. See *slate*2.

stone-shot (stōn'shot), *n.* The distance a stone can be thrown, either from a cannon or from a sling.

He show'd a tent
A stone-shot off. *Tennyson*, *Princess*, v.

Mrs. Campbell Praed, *The Head Station*, p. 35.

stoneware (stōn'wār), *n.* Potters' ware made from clay of very silicious nature, or a composition of clay and flint. The clay is beaten in water and purified, and the flint is calcined, ground, and suspended in water, and then mixed (in various proportions for various wares) with the clay. The mixture is then dried in a kiln until it is sufficiently solid to be kneaded, and is then beaten and tempered before being molded into shape. When fired it is not porous, like common pottery, but vitrified through its whole substance in consequence of the great amount of silex contained in the prepared clay. Vessels of stoneware are generally glazed by means of common salt. The salt, being thrown into the furnace, is volatilized by heat, becomes attached to the surface of the ware, and is decomposed, the muriatic acid flying off and leaving the soda behind it to form a fine thin glaze on the ware, which resists ordinary acids. The old German stoneware had often a vitreous glaze. See *grès de Flandres*, under *grès*, and *Cologne ware*, under *ware*2.

stoneweeds (stōn'wēd), *n.* 1. Same as *stone-seed*. — 2. The doorweed, *Polygonum articulare*. *Britten and Holland*. [Prov. Eng.]

stool-ball (stöl'bäl), *n.* An outdoor game of the sixteenth and seventeenth centuries, generally played by women alone, but sometimes in company with men. See second quotation.

Daugh. Will you go with me?

Woore. What shall we do there, wench?

Daugh. Why, play at *stool-ball*.

Fletcher (and another), Two Noble Kinsmen, v. 2.

Stool-ball. This game, so often mentioned in old writers, is still played in almost every village in Sussex, and is for ladies and girls exactly what cricket is to men. Two pieces of board 18 inches by 12 are fixed to two sticks from 3 to 4 feet high, according to the age of the players. These sticks are stuck in the ground sloping a little backwards, and from 10 to 15 yards apart. The players take sides, generally eight to ten each. The bowler pitches the ball at the board, which in fact is the wicket. If he hits it the player is out. The same is the case if the ball is caught; and the running out, stumping, &c., are exactly like cricket.

N. and Q., 3d ser., XI. 457.

stool-end (stöl'end), *n.* In *mining*, a part of rock left unworked for the purpose of supporting the rest.

stool-pigeon (stöl'pīj'on), *n.* **1.** A pigeon fastened to a stool, and used as a decoy.

The *Stool-Pigeon*, also, as familiar to English ears as to ours, exists here—and even in the Eastern States—still in both its primary signification and its figurative extension. In the former it means the pigeon, with its eyes stitched up, fastened on a stool, which can be moved up and down by the hidden fowler, an action which causes the bird to flutter anxiously. This attracts the passing flocks of wild pigeons, which alight and are caught by a net, which may be sprung over them.

De Vere, Americanisms, p. 210.

Hence—**2.** A person employed as a decoy: as, a *stool-pigeon* for a gambling-house: such a fellow is generally a "rook" who pretends to be a "pigeon." See *pigeon*, 2, and *rook*, 1, 3.

7. To steep; macerate. [Prov. Eng.]

stoop¹ (stöp), *n.* [*< stoop*¹, *v.*] **1.** The act of stooping or bending down; hence, a habitual bend of the back or shoulders: as, to walk with a *stoop*.

Now observe the *stoops*.

The bendings, and the falls.

B. Jonson, Sejanus, i. 1.

His clumsy figure, which a great *stoop* in his shoulders, and a ludicrous habit he had of thrusting his head forward, by no means redeemed.

Dickens, Martin Chuzzlewit, ii.

2. The darting down of a bird on its prey; a swoop; a pounce.

Once a kite, hovering over the garden, made a *stoop* at me.

Swift, Gulliver's Travels, ii. 5.

Hence—**3†.** That which stoops or swoops; a hawk. [Rare.]

stoothing (stöth'ing), *n.* [*< stooth + -ing¹*, or a var. of *studding*, accom. to *stooth*.] Studding; battening.

stop¹ (stop), *v.*; *pret.* and *pp.* *stopped*, *ppr.* *stop ping*. [*< ME.* *stoppen*, *stoppien*, < *AS.* *stopian* (in comp. for *stopian*), stop up, = *OS.* *stop-pōn* = *MD.* *D.* *stoppen* = *MLG.* *LG.* *stoppen*, stuff, cram, = *OHG.* *stoffōn*, *stoppon*, *MHG.* *G.* *stopfen*, *stoppen* = *Icel.* *Sw.* *stoppa* = *Dan.* *stoppe*, stop. (a) According to the usual view, = *OF.* *estouper*, *F.* *étouper* = *OSp.* *estopar* = *It.* *stoppare*, stop up with tow, < *LL.* *stupare*, *stuppare*, stop up with tow, cram, stop, < *L.* *stupa*, *stupa* = *Gr.* *στῦπη*, *στῦππη*, coarse part of flax, hards, oakum, tow: see *stupa*, *stupe¹*. (b) But this explanation, which suits phonetically, is on grounds of meaning somewhat doubtful; it does not appear from the early instances of the verb that the sense 'stop with tow', 'stuff', is the original. The similarity with the *L.* and *Rom.* forms may be accidental, and the Teut. verb may be different (though mingled with the other), and connected with *OHG.* *stopfōn*, *MHG.* *stopfen*, *stopfen*, pierce, and so ult. with *E.* *stump*. Cf. *stuff*, *v.*, derived, through the *F.*, from the same Teut. source.] I. *trans.* 1. To close up, as a hole, passage, or cavity, by filling, stuffing, plugging, or otherwise obstructing; block up; choke: as, to stop a vent or a channel.

Ther is an eddre thet is y-hote ine latin aspia, thet is of zuiche kende thet hi stoppeth thet on ears mid erthe, and thet other mid hare taylor, thet hi ne yhere thane charmere.

Ayenbite of Invyt (E. E. T. S.), p. 257.

Imperious Caesar, dead, and turn'd to clay,

Might stop a hole to keep the wind away.

Shak., Hamlet, v. 1. 237.

Mountains of ice, that stop the imagined way,

Beyond Petrosia eastward, to the rich

Cathalan coast. *Milton, P. L.*, x. 291.

2. To make close or tight; close with or as with a compressible substance, or a lid or stopper: as, to stop a bottle with a cork; hence, to stanch.

The eldest and wysest at Geball were they that mended and stopp'd thy shippes. *Bible of 1551, Ezek. xxvii. 9.*

Have by some surgeon, Shylock, on your charge,

To stop his wounds, lest he do bleed to death.

Thus does he poison, kill, and slay, . . .

Yet stops me o' my lawfu' prey.

Burns, Death and Dr. Hornbook.

6. To prevent the continuance of; suppress; extinguish; bring to an end: as, to stop a leak.

Thel putten here hondes upon his mouthe, and stoppen his Brethe, and so thel sloen him.

Manderille, Travels, p. 201.

If there be any love to my deservings

Borne by her virtuous self, I cannot stop it.

Beau. and Fl., Knight of Burning Pestle, l. 1.

7. To check or arrest by anticipation.

The grief . . . that stops his answer.

Shak., Lucrece, l. 1664.

Every bold sinner, when about to engage in the commission of any known sin, should . . . stop the execution of his purpose with this question: Do I believe that God has denounced death to such a practice, or do I not?

South. (Johnson).

8. To keep back; withhold.

Do you mean to stop any of William's wages, about the sack he lost the other day at Hincley fair?

Shak., 2 Hen. IV., v. 1. 24.

Nor *stop*, for one had cork, his butler's pay.
Pope, Imit. of Horace, II. ii. 63.

9. To cease from; discontinue; bring to a stop.

When the crickets *stopped* their cry,
When the owls forbore a term,
You heard music; that was I.
Browning, Serenade at the Villa.

10. In musical instruments: (a) Of the lute and viol classes, to press (a string) with the finger so as to shorten its vibrating length, and thus raise the pitch of the tone produced from it. (b) Of the wind group generally, to close (a finger-hole in the tube) so as to change the nodes of the vibrating column of air, and thus alter the pitch of the tone. (c) Of wind-instruments of the trumpet class, to insert the hand into (the bell) so as to shorten the length of the vibrating column of air, and thus to raise the pitch of the tone.—11. *Naut.*, to make fast with a small line: as, to *stop* a line to a harpoon-staff.—12. To put the stops, or marks of punctuation, in; point, as a written composition; punctuate.

If his sentences were properly *stopped*.
Landon, (Imp. Dict.)

13. In masonry, plastering, etc., to point or dress over (an imperfect or damaged place in a wall) by covering it with cement or plaster.—14. In *hort.*, same as *top*.

After the end of July it is not advisable to continue the topping.—technically *stopping*—of the young shoots.
Encyc. Brit., XII. 254.

15. To ward off; parry. [Pugilistic slang.]—A *stopping* oyster! See *oyster*.—*Stopping the glass*. See *glass*.—To *stop* a gap. See *gap*.—To *stop* a line. See *line*.—To *stop* down a lens, in *photog.*, etc., to reduce the amount of light admitted through a lens by using stops or diaphragms. See *stop*, n., 12.—To *stop* off. (a) In *foundry*, to fill in (a part of a mold) with sand to prevent metal from running into that part when the casting is made. The form of the casting can frequently be thus changed without the expense of altering a pattern or making a new pattern. (b) In galvanoplastic operations, to apply a varnish to (parts of a plate or object), to prevent the deposit of metal upon the varnished parts during immersion in the gilding or electroplating solution.—To *stop* one's mouth, to silence one; especially, to silence one by a sop or bribe.

Let repentance *stop* your mouth;
Learn to redeem your fault.

Ford, Lover's Melancholy, iv. 1.

If you would have her silent, *stop* her mouth with that ring.
Wycherley, Gentleman Dancing-Master, v. 1.

To *stop* out. (a) In the *arts*, to protect (a surface, etc.) from chemical or other action by covering with a coating: as, in photography, to cover with paint, paper, etc., as parts of a negative which are not to be printed; in electrotyping, to cover with wax, as parts of the black-leaded mold, to prevent the deposit of copper on those parts; in etching, to cover with a varnish or other resisting composition, as parts of a plate which are not to be bitten by the acid. (b) *Theat.*, to cover (some of the teeth) with black wax, so as to make them invisible. = *Syn.* 1 and 4. To interrupt, block, blockade, barricade, intercept, end.—9. To suspend, intermit.

II. *intrans.* 1. To check one's self; leave off; stand; stay; halt; come to a stand or stop, as in walking, speaking, or any other action or procedure.

Why *stop* my lord? shall I not hear my task?
Shak., 3 Hen. VI., iii. 2. 52.

Terence . . . always judiciously *stops* short before he comes to the downright pathetic.

Goldsmith, Sentimental Comedy.

No rattling wheels *stop* short before these gates.
Corper, Task, iv. 144.

2. To discontinue; come to an end; cease to be: as, the noise *stopped*; an annuity *stops*.—3. To make a halt or a stay of longer or shorter duration; tarry; remain.

We . . . went about half a mile to the east of Tortura, not designing to *stop* there.

Poocke, Description of the East, II. 1. 60.

Mr. Brontë and old Tabby went to bed. . . . But Charlotte . . . *stopped* up . . . till her weak eyes failed to read or to sew. Mrs. Gaskell, Charlotte Brontë, II. 121.

"I would rather *stop* abed," said I; "what have I to do with fighting?" R. D. Blackmore, Lorna Doone, lxiv.

I've been up country some weeks, *stopping* with my mother. S. O. Jewell, Deephaven, p. 17.

4. To intercept, ward off, or parry a blow. [Pugilistic slang.]

Don't *stop* with your head too frequently.

A. L. Gordon, In Utrumque Paratus.

To *stop* off or over, to make a brief or incidental stay at some point in the course of a journey; lie off or over: also used as a noun or an adjective: as, a *stop-over* check; the ticket allows a *stop-off* in Chicago. [Colloq.]—To *stop* out, to stay out all night, as in the streets, or away from one's proper lodging-place.

Mr. Hall, at Bow-street, only says, "Poor boy, let him go." But it's only when we've done nothink but *stop* out that he says that.

Mayhew, London Labour and London Poor, II. 563.

stop¹ (stop), *n.* [*< stop, v.*] 1. The act of stopping, in any sense. (a) A filling or closing up.

A breach that craves a quick expedient *stop*!

Shak., 2 Hen. VI., i. 1. 288.

(b) An impeding or hindering; obstruction; stoppage.

What's he? One sent,
I feare, from my dead mother, to make *stop*
Of our intended voyage. Brome, Antipodes, l. 7.

(c) A pause; a stand; a halt.

When he took leave now, he made a hundred *stops*,
Desir'd an hour, but half an hour, a minute.
Fletcher, Humorous Lieutenant, iii. 1.

Mrs. Crummles advancing with that stage walk which consists of a stride and a *stop* alternately.
Dickens, Nicholas Nickleby, xxv.

(d) Termination; ending.

How kingdoms sprung, and how they made their *stop*,
I well observed. J. Beaumont, Psyche, ii. 49.

(e) A stay; a tarrying.

Coming to the Corner above Bethlehem Gate, [we] made a *stop* there, in order to expect the return of our Messenger.
Maundrell, Aleppo to Jerusalem, p. 67.

2†. A state of hesitation or uncertainty; a standstill.

At which sudden question, Martius was a little at a *stop*.
Bacon, Holy War.

3. That which stops or hinders; especially, an obstacle or impediment; specifically, a weir.

He that is used to go forward, and findeth a *stop*, falleth out of his own favour.
Bacon, Empire (ed. 1887).

What they called *stops* . . . were in effect weirs or kideals.

Sir J. Hawkins, in Walton's Complete Angler, p. 274, note.

4. In musical instruments: (a) Of the lute and viol classes, a pressure on a string so as to shorten its vibrating length, and raise the pitch of its tone. (b) Of wind-instruments, the closing of a finger-hole in the tube so as to alter the pitch of its tone. (c) Of wind-instruments of the trumpet class, the inserting of the hand into the bell so as to raise the pitch of the tone.—5. Any lever or similar device for thus stopping a string or finger-hole.

His jesting spirit, which is now crept into a lute-string and now governed by *stops*. Shak., Much Ado, iii. 2. 62.

In every instrument are all tunes to him that has the skill to find out the *stops*. Brome, Sparagus Garden, iii. 4.

6. In an organ, a graduated set of pipes of the same kind, and giving tones of the same quality. A *complete stop* has at least one pipe for each digital of the keyboard to which it belongs; if a stop has less, it is called a *partial stop*; if more, it is called a *compound stop* or *mixture stop*. The number of pipes constituting a stop varies according to the compass of the keyboard to which it belongs, the usual number being now sixty-one for manual keyboards, and either twenty-seven or thirty for pedal keyboards, while mixture-stops have between twice and five times as many. Stops are variously classified, as follows: (a) As to general quality of tone, the principal qualities recognized being the *organ-tone* (as in the open diapason, the octave, the fifteenth, etc.), the *flute-tone* (as in the bourdon, the stopped diapason, the melodia, the flute, etc.), the *string-tone* (as in the viol da gamba, the violina, the dulciana, etc.), and the *reed-tone* (as in the oboe, the clarinet, the trumpet, etc.). The first three groups are also called *flue-stops*, and the last *reed-stops*, from the construction of their pipes (see *pipe*, 2). (b) As to the pitch of the tones relative to the digitals used, the two classes being *foundation-* and *mutation-stops*, of which the former give tones exactly corresponding to the normal pitch of the digitals, while the latter give tones distant from that pitch by some fixed interval, like one, two, or three octaves, or even a twelfth. Foundation-stops are usually called *eight-foot stops*, because the length of an open pipe sounding the second C below middle C is approximately eight feet; while for an analogous reason mutation-stops sounding an octave below the normal pitch of the digitals are called *sixteen-foot stops*; those sounding the octave above, *four-foot stops*; those sounding the second octave above, *two-foot stops*, etc. The specific names of stops are not only numerous, but often vary without sufficient reason. Some names have a merely technical significance, as *diapason*, *principal*, etc.; some indicate the instrument which they are intended to imitate, as *flute*, *trumpet*, *violinello*, etc.; while others mark the extent of the mutation produced, as *octave*, *twelfth*, *quint*, etc. Each partial organ has its own stops, which can be sounded only by means of the digitals of its own keyboard. The pipes of a stop are usually arranged in a transverse row on the wind-chest, the order of disposition, or *plantation*, varying somewhat. Under them, and between the upper and middle boards of the chest, is a movable strip of wood called a *slider*, which (together with both these boards) is perforated with holes corresponding to the plantation of the pipes. The position of the slider is controlled through a system of levers by a handle near the keyboard called a *register*, *stop-knob*, or *stop*. When this handle is pulled out or drawn, the holes of the slider are coincident with those of the two boards, so that the air can pass freely from the pallets into the pipes; when the handle is pushed in, the holes of the slider are not coincident with those of the two boards, and communication between the pallets and the pipes is cut off. In the one case the stop is said to be "on," in the other "off." When the slider controlling the use of the upper pipes of a stop is separated from that controlling the lower, the stop is called *divided*. Since the handles controlling the use of the pipes or stops proper are made of the same general shape as those controlling various mechanical appliances, like couplers, the former are also called *sounding* or *speaking stops*, in distinction from the latter, or *mechanical stops*. Stops whose quality or power of tone is decidedly individual, so as to fit them for the performance of solo melodies, are called *solo stops*. See *organ*, *reed-organ*, *pipe*, etc.

The pathetic *stop* of Petrarch's poetical organ was one he could pull out at pleasure.

Lowell, Among my Books, 1st ser., p. 368.

7. Same as *stop-knob*.—8. *pl.* In the harpsichord, handles controlling levers by which the position of the jacks could be varied so as to alter the force or quality of the tones produced.—9. A mark to indicate a stop or pause in reading; a mark of punctuation.

I can write fast and fair.

Most true orthography, and observe my *stops*.
Middleton, More Dissemblers besides Women, iii. 2.

Who walked so slowly, talked in such a hurry,
And with such wild contempt for *stops* and Lindley Murray!
C. S. Calverley, Isabel.

10. In *joinery*, one of the pieces of wood nailed on the frame of a door to form the recess or rebate into which the door shuts.—11. *Naut.*: (a) A projection at the head of a lower mast, supporting the trestletrees. (b) A bit of small line used to lash or fasten anything temporarily: as, hammock-stops, awning-stops.—12. In *optics*, a perforated diaphragm inserted between the two combinations of a double lens, or placed in front of a single lens, to intercept the extreme rays that disturb the perfection of the image. The practical effect of the stop is to increase the depth of the focus and sharpness of definition, but to diminish the illumination in the exact ratio of the diameter of the stop to that of the lens, and hence, in photography, to increase correspondingly the necessary time of exposure.

Microscopes, in which, whatever be the size of the lens itself, the greater portion of its surface is rendered inoperative by a *stop*. W. B. Carpenter, Micros., § 10.

13. In *bookbinding*, a small circular finishing-tool used by bookbinders to stop a line or fillet at its intersection with another line.—14. In *lace-manuf.* (in the application of the Jacquard attachment described under *loom*, 2, to a lace-frame), a point at which the different sets of warp-threads are concentrated or brought to a sort of focus, and which in the design of a pattern is taken as a basis for measurement in determining the distances the respective threads in the set must be moved to form the desired pattern. The movements of the mechanism are adjusted in accordance with these measurements.—15. In *phonetics*, an alphabetic sound involving a complete closure of the mouth-organs; a mute; a check.—16. The concavity of the profile of a dog's face, specially marked in the bulldog and pug.—17. In *fencing*, the action whereby a fencer, instead of parrying a blow and then thrusting, allows a careless opponent to run on his sword-point. He may hasten the stop by extending the sword-arm. (See *stop-thrust*.) The stop is discouraged in fencing as a game, since much use of it shortens the passages, and destroys combinations of feints, disengagements, coups, etc.—**Double stop**. See *single stop*.—**Full stop**. (a) A period. (b) In *lute-playing*: (1) A chord followed by a pause. (2) A chord in producing which all the strings are stopped by the fingers.—**Geneva stop**. See *Geneva movement*, under *movement*.—**Half-stop**, in an organ, a stop which contains half, or about half, the full number of stops.—**Harmonic stop**. See *harmonic*.—**Incomplete or imperfect stop**. See *incomplete*.—**Open stop**, in organ-building, a stop whose pipes are open at the upper end.—**Pedal stop**. See *pedal*.—**Service stop**, in *railroading*, a stop made by a railway-train, in the regular way and at stations designated by the regulation schedule, as distinguished from an *emergency stop*.—**Single stop**, in *ship-building*, the scoring down of the carlines between the beams, by which means a carline is prevented from sinking any lower than its intended position. The double stop is generally used for deeper carlines than the single stop.—**To hunt upon the stop**, to hunt with or like a stop-hound—that is, slowly and with frequent pauses; hence, to be lukewarm.

If any [Christian] *stop* a little forward, do not the rest hunt upon the stop?
Rev. S. Ward, Sermons, p. 91.

To *put* a *stop* to, to cause to stop, temporarily or permanently; break off; end.—*Syn.* 1. *Stop*, *Cessation*, *Stay*, *Suspension*, *Intermission*, *Pause*, *Rest*. These words may denote the failure or interruption of forward motion or of activity. *Stop* is an energetic word, but the most general: it is opposed to *going forward* or *going on*; *cessation* may be temporary or final, and is opposed to *continuance*; a *stay* is a *stop* viewed as a lingering or delay; as, a short *stay* in the place; or, as a legal term, simply a *stop*: as, a *stay* of proceedings; *suspension* is a complete but presumably temporary *stop*: as, a *suspension* of work or pay; *intermission* is a strictly temporary *stop*; *pause* is a brief *stop*, in full expectation of going on; *rest* is a *stop* for refreshment from weariness.

stop² (stop), *n.* [*< ME. stoppe*, *< AS. stoppa*, a bucket or pail: see *stoop*².] A bucket; a pail; a small well-bucket; a milk-pail. Halliwell. [Prov. Eng.]

stop³, *n.* A Middle English form of *stoop*². **stop-cock** (stop'kok), *n.* A faucet with a valve of some form, operated by a handle: used to open or close a pipe or passage for water, gas, etc. Such cocks are sometimes made self-closing, to prevent waste.

stop-collar (stop'kol'är), *n.* In *mach.*, an adjustable collar which can be placed and held

by a set-screw on a shaft or rod as a stop or gage to limit the motion of a movable part sliding on the rod or shaft, as a fitting on the main shaft on which the carriage of a typewriter slides, and adjustments in many other machines.

stop-cylinder (stop'sil'in-dër), *n.* In printing. See *cylinder-press* and *printing-machine*.

stop-drill (stop'dril), *n.* A form of drill made with a solid shoulder, or admitting of the attachment of a collar by a side-screw, to limit the depth of penetration of the tool.

stope¹ (stöp), *n.* [*< ME. *stope = MD. stoepe*, etc., a step; or a var. of *stape*, *stap*, a step (cf. *stopen*, *stope*, *stapen*, pp. of *stoppen*): see *step*, and cf. *stoop*³.] An excavation made in a mine to remove the ore which has been rendered accessible by the shafts and drifts. These are, to a certain extent, permanent constructions, being carefully supported by the necessary timbering and left open for passage, while the stopes are only supported so far as may be necessary for the safety of the mine, and are more or less completely filled up with the attle or refuse rock left behind after the ore has been picked out and sent to the surface.

stope¹ (stöp), *v. t. and i.*; pret. and pp. *stoped*, ppr. *stopping*. [*< stope*¹, *n.*] In mining, to remove the contents of a vein. The stopping is done after a vein or lode has been laid open by means of the necessary shafts and drifts. See *stopping*.

stope² (stöp), *n.* An obsolete form of *stoop*².

stope³, **stopent**. Middle English forms of *stapen*, past participle of *step*.

stop-finger (stop'fing'gër), *n.* Same as *faller-wire*, 2.

stop-gap (stop'gap), *n. and a.* [*< stop*¹, *v.*, + obj. *gap*.] 1. *n.* That which fills a gap or hiatus, or, figuratively, that which serves as an expedient in an emergency.

I declare off; you shall not make a *stop-gap* of me.

Footle, The Cozeners, i. 1.

A good deal of conversation which is . . . introduced as a *stop-gap*. *Proc. Eng. Soc. Psych. Research*, XVII. 450.

II. *a.* Filling a gap or pause, as in the course of talk.

The "well's" and "ah's," "don't-you-know's," and other *stop-gap* interjections.

Proc. Amer. Soc. Psych. Research, I. 312.

stop-gate (stop'gät), *n.* A gate used to divide a canal into sections, so that in case of a break in an embankment in one section the water can be shut off from flowing into it from other sections.

stop-hound (stop'hound), *n.* A dog trained to hunt slowly, stopping at the huntsman's signal. *Davies* (under *stop*).

Sir Roger, being at present too old for fox-hunting, to keep himself in action, has disposed of his beagles and got a pack of *stop-hounds*. *Budget*, Spectator, No. 110.

stopping (stöp'ing), *n.* [Verbal *n.* of *stope*¹, *v.*] In mining, the act of excavating mineral ground to remove the ore after this has been rendered accessible by the necessary preliminary excavations—namely, sinking one or more shafts or winzes and running drifts.—**Overhand stopping**, a method of working out the contents of a vein by advancing from below upward, the miner being thus always helped by gravity. It is the method most commonly employed. That part of the material thrown down which is worth saving is raised to the surface, and the refuse rock (attle or deads) resting on the stulls remains in the excavation, helping to support the walls of the mine, and giving the miner a place on which to stand.—**Underhand stopping**, excavating the ore by working from above downward. In underhand stopping everything loosened by blasting has to be lifted up to be got out of the way. The advantage of this method is that in case the ore is very valuable, less of it need be lost by its getting so mixed with the attle that it cannot be picked out.

stop-knob (stop'nob), *n.* In *organ-building*, the handle by which the player controls the position of the slider belonging to a particular stop, or set of pipes. When the knob is drawn out, the pipes are ready to be sounded by the keys. The name of the stop is commonly written on the knob. Also called *register* and *stop*. See cut under *reed-organ*.

stopless (stop'less), *a.* [*< stop*¹ + *-less*.] Not to be stopped or checked. [Rare.]

Making a civil and staid senate rude

And *stopless* as a running multitude.

Sir W. Davenant, On King Charles the Second's Return.

stop-motion (stop'mō'shon), *n.* In *mech.*, a device for automatically arresting the motion of an engine or a machine, when from any cause it is necessary to stop suddenly to prevent injury to the machine or material. Stop-motion mechanisms are applied to looms, spinning, roving, and drawing-machines, winding-machines, elevators, knitting-machines, and engines. They are divided into two classes: those operated by some mechanical means, as a weighted arm resting on the thread of a loom, where the breakage of the thread causes the arm to fall; and those actuated by electricity, in which the fall of an arm closes a circuit, and by means of a magnet sets in motion some mechanical device for arresting the motion. In most ma-

chines the usual method is the shifting of the belt that moves the machine. In engines the stoppage and fall of the governor closes the steam-valve. Electrical stop-motion appliances, not self-acting, are sometimes used; in case of a break-down the use of a push-button releases a weight that by suitable mechanism shuts off steam from the engine.—**Fork-and-grid stop-motion**, in a power-loom, a stop-motion in which a grid on the batten acts in connection with a fork, which when the web-thread breaks causes a lever to drop and stops the loom.

stop-net (stop'net), *n.* An addition to the main net in seine-fishing. *Encyc. Brit.*, IX. 254.

stop-order (stop'or'dër), *n.* In *stock-broking*, an order given by a person to his broker to sell or buy a specified stock when the price reaches a specified figure.

stop-over (stop'ō'vër), *n. and a.* See *to stop off* or *over*, under *stop*¹, *v. i.*

stoppage (stop'āj), *n.* [*< stop*¹ + *-age*.] 1. The act of stopping, in any sense, or the state of being stopped; especially, a stopping of motion or procedure.

His majesty, . . . finding unexpected *stoppage*, tells you he now looks for a present proceed in his affairs.

Court and Times of Charles I., I. 344.

2. A deduction made from pay or allowances to repay advances, etc.—**Stoppage in transit** or **in transitu**, in *law*, the act of a seller of goods who has sent them on their way to the buyer, in reclaiming them before they have come into the actual possession or control of the buyer, and terminating or suspending performance of the sale: a right allowed in case of discovering the buyer to be insolvent.

stopper, *n.* [ME., *< AS. stoppa*, a vessel: see *stoop*².] A pail or bucket. *Prompt. Parv.*, p. 477; *Hallivell*.

stopped (stopt), *p. a.* 1. In playing musical instruments, noting the effect produced by stopping in any of the senses described under *stop*¹, *v. t.*, 10.—2. In an organ, having the upper end plugged: said of a pipe: opposed to *open*. The tone produced by a stopped pipe is an octave lower than that produced by an open pipe of the same length.—**Stopped diapason**, in *organ-building*. See *diapason* (e).—**Stopped note**. See *note*¹.

stopple¹, *n.* An obsolete form of *stopple*.

stopple², *n.* Same as *estopple*.

Abatements, *stopples*, inhibitions.

Marston, Scourge of Villanie, vii. 87.

stopper (stop'ër), *n.* [*< stop*¹ + *-er*¹.] 1. One who or that which stops or plugs. (a) One who fills up holes or openings.

The ancients of Gebal and the wise men thereof were in thee thy calkers [margin: *stoppers* of chinks].

Ezek. xvii. 9.

(b) That which closes or fills up (an opening, etc.), as a plug, a bung, or a cork; especially, such an article for the mouth of a fruit-jar, decanter, or vial, when made of the same material as the vessel itself, and having no special name, as *cork*, *bung*, etc.: a stopple; specifically, a device for closing bottles for aerated water. See cut under *siphon-bottle*. (c) A convenient utensil made of wood, bone, ivory, or the like, formerly used to compress or pack some loose or flocculent substance into small compass.

I sold little bone "tobacco-stoppers"—they're seldom asked for now; *stoppers* are quite out of fashion.

Mayhew, London Labour and London Poor, I. 490.

(d) One who or that which brings to a stop or stand; specifically, one of the players in tennis, foot-ball, and other games, who stops the balls. *Hallivell*. (e) *Naut.*, a piece of rope secured at one end to a bolt or the like, used to check the motion of another rope or of a cable. Stoppers for cables are of various construction, such as an iron clamp with a lever or screw, a claw of iron with a rope attached, etc. (f) In an organ, a wooden plug inserted in the tops of certain kinds of pipes, as in those of the stopped diapason, flute, bourdon, etc., whence they are called *stopped pipes*. Such pipes are tuned by means of the stopper. (g) In a vehicle, a bar of wood with iron points pivoted to the body, and allowed to trail on the ground behind to serve as a stop or brake in ascending steep grades. Such a device is used, for instance, on ice-carts plying on hilly streets, where stoppages are frequent.

2. The upper pad or principal callosity of the sole of a dog's foot.

The leg, or bones below the knee [of the greyhound], should be of good size, the *stopper* (or upper pad) well united to it, and firm in texture.

Dogs of Great Britain and America, p. 45.

3. A small tree of one of four species of the genus *Eugenia* occurring in Florida. Of the species *E. baccifolia* is the gurgon or Spanish stopper, *E. monticola* is the white stopper, and *E. proserpa* is the red stopper. The last is somewhat abundant, and has a very heavy, hard, strong, and close-grained wood of a light yellowish-brown color, likely to be valuable for cabinet-making and coarse engraving. The remaining species so called is *E. longipes*, a rare tree bearing a small red fruit with the flavor of cranberries. All except the last are found also in the West Indies. *Sargent*.—**Cat-head stopper**. See *cat-head*.—**Spanish stopper**. See *def. 3.* (See also *fighting-stopper*.)

stopper (stop'ër), *v. t.* [*< stopper*, *n.*] 1. To close or secure with a stopple: as, *stoppered* bottles.—2. To fit with a stopple or stopples.

The month of the vessel to be *stoppered* is ground by an iron cone fixed to a lathe.

H. J. Powell, Glass-making, p. 73.

3. *Naut.*, to secure with a stopper or stoppers.—**To stopper a cable**, to put stoppers on a cable to prevent it from running out of the ship when riding at anchor.

stopper-bolt (stop'ër-bölt), *n.* *Naut.*, a large ring-bolt driven into the deck before the main hatch, etc., for securing the stoppers.

stopper-hole (stop'ër-höl), *n.* In *iron-puddling*, a hole in the door of the furnace through which the metal is stirred. See cut under *puddling-furnace*.

stopper-knot (stop'ër-not), *n.* A knot in the end of a rope-stopper made by double-walling the strands.

stopping (stop'ing), *n.* [Verbal *n.* of *stop*¹, *v.*]

1. The act of one who or that which stops, in any sense. Specifically—(a) The process of filling cracks or fissures, as in an oil-painting, with a composition preparatory to restoring; also, the material used in the process.

The *stopping*, as this mixture [of size and whiting] is called, is pressed into the cracks by means of a palette-knife.

Workshop Receipts, 2d ser., p. 127.

(b) In *etching*. See *to stop out* (a), under *stop*¹, *v. t.* (c) The act or process of altering the pitch of the tones of a musical instrument in any of the ways described under *stop*¹, *v. t.*, 10.

2. Something that stops. Specifically—(a) In *mining*, any solid wall or brattice built across a passage in a mine, to shut out the air from the goaves, or to limit it to certain passages, or to keep the gas confined, or for any other purpose. (b) In *dental surg.*, material for filling cavities in teeth. (c) In *farriery*, a ball or pad for stuffing the space in a horse's foot within the inner edge of the shoe.—**Double stopping**, in *riot-playing*, the act or process of producing tones simultaneously from two stopped strings.

stopping-brush (stop'ing-brush), *n.* 1. In *hat-making*, a brush used to sprinkle boiling water upon the napping and the hat-body to assist in uniting them.—2. In *etching*, a camel's-hair brush used in stopping out parts of etched plates.

stopping-coat (stop'ing-köt), *n.* The covering of resistant material applied to any part of an object about to be exposed to the action of an acid or other agent, in order to protect that part from such action.

stopping-knife (stop'ing-nif), *n.* A knife used in stopping, as a glaziers' putty-knife.

stop-plank (stop'plangk), *n.* One of the planks employed to form a sort of dam in some hydraulic works. They generally occupy vertical grooves in the wing walls of a lock or weir, to hold back water in case of temporary disorder of the lock-gates.

stop-plate (stop'plät), *n.* An end-bearing for the axle in a railroad journal-box, designed to resist end-play of the axle.

stopple¹ (stop'l), *n.* [*< ME. stoppel*, *stoppell*, *stopell*; *< stop* + *-el*, now *-le*, a noun-formative indicating the instrument (as also in *whittle*, *swingle*, etc.).] 1. That which stops or closes the mouth of a vessel; a stopper: as, a glass *stopple*; a cork *stopple*.

Item, j. litill botell, with j. cheyne and j. *stopell*, welyng xxxviij. unces.

Paston Letters, I. 472.

Who knows, when he openeth the *stopple*, what may be in the bottle?

B. Jonson, Bartholomew Fair, ii. 1.

2. A plug sometimes inserted in certain finger-holes of a flute or flageolet to accommodate its scale to some unusual series.

stopple¹ (stop'l), *v. t.*; pret. and pp. *stoppled*, ppr. *stopping*. [*< stopple*¹, *n.*] To stop or close with a stopple.

His hours of study clos'd at last,

And finish'd his concise repast,

Stoppled his cruise, replac'd his book

Within its customary nook.

Courper, Moralizer Corrected.

stopple² (stop'l), *n.* [*< ME. stopyll*, *stouple*; a more orig. form of *stubble*: see *stubble*.] *Stubble*. [Obsolete or prov. Eng.]

And thoru haubert and ys coler, that nere nothyng souple,
He smot of ys heved as lyglyche as yt were a lute *stopple*.

Robert of Gloucester, p. 223.

stop-ridge (stop'rij), *n.* A band slightly elevated upon the surface of a blade or a similar part of an implement, intended to stop and hold it in the proper place, as in the handle. In stone celts the presence of such a stop-ridge marks a certain class or category.

stop-rod (stop'rod), *n.* In *weaving*, the rod which extends longitudinally under the batten of a loom, forming a part of the stop-motion, and which raises a catch that, if not raised, engages mechanism which immediately stops the loom. Every time the shuttle enters the shuttle-box fairly it acts upon a stop-finger to cause the stop-rod to lift the catch; but, if the shuttle is stopped in its course through the shed, the catch is not raised, the loom is stopped, and the warp, which would otherwise be broken by the impact of the reed against the shuttle while in the shed, is thus saved.

stop-ship (stop'ship), *n.* [*< stop¹, v., + obj. ship;* a translation of the Gr. *ἐχέμης*, the remora: see *Echeneis*, and cf. *mora*, *remora*.] The fish remora.

O *Stop-ship*, . . . tell vs where thou doo'st thine Anchors hide;

Whence thou resistest Sayls, Owers, Wind, and Tide.

Sylvestre, tr. of Du Bartas's Weeks, l. 5.

stop-thrust (stop'thrust), *n.* In *fencing*, a slight thrust at one's opponent, instead of a parry, made after he has begun to lunge forward in an attack. The stop-thrust goes over by delicate gradations into the time-thrust, but is not considered by fencers a fine blow like the time-thrust.

stop-valve (stop'valv), *n.* 1. In *hydraul.*, a valve which closes a pipe against the passage of fluid. It is usually a disk which occupies a chamber above the pipe when the passageway through the latter is open, and is driven down by a screw to stop the aperture.

2. In steam-engines, a valve fitted to the steam-pipes, where they leave the several boilers, in such a way that any boiler may be shut off from the others and from the engines.

stop-watch (stop'woch), *n.* A watch which records small fractions of a second, and in which the hands can be stopped at any instant, so as to mark the exact time at which some event occurs: chiefly used in timing races.

He suspended his voice in the epilogue a dozen times, three seconds and three fifths by a *stop-watch*, my lord, each time.

Sterne, *Tristram Shandy*, iii. 12.

stop-water (stop'wá'tér), *n.* [*< stop¹, v., + obj. water.*] 1. *Naut.*, a drag.—2. A plug of soft wood driven tightly into a hole at the joint of a scarf, the expansion of which, when immersed, prevents water from working up through the scarf and behind the bottom plank.

In building iron ships a piece of canvas soaked in red lead is used to make water-tight joints where calking is difficult.

stop-wheel (stop'hwél), *n.* See *Geneva movement*, under *movement*.

stop-work (stop'wérk), *n.* A device attached to the barrel of a watch, musical box, etc., to prevent overwinding.

stor¹, *a.* A Middle English form of *stoor¹*.

stor², *n.* [ME., *< AS. stōr*, incense, *storax* (= *W. ystor*, resin, rosin), *< L. storax*, *storax*: see *storax*.] Incense.

Thet *Stor* signefied Gode werkes, for ase se smech of the *store* wanne hit is i-do into the ueré and goth upward to the heuene and to Gode warde Swa amuntel si gode biddinge to gode of the herte of the gode cristenemanne.

Old Eng. Misc. (ed. Morris), p. 28.

storable (stór'a-bl), *a.* [*< store³ + -able.*] Capable of being stored. *R. S. Ball*, *Exper. Mechanics*, p. 262.

storage (stór'áj), *n.* [*< store³ + -age.*] 1. The act of storing, in any sense; specifically, the keeping of goods in a store, warehouse, or other place of deposit.—2. The price charged or paid for keeping goods in a storehouse.—**Cold storage**, storage in refrigerating chambers or other places artificially cooled, as for the preservation of articles liable to be damaged by heat.—**Storage battery**. See *battery*.—**Storage magazine**. Same as *magazine*, 1 (a).—**Storage warehouse**. See *warehouse*.

storage-bellows (stór'áj-bel'öz), *n.* See *organ¹*, 6.

storax (stór'raks), *n.* [= *F. storax*, *styrax*, *< L. storax*, *styrax*, *< Gr. στρίπαξ*, a sweet-smelling resin so called, also a tree producing it.] 1. A solid resin resembling benzoin, with the fragrance of vanilla, formerly obtained from a small tree, *Styrax officinalis*, of Asia Minor and Syria. It was in use from ancient times down to the close of the last century, but has disappeared from the market, the trees having been mostly reduced to bushes by excessive lopping.

This, that, and ev'ry thicket doth transpire
More sweet than *storax* from the hallowed fire.

Herrick, *Apparition of his Mistress*.

2. The tree yielding *storax*, or some other tree or shrub of the same genus. Among the American species, *Styrax Californica* is a handsome Californian shrub. See cut in next column.—**Liquid storax**, a balsam known from ancient times with the true *storax*, obtained by boiling and pressing from the inner bark of the Oriental sweet-gum tree, *Liquidambar orientalis*, itself also called *liquidambar*. It is a semi-fluid adhesive substance with the properties of a stimulant expectorant, but now scarcely used in Western practice except as a constituent in the compound tincture of benzoin (resembling *fraria's balsam*: see *benzoin*), and as an application for itch. It has long been used in making incense and fumigating preparations, and also enters into perfumery. Its chief markets are China and India. A similar balsam is obtained, chiefly in Burma, from *Altingia excelsa*, known (together with the last) in East Indian commerce as *rose-maloes*, *rasamala*, etc. In Formosa and southern China a dry terebinthinous resin of the same character is derived from *Liquidambar Formosana* (a species recently identified). An American liquidambar, or liquid storax, or a substitute for it, is procured as natural exudation or by incision from the bark

Branch with Flowers of Storax (*Styrax Californica*).

Milton, *P. L.*, vi. 515.

Hence — 4. A place where goods are kept for sale by either wholesale or retail; a shop: as, a book-*store*; a dry-goods *store*. See note under *shop¹*, 2. [U. S. and British colonies.]

Stores, as the shops are called.

Capt. B. Hall, *Travels in N. A.*, I. 8.

Bill of stores. See *bill³*.—**Bonded store**. See *bonded*.

—**Coöperative store**. See *coöperative*.—**Fancy store**. See *fancy*.—**General-order store**, a customs warehouse in which goods are stored temporarily, as unclaimed, or arriving in advance of invoice or transportation papers, or through other like cause of detention. Such goods are obtainable only on a general order.—**General store**, a store or shop where goods of all ordinary kinds are kept for sale; especially, such a store in a country village or at cross-roads.—**In store**, laid up; on hand; ready to be produced: as, we know not what the future has *in store* for us.

I have an hour's talk *in store* for you.

Shak., *J. C.*, II. 2. 121.

Marine, ordnance, public stores. See the qualifying words.—**Sea-stores**, provisions and supplies on shipboard for use at sea. Compare *ship-stores*.—**Ship-stores**, provisions and supplies for use on board ships at sea or in port: such supplies are sealed, as non-dutiable, by the customs officers.—**Small stores**, in a man-of-war, a general term embracing tinware, tobacco, soap, razors, brushes, thread, needles, etc., issued and charged to the men by the paymaster.—**Subsistence stores**. See *subsistence*.—**To set store by**. See *set¹, v. t.*, 18.—**To tell no store off**, to make no account of; set no store by.

I ne telle of laxatyves no *store*,

For they ben venymous, I woot it weel;

I hem diffye, I love hem never a deel.

Chaucer, *Nun's Priest's Tale*, l. 334.

II. a. 1†. Hoarded; laid up: as, *store* linen; *store* fruit.

Of this treasure . . . the gold was accumulate, and *store* treasure; . . . but the silver is still growing.

Bacon, *Holy War*.

2. Containing stores; set apart for receiving stores or supplies. Compare *store-city*.—3. Obtained at a store or shop; purchased or purchasable at a shop or store: as, *store* clothes; *store* teeth (humorously used for *false teeth*). This word in rural or frontier use is commonly opposed to *home-made*, and implies preference: as, *stylish store* curtains; in town use it is usually opposed to *made to order*, and implies disparagement: as, *clumsy store* boots. [Colloq., U. S.]—**Store casemate**. Same as *barrack casemate* (which see, under *barrack*).—**Store cattle**, lean cattle bought for fattening by squatters who find that they have more grass than the natural increase of their herd requires. [Australia.]

Oh, we are not fit for anything but *store cattle*: we are all *blady* grass. *Mrs. Campbell Fraed*, *Head Station*, p. 74.

Store pay, payment for country produce, labor, etc., by goods from a store, in lieu of cash; barter. [Rural, U. S.]

See, a girl has just arrived with a pot of butter to trade off for *store* pay. She wants in exchange a yard of calico, a quarter of tea, . . . and a bottle of rum.

Capt. Priest's Adventures, p. 54. (*Barlett*.)

store⁴, *n.* A Middle English form of *stour³*.

store⁵ (stór), *n.* [*< F. store*, a window-shade, spring-blind, roller-blind, *< L. storea*, a mat.]

A window-shade: the French term used in English for such a shade when of decorative character, especially when of French manufacture.

store-city (stór'sit'i), *n.* In the Old Testament, a city provided with stores of provisions for troops.

storehouse (stór'hous), *n.* 1. A house in which things are stored; a building for the storing of grain, food-stuffs, or goods of any kind; a magazine; a repository; a warehouse; a store.

They ne'er cared for us yet; suffer us to famish, and their *store-houses* crammed with grain.

Shak., *Cor.*, I. l. 83.

2†. A store; a plentiful supply.

And greatly joyed merry tales to faine,
Of which a storehouse did with her remain.

Spenser, F. Q., II. vi. 6.

storekeeper (stôr'kê'për), *n.* 1. One who has the care or charge of a store or stores. (a) A shopkeeper. [U. S.] (b) An officer in a dockyard in charge of stores and storehouses; the superintendent of a storehouse in a navy-yard. (c) *Milit.*, a commissioned officer in the United States army who has charge of the military stores at depots and arsenals. A *military storekeeper* is an officer of the quartermaster's department; an *ordnance storekeeper*, of the ordnance department; a *medical storekeeper*, of the medical department. These officers have the rank and pay of mounted captains in the army, but are not in the line of promotion. 2. Figuratively, an article in a stock of goods that remains so long on hand as to be unsalable. [Slang, U. S.]

storekeeping (stôr'kê'ping), *n.* The act of taking charge of stores or a store.

storeman (stôr'man), *n.*; pl. *storemen* (-men). 1. A man in charge of stores or supplies: as, the *storeman's* stock of bolts and screws.—2. A man employed in a storehouse for the work of storing goods.

The question of wages of shifters and *store-men* has been referred to arbitration.

Weekly Echo, Sept. 5, 1885. (*Encyc. Dict.*)

store-master (stôr'mâs'tër), *n.* The tenant of a store-farm. [Scotch.]

storer (stôr'ër), *n.* [*< store* + *-er*]. One who lays up or accumulates a store.

Storeria (stô-rê'ri-ä), *n.* [NL. (Baird and Girard, 1853), named after Dr. D. H. Storer, an American naturalist.] A genus of harmless colubiform serpents of North America, of the family *Colubridæ*. Two common species of the United States are *S. dekayi*, and *S. occipitamaculata*, the spotted-neck snake.

store-room (stôr'rôm), *n.* A room set apart for stores or supplies, especially table and household supplies.

Miss Jenkins asked me if I would come and help her to tie up the preserves in the *store-room*.

Mrs. Gaskell, Cranford, II.

store-ship (stôr'ship), *n.* A government vessel detailed to carry stores for the use of a fleet or garrison, or to store them in foreign ports.

storey, *n.* See *story*.
storge (stôr'gë), *n.* [*< Gr. στήγη*, natural love or affection, *< στήγειν*, love, as parents their children.] The strong instinctive affection of animals for their young; hence, the attachment of parents for children, or of children for parents; parental or filial love. [Rare and technical.]

In the *storge*, or natural affections of divers animals to their young ones, . . . there appears in the parent manifest tokens of solicitude, skill, and in some cases courage too.

Boyle, Christian Virtuoso, pt. II. aph. viii.

The innocence of infancy . . . is the cause of the love called *storge*.

Suendenborg, Conjugal Love (trans.), § 396.

storial (stô'ri-al), *a.* [ME. *storial*, an aphetic form of *historial*.] 1. Historical.

This is *storial* sooth, it is no fable.

Chaucer, Good Women, l. 702.

2. Of the nature of a story.

He shal fynde ynowe, grete and smale,
Of *storial* thyng that toucheth gentillesse,
And eek moralitee and hoolynesse.

Chaucer, Prologue to Miller's Tale, l. 71.

storiated (stô'ri-ä-ted), *a.* [Cf. *historiated*.] Decorated with elaborate ornamental and illustrative designs, as title-pages of books in the sixteenth and seventeenth centuries, in which the ornamentation often covered the entire page.

The mania for the acquisition of *storiated* title-pages has led to the cruel spoliation of thousands of rare old books.

London Art Jour., No. 51, p. 91.

storied (stô'rid), *a.* [*< story* + *-ed*]. 1. Celebrated or recorded in story or history; associated with stories, tales, or legends.

To-morrow hurry through the fields
Of Flanders to the storied Rhine!

M. Arnold, Calais Sands.

2. Adorned with scenes from a story, or from history, executed by means of sculpture, painting, weaving, needlework, or other art: as, *storied* tapestries.

Storied windows, richly dight,
Casting a dim religious light.

Milton, Il Penseroso, l. 150.

Can storied urn, or animated bust,
Back to its mansion call the fleeting breath?

Gray, Elegy.

storied (stô'rid), *a.* [Formerly also *storeyed*; *< story* + *-ed*.] Having stories or stages: as, a four-storied building.

storier (stô'ri-ër), *n.* [*< story* + *-er*]. A relater of stories; a story-teller; a historian.

The honeyed rhythm of this melodious *storier*.

J. Rogers Rees, Poetry of the Period (Bookworm, p. 65).

storify (stô'ri-fi), *v. t.* [*< story* + *L. facere*, make, do: see *-fy*.] To make or tell stories about.

storify (stô'ri-fi), *v. t.*; pret. and pp. *storified*, ppr. *storifying*. [*< story* + *L. facere*, make, do: see *-fy*.] To range, as beehives over and under one another, in the form of stories. *Phin*, Diet. Apiculture, p. 67. [Rare.]

storiologist (stô-ri-ol'ô-jist), *n.* [*< storiolog-y* + *-ist*.] A student or expounder of popular tales and legends; one who is versed in folk-lore. [Recent.]

The resuscitation of the roe from its bones will recall to *storiologists* similar incidents in European and especially Scandinavian and Icelandic folk-lore.

N. and Q., 7th ser., I. 484, note.

storiology (stô-ri-ol'ô-ji), *n.* [*< E. story* + *Gr. -λογία*, *< λέγειν*, speak: see *-ology*.] The science of folk-lore; the study of popular tales and legends. [Recent.]

For Chaucer's direct source, it might be well worth while for students of comparative *storiology* who have leisure . . . to examine these and similar monkish collections of exempla [of the thirteenth century].

N. and Q., 7th ser., I. 485.

stork (stôrk), *n.* [*< ME. stork*, *< AS. storc* = D. MLG. LG. *stork* = OHG. *storch*, MHG. G. *storch* (also OHG. *stork*, MHG. G. dial. *stork*) = Icel. *störk* = Sw. Dan. *stork*, a stork; cf. O.Bulg. *storkū*, Bulg. *strik*, *shtrūk* = Serv. *shtrk* = O.Russ. *storkū*, Russ. *sterkhū* = Lith. *starkus* = Lett. *starks* = Hung. *eszerag* = Albanian *sterkjak*, a stork. The relation of the Teut. to the Slav. and other forms is undetermined. Cf. Gr. *τόπος*, a vulture, *τόπος ύπόποισ*, a swan.] A large altricial grallatorial bird, of the family *Ciconiidae* and especially of the subfamily *Ciconiinae* (which see for technical characters). The stork is related to the herons, spoonbills, and ibises, but not very closely to the cranes. There are several species, found in nearly all temperate and tropical regions. They are tall and stately birds, equaling the cranes and larger herons in stature, but are readily distinguished by many technical characters. Storks are wading birds, frequenting the vicinity of water; but some of them become semi-domesticated, and often nest on buildings. Their fidelity and amiability are traditional. They feed chiefly on reptiles (as snakes and lizards), amphibians (as frogs), fishes, mollusks, and worms, but also sometimes capture small quadrupeds and birds. The best-known species is the common white stork of Europe, *Ciconia alba*; when adult, it is pure-white with black-tipped wings and reddish bill and feet; it is about 5½ feet long, and stands 4 feet high. The black stork of the same country is *C. nigra*, a rarer species. Various birds of different countries, technically storks, are known by other names, as *adjutant*, *marabou*, *maguari*, *jabiru*, *shell-ibis*, and *wood-ibis*. See these words, and cuts under *adjutant-bird*, *Ciconiidae*, *Grallæ*, *jabiru*, *openbill*, *Pelargomorphæ*, *simbil*, and *Tantalus*.—**Black-necked stork**, *Xenorhynchus australis*, of India and Australia, related to the American *jabiru* and African saddle-billed stork, the three being often placed in the genus *Mycteria*.—**Black stork**. See def.—**Episcopal stork**, *Disoura episcopius*. See cut under *Pelargomorphæ*.—**Giant stork**, the *adjutant-bird*.—**Hair-crested stork**, *Leptoptilus (Cranopelargus) javanicus*, a small and quite distinct species of marabou, related to the *adjutant*, found in parts of India, Java, Sumatra, etc.—**Maguari stork**, *Euzenura maguari*. See *maguari*.—**Marabou stork**. See *marabou*, and cut under *adjutant-bird*.—**Pouched stork**. Same as *adjutant-bird*.—**Saddle-billed stork**, *Ephippiorhynchus senegalensis*. See the generic name.—**White-bellied stork**, *Sphenorhynchus abdimi*. See cut under *simbil*.—**White stork**. See def.

stork-billed (stôrk'bild), *a.* Having a bill like a stork's, as a kingfisher of the genus *Pelargopsis*. See cut under *Pelargopsis*.

stork's-bill (stôrk's'bil), *n.* 1. A plant of the genus *Erodium*, particularly the heron's-bill, *E. cicutarium* (also called *hemlock stork's-bill*), a low bushy herb with pinnate leaves, a mostly Old World plant, abundantly naturalized in many parts of the United States, perhaps indigenous in the west. See *al-filerilla*.—2. A plant of the related genus *Pelargonium*, which includes the geraniums, etc., of gardens.

Flowering Plant of Stork's-bill (*Erodium cicutarium*). a, one of the carpels.

storm (stôrm), *n.* [*< ME. storm*, *< AS. storm*, storm, = OS. MD. D. MLG. LG. *storm* = OHG. MHG. G. *sturm* = Icel. *stórm* = Sw. Dan. *storm* (not in Goth.; cf. It. *stormo*, a fight, It. dial. *sturm* = Pr. *estorn* = OF. *estour*, *estor*, *estur* (> E. *stour*, a tumult, stir) = Ir. Gael. *stoirm* = Bret. *stourm*, a storm, all < Teut.]; perhaps, with formative *-m*, from the root of *stir* (*< stir*, *< stor*) or of *L. sternere*, strew: see *stir*, *strew*.] 1. A disturbance of the normal condition of the atmosphere, manifesting itself by winds of unusual direction or force, or by rain (often with lightning and thunder), snow, or hail, or by several of these phenomena in combination; a tempest: also used with reference to precipitation only, as in *hail-storm*, *thunder-storm*, *snow-storm*. A storm is usually associated with an area of low pressure, and its intensity or violence depends upon the steepness of the density-gradients which produce it. The terms *area of low pressure*, *cyclone*, *cyclonic storm*, and *storm* are often used interchangeably. In *area of low pressure* the primary reference is to the state of the barometer, in *cyclone* it is to the gyrotory character of the atmospheric circulation, and in *storm* to the disturbance of the weather: but each term is extended to include the whole of the attendant phenomena.

And there arose a great storm of wind. Mark iv. 37.

Poor naked wretches, whoso'er you are,
That bide the pelting of this pitiless storm.

Shak., Lear, III. 4. 29.

2. Specifically—(a) Technically, in nautical use, a wind of force 11 on the Beaufort scale, being that in which a man-of-war could carry only storm-staysails.

The wind suddenly shifted in a heavy rain squall from SSE. to W., and increased to a storm; at 12 noon the barometer read lowest, and the wind was blowing a storm.

Monthly Weather Review (1887), p. 40.

(b) A fall of snow. (c) A prolonged frost. [Prov. Eng.] Hence, figuratively—3. A tempestuous fight or descent of objects fiercely hurled: as, a storm of missiles.

No drizzling shower,

But rattling storm of arrows barb'd with fire.

Milton, P. L., vi. 546.

4. A violent disturbance or agitation of human society; a civil, political, or domestic commotion; a tumult; a clamor.

I will stir up in England some black storm

Shall blow ten thousand souls to heaven or hell.

Shak., 2 Hen. VI., III. 1. 349.

5. A destructive or overwhelming calamity; extremity of adversity or disaster.

Having passed many bitter brunts and blasts of vengeance, they dread no storm of Fortune.

Spenser, Shep. Cal., February, Embleme.

An old man, broken with the storms of state.

Shak., Hen. VIII., iv. 2. 21.

6. A vehement or passionate outbreak, as of some emotion, or of the expression of such emotion: as, a storm of indignation; a storm of applause; a storm of hisses.

Mark'd you not how her sister

Began to scold and raise up such a storm?

Shak., T. of the S., I. 1. 177.

Her bosom shaken with a sudden storm of sighs.

Tennyson, Locksley Hall.

7. *Milit.*, a violent assault on a fortified place or strong position; a dashing attempt by troops to capture a fortified place, as by scaling the walls or forcing the gates.

How by storm the walls were won,

Or how the victor sacked and burnt the town.

Dryden.

Cyclonic storm, one that accompanies or is caused by a cyclone.—**Electric storm**. See *electric*.—**Eye of a storm**, the calm region at the center of a violent cyclonic storm, where the clouds clear away and blue sky appears—occurring mostly in the tropics, but also experienced more or less perfectly in higher latitudes. This phenomenon is due to the circumstance that the winds immediately bordering the central area blow circularly around it, leaving a region of calm. The centrifugal force of the wind intensifies the diminution of pressure, and develops a tendency toward a gently descending current from above, and a consequent clearing of the sky.—**High-area storm**, a storm associated with an area of high pressure.—**Low-area storm**. Same as *cyclonic storm*.—**Magnetic, revolving, etc., storm**. See the adjectives.—**Storm and stress** (a translation of the German *Sturm und Drang*, alluding to a drama by Klinger, "Sturm und Drang"), a name given to a period in German literary history (about 1770 to 1790) influenced by a group of younger writers whose works were characterized by passion and reaction from the old methods; hence, a proverbial phrase for unrest or agitation.—**To take by storm**. (a) *Milit.*, to carry by assault. See def. 7.

The recollection of the victory of Roanoke imparted to the Federals that assurance which is a great element of success; they knew that a battery could be taken by storm.

Comte de Paris, Civil War in America (trans.), I. 587.

(b) To captivate or carry away by surprising or delighting: as, the new singer has taken the town by storm.—**Wind-storm**, a storm with heavy wind, without precipitation.—**Syn.** 1. *Tempest*, etc. See *wind*.

storm (stôrm), *v.* [*<* ME. *stormen*, *sturmen*, *<* AS. *styrman* = D. MLG. *LG. stormen* = OHG. *sturman*, MHG. *G. stürmen* = Icel. *styrma* = Sw. *storma* = Dan. *storme*, *storm*; cf. It. *stormire*, make a noise, *stormeggiare*, ring the storm-bell, throng together; from the noun.] **I. intrans.** 1. To blow with great force; also, to rain, hail, snow, or sleet, especially with violence; used impersonally: as, it *storms*.—2. To fume; scold; rage; be in a violent agitation or passion; raise a tempest.

The Dolphin then, discreding Land (at last),
Stormes with himselfe for hauing made such haste.
Syluester, tr. of Du Bartas's Weeks, l. 5.

When . . . I see a gentleman lose his money with serenity, I recognise in him all the great qualities of a philosopher. If he *storms* and invokes the gods, I lament that he is not placed at the head of a regiment.

Steele, *Guardian*, No. 174.

3. To move with violence; rush angrily or impetuously: as, he *stormed* about the room.

Bobby Wick *stormed* through the tents of his Company.
R. Kipling, *Only a Subaltern*.

II. trans. To attack and attempt to take possession of, as by scaling walls or forcing gates or breaches; assault: as, to *storm* a fortified town: often used figuratively.

With eager warmth they fight, ambitious all
Who first shall *storm* the breach, or mount the wall.
Addison, *To the King*.

storm-area (stôrm'ā-rē-ä), *n.* The area covered by a storm; the region within the closed isobars surrounding a center of low pressure. In the United States this region is generally an oval whose length is, on the average, nearly twice its width. Its longest diameter may be turned in any azimuth, but is most frequently directed to a point between north and north 60° east. Over the ocean storm-areas are generally nearly circular.

storm-beat, storm-beaten (stôrm'bēt, -bē'tn), *a.* Beaten or damaged by storms.

storm-belt (stôrm'bēlt), *n.* A belt of maximum storm-frequency. On charts containing a large number of storm-tracks the paths are found to be mostly divided into several well-defined groups whose local form natural storm-belts. In the United States three storm-belts are distinguished: (1) that of storms which appear in the northwest British provinces, advance eastward to the lake region, and thence down the St. Lawrence valley; (2) that of storms which originate in the southwest near the Gulf of Mexico, and move northeastward to the lakes; (3) that of the West India hurricanes, which first move westerly, and then northeastward along the Atlantic coast. Over Europe three storm-belts may be distinguished: one lying across the northern Mediterranean, one across the North Sea and the Baltic, and one northeast and southwest off the coast of Norway and the British Isles. Also called *storm-zone*.

storm-bird (stôrm'bērd), *n.* 1. A petrel; one of the birds of the family *Procellariidae*, including the albatrosses, fulmars, etc., as well as those to which the name *petrel* is more commonly applied; specifically, the stormy petrel. See cut under *petrel*.—2. A bird that indicates or seems to foretell bad weather by its cries or other actions, as a storm-cock. Compare *rain-bird*.

storm-bound (stôrm'bound), *a.* Confined or delayed by storms; relating to hindrance by storms: as, we were *storm-bound* in port.

Weeks of *storm-bound* inactivity.
Carlyle, *To John Carlyle*, Feb. 11, 1830.

storm-card (stôrm'kârd), *n.* A transparent card containing lines to represent the wind-directions in all quarters of a cyclonic storm: devised by Reid as an aid to seamen in avoiding dangerous storms. When the card is drawn to suitable scale, and placed over the position of a vessel on a chart, so that the observed wind-direction and the same wind-direction on the card are brought into coincidence, the bearing of the center of the card from the point of observation indicates the direction of the center of the storm. Knowing the direction of the storm-center, its probable path can be laid down with considerable precision, and the best course for the vessel may then be determined. It is now known that a storm-card cannot universally be used to discover the bearing of a storm-center, for the angle between the wind and the radius varies in different latitudes, and is different at different distances from the center. Also called *storm-circle*, *storm-compass*.

storm-center (stôrm'sen'tēr), *n.* The position of lowest pressure in a cyclonic storm. In the typical case the wind throughout the storm-area blows spirally inward toward the storm-center, changing from a radial to an approximately circular path, and increasing in force as the center is approached. The center itself is an area of comparative calm, accompanied by a partial or complete clearing away of the clouds, and a mild temperature. (See *eye of a storm*, under *storm*.) Violent ocean storms frequently exemplify this typical description; but in land storms, which present irregularities of all kinds, these conditions are in general only partially realized.

storm-circle (stôrm'sēr'kl), *n.* Same as *storm-card*.

storm-cloud (stôrm'kloud), *n.* A cloud that brings or threatens storm.

storm-cock (stôrm'kok), *n.* 1. The fieldfare, *Turdus pilaris*; also, the mistlethrush, *T. viscivorus*.

Its song . . . it [the missel] begins . . . very early in the spring, often with the new year, in blowing showery weather, which makes the inhabitants of Hampshire call it the *storm-cock*. Pennant, *Brit. Zool.* (ed. 1776), l. 302.

2. The green woodpecker, *Geococcyx viridis*. [Prov. Eng. in all uses.]

storm-compass (stôrm'kum'pas), *n.* Same as *storm-card*.

storm-cone (stôrm'kōn), *n.* A cone consisting of tarred canvas extended on a frame 3 feet high and 3 feet wide at the base, used either alone or along with the drum as a storm-signal. See cut under *storm-signal*. [Eng.]

storm-current (stôrm'kur'ent), *n.* A surface sea-current produced by the force of the wind in a storm. Such a current frequently outruns its generating storm, and affords the first announcement thereof on a distant shore by increasing there the intensity of the usual current or by changing its set.

storm-door (stôrm'dör), *n.* An outer or additional door for protection against inclement weather: in general used temporarily, for the winter only.

storm-drum (stôrm'drum), *n.* A cylinder of tarred canvas extended on a hoop 3 feet high and 3 feet wide, hoisted in conjunction with the cone as a storm-signal. See *storm-signal*. [Eng.]

stormer (stôr'mēr), *n.* [*<* *storm* + *-er*.] One who storms; specifically (*milit.*), a member of an assaulting party.

storm-finch (stôrm'finch), *n.* See *finch*¹, and cut under *petrel*.

storm-flag (stôrm'flag), *n.* See *storm-signal*.
stormful (stôrm'fûl), *a.* [*<* *storm* + *-ful*.] Abounding with storms.

They know what spirit brews the *stormful* day.
Collins, *Ode on the Popular Superstitions of the Highlands*.

stormfulness (stôrm'fûl-nes), *n.* The state of being stormful; stormy character or condition. Coleridge.

storm-glass (stôrm'glâs), *n.* A hermetically sealed tube containing an alcoholic solution of camphor, together with crystals of nitrate of potash and ammonium chloride: so named because an increase in the amount of the precipitate was supposed to indicate the approach of stormy weather. The changes in the amount of the precipitate are due solely to variations of temperature, and the instrument is simply a chemical thermometer.

storm-house (stôrm'hous), *n.* A temporary shelter for men employed in constructing or guarding railroads, or other works in exposed situations.

stormily (stôr'mi-li), *adv.* In a stormy manner; tempestuously.

storminess (stôr'mi-nes), *n.* The state of being stormy, or of being agitated or visited by violent winds; tempestuousness; impetuosity; violence.

storming-party (stôr'ming-pär'ti), *n.* *Milit.*, the party to whom is assigned the duty of making the first assault in storming an enemy's works.

storm-kite (stôrm'kit), *n.* A device, on the principle of a kite, for carrying a rope from a ship to the shore in a storm.

stormless (stôrm'les), *a.* [*<* *storm* + *-less*.] Free from storms; without storm.

Our waking thoughts
Suffer a *stormless* shipwreck in the pools
Of sullen slumber. Tennyson, *Harold*, v. 1.

storm-pane (stôrm'pân), *n.* An extra square of glass fitted in a frame provided with clamps, used to fit over a window in an exposed building, as a lighthouse, in case of breakage.

storm-path (stôrm'pâth), *n.* Same as *storm-track*.

storm-pavement (stôrm'päv'ment), *n.* In *hydraul. engin.*, a sloping stone pavement lining the sea-face of a pier or breakwater. E. H. Knight.

storm-petrel (stôrm'pet'rel), *n.* A small blackish petrel, belonging to the genus *Procellaria* as now restricted, or to one of a few closely related genera, as *Oceanites*, *Cymochorea*, and *Halocyptena*. The three best-known storm-petrels are *Procellaria pelagica*, *Cymochorea leucorhoa*, and *Oceanites oceanicus*. All are also called *Mother Carey's chickens*. See cut under *petrel*. The form *stormy petrel* is also common.

storm-proof (stôrm'pröf), *a.* Proof against storms or stress of weather.

storm-sail (stôrm'säl), *n.* A sail made of very stout canvas, of smaller size than the corresponding sail in ordinary use, set in squally or heavy weather.

storm-signal (stôrm'sig'nal), *n.* A signal displayed on sea-coasts and lake-shores for indicating the expected prevalence of high winds or storms. For this purpose flags and lanterns are used in the United States, and a cone and drum in Great Britain. In the practice of the United States Weather Bureau, a red flag with black center is displayed by day when a violent storm is expected, and an additional pennant indicates the quadrant of the probable wind-direction, as follows: red pennant above flag, northeasterly winds; red pennant below flag, southeasterly winds; white pennant above flag, northwesterly winds; white pennant below flag, southwesterly winds. By night, a red light indicates easterly winds, and a white light above a red light indicates westerly winds. In the British system the inverted cone indicates a south gale, the upright cone a north gale, while the addition of the drum indicates that the winds are expected to be of marked violence. See *weather-signal*.

English Storm-signal, indicating dangerous winds from the south.

storm-stay (stôrm'stä), *n.* A stay on which a storm-sail is set.

storm-stayed (stôrm'städ), *a.* Prevented from proceeding on, or interrupted in the course of, a journey or voyage by storms or stress of weather.

storm-stone (stôrm'stōn), *n.* Same as *thunder-bolt*.

storm-tossed (stôrm'tost), *a.* Tossed about by storm or tempest: as, a *storm-tossed* bark; hence, agitated by conflicting passions or emotions: as, his *storm-tossed* spirit is at rest.

storm-track (stôrm'trak), *n.* The path traversed by the center of a cyclonic storm. North of the parallel of 30° storm-tracks almost invariably pursue an easterly course, having generally a northerly inclination. Within the tropics storm-tracks almost invariably tend westerly, generally with an inclination toward the pole; they have rarely, if ever, been traced nearer to the equator than 6°. Continuous storm-tracks are sometimes traced across North America, the Atlantic ocean, and Europe; but in general less than 12 per cent. of the storms leaving America reach the European coast.

storm-wind (stôrm'wind), *n.* The wind or blast of a storm or tempest; a hurricane; also, a wind that brings a storm.

Then comes, with an awful roar,
Gathering and sounding on,
The *storm-wind* from Labrador,
The wind Euroclydon,
The *storm-wind*!

Longfellow, *Midnight Mass*.

storm-window (stôrm'win'dō), *n.* 1. An outer window to protect the inner from inclemency of the weather.—2. A window raised from the roof and slated above and on each side.

stormy (stôr'mi), *a.* [*<* ME. *stormi*, *<* AS. *stormig* (= D. Sw. *stormig* = MHG. *stürmic*, G. *stürmig*), *<* *storm*, *storm*: see *storm*.] 1. Characterized by storm or tempest, or by high winds; tempestuous; boisterous: as, a *stormy* season.

No cloudy show of *stormy* blustering weather
Doth yet in his fair welkin once appear.

Shak., *Lucrece*, l. 115.

His trumpet has often been heard by the neighbors, of a *stormy* night, mingling with the howling of the blast.

Irving, *Knickerbocker*, p. 448.

2. Characterized by violent disturbances or contentions; agitated; turbulent.

For love is yet the most *stormy* lyf,
Right of himself, that ever was begonne.

Chaucer, *Troilus*, ll. 778.

His [Warren Hastings's] administration, so eventful and *stormy*, closed in almost perfect quiet.

Macaulay, *Warren Hastings*.

3. Violent; passionate; easily roused to anger or strife.

The lives of all your loving complices
Lean on your health; the which, if you give o'er
To *stormy* passion, must perforce decay.

Shak., *2 Hen. IV.*, l. 1. 165.

The *stormy* chiefs of a desert but extensive domain.

Scott.

4. Associated with storms, as seen in them or supposed to presage them: specifically, in ornithology, noting certain petrels.—**Stormy petrel.** Same as *storm-petrel*. = *Syn.* 1. Windy, gusty, squally, blustering. See *wind*².

storm-zone (stôrm'zōn), *n.* Same as *storm-belt*.

The regions between 40° and 70° latitude are the great storm zones of the world.

R. Hinman, *Eclectic Physical Geography*, p. 94.

stornello (stôr-nel'lo), *n.*; pl. *stornelli* (-li). [It.] A form of Italian folk-song, usually improvised and either sentimental or satirical.

The Tuscan and Umbrian *stornello* is much shorter [than the *rispetto*], consisting, indeed, of a hemistich naming some natural object which suggests the motive of the little poem.

Encyc. Brit., XIX. 272.

Storthing (stōr'ting), *n.* [*<* Dan. Norw. *stórthing* (= Icel. *stórthing*), great or high court, parliament, *<* *stor* (= Sw. *stor* = Icel. *stórr* = AS. *stōr*, *>* E. *stoor*), great, + *thing* = Sw. *ting* = Icel. *thing*, assembly, meeting, = AS. *thing*: see *thing*².] The national parliament of Norway. It is composed of 114 members, who are chosen by indirect election. The Storthing is convened every year, and divides itself into an upper house (Lagthing) and a lower house (Odelsting). The former is composed of one fourth, and the latter of three fourths of the members. See *Lagthing* and *Odelsting*.

storvent. Preterit plural and past participle of Middle English *steren*, die. See *starre*.

story¹ (stō'ri), *n.*; pl. *stories* (-riz). [*<* ME. *storie*, *storie* (cf. It. *storia*, *<* LL. *storia*), an aphetic form of *istoric*, *historic*, history: see *history*.] 1. A connected account or narration, oral or written, of events of the past; history.

The prime virtue of *Story* is verity.

Howell, Vocall Forrest, Pref.

She was well versed in the Greek and Roman *story*, and was not unskilled in that of France and England.

Swift, Death of Stella.

is comparatively recent. From the Teut.,
through *OF.*, are derived *E. stew¹* and *stive³*,
which are thus doublets of *stove¹*.] 1. A
room, chamber, or house artificially warmed.
[Obsolete except in the specific uses (a), (b),
below.]

When a certain Frenchman came to visit Melancthon
he found him in his stove, with one hand dandling his
child in the swaddling clouts and the other holding a book
and reading it. *Fuller*.

When you have taken Care of your Horse, you come
whole into the Stove, Boots, Baggage, Dirt and all, for that
is a common Room for all Corners.

N. Bailey, tr. of *Colloquies of Erasmus*, I. 288.

Specifically—(a) In hort., a glazed and artificially heated
building for the culture of tender plants: the same as a
greenhouse or hothouse, except that the stove maintains
a higher temperature—not lower than 60° F. See *green-
house*, *hothouse*, and *dry-stove*. [Eng.] (b) A drying-cham-
ber, as for plants, extracts, conserves, etc.; also, a highly
heated drying-room, used in various manufactures.

They are sumtimes enforced to rype and dry them [grain]
in theyr stoures and hottes houses.
R. Eden, tr. of Sebastian Munster (First Books on America,
[ed. Arber, p. 292].

2†. A place for taking either liquid or vapor
baths; a bath-house or bath-room.

In that village there was a Stove, into which the cap-
taine went in the morning, requesting M. Garrard to go
also to the same to wash himself.

Hakluyt's Voyages, I. 423.

There are in Fez a hundred bath-stoves well built, with
four Halls in each, and certain Galleries without, in
which they put off their clothes.

Purchas, *Pilgrimage*, p. 617.

3. A closed or partly closed vessel or receiver
in which fuel is burned, the radiated heat be-
ing utilized for warming a room or for cooking.
Stoves are made of cast-iron and sheet-iron, and also of
earthenware in the form of tiles cemented together, of
plaster held together by a frame of wire, or the like, and
of masonry solidly put together. The stoves of tiles, ma-
sonry, etc., radiate less heat than iron stoves, but when
heated remain hot for a long time. Stoves are divided into
the two main classes of cooking-stoves and warming-stoves,
and are also classified according to the fuel used, as wood-
stoves, gas-stoves, etc. There are many varieties, named
according to their use, as the car-stove, camp-stove, foot-
stove, timmen's stove, etc., or according to some attach-
ment, as a water-back stove. Warming-stoves range from

the open fireplace or Franklin stove to magazine and base-burning fireplaces and heaters for warming more than one room, which are more properly furnaces. The word was first used in English in this sense as applied to foot-stoves. See *foot-stove*, *oil-stove*, *gas-stove*.

The sempstress speeds to change with red-tipt nose;
The Belgian *stove* beneath her footstool glows.

Gay, *Trivia*, II. 338.

4. In *ceram.*, a pottery-kiln.—5. In a furnace, the oven in which the blast is heated.—6. In *bookbinding*, an apparatus with which the finisher heats his tools, formerly made to burn charcoal, but latterly gas.—**Air-tight stove.** See *air-tight*.—**Bark-stove.** Same as *bark-bed*.—**Base-burning stove.** See *base-burning*.—**Camp-stove.** A small sheet-iron stove, light and portable, used for both cooking and heating, as in a tent.—**Cooking-stove.** A stove arranged especially for cooking, having ovens, and often a water-back, exposed to the heat of the fire, and pot-holes above the fire.—**Franklin stove.** A form of open stove invented by Benjamin Franklin in the early part of his life, and called by him "the Pennsylvania fireplace." The name is now given (a) to any open stove with or without doors that open widely, and with andirons or a grate similar to those of an ordinary fireplace; (b) to a kind of fireplace with back and sides of ironwork and some arrangement for heating the air in chambers which communicate with the room.—**Norwegian stove.** A chamber the walls of which are made as perfect non-conductors of heat as possible, used for cooking by enabling a pot or saucepan full of boiling water, placed in it, to retain its heat for a great length of time, thus stewing the meat, etc., which it may contain. The same chamber may be used as a refrigerator, as it keeps ice unmelted for a long time.—**Rotary stove.** See *rotary oven*, under *oven*.

stove¹ (stov), *v. t.*; pret. and pp. *stoved*, ppr. *stoving*. [*store¹*, *n.* Cf. *stew¹*, *v.*, *stive³*, *v.*] 1. To heat in a stove or heated room; expose to moderate heat in a vessel. Specifically—(a) To keep warm in a house or room by artificial heat: as, to *stove* orange-trees.

straggler (strag'lér), *n.* [*< straggle + -er*.] 1. One who straggles or strays away, as from his fellows or from the direct or proper course; one who lags behind or becomes separated in any way from his companions, as from a body of troops on the march.

This manner of speech is termed the figure of digression by the Latines, following the Greeke original; we also call him the *straggler*, by allusion to the souldier that marches out of his array. *Puttenham*, *Arte of Eng. Poesie*, p. 195.

The first *stragglers* of a battalion of rocks, guarding a sort of pass, beyond which the beck rushed down a waterfall. *Charlotte Brontë*, *Jane Eyre*, xxxiv.

2. Specifically, in *ornith.*, a stray, or strayed bird, out of its usual range, or off its regular migration. The stragglers are the casual or accidental visitants in any avifauna. In the nature of the case they are never numerous as regards individuals; but the list of what are technically called *stragglers* in any region or locality usually becomes, in the course of time, a long one, so far as species are concerned. Thus, in the avifauna of the District of Columbia, the stragglers are about as many species as the regular visitants of either summer or winter, or the permanent residents of the year round, though fewer than the spring and autumn migrants.

3. One who roams or wanders about at random, or without settled direction or object; a wanderer; a vagabond; especially, a wandering, shiftless fellow; a tramp.

Let's whip these *stragglers* o'er the seas again.

stragulum (strag'ū-lum), *n.*; pl. *stragula* (-lā). [*< L. stragulum*, a cover, coverlet: see *strail*.] In *ornith.*, the mantle; the pallium; the back and folded wings taken together, in any way distinguished from other parts, as by color on a gull or tern. [Rare.]

strahlite (strā'lit), *n.* [*< G. strahl*, a ray, beam, arrow (see *strale*), + *-ite*.] Same as *actinolite*.

straight (strāt), *a.* and *n.* [Formerly also *streight*, *straught*, *Se. straught*, *straucht*, and, with the omission of the silent guttural, *strait* (prob. by confusion with the diff. word *strail*, narrow, strict, which was also, on the other hand, formerly spelled *straight*); *< ME. streight*, *streght*, *streigt*, rarely *streit*, *straight*, lit. 'stretched,' *< AS. streht*, pp. of *streccan*, stretch: see *stretch*. Cf. *ME. strek*, *strik*, *< AS. strecc*, *strec*, *strec* = *MLG. LG. strak* = *OHG. strach*, *MHG. strac*, *G. strack*, extended, stretched, straight, = *Dan. (obs.) strag*, straight, erect, tight; from the same ult. root. Cf. the equiv. *right*, lit. 'stretched.')] **I. a.** 1. Stretched; drawn out.

Sithe thi fleisch, Iord, was first perceyued
And, for oure sake, laid *stret* in stalle.
Political Poems, etc. (ed. Furnivall), p. 252.

Pirrus with his *stret* sword.
Chaucer, *Nun's Priest's Tale*, I. 537.

2. Without bend or deviation, like a string tightly stretched; not crooked or curved; right; in *geom.*, lying, as a line, evenly between its points. This is Euclid's definition. The principal characteristic of a straight line is that it is completely determined, if unlimited, by any two points taken upon it, or, if limited, by its two extremities. The idea of measurement does not enter into the idea of a straight line, and it is unnecessary to introduce that idea into the definition, as is done when it is said (after Legendre) to be the shortest distance between two points.

He that knoweth what is *straight* doth even thereby discern what is crooked, because the absence of straightness in bodies capable thereof is crookedness.

Hooker, *Eccles. Polity*, I. 8.

There is no moe such *Cæsars*; other of them may have crook'd noses, but to owe such *straight* arms, none.

Shak., *Cymbeline*, III. 1. 38.

Be pleased to let thy Holy Spirit lead me in the *straight* paths of sanctity, without deflections to either hand.
Jer. Taylor, *Works* (ed. 1835), I. 86.

3. Without interruption or break; direct.

Forth-with declarid to hys peple all,
And to thys cite his peple gan cal,
Wher-vnto that had an eyn *streight* way.
Rom. of Partenay (E. E. T. S.), I. 1308.

With *straight* air—that is, with the pressure from the main reservoir, or the air-pump, going directly to the brake cylinder—the engineer can apply the brakes to all the wheels of his train simultaneously.

Scribner's Mag., VI. 333.

4. Direct; authoritative; sure; reliable: as, a *straight* tip. [Slang.]—5. Upright; marked by adherence to truth and fairness; fair; honorable: as, a man *straight* in all his dealings. [Colloq.]—6. Proceeding or acting with directness; keeping true to the course. [Colloq.]

He shows himself to be a man of wide reading, a pretty *straight* thinker, and a lively and independent critic.
The Nation, Dec. 6, 1888, p. 459.

7. Free from disorder or irregularity; in order: as, his accounts are not quite *straight*.

Finally, being belted, curled, and set *straight*, he descended upon the drawing-room.

Thackeray, *Pendennis*, vii.

He told her that she needn't mind the place being not quite *straight*, he had only come up for a few hours—he should be busy in the studio.

H. James, Jr., *The Century*, XXXVI. 218.

8. Unqualified; unreserved; out-and-out: as, a *straight* Democrat (that is, one who supports the entire platform and policy of his party).—9. Unmixed; undiluted; neat. [Slang.]

Dissipating their rare and precious cash on "whisky *straight*" in the ever-recurring bar-rooms.
Fortnightly Rev., N. S., XXXIX. 76.

10. East and west; along an east and west line: used of the position of the body in Christian burial.

First Clo. Is she to be buried in Christian burial that wilfully seeks her own salvation?
Sec. Clo. I tell thee she is; and therefore make her grave *straight*; the crowner hath sat on her, and finds it Christian burial.
Shak., Hamlet, v. 1. 4.

11. In *poker*, consisting of a sequence; forming a straight: as, a *straight* hand; a *straight* flush.—**A straight face**, an unsmiling face; a sober, unamused expression: as, he could with difficulty keep a *straight face*. [*Colloq.*]—**Long straight**. See *long*.—**Straight accents**, the long marks over the vowels, as *ā, ē, ī, ō, ū, ŷ*.—**Straight angle**. See *angle*.**1.**—**Straight arch**, in *arch*, a form of arch spanning an aperture in which the intrados is represented by straight lines which meet in a point at the top and comprise two sides of a triangle.—**Straight ends and walls**, a system of working coal, somewhat similar to "board and pillar." [*North Wales*.]—**Straight flush**. See *flush*.—**Straight intestine, bowel, or gut**, the rectum. See *cuts under alimentary, intestine, and peritoneum*.—**Straight sheer**. See *sheer*.**3.****1.**—**Straight sinus, ticket, tubule**, etc. See the nouns.

II. n. **1.** The condition of being straight, or free from curvature or crookedness of any kind: as, to be out of the *straight*. [*Colloq.*]—**2.** A straight part or direction: as, the *straight* of a piece of timber.—**3.** In *poker*, a sequence of cards, generally five in number, or a hand containing such a sequence.

straight¹ (strāt'), *adv.* [*< ME. strenght, streyght, streyhte, etc.; < straight¹, a.*] **1.** In a straight line; without swerving or deviating from the direct course; directly.

Straight afori hym a fair feld gan behold.
Rom. of Partenay (E. E. T. S.), l. 4661.

Floating *straight*, obedient to the stream.
Shak., C. of E., l. 1. 87.

2. At once; immediately; directly; straightway.

And went *streight* into the Hospytall, and refreshed vs with mete and drynke, and rested vs there an houre or .ij. bycause of our watche the nyght before.
Sir R. Guyford, Pylgrymage, p. 28.

Shew him an enemy, his pain's forgot *straight*.

straight¹ (strāt'), *v. t.* [*< straight¹, a.*] To make straight; straighten. [*Rare.*]

The old gypsy, in the mean time, set about arranging the dead body, composing its limbs, and *straightening* the arms by its side.
Scott, Guy Mannering, xxvii.

straight², *a. and n.* An obsolete spelling of *strait*.

straightaway (strāt'ā-wā'), *a.* Straight forward, without turn or curve: as, a *straightaway* course in a yacht- or horse-race.

At the Ascot, where I was last Thursday, the course is a *straightaway* one.
T. C. Crawford, English Life, p. 28.

straight-billed (strāt'bīld), *a.* Having the bill straight, as a bird; rectirostral.

straight-cut (strāt'kut), *a.* Cut in a straight manner: applied to fine grades of cut smoking tobacco. The leaves are flattened out, packed compactly, and cut lengthwise, long fibers being thus obtained that present a beautiful silky appearance.

straight-edge (strāt'ej), *n.* A bar having one edge, at least, as straight as possible, to be used as a fiducial line in drawing and testing straight lines. Such instruments when of the greatest accuracy are somewhat costly. Common straight-edges for ruling ordinary lines, testing the surface of millstones, brickwork and stonework, etc., are made of wood, and range from a slip of wood one foot long to planks cut in the form of a truss and ten or more feet in length. See *cut under plumb-rule*.

straighten¹ (strā'tn), *v.* [*< straight¹ + -en¹.*] **I. trans.** To make straight, in any sense; specifically, to reduce from a crooked to a straight form.

A crooked stick is not *straightened* unless it be bent as far on the clean contrary side.

Hooker, Eccles. Polity, iv. 8.

To straighten the sheer. See *sheer*.

II. intrans. To become straight; assume a straight form.

straighten², *v. t.* See *straiten*.

straightener (strāt'nēr), *n.* [*< straighten¹ + -er¹.*] One who or that which straightens.

straightening-block (strāt'ning-blok), *n.* An anvil used in straightening buckled saws. *E. H. Knight.*

straightening-machine (strāt'ning-mā-shēn'), *n.* In *metal-work*, any machine for removing a twist, bend, buckle, or kink from rails, rods, plates, straps, tubes, or wire.

straightforth (strāt'fōrth'), *adv.* [*Early mod. E. straight forth; < straight¹ + forth¹.*] Directly; straightway.

She smote the ground, the which *straight forth* did yield

A fruitful Olive tree.
Spenser, Muirpotmos, l. 325.

straightforward (strāt'fōr'wārd), *adv.* [*Also straightforwards, formerly also straitforward; < straight¹ + forward¹.*] Directly forward; right ahead.

Look not on this side or that side, or behind you as Lot's wife did, but *straightforwards* on the end.

J. Bradford, Letters (Parker Soc., 1853), II. 211.

straightforward (strāt'fōr'wārd), *a.* [*< straight-forward, adv.*] **1.** Direct; leading directly forward or onward.

Midway upon the journey of our life
I found myself within a forest dark,
For the *straightforward* pathway had been lost.
Longfellow, tr. of Dante's Inferno, l. 3.

2. Characterized by uprightness, honesty, or frankness; honest; frank; open; without deviation or prevarication: as, a *straightforward* course; a *straightforward* person, character, or answer.

In prose he wrote as he conversed and as he preached, using the plain *straightforward* language of common life.
Southey, Bunyan, p. 40.

straightforwardly (strāt'fōr'wārd-li), *adv.* In a straightforward manner. *Athenæum*, No. 3258, p. 451.

straightforwardness (strāt'fōr'wārd-nes), *n.* Straightforward character or conduct; undeviating rectitude: as, a man of remarkable *straightforwardness*.

straight-hearted, a. See *heart-hearted*.

straight-horn (strāt'hörn), *n.* A fossil cephalopod of the family *Orthoceratidae*, some of which were 12 or 15 feet long; an orthoceratite. *P. P. Carpenter.*

straight-joint (strāt'joint), *a.* Noting a floor the boards of which are so laid that the joints form a continuous line throughout the length.

straightly¹ (strāt'li), *adv.* [*< straight¹ + -ly².*] In a straight line; not crookedly; directly: as, to run *straightly* on. *Imp. Dict.*

straightly², *adv.* An obsolete spelling of *straitly*.

straightness (strāt'nes), *n.* The property or state of being straight.

straight-out (strāt'out), *a. and n.* **I. a.** Out-and-out; straight: as, *straight-out* Republicans.

II. n. In *U. S. politics*, one who votes a straight or strictly party ticket; a thorough partizan.

Other *Straight-outs*, as they call themselves, . . . cannot take Grant and the Republicans.

The Nation, Aug. 22, 1872, p. 113

straight-pight (strāt'pīt), *a.* [*< straight¹ + pight.*] Straight-fixed; erect.

Straight-pight Minerva. *Shak., Cymbeline, v. 5. 164.*

straight-ribbed (strāt'ribd), *a.* In *bot.*, having the lateral ribs straight, as leaves of *Castanea*, palms, etc.

straightway (strāt'wā), *adv.* [*< ME. strenght-wei; < straight¹ + way¹.*] Immediately; forthwith; without loss of time; without delay.

Thel hilde her *streight-wei* toward north wales to a Citce that longed to the kynges Traidly-uannte.

Martin (E. E. T. S.), III. 558.

And *straightway* the damsel arose and walked.

Mark v. 42.

straightways (strāt'wāz), *adv.* [*< straightway + adv. gen. -s.*] Straightway.

None of the three could win a palm of ground but the other two would *straightways* balance it.

Bacon, Empire (ed. 1887).

straight-winged (strāt'wingd), *a.* In *entom.*, having straight wings; orthopterous.

strait¹, *n.* A Scotch spelling of *stroke*².

strait², *v. t.* A Scotch form of *stroke*².

strail, *n.* [*< ME. stragle, < AS. strægl, *strægel, contr. stræl, a bed-cover, carpet, rug, = OF. stragule, a mantle, coverlet, < L. stragulum, a spread, covering, coverlet, blanket, carpet, rug, also stragula, a covering, blanket; neut. and fem. respectively of stragulus, serving for spreading or covering, < sternere, pp. stratus, spread, strew; see stratum.*] A covering; a coverlet. *Prompt. Parv.*, p. 478.

strain¹ (strān), *v.* [*Early mod. E. also strayne; < ME. straynen, streinen, streynen, straynen, < OF. streindre, estraindre, straindre, F. étreindre = Pr. estrener, estreigner = It. stringere, stringere, stringere, < L. stringere, pp. strictus, draw tight; akin to Gr. σπῆγος, twisted, σπῆγγειν, press out, Lith. stregti, become stiff, freeze, AS. streccan, stretch; etc.: see stretch, straight¹. From L. stringere are also ult. E. constrain, restrain, restrain, stringent, strait¹, strict, etc.*] **I. trans.** **1.** To draw out; stretch; extend, especially with effort or care.

And if thi vynes footes IV ascende,
Thenne armes IV is goode forth forto streyne.

Palladius, Husbandrie (E. E. T. S.), p. 70.

All their actions, voyces, and gestures, both in charging and retiring, were so *strained* to the height of their qualitie and nature that the strangeness thereof made it seeme very delightfull.
Capt. John Smith, Works, l. 136.

2. To draw tight; tighten; make taut.

To the pyller, lorde, also,
With a rope men bownd the too,
Hard drawe and streymyd faste.

Holy Rood (E. E. T. S.), p. 181.

Sir Mungo, who watched his victim with the delighted yet wary eye of an experienced angler, became now aware that, if he *strained* the line on him too tightly, there was every risk of his breaking hold.

Scott, Fortunes of Nigel, xv.

3. To confine; restrain; imprison.

There the steede in stooles *strained* in bondes.

Alisaunder of Macedoine (E. E. T. S.), l. 1157.

4. To stretch to the utmost tension; put to the stretch; exert: as, to *strain* every nerve to accomplish something.

He sweats,

Strains his young nerves, and puts himself in posture
That acts my words.
Shak., Cymbeline, III. 3. 94.

5. To stretch beyond measure; push beyond the proper extent or limit; carry too far.

He *strained* the Constitution, but he conquered the Lords.
N. A. Rev., CXLII. 593.

6. To impair, weaken, or injure by stretching or overtasking; harm by subjection to too great stress or exertion; hence, to sprain.

Hold, sir, hold, pray use this whistle for me,
I dare not *straine* my selfe to winde it I,
The Doctors tell me it will spend my spirits.

Brome, Sparagus Garden, iv. 7.

Prudes decay'd about may tack,

Strain their necks with looking back. *Swift.*

7. To force; constrain.

Whether that Goddess worthy forwetyng

Streyneth me nedely for to don a thing.

Chaucer, Nun's Priest's Tale, l. 422.

The quality of mercy is not *strain'd*.

Shak., M. of V., iv. 1. 184.

His mirth

Is forc'd and *strain'd*.

Sir J. Denham, The Sophy. (Latham.)

8. To urge; press.

Note if your lady *strain* his entertainment

With any strong or vehement importunity.

Shak., Othello, III. 3. 250.

9. To press; squeeze; hence, to hug; embrace.

He that nyght in armes wold hire *streyne*

Harder than ever Paris did Eleyne.

Chaucer, Merchant's Tale, l. 509.

I would have *strain'd* him with a strict embrace.

Dryden, tr. of Ovid's Metamorph., x. 407.

10. To press through a filter or colander; separate extraneous or coarser matters from (a liquid) by causing it to pass through a filter or colander; purify from extraneous matter by filtration; filter: as, to *strain* milk.—**11.** To separate or remove by the use of a filter or colander: with *out*. See phrase under *v. i.*, below.

Ye blind guides, which *strain out* the gnat, and swallow the camel.

Mat. xxiii. 24 (E. V.).

12. To force out by straining.

I at each sad strain will *strain* a tear.

Shak., Lucrece, l. 1181.

13. To deform, as a solid body or structure.—**To strain a point.** See *point*¹.—**To strain courtesy**, to use ceremony; stand too much upon form or ceremony; insist on the precedence of others; hang back through excess of courtesy or civility.

My business was great; and in such a case as mine a man may *strain* courtesy.

Shak., R. and J., II. 4. 56.

Strain not courtesies with a noble enemy.

Lamb, Two Races of Men.

=*Syn.* **10.** *Bolt, Screen*, etc. See *sift*.

II. intrans. **1.** To exert one's self; make violent efforts; strive.

To build his fortune I will *strain* a little.

Shak., T. of A., l. 1. 143.

What

Has made thy life so vile that thou shouldst *strain*

To forfeit it to me?
J. Beaumont, Psyche, II. 106.

2. To urge; press.

Nay, Sir, indeed the fault is yours most extreamly now. Pray, sir, forbear to *strain* beyond a woman's patience.

Brome, Northern Lass, III. 3.

3. To stretch strugglingly; stretch with effort.

This parlor looked out on the dark courtyard, in which there grew two or three poplars, *straining* upward to the light.

Mrs. Gaskell, Sylvia's Lovers, III.

No sound, no sight as far as eye could *strain*.

Browning, Child Roland.

4. To undergo distortions under force, as a ship in a high sea.

A ship is said to *strain* if in launching, or when working in a heavy sea, the different parts of it experience relative motions.

Sir W. Thomson, in Phil. Trans., CXLVI. 481.

The ship ran

Straining, heeled o'er, through seas all changed and wan.

William Morris, Earthly Paradise, III. 10.

5. To drip; ooze; filter; drain; flow; issue: as, water *straining* through sand becomes pure.

Then, in the Deserts dry and barren sand,
From flinty Rocks doth plentiful Rivers *strain*.
Sylvester, tr. of Du Bartas's Triumph of Faith, lll. 18.

To *strain at*, to strive after; endeavor to reach or obtain.

I do not *strain at* the position.
Shak., T. and C., lll. 3. 112.

To *strain at a gnat*, a typographical error found in the authorized version (Mat. xxiii. 24) for *strain out a gnat*, the phrase found in Tyndale's and Coverdale's and other versions. See def. 11, above, and quotation there.

strain¹ (strān), *n.* [*< strain¹, v.* In some uses (def. 7), cf. *strain²*.] 1†. Stretch; extent; pitch.

If it did infect my blood with joy,
Or swell my thoughts to any *strain* of pride.
Shak., 2 Hen. IV., iv. 5. 171.

May our Minerva
Answer your hopes, unto their largest *strain*!
B. Jonson, Every Man out of his Humour, Ind.

2. Stretching or deforming force or pressure; violence. [This use of the word, while permissible in literature, is incorrect in mechanics. The strain is not the force, but the deformation produced by the force.]

A difference of taste in jokes is a great *strain* on the affections.
George Eliot, Daniel Deronda, xv.

3. Tense or constrained state or condition; tension; great effort.

A dismal wedding! every ear at *strain*
Some sign of things that were to be to gain.
William Morris, Earthly Paradise, II. 314.

Whether any poet . . . has exerted a greater variety of powers with less *strain* and less ostentation. *Landor*.

4. In *mech.*, a definite change in the shape or size of a solid body setting up an elastic resistance, or stress, or exceeding the limit of elasticity. The deformation of a fluid is not commonly called a *strain*. The word, which had previously been ill-defined, was made a scientific and precise term in this sense by Rankine in 1850. Thomson and Tait, in their "Treatise on Natural Philosophy," extend the term to deformations of liquid masses, and even of groups of points; and Tait subsequently extends it to any geometrical figure, so that it becomes a synonym of *deformation*.

Fresnel made the very striking discovery that glass and other simply refracting bodies are rendered doubly refracting when in a state of *strain*. To this Brewster added the observation that the requisite *strain* might be produced by unequal heating instead of by mechanical stress.
Tait, Light, § 292.

In this paper the word *strain* will be used to denote the change of volume and figure constituting the deviation of a molecule of a solid from that condition which it preserves when free from the action of external forces.

Rankine, Axes of Elasticity (1855).
A *strain* is any definite alteration of form or dimensions experienced by a solid. . . . If a stone, a beam, or a mass of metal in a building, or in a piece of framework, becomes condensed or dilated in any direction, or bent, or twisted, or distorted in any way, it is said to experience a *strain*.
W. Thomson, Mathematical Theory of Elasticity (1856).

5. A stretching of the muscles or tendons, giving rise to subsequent pain and stiffness; sprain; wrench; twist.—6. A permanent deformation or injury of a solid structure.—7. Stretch; flight or burst, as of imagination, eloquence, or song. Specifically—(a) A poem; a song; a lay.

All unworthy of thy nobler *strain*.
Scott, L. of the L., l. Int.

(b) Tune; melody.

I was all ear,
And took in *strains* that might create a soul
Under the ribs of death. *Milton*, Comus, l. 561.
In sweet Italian *strains* our Shepherds sing.
Congreve, Opening of the Queen's Theatre, Epil.

(c) In a stricter sense, in *music*, a section of a piece which is more or less complete in itself. In written music the strains are often marked by double bars.

An Cynthia had but seen me dance a *strain*, or do but one trick, I had been kept in court.
B. Jonson, Cynthia's Revels, iv. 1.

(d) Tone; key; style or manner of speech or conduct.

The third [sort] is of such as take too high a *strain* at the first.
Bacon, Youth and Age (ed. 1887).

That sermon is in a *strain* which I believe has not been heard in this kingdom. *Burke*, Rev. in France.

(e) Mood; disposition.

Henry . . . said, "I am come, young ladies, in a very moralizing *strain*, to observe that our pleasures in this world are always to be paid for."

Jane Austen, Northanger Abbey, xxv.

Axes of a homogeneous strain, three straight lines of particles perpendicular to one another both before and after the strain.—**Composition of strains**. See *composition of displacements*, under *composition*.—**Concurrent stress and strain**. See *concurrent*.—**Homogeneous or uniform strain**, a strain which leaves every straight line of particles straight, and every pair of parallel lines parallel.—**Longitudinal strain**. See *longitudinal*.—**Normal plane of a homogeneous strain**, one of three planes each containing two of the three axes. There is generally only one such system of planes through each point of the body.—**Orthogonal strain**. (a) Relatively to a stress, a strain which neither does nor uses work by virtue of that stress. (b) Relatively to another strain, a strain orthogonal to a stress perfectly concurrent to the other strain.—

Principal strain. Same as *principal strain-type* (which see, under *strain-type*).—**Pure strain**, a homogeneous strain which does not rotate any axis of the strain.—**Simple strain**, any one of a number of strains conceived as independent components of other strains which they are employed to define. The phrase *simple strain* has no definite meaning, but *simple longitudinal strain*, *simple tangential strain*, *simple shearing strain*, etc., mean such strains existing not as components merely, but as resultants. Thus, if a bar is elongated without any transverse contraction or expansion, there is a *simple longitudinal strain* in the direction of the elongation. A *simple tangential strain* is a homogeneous strain in which all the particles are displaced parallel to one plane.—**Strain-ellipsoid**. See *ellipsoid*.—**To heave a strain**. See *heave*.—**Type of a strain**. See *type*.

strain² (strān), *n.* [An altered form, due appar. to confusion with *strain¹*, 7, of what would be reg. *streen*; < ME. *streen*, *stren*, earlier *streon*, *istreon*, race, stock, generation, < AS. *gestreon*, *gestrion*, gain, wealth (= OS. *gistrunt*, = OHG. *gistrunt*, gain, property, wealth, business); appar. confused in ME. with the related noun, ME. *strend*, *strynd*, *strand*, < AS. *strýnd*, race, stock; < *streōnan*, *strýnan* = OHG. *esrînan*, beget, *gestreōnan*, get, acquire.] 1. Race; stock; generation; descent; hence, family blood; quality or line as regards breeding; breed; a race or breed; a variety, especially an artificial variety, of a domestic animal. *Strain* indicates the least recognizable variation from a given stock, or the ultimate modification to which an animal has been subjected. But since such variation usually proceeds by insensible degrees, the significance of *strain* grades into that of *breed*, *race*, or *variety*.

Bountee comth al of God, nat of the *streen*
Of which they been engendred and ybore.
Chaucer, Clerk's Tale, l. 101.

O, if thou wert the noblest of thy *strain*,
Young man, thou couldst not die more honourable.
Shak., J. C., v. 1. 59.

The ears of a cat vary in shape, and certain *strains*, in England, inherit a pencil-like tuft of hairs, above a quarter of an inch in length, on the tips of their ears.

Darwin, Var. of Animals and Plants, l.

2. Hereditary or natural disposition; turn; tendency; character.

Sir, you have shown to-day your valiant *strain*.
Shak., Lear, v. 3. 40.

And here I shall not restrain righteousness to the particular virtue of justice, but enlarge it according to the genius and *strain* of the book of the Proverbs. *Tillotson*.

3. Sort; kind; style.

Let man learn a prudence of a higher *strain*.
Emerson, Essays, 1st ser., p. 214.

4. Trace; streak.

With all his merit there was a *strain* of weakness in his character.
Bancroft, Hist. Const., II. 6.

5. The shoot of a tree. *Hallivell* (under *strene*). [Prov. Eng.]—6†. The track of a deer.

When they have shot a Deere by land, they follow him like blood-hounds by the blood, and *straine*, and oftentimes so take them. *Capt. John Smith*, Works, I. 134.

strain^{3†} (strān), *v. t.* [An aphetic form of *disstrain*.] To disstrain.

When my lord refused to pay the two shillings, Mr. Knightly charged the constable to *strain* two shillings' worth of goods. *Court and Times of Charles I.*, I. 56.

strainable (strā'na-bl), *a.* [Early mod. E. *streineable*, *streynable*; < *strain¹* + *-able*.] 1†. Constraining; compelling; violent.

This yere the Duke of Burzon, . . . with his xii. M. men, was dryuen in to Englonde, with a fersse *streynable* wynde, in thier selynge towarde Spayn.
Arnold's Chron. (1502), p. xliii.

2. Capable of being strained.

strainably† (strā'na-bli), *adv.* [Early mod. E. *streineable*; < *strainable* + *-ly*.] Violently; fiercely.

strategetics (strat-ē-jet'iks), *n.* [Pl. of *strategic* (see *-ics*).] Same as *strategy*.

strategi, *n.* Plural of *strategus*, 1.

strategic (stra-tej'ik), *a.* [= F. *stratégique*, < LL. **strategicus* (in neut. pl. *strategica*, the deeds of a general), < Gr. *στρατηγικός*, of or pertaining to a general, < *στρατηγός*, a general; see *stratagem*, and cf. *strategy*.] Of, pertaining to, or of the nature of strategy; demanded by, used in, or characterized by strategy; as, *strategic* movements.—**Strategic battle.** See *battle*, 1.

strategical (stra-tej'ik-al), *a.* [< *strategic* + *-al*.] Same as *strategic*.

strategically (stra-tej'ik-al-i), *adv.* In a strategical manner; as regards strategy.

strategics (stra-tej'iks), *n.* [Pl. of *strategic* (see *-ics*).] Same as *strategy*.

strategist (strat-ē-jist), *n.* [= F. *stratège*; as *strategy* + *-ist*.] One skilled in strategy.

He [Milton] was a *strategist* rather than a drill-sergeant in verse, capable, beyond any other English poet, of putting great masses through the most complicated evolutions without clash or confusion, but he was not curious that every foot should be at the same angle.

Lowell, Among my Books, 2d ser., p. 286.

strategus (stra-tē'gus), *n.* [< L. *strategus*, < Gr. *στρατηγός*, the commander of an army, a general; see *strategy*.] 1. Pl. *strategi* (-ji). A military commander in ancient Greece: as, Diæus was *strategus* of the Achean League.—2. [cap.] [NL. (Hope, 1837).] In *entom.*, a genus of large American scarabæid beetles, whose males usually have three prothoracic horns. They are mainly tropical and subtropical, but *S. antæus* extends north to Massachusetts.—3. [cap.] [NL.] A genus of mollusks.

strategy (strat'ē-ji), *n.* [< OF. *strategie*, F. *strategie* = Sp. *estrategia* = It. *strategia*, *strategy* (cf. L. *strategia*, a government, province), < Gr. *στρατηγία*, the office or dignity of a commander, generalship, a pretorship, government, province, < *στρατηγός*, the leader or commander of an army, a general, a governor, pretor, consul, < *στρατός*, an army, host, soldiery (prop. an encamped army, lit. 'scattered, spread' (= L. *stratus*, scattered, spread), < *σπορεινός* = L. *sternere* (pp. *stratus*), scatter, spread, strew; see *stratum*, + *ἀγείν*, lead (see *agent*).] 1. The science of combining and employing the means which the different branches of the art of war afford, for the purpose of forming projects of operations and of directing great military movements; the art of moving troops so as to be enabled either to dispense with a battle or to deliver one with the greatest advantage and with the most decisive results; generalship. In strategy three things demand especial consideration: (1) the *base of operations*, or line from which an army commences its advance upon an enemy; (2) the *objective*, or *objective point*, the point which it aims to possess, or the object which it strives to attain; (3) the *line of operations*, or that line which an army must pass over to attain its objective point. When an army assumes a strictly defensive attitude, the base of operations becomes the *line of defense*, and in a retrograde movement the line of operations becomes the *line of retreat*. *Strategic points* are the points of operations of an army—namely, points whose occupation secures an undoubted advantage to the army holding them for offensive and defensive purposes, and points which it is the chief object of an army to attain. The *theater of operations* comprises the territory to be invaded or defended by an army. It includes the *base of operations*, the *objective point*, the *front of operations*, the *lines of operation*, the *lines of communication* which connect the several lines of operations, *obstacles*, natural or artificial, *lines of retreat*, and places of refuge. The *front of operations* is the length of the line in advance of the base of operations covered or occupied by an army.

2. The use of artifice, finesse, or stratagem for the carrying out of any project.

strath (strath), *n.* [< Gael. *srath* = Ir. *srath*, *sratha* = W. *ystad*, a valley; perhaps connected with *street*, ult. < L. *strata*: see *street*.] In Scotland, a valley of considerable size, often having a river running through it and giving it its distinctive appellation; as, *Strathspey* (the valley of the Spey), *Strathern* (the valley of the Earn), and *Strathmore* (the great valley).

strathspey (strath-spā'), *n.* [So called from *Strathspey* in Scotland.] 1. A Scotch dance, invented early in the eighteenth century, resembling the reel, but slower, and marked by numerous sudden jerks.

While youths and maids the light *strathspey*
So nimbly danced, with Highland glee!
Scott, Glenfinlas.

2. Music for such a dance or in its rhythm, which is duple, moderately rapid, and abounding in the rhythmic or metric figure called the *Scotch snap* or *catch* (which see, under *Scotch*), or its converse.

stratulate (strā-tik'ū-lāt), *a.* [< NL. **stratulus*, < **straticulum*, dim. of *stratum*, a layer; see *stratum*.] Arranged in thin layers, as a banded agate.

stratification (strat'i-fi-kā'shon), *n.* [= F. *stratification* = Sp. *estratificación* = It. *stratificazione*; as *stratify* + *-ation*.] 1. The act of stratifying, or the state of being stratified; formation or arrangement in layers.

It was formerly the practice in England, as it still is on the Continent, to tan by the process of *stratification*, for which purpose a bed of bark is made upon the bottom of the pit; upon this is laid the hide, then bark, then a hide, and so on until the pit is full. Encyc. Brit., XIV. 385.

2. Specifically, in *geol.*, deposition in beds or strata; the mode of occurrence of those rocks which have been laid down or spread over the surface by water. The most important indication and result of stratification is that the rock separates more or less easily along the planes separating the beds or strata. Each stratification-plane marks a change in the character of the deposit, or a shorter or longer period during which deposition was suspended. Often one stratum is succeeded by another of quite different character, showing a change in the existing conditions. Sometimes, however, a rock is distinctly stratified, but each stratum separates easily into much thinner layers, closely resembling one another in petrographic character: this is generally called *lamination*.

In some cases the apparent stratification seems to be of the nature of an imperfect cleavage, there having been a certain amount of rearrangement of the particles of the rock parallel to the planes of deposition. See cuts under *Artesian* and *crinoid*.

3. In *physiol.*, the thickening of a cell-wall by the deposition of successive thin layers of formed material; also, the arrangement of the layers so deposited.

It is now known that *stratification* is due to a subsequent change in the amount of water of organization present in particular parts of the [cell-wall]. Bessey, Botany, p. 33.

4. In *elect.*, the appearance presented by an electric discharge, or a series of rapid discharges, in a rarefied gas, light and dark bands or striæ being produced.

stratified (strat'i-fid), *p. a.* Arranged or disposed in layers or strata; as, *stratified* rocks. See cut under *erosion*.—**Stratified cartilage**, ordinary white fibrocartilage.—**Stratified epithelium**. See *epithelium*.—**Stratified thallus**, in lichens, a thallus in which the gonidia, or algal cells, are disposed in one or more layers, thus producing stratification. See *heteromorous*, (c) (2).

stratiform (strat'i-fŏrm), *a.* [< NL. *stratum*, a layer, + *forma*, form.] Forming or formed into a layer or lamella; embedded as a stratum or layer; stratified: specifically used in the anatomy of a form of cartilage.—**Stratiform cartilage** or *fibrocartilage*, a layer of cartilage embedded in a groove of bone along which the tendon of a muscle plays: referring not to a special kind of cartilage, but to the particular form in which it is arranged. The cartilage lining the bicipital groove of the humerus, on which the tendon of the long head of the biceps glides, is an example.

stratify (strat'i-fi), *v. t.*; pret. and pp. *stratified*, ppr. *stratifying*. [= F. *stratifier* = It. *stratificare*, < NL. *stratum*, a layer, + L. *facere*, make, do.] To form into a layer or layers, as substances in the earth; lay or arrange in strata.

stratigrapher (strā-tig'ra-fēr), *n.* [< *stratigraph-y* + *-er*.] One who devotes himself to the study of stratigraphical geology. *Nature*, XLIII. 142.

stratigraphic (strat-i-graf'ik), *a.* [< *stratigraph-y* + *-ic*.] Having to do with the order of succession, mode of occurrence, and general geological character of the series of stratified rocks of which the earth's crust is largely composed.

stratigraphical (strat-i-graf'ik-al), *a.* [< *stratigraphic* + *-al*.] Same as *stratigraphic*.

stratigraphically (strat-i-graf'ik-al-i), *adv.* In a stratigraphic manner; as regards stratigraphy, or the disposition of strata.

stratigraphist (strā-tig'ra-fist), *n.* [< *stratigraph-y* + *-ist*.] One who studies stratigraphy; a stratigrapher. *Nature*, XXXVIII. 506.

stratigraphy (strā-tig'ra-fi), *n.* [< NL. *stratum*, a layer, + Gr. *-γραφία*, < *-γράφειν*, write.] In *geol.*, order and position of the stratified groups; all that part of geological science which is not specially theoretical or paleontological; general descriptive geology.

Stratiomyia (strat'i-ō-mi'i-ä), *n.* [NL. (Macquart, 1838), orig. *Stratiomyia* (Geoffroy, 1764), also *Stratiomya* (Schiner, 1868), *Stratiomis* (Schelling, 1803), *Stratiomys* (J. E. Gray, 1832); irreg. < Gr. *στρατιώτης*, a soldier, + *μύια*, a fly.] The typical genus of the family *Stratiomyidae*. They are medium-sized or rather large flies of dark color with light spots or stripes. The larvae live in mud or damp sand, and the flies are found upon umbelliferous and other flowers growing near water. About 40 species are known in North America, and about 20 in Europe. They are sometimes called *chameleon-flies*, from the name of one species, *S. chameleon*.

Stratiomyidae (strat'i-ō-mi'i-dä), *n. pl.* [NL. (Leach, 1819, as *Stratiomyidae*, < *Stratiomyia* + *-idae*.] A family of true flies, belonging to the brachycerous *Diptera* and to the section *Notacantha*. It is a large and wide-spread family; about 200 species occur in North America. They vary much in size and color, and have a large hemispherical head, flattened or convex abdomen, and tibiae usually without spurs. They are mostly flower-flies, and are often found upon vegetation in damp places.

Stratiotæ (strat-i-ō'tē-ē), *n. pl.* [NL. (Link, 1829), < *Stratiotes* + *-æ*.] A tribe of monocotyledonous plants, of the order *Hydrocharidæ* and series *Glycydræ*. It is characterized by a very short stem bearing crowded sessile submerged leaves and usually also long-petioled floating leaves, by peduncled spathes, and by one-celled ovaries spuriously six-celled by intrusion of the lobed placenta. It includes five genera, of which *Stratiotes* is the type. (See also *Hydrocharis*.) The others are mostly tropical plants of fresh water, with ovate-oblong or broadly cordate floating leaves and ribbed or winged spathes.

Stratiotes (strat-i-ō'tēz), *n.* [NL. (in def. 1 (Linnaeus, 1737) so called from the sword-like leaves), < Gr. *στρατιώτης*, sc. *ποτάμιος*, an Egyptian water-plant, by some said to have been the water-lettuce, *Pistia Stratiotes*; lit. 'river-sol-

dier, < στρατιώτης, a soldier, < στρατιά, an army, < στρατός, an army: see strategy. Cf. *stradiot*, *estradiot*.] 1. A genus of water-plants, of the order *Hydrocharitaceae*, type of the tribe *Stratioteae*. It is without floating leaves, unlike the rest of its tribe, and is characterized by spathes of two leaves which in the male enclose the base of a long pedicel bearing two or more flowers with from 11 to 15 stamens each. The female flowers are solitary and short-pedicelled, with numerous linear stamens, 6 slender two-cleft styles, and a beaked ovary becoming in fruit ovoid and acuminate, externally fleshy, and exerted from its spathe on a recurved pedicel. The only species, *S. aloides*, the water-soldier, is a native of Europe and Siberia, and resembles a small aloe. It is a perennial submerged aquatic, with somewhat fleshy crowded sword-shaped leaves, which are acute, sessile, and sharply serrate. The flowers are borne above the surface of the water; each perianth consists of three calyx-like segments and three much larger wavy crisped white petals. Old names are *knightswort*, *crab's-claw*, and *water-senegen*.

2. In *entom.*, a genus of South American carabid beetles. *Putzeys*, 1846.

strato-cirrus (strā-tō-sir'us), *n.* [NL., < *stratus* + *cirrus*.] A cloud very like cirro-stratus, but more compact in structure, and formed at a lower altitude. *Abercromby*.

stratocracy (strā-tōk'ra-si), *n.* [Gr. στρατός, an army, + κράτος, < κρᾶνν, rule.] A military government; government by force of arms.

Enough exists to show that the form of polity (according to Plato's system) would be a martial aristocracy, a qualified stratocracy. *De Quincey*, *Plato*.

strato-cumulus (strā-tō-kū'mū-lus), *n.* [NL., < *stratus* + *cumulus*.] A stratum of low cloud consisting of separate irregular masses; a cloud of the layer type, but not sufficiently uniform to be pure stratus. Also called *cumulo-stratus*.

stratographic (strat-ō-graf'ik), *a.* [< *stratograph-y* + *-ic*.] Pertaining to stratigraphy.

stratographical (strat-ō-graf'ik-al), *a.* [< *stratographic* + *-al*.] Same as *stratographic*.

stratigraphically (strat-ō-graf'ik-al-i), *adv.* In a stratigraphic manner.

stratigraphy (strā-tog'ra-fi), *n.* [Gr. στρατός, an army, + γραφία, < γράφειν, write.] Description of armies or what belongs to an army.

A great commander by land and by sea, he [Raleigh] was critical in all the arts of stratigraphy, and delights to illustrate them on every occasion. *I. D. Israeli*, *Amen. of Lit.*, II. 273.

Stratonic (strā-ton'ik), *a.* Same as *Stratonical*.
Stratonical (strā-ton'ik-al), *a.* [< *Strato* (see def.) + *-ic-al*.] Pertaining to Strato or Straton of Lampsacus, called "the physicist," the third head of the Peripatetic school of philosophy, over which he presided from 288 to 270 B. C. He was a thorough materialist, and held that every particle of matter has a plastic and seminal power, and that the world is formed by natural development.—**Stratonical atheism**, a form of evolutionism which replaces the absolute chance of the Epicureans by a sort of life which is regarded as an intrinsic attribute of matter.

There is, indeed, another form of *atheism*, . . . we for distinction sake shall call *Stratonical*, such as, being too modest and shamefaced to fetch all things from the fortuitous motion of atoms, would therefore allow to the several parts of matter a certain kind of natural (though not animal) perception, such as is devoid of reflexive consciousness, together with a plastic power whereby they may be able artificially and methodically to form and frame themselves to the best advantage of their respective capabilities—something like to Aristotle's Nature, but that it hath no dependence at all upon any higher mind or deity. *Cudworth*, *Intellectual System*, II. § 3.

stratopelite (strā-tō-pē-it), *n.* [NL. *stratum*, a layer; second element uncertain.] A hydrous silicate of manganese, of uncertain composition, derived from the alteration of rhodonite.

stratose (strā'tōs), *a.* [NL. **stratosus*, < *stratum*, a layer: see *stratum*.] In bot., stratified; arranged in more or less clearly defined layers. *Farlow*, *Marine Algæ*, p. 51.

stratotic (strā-tot'ik), *a.* [Irreg. < Gr. στρατός, an army, + *-tic*; or erroneously for **stratotic*, < Gr. στρατιωτικός, of or pertaining to a soldier, < στρατιώτης, a soldier: see *Stratiotes*.] Warlike; military. [Rare.] *Imp. Dict.*

stratum (strā'tum), *n.*; pl. *strata* (-tā). [NL., < L. *stratum*, a spread for a bed, a coverlet, quilt, blanket, a pillow, bolster, a bed, also pavement, prop. neut. of *stratus* (= Gr. στρατός, an army), pp. of *sternere*, = Gr. *stroveinai*, spread, extend. Cf. *strew*.] A layer of material, formed either naturally or artificially. Specifically—(a) In *geol.*, same as *bed*. See *bed*, 6 (a), and *stratification*, also cut under *Artemian*. (b) In *zool.* and *anat.*, a layer of tissue, as a membrane, etc.; a lamina or lamella; especially, one of several similar or superposed layers specified by a qualifying word: used with either English or Latin context.—**Gonidial stratum**. See *gonidial*.—**Rise of strata**, in *geol.* See *dip*, n., 4 (a).—**Secondary strata**, in *geol.*, the Mesozoic strata.—**Stratum bacillosum**. Same as *rod-and-cone layer of the retina* (which see, under *retina*).—**Stratum cinereum**, a layer of gray matter in the nates, lying just beneath the stratum zonale, with few and small

ganglion-cells.—**Stratum corneum**, the outer layer of the epidermis, above the stratum granulosum. See cut under *skin*.—**Stratum cylindrorum**. Same as *stratum bacillosum*.—**Stratum gelatinosum**, a layer of gray matter of the olfactory bulb, consisting of fusiform or pyramidal gray nerve-cells in a fine mesh of white nerve-fiber.—**Stratum glomerulosum**, a layer of gray matter of the olfactory bulb, consisting of nodulated masses containing small nuclear cells, among which is a convoluted olfactory nerve-fiber.—**Stratum granulosum**, the thin stratum next above the stratum spinosum of the epidermis, consisting of cells rendered granular by minute globules of ceratohyalin. It is wanting over the lips and under the nails, and gives the white color to the skin. See cut under *skin*.—**Stratum lacunosum**, a layer of the hippocampus major, next above the stratum radiatum, characterized by the open reticulated nature of the neuropil.—**Stratum lucidum**, the lowest layer of the stratum corneum of the epidermis. See cut under *skin*.—**Stratum opticum**, the layer in the upper quadrigeminal body which lies below the stratum cinereum, composed of longitudinal white fibers interspersed with ganglion-cells.—**Stratum radiatum**, a layer of the hippocampus major, striated at right angles to its surfaces by the processes of the large pyramidal cells which lie along its inner border.—**Stratum spinosum**, the lowest layer of the epidermis, next to the corium, formed of prickly cells, and limited above by the stratum granulosum. Also called *rete mucosum*, *rete Malpighii* or *Malpighi*, and *stratum Malpighii* or *Malpighi*. See cut under *skin*.—**Stratum zonale**, a superficial stratum of white nerve-fibers.

stratus (strā'tus), *n.* [NL., < L. *stratus*, a spread for a bed, a coverlet, < *sternere*, pp. *stratus*, spread, extend: see *stratum*.] A continuous horizontal sheet of cloud, generally of uniform thickness. It is essentially a fine-weather cloud, and is characteristic of areas of high pressure. In the evening and morning of fine days it frequently appears as a low foggy canopy overspreading the whole or a part of the sky, and disappears as the heat of the day increases. All low detached clouds which look like lifted fog and are not consolidated into definite forms are stratus. It is the lowest of the clouds. Abbreviated *s.* See cut under *cloud*. All cloud which lies as a thin flat sheet must either be pure *stratus* or contain the word *strato* in combination. *Abercromby*, *Weather*, p. 71.

straucht, straight (strā'cht), *a.* and *v.* Obsolete or dialectal (Scotch) forms of *straight*.

straight (strā't), *a.* [By aphesis from *disstraight*. Cf. *stract*.] Distraught.

So as being now *straight* of minde, desperate, and a verie foole, he goeth, etc. *R. Scot*, *Witchcraft*, I. 8 b. (*Nares*.)

straught, straight (strā'cht), *a.* and *v.* Obsolete forms of the preterit and past participle of *stretch*.

stravagant, *a.* [= *It. stragante*; an aphetic form of *extravagant*.] Extravagant; profuse.
stravaig (strā-vāg'), *v.* i. [Also *stravage*; prop. **stravage*, < OE. *estravaguer* = OIt. *stravagare*, < ML. *extravagari*, wander out or beyond: see *extravagant*. Cf. *stravagant*.] To stroll; wander; go about idly. [Scotch and Irish.]

What did ye come here for? To go prancing down to the shore and back from the shore—and *stravaying* about the place? *W. Black*, *In Far Lochaber*, vii.

stravaiger (strā-vā'gēr), *n.* [< *stravaig* + *-er*.] One who wanders about idly; a stroller; a wanderer. [Scotch and Irish.]

straw (strā), *n.* and *a.* [= *Se. strae*; < ME. *straw*, *strau*, *stra*, *stre*, *stree*, < AS. **strediu*, **stred*, **stredic* (found independently only in the form *strediu* (appar. pl.), in two glosses, otherwise only in comp. *streduberie*, etc.: see *strawberry*) = OS. *strō* = OFries. *strē* = MD. *stroo*, *stroy*, D. *stroo* = MLG. *strō*, LG. *stro* = OHG. *strō*, MHG. *strou*, *strō* (*straw*, *strouc*, *strōw*), G. *stroh* = Icel. *strā* = Sw. *strā* = Dan. *straa*, *straw*; appar. 'that which is scattered about' (if so, it must have been orig. applied to the broken stalks of grain after threshing, the simple sense 'stalk' being then later), from the root of *strew* (dial. *straw*): see *strew*, *straw*²; cf. L. *stramen*, *straw*, < *sternere*, pp. *stratus*, *strew* (see *strand*³, *stramage*, *strammel*, *stratum*).] I. n. 1. The stalk or stem of certain species of grain, pulse, etc., chiefly of wheat, rye, oats, barley, buckwheat, and pease, cut or broken off (and usually dry); also, a piece of such a stem.

When shepherds pipe on oaten *straws*. *Shak.*, L. L. L., v. 2. 913.

2. Such stalks collectively, especially after drying and threshing: as, a load of *straw*. In this sense a collective without plural.

Ne how the fyr was couched first with *stree*, And thanne with drye stokkes cloven a thre. *Chaucer*, *Knight's Tale*, I. 2075.

3. Figuratively, anything proverbially worthless; the least possible thing.

For thy sword and thy bow I care not a *straw*, Nor all thine arrows to boot. *Robin Hood and the Tanner* (Child's Ballads, V. 225).

Love, like despair, catches at *straws*. *Scott*, *Quentin Durward*, xxxv.

4. [In allusion to the proverb, "A *straw* shows which way the wind blows."] A slight fact,

taken as an instance in proof of a tendency.—

5. A clay pipe, especially a long one. [Colloq.]
—6. Same as *straw-needle*.—7. In *entom.*, a stick-insect; a walking-stick.—**Dunstable straw**, wheat-straw used for bonnet-plaits. The middle part of the straw above the last joint is selected. It is cut into lengths of about 10 inches, which are then split by a machine into slips of the requisite width. *Whole Dunstable* signifies a plait that is formed of seven entire straws, while a *patent Dunstable* consists of fourteen split straws. *Simmons*.—**Face of straw**, a sham; a mere effigy.

Off drops the Vizor, and a *Face of Straw* appears. *Roger North*, *Examen*, III. viii. § 6.

In the *straw*, lying-in, as a mother; in childbed.

Our English plain Proverb of Puerperis, "they are in the *straw*," shows Feather-Beds to be of no ancient use among the common sort of our nation.

Fuller, *Worthies*, Lincolnshire, II. 263. (*Davies*.)

Jack of straw. Same as *jackstraw*, 1.—**Leghorn straw**. See *leghorn*.—**Man of straw**. See *man*.—**Pad in the straw**. See *pad*.—**To break a straw**, to quarrel. *Udall*, tr. of Apophthegms of Erasmus, p. 68.—**To draw straws**, to give indications of sleepiness.

Lady Anne. I'm sure 'tis time for honest folks to be a-bed.

Miss. Indeed my eyes draw *straws*. *Swift*, *Polite Conversation*, iii.

To lay a *straw*, to pause and make a note. *Holland*, tr. of Camden, p. 141.

II. a. 1. Made or composed of straw: as, a *straw hat*.—2. Sham; fictitious; useless: as, a *straw bid*. Compare *straw bail*, under *bail*², 5.—**Straw bond**. See *bond*¹.—**Straw bonnet**, a bonnet made of woven or plaited straw. See *straw hat*, *Dunstable straw* (above), and *leghorn*.—**Straw hat**, a hat made of straw either woven together in one piece or, as is more common, plaited into a narrow braid which is wound spirally, the separate turns being sewed together where the edges touch. Hats for men and bonnets for women are included under the general term.—**Straw mosaic**, rope, etc. See the nouns.—**Straw vote**, a vote taken without previous notice, in a casual gathering or otherwise. See I., 4.

straw¹ (strā), *v.* t. [< *straw*¹, *n.*] To furnish or bind with straw; apply straw to.—**Strawed seal**, a seal containing a straw, a blade of grass, or a rush, or several of these, embedded in the wax, often around it as a border, or tied in fastening the seal to the document. Such additions to the ordinary seal were often made in the fourteenth and fifteenth centuries; but whether the purpose was to strengthen or protect the wax or to preserve a fragment of the clod delivered in making livery of seizin seems to be matter of conjecture.

straw² (strā), *v.* t. An obsolete or dialectal form of *strew*. *Ex. xxxii. 20.*

She *strawed* the roses on the ground, Threw her mantle on the brier.

Lord John (Child's Ballads, I. 135).

strawberry (strā'ber'i), *n.*; pl. *strawberries* (-iz). [ME. *strabery*, *straberi*, *strabery*, *straberi*, *strebere*, also (in comp.) *strachbyr*, *strobery*, < AS. *streduberie*, *streduberige*, also contracted *stredberie*, *stredberige*, *stredberge*, also *stredwberge*, *streduberie*, late AS. *stræberie* (in comp.), *strawberry* (also called *eortherie*, G. *erdbeere*, 'earth-berry'), < **stredw*, *straw*, + *berie*, *berry*: see *straw*¹ and *berry*¹. The first element, lit. 'straw,' is very rare in AS. use, and its exact application here is uncertain. It may be taken in the sense of 'a long stem,' referring to the runners of the plant, or it may allude to an old habit of stringing the berries on a straw. The word is often erroneously explained as a corruption of a supposed **strayberry*, or even as referring to the common use of straw or hay about the plants to keep the earth from soiling the berries. No corresponding name appears in the other languages. Cf. *strawberry-wise*.] The fruit of any of the species of the genus *Fragaria*, or the plant itself. The plants are stemless, propagating by slender runners (whence they are often called *strawberry-vines*), with trifoliate leaves, and scapes a few inches high, bearing mostly white-petaled flowers in small cymes, followed by the "berry," which consists of an enlarged fleshy receptacle, colored scarlet or other shade of red, bearing the achenes on its exterior. About six natural species are recognized, though these are so variable as to make it possible that they all belong to one multiflorous species. *F. vesca* is common throughout the northern Old World and northward in North America. It includes the alpine *strawberry*, hantboy, and wood-strawberry (see below), was probably the first cultivated, and is the source of many artificial varieties, including the perpetuals. The Virginian or scarlet strawberry, *F. Virginiana*, is common eastward in North America, and in the more robust variety *Illinoensis* extends perhaps to Oregon. The achenes, which in *F. vesca* are superficial, are in this species sunk in pits. It was the source of the famous Hovey's seedling, produced near Boston about 1840, and later of Wilson's Albany (or simply Wilson's), whose production marked an epoch in American strawberry-culture. In Chili and along the Pacific coast from San Francisco to Alaska grows the Chili strawberry, *F. Chilensis*, a low stout densely hairy plant with thick leaves and large flowers, which has been the source of valuable hybrids in France and England. The Indian strawberry, *F. Indica*, peculiar in its yellow petals and tasteless fruit, is only of ornamental value. The strawberry was not cultivated by the ancients; its culture in Europe began probably in the fifteenth or sixteenth century. It is now grown in great quantities in Europe

and North America for its delicious subacid fruit, which is used fresh for dessert, and also canned or made into jam, and affords a syrup for flavoring drinks, ices, creams, etc. The varieties, which are mainly or wholly from the first three species above named, are numerous and constantly changing. See cuts under *flagellum* and *Fragaria*.

The *strawberry* grows underneath the nettle.

Shak., Hon. V., l. 1. 60.

Dr. Boteler said, of *strawberries*, "Doubtless God could have made a better berry, but doubtless God never did." J. Walton, Complete Angler (ed. Bohn), p. 158.

Alpine strawberry, a European form of *Fragaria vesca*, sometimes distinguished as *F. collina*.—**Ananas strawberry**. M. Arnold, *Literature and Dogma*, l.

6. A rift: so called by English anglers. *Norris*.—*Gulf Stream*. See *gulf*.—*Stream-function* of the motion of an incompressible fluid in two dimensions, such a function that the total instantaneous flow across any curve, referred to the unit of time, is equal to the difference of the values of the stream-function at the extremities of the curve.—*Stream of thought*, the train of ideas which pass successively into present consciousness, regarded as analogous to a current flowing past a point upon the bank.—*The stream*, the Gulf Stream.—*Syn.* 1 and 2. *Stream*, *Current*, *Eddy*. All rivers and brooks are streams, and have currents. An eddy is a counter-current, a current contrary to the main direction.

stream (strēm), *v.* [*< ME. streamen* = D. *stroemen* = G. *strömen* = Icel. *streyma* = Sw. *strömma* = Dan. *strömmen*; from the noun.] I. *intrans.* 1. To move or run in a continuous current; flow continuously. See *streaming*, *n.*, 2.

Within those banks, where rivers now

Stream, and perpetual draw their humid train.

Milton, *P. L.*, vii. 306.

- On all sides round
Streams the black blood. *Pope*, *Odyssey*, iii. 581.
2. To move or proceed continuously and uniformly, or in unbroken succession.
And to imperial Love, that god most high,
Do my sighs stream. *Shak.*, *All's Well*, ii. 3. 82.

Streaming files of wild ducks began to make their appearance high in the air. *Iring*, *Sketch-Book*, p. 437.

3. To pour out a stream; also, to throw off a stream from the surface: as, *streaming eyes*; a *streaming umbrella*.
Then grateful Greece with *streaming eyes* you'd raise
Historic marbles, to record his praise.
Penton, in *Pope's Odyssey*, i. 305.

Blasts that blow the poplar white,
And lash with storm the *streaming* pane.
Tennyson, in *Memoriam*, lxxii.

4. To move swiftly and continuously, as a ray of light; streak.
I looked up just in time to see a superb shooting star
stream across the heavens. *Nature*, XXX. 455.

5. To stretch out in a line; hang or float at full length: as, *streaming hair*.
Standards and gonfalons 'twixt van and rear
Stream in the air. *Milton*, *P. L.*, v. 590.
Ribbons *streaming* gay. *Courper*, *Task*, iv. 541.

- II. *trans.* 1. To discharge in a stream; cause to flow; pour out.
Had I as many eyes as thou hast wounds,
Weeping as fast as they stream forth thy blood.
Shak., *J. C.*, iii. 1. 201.
Calanus told Onesicritus of a golden world, where meale
was as plentiful as dust, and fountains *streamed* milke,
hony, wine, and oyle. *Purchas*, *Pilgrimage*, p. 454.

2. To cause to float out; wave.
Many a time hath banish'd Norfolk fought,
Streaming the ensign of the Christian cross
Against black pagans, Turks, and Saracens.
Shak., *Rich. II.*, iv. 1. 94.

3. To stripe or ray. See *streaming*, *a.* [Rare.]
The herald's mantle is *streamed* with gold. *Bacon*.

4. (a) In *mining*, to wash, as the superficial detritus, especially that accumulated in the beds of rivers, for the purpose of separating any valuable ore which it may contain. See *placer*². The term *stream*, long in use in Cornwall, exclusively with reference to tin ores, seems hardly to have come into general use in any mining regions except those in which the ore of tin is mined. (b) In *dyeing*, to wash in running water, as silk, before putting in the dye. *Workshop Receipts*, 2d ser., p. 40.—To *stream* a buoy. See *buoy*.

stream-anchor (strēm'ang'kōr), *n.* *Naut.*, an anchor of a size intermediate between the bower-anchor and the kedg. It is used for warping and like purposes. In the United States navy stream-anchors weigh from 400 to 1,500 pounds, and are about one fourth the weight of bower-anchors.

stream-cable (strēm'kā'bl), *n.* The cable or hawser of the stream-anchor.

stream-clock (strēm'klok), *n.* [Tr. G. *strom-uh*.] A physiological instrument for determining the velocity of blood in a vessel.

stream-current (strēm'kur'ēnt), *n.* See the quotation, and also *drift-current*.

A current whose onward movement is sustained by the vis a tergo of a drift-current is called a *stream-current*. *Encyc. Brit.*, III. 19.

streamer (strēm'mér), *n.* [ME. *strem*, *stremere*; < *stream* + *-er*¹.] 1. That which streams out, or hangs or floats at full length: applied to anything long and narrow, as a ribbon.
All twinkling with the dewdrops' sheen,
The brier-rose fell in *streamers* green.
Scott, *L. of the L.*, i. 11.

(a) A long narrow flag; a pennon extended or flowing in the wind: same as *pennant*, 1 (a).
His brave fleet
With silken *streamers* the young Phæbus fanning.
Shak., *Hen. V.*, iii. 1, prol. 1. 6.

(b) A stream or column of light shooting upward or outward, as in some forms of the aurora borealis.
He knew, by the *streamers* that shot so bright,
That spirits were riding the northern light.
Scott, *L. of L. M.*, ii. 8.

(c) A long flowing strip of ribbon, or feather, or something similar, used in decoration, especially in dress.
A most airy sort of blue and silver turban, with a
streamer of plumage on one side.
Charlotte Brontë, *Villette*, xx.

(d) A long-exserted feather which streams away from the rest of the plumage of some birds: a pennant or standard. See cuts under *Semioptera* and *standard-bearer*.

2. In *mining*, a person who washes for stream-tin. See *streaming*.—3. The geometrid moth *Anticlea derivata*: an English collectors' name.

streamful (strēm'fūl), *a.* [< *stream* + *-ful*.] Full of streams or currents.

Like a ship despoiled of her sails,
Shov'd by the wind against the *streamful* tide.
Drayton, *Legend of Pierce Gaveston*, st. 105.

stream-gold (strēm'göld), *n.* See the quotation.

The gold of alluvial districts, called *stream-gold* or *placer-gold*, occurs, as well as alluvial tin, among the debris of the more ancient rocks. *Ure*, *Dict.*, III. 298.

stream-ice (strēm'is), *n.* Pieces of drift or bay ice forming a ridge and following the line of current.

At 4 A. M. a seemingly close pack was seen to the eastward, but later it developed into *stream-ice* of small extent. *A. W. Greeley*, *Arctic Service*, p. 67.

streaminess (strē'mi-nes), *n.* The quality or state of being streamy.

I give the case of a star-group which is certainly not the most remarkable for *streaminess*.

R. A. Proctor, *Universe of Stars* (2d ed., 1878), p. 22.

streaming (strē'ming), *n.* [Verbal *n.* of *stream*, *v.*] 1. In *tin-mining*, the washing of tin ore from the detritus with which it is associated. The now almost entirely exhausted deposits of detrital tin ore in Cornwall and Devon were called *streams*, because they occur chiefly in or near the bottoms of the valleys and adjacent to the present streams, or in the manner of deposits formed by streams, analogous to the channels of the Californian and the gutters of the Australian miners; the miners were themselves called *streamers*; the localities where streaming was carried on, *stream-works*; and the ore obtained, *stream-tin*. 2. In *biol.*, the peculiar flowing motion of the particles of protoplasm in an amoeba or other rhizopod, by which the form of the animalcule changes or pseudopods are protruded; also, the similar circulation or rotation of the protoplasm of some plant-cells. See *protoplasm*, and *rotation of protoplasm* (under *rotation*).

streaming (strē'ming), *p. a.* In *her.*, issuing, as rays of light: as, rays *streaming* from the dexter chief.

streamless (strēm'les), *a.* [< *stream* + *-less*.] Not traversed by streams; unwatered. *Encyc. Brit.*, XXIV. 758.

streamlet (strēm'let), *n.* [< *stream* + *-let*.] A small stream; a rivulet; a rill.

Unnumber'd glittering *streamlets* play'd,
And hurried every where their waters sheen.
Thomson, *Castle of Indolence*, i. 3.

stream-line (strēm'lin), *n.* See *line*², and *line of flow* (under *flow*¹).—**Stream-line surface**. See *surface*.

streamling (strēm'ling), *n.* [< *stream* + *-ling*¹.] Same as *streamlet*.

A thousand *Streamlings* that n'er saw the Sun,
With tribute silver to his service run.
Sylvester, tr. of *Du Bartas's Weeks*, ii., *The Captains*.

stream-tin (strēm'tin), *n.* In *mining*, tin ore, or oxid of tin, obtained in streaming (which see).

stream-wheel (strēm'hwel), *n.* An undershot wheel, or current-wheel.

stream-works (strēm'wërks), *n. sing. and pl.* In *mining*, a locality where the detrital deposits are washed in order to procure the valuable metal or ore which they may contain; alluvial washings, or surface mining. The words *stream-works* and *stream* (*v. t.*) are rarely, if ever, used except with reference to the separation of tin ore from detrital deposits.

streamwort (strēm'wört), *n.* A plant of Lindley's order *Haloragacæ*. [Rare.]

streamy (strēm'mi), *a.* [Early mod. E. also *streamy*; < *stream* + *-y*¹.] 1. Abounding in streams. (a) Full of running water or of springs.

(b) Full of or emitting streaming rays of light.
In *streamy* sparkles, kindling all the skies,
From pole to pole the trail of glory flies.
Pope, *Iliad*, xiii. 321.

2. Having the form of a beam or stream of light.

street, *n.* An obsolete form of *street*.

Streetfield's operation. See *operation*.

streberry, *n.* An obsolete form of *strawberry*.

Strebla (streb'lā), *n.* [NL. (Wiedemann, 1824), < Gr. *στρεβλός*, twisted, crooked, < *στρίβειν*, twist.] A peculiar genus of pupiparous dipterous insects, of the family *Nycteribiidae*, including certain so-called bat-lice or bat-ticks. *S. vespertilionis* is a common bat-parasite occurring in South America and the West Indies.

streblosis (streb-lō'sis), *n.* [NL., < Gr. *στρεβλός*, twisted: see *Strebla*.] The angle through which it is necessary to rotate an element of a figure to bring it into coincidence with the corresponding element of a given conformable figure.

Streblus (streb'lus), *n.* [NL. (Loureiro, 1790), so called in allusion to its branches, which form a dense mass of rigid straggling twigs; < Gr. *στρεβλός*, twisted: see *Strebla*.] A genus of

apetalous plants, of the order *Urticaceæ* and tribe *Moraceæ*, type of the subtribe *Streblicæ*. It is characterized by usually dioecious flowers, the male in clustered two-bracted heads, the female solitary on the peduncle, the perianth consisting of four widely overlapping segments which closely invest the one-celled ovary. As in most of the subtribe, its cotyledons are very unequal, and the larger, which is very fleshy, incloses the smaller. The only species, *S. asper* (*Trophis aspera*), is the tonkhol or paper-tree of the Siamese, who prepare several kinds of paper from its bark, including a heavy and a thin white paper, and a black paper for use like a slate, much employed in the native law-courts. It is a small tree, reaching about thirty feet in height, bearing dark-green oval coriaceous two-ranked leaves, and occurring from China and Manila to the Andaman Islands.

strecchet, *v.* An old spelling of *stretch*.

street, *n.* A Middle English form of *straw*¹.

street (strēt), *v. t.* [Cf. *street*.] To trail; stream.

street, *n.* A Middle English form of *strain*².

street (strēt), *n.* [Early mod. E. also *street*, *streete*; < ME. *streete*, *streete*, *street*, *strate*, < AS. *stræt*=OS. *strata*=OFries. *strete*=MD. *straete*, D. *straat*=MLG. *strāte*, LG. *strate*=OHG. *strāza*, MHG. *strāze*, G. *strasse*=Icel. *stræti*=Sw. *strät*=Dan. *stråde* (= It. *strada*=Sp. Pg. *Pr. estrada*=OF. *estree*, *stree*, *strae*, F. *étrec*=W. *ystrad*, *ystrid*=OIr. *sráth*=Ir. Gael. *sráid*=NGr. *στράτα*, < LL. *strata*, a street, road, highway, orig. *via strata*, a paved way, < L. *strata*, fem. of *stratus*, pp. of *sternere*, *strew*, scatter, spread, cover, pave: see *stratum*. *Street* is one of the very few words regarded as received in England from the Roman invaders, others being *chester* (*Chester*), *port*, *wall*, and *-coln* in *Lincoln*. Cf. *stray*¹, *stray*².] 1. A paved road; a highway.

This grand-child, great as he [Mulumtius], those four proud *Streets* begun

That each way cross this Isle, and bounds did them allow.
Drayton, *Polyolbion*, viii. 74.

There were at that time [fifth year after the Conquest] in England four great roads, . . . of which two ran lengthways through the island, and two crossed it, . . . Watling-street, Fosse, Hikenild-street, and Erming-street.

Guent, *Origines Celticae*, II. 218.

2. A public way or road, whether paved or unpaved, in a village, town, or city, ordinarily including a sidewalk or sidewalks and a roadway, and having houses or town lots on one or both sides; a main way, in distinction from a lane or alley: as, a fashionable *street*; a *street* of shops. Abbreviated *St.*, *st.* Compare *road*, 3. Strictly, the word excludes the houses, which are on the street; but in a very common use it includes the land and houses, which are then in the street: as, a house in High Street. In *law*, *street* sometimes includes as much of the surface, and as much of the space above and of the soil or depth beneath, as may be needed for the ordinary works which the local authorities may decide to execute on or in a street, including sidewalks.

Up Fish *Street*! down Saint Magnus' Corner!
Shak., 2 *Hen. VI.*, iv. 8. 1.

3. The way for vehicles, between the curbs, as distinguished from the sidewalks: as, to walk in the *street*.—4. Hence, a path or passageway inclosed between continuous lines of objects; a track; a lane.

It seemed to bee, as it were, a continued *street* of shippes.
Purchas, *Pilgrimage*, p. 435.

I was ushered through an actual *street* of servitors.
Disraeli, *Vivian Grey*, iii. 8.

5. A path; a way.
Than maketh thou his pees with his sovereign,
And bringest him out of the crooked *streets*.
Chaucer, *A. B. C.*, l. 70.

While I ran by the most secret *streets*,
Eschewing still the common haunted track.
Surrey, *Æneid*, ii. 975.

6. The inhabitants of a street collectively. [Colloq.]

All the whole *street* will hate us, and the world
Point me out cruel. *Middleton*, *Chaste Maid*, v. 2.

Grub Street. See *Grub-street*.—**Lombard Street**. See *Lombard*², 1.—**Queer Street**. See *queer*¹.—**Street Arab**. See *Arab*, 2.—**Street broker**. See *broker*.—**The street**, a street (as Wall Street in New York) or locality where merchants or stock-brokers congregate for business; the commercial exchange: as, it is rumored on the *street*.

Common places whither marchantes resort as to the burse or *streete*. *Peter Martyr* (tr. in *Eden's First Books* [on America, ed. Arber, p. 186]).

To have the key of the *street*. See *key*¹.—To spin *street-yarn*. See *spin*.—**Syn. 2. Road**, etc. See *way*.

streetage (strē'tāj), *n.* [< *street* + *-age*.] A charge made for the use of a street. [Rare.]

street-car (strēt'kär), *n.* A passenger-car for local or city travel, drawn on the surface of the public streets by horses, by a locomotive engine, or by an endless cable, or propelled by electricity. [U. S.]

The *street-car* rattled in the foreground, changing horses and absorbing and emitting passengers.

H. James, Jr., The Bostonians, xxxiv.

street-door (strēt'dōr), *n.* The door of a house or other building which opens upon a street.

When you step but a few doors off . . . to see a brother-footman going to be hanged, leave the *street door* open.

Swift, Advice to Servants (Footman).

streeted (strē'ted), *a.* Provided with streets.

There are few places this side the Alps better built, and so well *streeted* as this [Antwerp].

Hovell, Letters, I. 1. 12.

street-locomotive (strēt'lō'kō-mō-tiv), *n.* See *locomotive*.

street-orderly (strēt'ōr'dēr-li), *n.* A person employed to keep the streets clean by the prompt removal of rubbish, dung, or dirt of any kind by means of a hand-brush and bag.

By the *street-orderly* method of scavaging, the thoroughfares are continually being cleansed, and so never allowed to become dirty; whereas, by the ordinary method, they are not cleansed until they are dirty.

Mayhew, London Labour and London Poor, II. 257.

street-railroad (strēt'rāl'rōd), *n.* A railroad constructed upon the surface of a public street in towns and cities; a tramway. Cars on such railroads are variously propelled, and the railroads take specific names from the system of propulsion, as *cable-railroad*, *horse-railroad*, *electric railroad*. [*U. S.*]

street-sweeper (strēt'swē'pēr), *n.* One who or that which sweeps the streets; specifically, a machine provided with brushes and scrapers for removing dust, mud, etc., from the streets.

street-walker (strēt'wā'kēr), *n.* 1. One who walks the streets; a pedestrian.

All *street-walkers* and shop-keepers bear an equal share in its hourly vexation [the nuisance of beggars].

Swift, Proposal for giving Badges to Beggars.

2. A common prostitute who walks the streets at night.

streetward¹ (strēt'wārd), *n.* [*< street + ward.*] Formerly, an officer who had the care of the streets.

streetward² (strēt'wārd), *adv.* and *a.* [*< street + -ward.*] Next the street; looking out on the street. *Tennyson, Enoch Arden.*

streetway (strēt'wā), *n.* [*< street + way.*] The open space of a street; the roadway.

straight¹. An old spelling of *straight¹*.

straight², straighten¹. Old spellings of *strait¹, straiten*. *Drayton.*

streikt, v. See *streak³*.

streinet, streinablet. Old spellings of *strain¹, strainable*. *Holinshead.*

streit, streitet, a. Old spellings of *strait¹*.

strekēt. A Middle English form of *streak¹, streak², and strike*.

strelitz (strel'its), *n.* [*< G. strelitze, < Russ. strelitsā, an archer, shooter, < strilyati, shoot, strila, an arrow; prob. < OHG. strāla, G. strahl = AS. strāl, arrow; see stral.*] A soldier of the ancient Muscovite guards, abolished by Peter the Great.

Strelitzia (strē-lit'si-ā), *n.* [*NL. (Aiton, 1789), named after Queen Charlotte, wife of George III. of England, and descended from the German house of Mecklenburg-Strelitz.*] 1. A genus of monocotyledonous plants, of the order *Musaceæ*, distinguished by its flowers with three free sepals and three very dissimilar and peculiar petals, of which the outer is short, broad, and concave or hooded, the two lateral long, narrow, more or less united, and continued into a long petaloid appendage. There are 4 or 5 species, natives of South Africa. They are singular plants, producing an erect or subterranean woody rootstock, and large leaves which resemble those of a small banana-tree, or are reduced mainly or completely to tall erect cylindrical petioles. The large handsome flowers are borne few together far exerted from a spathe, which consists of one or two large boat-shaped bracts on a terminal or axillary scape. *S. Reginae*, known as *queen-plant, bird's-tongue flower*, or *bird-of-paradise flower*, produces large brilliant flowers, highly prized for the oddity of their shape and coloring, showing the unusual combination of orange and blue. *S. augusta*, a larger species with small white flowers and purple bracts, has a palm-like stem reaching 20 feet in height, and is cultivated under the name *grand strelitzia*. *S. juncea* and other species are also cultivated under glass.

2. [*l. c.*] A plant of this genus.

streamet, n. and v. An obsolete spelling of *stream*.

strent, strener, n. Middle English forms of *strain²*.

strengert, strengest¹, a. Earlier comparative and superlative of *strong¹*.

strengite (streng'it), *n.* [Named after A. Streng, of Giessen, Germany.] A hydrous phosphate of iron, occurring in reddish orthorhombic crystals: it is isomorphous with scorodite.

strength (strength), *n.* [*< ME. strengthe, strenthe, strenkyth, also strenthe, streinthe, <*

AS. strengthu (= OHG. strengida), strength, < strang, strong; see strong¹. Cf. length, < long.]

1. The property of being strong; force; power. Specifically—(a) In animals, that attribute of an animal body by which it is enabled to move itself or other bodies. The strength of animals is the muscular force or energy which they are capable of exerting. See *horse-power*.

Vlives also, with angarely mony

Of tulkis [knights] of Traci, for men of *strenkyth*.

Destruction of Troy (E. E. T. S.), I. 6894.

The external indications of *strength* are the abundance and firmness of the muscular fibres.

Bentham, Introd. to Morals and Legislation, vi. 9.

[Used in plural with same sense as singular.

Alle his [Samson's] *strenghes* in his heres were.

Chaucer, Monk's Tale, I. 68.]

(b) In inanimate things, the property by which they sustain the application of force without breaking or yielding: as, the *strength* of a bone; the *strength* of a beam; the *strength* of a wall; the *strength* of a rope.

Our castle's *strength*

Will laugh a siege to scorn.

Shak., Macbeth, v. 5. 2.

The city is of no great *strength*, having a trifling wall about it.

Evelyn, Diary, May 21, 1645.

Hence—2. Power or vigor of any kind; ability; capacity for work or effective action, whether physical, intellectual, or moral: as, *strength* of grasp or stroke; *strength* of mind, memory, or judgment; *strength* of feeling (that is, not intensity but effectiveness of emotion).

If, rather than to marry County Paris,

Thou hast the *strength* of will to slay thyself.

Shak., R. and J., iv. 1. 72.

The belief

He has of his own great and catholic *strengths*

In arguing and discourse.

B. Jonson, Devil is an Ass, i. 2.

In the world of morals, as in the world of physics,

strength is nearly allied to hardness.

Lecky, Europ. Morals, I. 354.

3. One who or that which is regarded as an embodiment of force or strength; that on which confidence or reliance is firmly set; stay; support; security.

God is our refuge and *strength*.

Ps. xlii. 1.

Thy counsel, in this uttermost distress,

My only *strength* and stay. *Milton, P. L., x. 921.*

Hitherto, Davenant observes, in taxing the people we had gone chiefly on land and trade, which is about one-third of the *strength* of England.

S. Dowell, Taxes in England, II. 56.

4. Force; violence; vehemence; intensity.

Zee schulle undrestonde, that the Soudan is Lord of 5 Kyngdomes, that he hath conquered and approped to him be *Strengthe*.

Mandeville, Travels, p. 35.

And al men spoken of hunting,

How they wolde slee the hert with *strengthe*.

Chaucer, Death of Blanche, I. 351.

If you did know to whom I gave the ring, . . .

You would abate the *strength* of your displeasure.

Shak., M. of V., v. 1. 198.

5. Degree of the distinguishing or essential element or constituent; the power to produce sensible effects on other bodies; potency: said of liquors and the like: as, the *strength* of an acid; the *strength* of wine or spirits; the *strength* of a potion or a poison.—6. Force as measured or stated in figures; amount or numbers of any collective body, as of an army or a fleet: as, a play adapted to the whole *strength* of the company; the full *strength* of a regiment.

Demand of him of what *strength* they are a-foot.

Shak., All's Well, iv. 3. 181.

Half a dozen gentlemen, furnished with a good *strength* of water-spaniels.

Gilbert White, Nat. Hist. Selborne, To T. Pennant, xxii.

7. Available force or backing, as of a candidate: as, his *strength* is greatest in the cities. [Political cant.]—8. Force proceeding from motion and proportioned to it; vehemence; impetuosity: as, the *strength* of a current of air or water; the *strength* of a charge of cavalry.—9. A stronghold.

Syne they hae left him, hail and feir,

Within his *strength* of stane.

Auld Maitland (Child's Ballads, VI. 222).

"No to say it's our best dwelling," he added, turning to Bucklaw, "but just a *strength* for the Lord of Ravenswood to flee until."

Scott, Bride of Lammermoor, vii.

10. In colors, the relative property possessed by a pigment of imparting a color to and modifying the shade of any other pigment to which it is added. Thus, one pound of lampblack added to 100 pounds of white lead produces a dark-gray shade, but one pound of ivory-black added in the same way would have little effect on the white.

11. In the *fine arts*, boldness of conception or treatment.

Carracci's *strength*, Correggio's softer line.

Pope, Epistle to Jervas, I. 37.

12. In soap-making. See the quotation.

A peculiar phenomenon may be remarked in the cooling [of a little of the soap placed on a glass plate], which affords a good criterion of the quality of the soap. When there is formed around the little patch an opaque zone, a fraction of an inch broad, this is supposed to indicate complete saponification, and is called the *strength*; when it is absent, the soap is said to want its *strength*. When this zone soon vanishes after being distinctly seen, the soap is said to have *false strength*.

Ure, Dict., III. 852.

On the strength (milit. and naval), on the muster-rolls. [Colloq.]

The colonel had put the widow woman on the *strength*; she was no longer an unrecognized waif, but had her regimental position.

Arch. Forbes, in Eng. Illust. Mag., VI. 525.

On or upon the strength of, in reliance upon the value of; on the faith of; as, to do something on the *strength* of another's promise.

My father set out upon the *strength* of these two following axioms.

Sterne, Tristram Shandy, II. 19.

Proof strength. See *proof, a.*—**Strength of a current**, in *elect.*, the quantity of electricity which passes in a unit of time; the measure of electrical energy. See *Ohm's law*, under *law*.—**Strength of materials.** See *material*.—**Strength of pole.** See *pole²*.—**Strength of the source.** See the quotation.

The time rate of supply of liquid through the source is called the *strength* of the source.

Minchin, Uniplanar Kinematics, vi.

To measure strength. See *measure*.—**Syn. 1. Force**, etc. See *power¹*.

strengthen¹ (strength), *v. t.* [*< ME. strengthenen, strenthen; < strenght, n.*] To strengthen.

Take this for a general rule, that every counsel that is affirmed or *strengthened* so strongly that it may not be changed for no condition that may betide—I say that thilke counsel is wicked.

Chaucer, Tale of Melibeus (Harleian MS.).

The helpe of Gods grace in that tribulation to *strengthen* him.

Sir T. More, Comfort against Tribulation (1573), fol. 16.

His armes and leggy[s] were well lengthed and *strengthened*.

Fabjan, Chron., clvi.

strengthen (streng'thn), *v.* [*< strenght + -en¹*] **I. trans.** To make strong or stronger; add strength to, either physical, legal, or moral; confirm; establish: as, to *strengthen* a limb; to *strengthen* an obligation; to *strengthen* a claim; to *strengthen* authority.

Deut. iii. 28.

Let noble Warwick, Cobham, and the rest . . .

With powerful policy *strengthen* themselves.

Shak., 3 Hen. VI., I. 2. 58.

For the more *strengthening* the Acts of this Parliament, the King purchased the Pope's Bulls, containing grievous Censures and Curses to them that should break them.

Baker, Chronicles, p. 149.

Strengthening plaster. See *plaster*.—**Syn.** To invigorate, fortify, brace, nerve, steel, corroborate, support, heighten.

II. intrans. To grow strong or stronger.

The young disease, that must subdue at length, Grows with his growth, and *strengtheneth* with his strength.

Pope, Essay on Man, II. 136.

strengthenener (strength'nēr), *n.* [Formerly also *strengthenier*; *< strengthen + -er¹*.] One who or that which makes strong or stronger; one who or that which increases strength, physical or moral.

Whose plays are *strengtheners* of virtue.

Mary Lamb, Tales from Shakspeare, Pref.

strengthful (strength'fūl), *a.* [*< strength + -ful.*] Abounding in strength; strong. *Mars-ton.*

strengthfulness (strength'fūl-nes), *n.* The state or quality of being strengthful or strong; fullness of strength.

strengthening (streng'thing), *n.* [Verbal *n.* of *strengthen, v.*] A strengthening. *Palsgrave. (Halliwell.)*

strengthless (strength'les), *a.* [*< strength + -less.*] Destitute of strength, in any sense of the word. *Shak.; Boyle.*

strengthenert (strength'nēr), *n.* Same as *strengthenener*.

strengthy (streng'thi), *a.* [Early mod. E. also *strenthie*; *< strength + -y¹*. Cf. *lengthy*.] Having strength; strong.

The simple and *strenthie* defence of aue iust caus.

J. Tyrr, Refutation, Pref. 2. (Jamieson.)

strenkle (streng'kl), *v. t.* An obsolete or Scotch form of *strikle*.

strenkle (streng'kl), *n.* [*< ME. strenkyll; < strenkle, v.* Cf. *sprinkle, n.*] A sprinkler. [Obsolete or Scotch.]

Strenkyll to cast holy water, vimplon.

Palsgrave. (Halliwell.)

strenth¹, n. An obsolete form of *strength*.

strenuity (stre-nū'i-ti), *n.* [*< L. strenuita(-t)-s, nimbleness, friskness, < strenuus, quick, active, vigorous; see strenuous.*] Strenuousness.

About in the see
No Prince was of better *strenuiter*.
Hakluyt's Voyages, I. 206.

strenuosity (stren-ū-os'ī-ti), *n.* [*< strenuous + -ity.*] 1. The state or character of being strenuous; strenuousness.—2. A strained effect, or a straining for effect, as in a literary composition.

Strenuosity in style is not quite the same thing as strength.
The Academy, Jan. 30, 1886, p. 73.

strenuous (stren'ū-us), *a.* [*< L. strenuus*, quick, active, brisk, vigorous; cf. *Gr. στρεπός*, firm, hard, *στρεπής*, strong.] 1. Strong; vigorous; active; pushing.

Him whose *strenuous* tongue
Can burst Joy's grape against his palate fine.
Keats, *Melancholy*.

2. Eagerly pressing or urgent; energetic; zealous; ardent; bold; earnest; valiant; intrepid.

To *strenuous* minds there is an inquietude in overquietness.
Sir T. Browne, *Christ. Mor.*, I. 33.

This scheme encountered *strenuous* opposition in the council.
Macaulay, *Hist. Eng.*, vi.

3. Necessitating vigor or energy; accompanied by labor or exertion.

What more oft, in nations grown corrupt,
Than to love bondage more than liberty,
Bondage with ease than *strenuous* liberty?
Milton, *S. A.*, I. 271.

Worldlings revelling in the fields
Of *strenuous* idleness. *Wordsworth*, *Memory*.

=*Syn.* 1 and 2. Energetic, resolute.

strenuously (stren'ū-us-ly), *adv.* In a strenuous manner; with eager and pressing zeal; ardently; boldly; vigorously; actively.

strenuousness (stren'ū-us-nēs), *n.* The state or character of being strenuous; eagerness; earnestness; active zeal.

strepit, *v.* An old spelling of *strepit*.

strepent (strep'ent), *a.* [*< L. strepens* (*t*)-s, ppr. of *strepere*, make a noise, rumble, murmur.] Noisy; loud. [Rare.]

Peace to the *strepent* horn!
Shenstone, *Rural Elegance*.

Strepera (strep'e-rā), *n.* [NL. (Lesson, 1831), *< L. strepera*, make a noise.] An Australian genus of corvine passerine birds, typical of the subfamily *Streperinae*, having long wings and naked nostrils. Also called *Coronica* (Gould, 1837). There are 7 species, commonly called *crow-shrikes*, of a black, blackish-brown, or gray color, more or less

Crow-shrike (*Strepera graculina*).

varied with white or rufous. The type is *Corvus graculinus* of White, the noisy roller of Latham, *Coracias* or *Gracula* or *Barila strepera* of various authors, now *Strepera graculina*. It is glossy black, with the base of the tail and an alar speculum white, the iris yellow. The length is 18½ inches. *S. cristalis*, *arguta*, *intermedia*, *cuneicauda* (or *anaphonensis*: see *squeaker*), *melanoptera*, and *fuliginosa* are the other species.

streperine (strep'e-rin), *a.* [*< Strepera + -ine*.] Of or pertaining to birds of the genus *Strepera*.

streperous (strep'e-rus), *a.* [*< L. strepere*, make a noise, rumble, murmur, + *-ous*. Cf. *obstreperous*.] Noisy; loud; boisterous. [Rare.]

In a *streperous* eruption it [the bay or laurel] riseth against fire.
Sir T. Browne, *Vulg. Err.*, II. 6.

strophotome (stref'ō-tōm), *n.* [*< Gr. στρέφω*, twist, turn, + *-τομος*, *< τέμνειν*, *ταμείν*, cut.] A corkscrew-like needle used in an operation for the radical cure of inguinal hernia.

Streptiores (strep-i-tō-rēs), *n. pl.* [NL., pl. of **streptior*, *< L. strepere*, make a noise: see *strepent*.] A group of insessorial birds, established by Blyth in 1849 for those Cuvierian *Passerinae* which are non-passerine, and primarily divided into *Syndactyli*, *Zygodactyli*, and *Heterodactyli*. See these words.

strepitoso (strep-i-tō-sō), *adv.* [It., *< strepito*, noise, *< L. strepitus*, noise: see *strepituous*.] In music, in an impetuous, boisterous, noisy manner.

strepituous (strep'i-tus), *a.* [*< L. strepitus*, noise, *< strepere*, make a noise: see *strepent*.] Noisy. **strepsicere** (strep'si-sēr), *n.* [*< strepsiceros*.] An antelope with twisted horns; a strepsiceros.

strepsiceros (strep-sis'e-ros), *n.* [NL., *< L. strepsiceros*, *< Gr. *στρεψικερος*, an animal with twisted horns, called by the Africans *addax*.] 1†. Some antelope with twisted horns, as the koodoo; originally, perhaps, the addax.—2. [cap.] [NL. (Hamilton Smith, 1827).] A genus of antelopes with twisted or spiral horns. The only species now left in the genus is *S. kudu*, the koodoo. See cut under *koodoo*.

Strepsilas (strep'si-las), *n.* [NL. (Illiger, 1811), *< Gr. στρέψιλος*, a turning round, *< στρέφειν* (aor. *στρέψαι*), twist, turn, + *λάς*, *λάος*, a stone.] The typical genus of a subfamily *Strepsilainae*; the turnstones. The bill is short, constricted at the base, tapering to a sharp point, with ascending gony longer than the mandibular ramus, short and broad nasal fossae, and short shallow grooves in the under mandible. The legs are short and stout, with the tarsus scutellate in front and reticulate on the sides and back, and four toes, cleft to the base. There are 2 species—*S. interpres*, the common turnstone, and *S. melanoccephalus* of the North Pacific, the black-headed turnstone, perhaps only a variety of the other. The genus was also called *Cinctus*, *Arenaria*, and *Morinella*. See cuts under *Pressirostres* and *turnstone*.

strepsipter (strep-sip'tēr), *n.* [*< NL. Strepsiptera*.] A member of the *Strepsiptera*.

Strepsiptera (strep-sip'te-rā), *n. pl.* [NL., neut. pl. of **strepsipterus*: see *strepsipterous*.]

1. An order of insects, named by Kirby in 1833 from the twisted wings, synonymous with *Rhipiptera* of Latreille, and corresponding to the family *Stylopidae*. The fore wings are mere twisted filaments or pseudelytra; the hind wings are expansive and fan-shaped; the females are wingless. The strepsipters are parasitic on hymenopterous insects, especially bees and wasps. They are now regarded as anomalous *Coleoptera* degraded by parasitism. See cut under *Stylops*. 2†. In Gegenbaur's system of classification, a family of neuropterous insects, forming with *Phryganida* the suborder *Trichoptera*.

strepsipteral (strep-sip'te-rāl), *a.* [*< strepsipterous + -al*.] Same as *strepsipterous*.

strepsipteran (strep-sip'te-rān), *n.* and *a.* [*< NL. Strepsiptera + -an*.] I. *n.* A strepsipter.

II. *a.* Same as *strepsipterous*.

strepsipterous (strep-sip'te-rūs), *a.* [*< NL. *strepsipterus*, *< Gr. στρέψειν* (aor. *στρέψαι*), twist, turn, + *πτερόν*, a wing.] Having twisted front wings, as a stylops; of or pertaining to the *Strepsiptera*; rhipipterous. Also *strepsipteran*, *strepsipteral*. See cut under *Stylops*.

strepsirrhinal, **strepsirrhinal** (strep-si-rī-nāl), *a.* [*< strepsirrhine + -al*.] Same as *strepsirrhine*.

strepsirrhine, **strepsirrhine** (strep'si-rin), *a.* and *n.* [*< NL. *strepsirrhinus*, *< Gr. στρέψειν* (aor. *στρέψαι*), turn, twist, + *ῥίς* (*ῥιν*), nose.] I. *a.* Having twisted or curved nostrils, as a lemur; of or pertaining to the *Strepsirrhini*; neither catarrhine nor platyrrhine, as a primate. Also *strepsorhine*.

II. *n.* Any lemur or prosimian; a member of the *Strepsirrhini*.

Strepsirrhini, **Strepsirrhini** (strep-si-rī-nī), *n. pl.* [NL. (Geoffroy): see *strepsirrhine*.] The lemuroid mammals, or lemurs: so called from the twisted nostrils, in distinction from *Catarrhini* and *Platyrrhini*. In these animals the nostrils are at the corners of the snout, and somewhat comma-shaped, as is usual in mammals, instead of having the more human character of those of the higher *Primates*. The term is exactly synonymous with *Prosimia* or *Lemuroidea*, excepting that in early usages of all three of these names of lemurs the so-called flying-lemurs (*Galeopithecidae*) were wrongly included, these being insectivorous and not primate mammals, now always excluded from the strepsirrhines. Also *Strepsirrhina*, *Strepsirrhina*, and *Strepsorhina*.

Streptanthus (strep-tan'thus), *n.* [NL. (Nuttall, 1825), so called from the greatly twisted claws of the petals; *< Gr. στρεπτός*, twisted (*< στρέφειν*, twist, turn), + *ἄνθος*, flower.] A genus of polypetalous plants, of the order *Cruciferae* and tribe *Arabideae*, distinguished from the type-genus *Arabis* by a calyx commonly of large size, longer and sometimes connate stamens, and petals usually borne on a twisted claw. There are about 16 species, natives of North America, and chiefly of the western United States. They are smooth annuals or perennials, with entire or lyrate leaves and commonly bractless flowers, which are purple or sometimes white or yellow, and in some species pendulous. *S. obtusifolius*, a pink-flowered species, has been called *Arkansas cabbage*.

streptobacteria (strep'tō-bak-tē-ri-ā), *n. pl.* [NL., *< Gr. στρεπτός*, twisted, + *NL. bacterium*.] A supposed bacterium, consisting of a chain of short rod-formed bacteria linked together. *Ziegler*, *Pathol. Anat.* (trans.), i. 185.

Streptocarpus (strep-tō-kār'pus), *n.* [NL. (Lindley, 1828), so called from the spirally twisted fruit; *< Gr. στρεπτός*, twisted, + *καρπός*, fruit.] A genus of tribopterous plants, of the order *Gesneraceae*, tribe *Cyrtandreae*, and subtribe *Didymocarpeae*. It is characterized by flowers with an elongated corolla-tube which is much enlarged above, and contains two perfect stamens and a linear ovary imperfectly four-celled by the protrusion of lobed placentae densely covered on their margins with ovules, and becoming a spirally twisted capsule which is linear and terete and splits into valves coherent at the base and apex. There are about 19 species, natives of South Africa and of Madagascar. They are woolly or downy herbs, chiefly with spreading radical leaves or with a single leaf (a persistent cotyledon), sometimes with a stem bearing opposite leaves. The handsome flowers are mostly pale purple or blue; they form a many-flowered cyme, or are borne few or singly upon their peduncle. *S. Dunnii*, a remarkable species from the Transvaal mountains, is cultivated for its peculiar solitary grayish-green leaf, prostrate on the ground and over 3 feet long, with thick fleshy veins and clothed beneath with close reddish down, and for its bright-red tubular decurved flowers, of which there are sometimes over one hundred on a scape at once. Several other species are in cultivation under glass, especially *S. Watsoni*, a hybrid with several large leaves and rich crimson flowers, and *S. Rezii*, with blue flowers. They are known as *Cape Primrose*.

streptococchemia, **streptococchaemia** (strep'tō-kō-kē'mi-ā), *n.* [NL., *< streptococci + Gr. αἷμα*, blood.] The presence of streptococci in the blood.

streptococci (strep-tō-kōk'si), *n. pl.* [NL., *< Gr. στρεπτός*, twisted, + *κόκκος*, a berry.] A chain of micrococci linked together, occurring in some specific diseases. *Ziegler*, *Pathol. Anat.* (trans.), i. 185.

Streptoneura (strep-tō-nū'rā), *n. pl.* [NL., neut. pl. of *streptoneurus*: see *streptoneurous*.] A branch of anisopleurous *Gastropoda*, in which the long loop of visceral nerves embracing the intestine is caught and twisted into a figure-of-8 by the torsion which the animal undergoes in its development. The *Streptoneura* are divided into two orders, *Zygobranchia* and *Azygobranchia*. They include all the anisopleurous gastropods except the opisthobranchs and pulmonifers. The nearest synonym is *Prosobranchiata*.

streptoneural (strep-tō-nū'rāl), *a.* [*< streptoneurous + -al*.] Same as *streptoneurous*.

streptoneurous (strep-tō-nū'rūs), *a.* [*< NL. *streptoneurus*, *< Gr. στρεπτός*, twisted, + *νεῖρον*, a nerve.] Having twisted (visceral) nerves; specifically, pertaining to the *Streptoneura*, or having their characters.

Streptopus (strep'tō-pus), *n.* [NL. (F. A. Michaux, 1803), so called from the abruptly bent flower-stalk; *< Gr. στρεπτός*, twisted, + *πούς* = *E. foot*.] A genus of monocotyledonous plants, of the order *Liliaceae* and tribe *Polygonatæ*. It is characterized by nodding solitary or twin axillary flowers, divided into six more or less spreading segments, with a filiform or columnar style which is three-cleft at the apex. There are 4 species, natives of Europe, North America, and temperate parts of Asia. They are rather delicate plants, from a short and densely fiber-bearing or a creeping rootstock, with a simple or sparingly branched stem, bearing numerous ovate or lanceolate alternate sessile or clasping leaves. The small rose-colored or whitish flowers hang upon slender recurved or reflexed peduncles, followed by small roundish berries with numerous pale oblong or curving striate seeds. They are known by the name *twisted-walk*, translating the genus name. *S. amplexifolius* is found in Europe, and together with *S. roseus*, in northern North America, and southward in the mountains.

streptospondylia (strep'tō-spon-dil'i-ān), *a.* Same as *streptospondylous*.

streptospondylous (strep-tō-spon-di-lus), *a.* [*< NL. *streptospondylus*, *< Gr. στρεπτός*, twisted + *σπόνδυλος*, *σπόνδυλος*, a vertebra.] Having the character of the vertebral articulations reversed, or supposed to be so, as in the genus *Streptospondylus*.

Streptospondylus (strep-tō-spon-di-lus), *n.* [NL. (Meyer): see *streptospondylous*.] A genus of fossil crocodiles, founded on remains represented by vertebrae of the Wealden and Oolitic formations. It was originally placed among the opisthocœlian *Crocodylia*, subsequently among the amphiocœlian. The genus agrees with such forms as *Teleosaurus*, which have the external nares terminal, and is placed by Huxley in the family *Teleosauridae*.

streptostylic (strep-tō-stil'ik), *a.* [*< NL. streptostylicus*, *< Gr. στρεπτός*, twisted, + *στυλος*, a pillar.] Having the quadrate bone freely articulated with the skull, as in ophidian and saurian reptiles; not monimostylic; of or pertaining to the *Streptostylia*.

Streptostylia (strep-tō-stil'i-kā), *n. pl.* [NL., neut. pl. of *streptostylicus*: see *streptostylic*.] Streptostylic reptiles, a prime division of ordinary reptiles (as snakes and lizards), having an articulated quadrate bone and a pair of extracloacal copulatory organs: opposed to *Monimostylia*. They were divided into *Ophi-*

dia and *Sauria* (including *Amphisbæna*). *Stan-*
nius, 1856.

Streptothrix (strep' tō-thriks), *n.* [NL. (F. Cohn), < Gr. στρεπτός, twisted, + ὄριξ, the hair.] A genus standing probably intermediate between the bacteria and the fungi proper. It comprises very minute, colorless, branching filaments, growing in interlacing masses like the mycelium of fungi. *S. foersteri* was found by Cohn in the concretions of the lacrimal canals of the eye.

stress¹ (stres), *v. t.* [*< OF. estreccier, estressier, estrechier, estroyssier, etc., straiten, contract, < ML. as if *strictiare, < L. strictus, pp. of stringere, draw together, compress; see stringent, strain¹, strict. Cf. distress.*] 1. To straiten; constrain; press; urge; hamper. [Rare.]

If the magistrate be so *stressed* that he cannot protect those that are pious and peaceable, the Lord help.
Waterhouse, Apol. for Learning, p. 165. (Latham.)

2. In *mech.*, to subject to a stress.

The theory of elastic solids . . . shows that when a solid is *stressed* the state of stress is completely determined when the amount and direction of the three principal stresses are known. *Thomson and Tait, Nat. Phil., § 832.*

3. To lay the stress, emphasis, or accent on; emphasize.

If he had eased his heart in *stressing* the first syllable, it was only temporary relief.

G. Meredith, The Egoist, xviii.

stress¹ (stres), *n.* [*< stress¹, v.*] 1. Constraining, urging, or impelling force; constraining power or influence; pressure; urgency; violence.

By *stress* of weather driven,
At last they landed. *Dryden, Æneid, l. 503.*

2. In *mech.*, an elastic force, whether in equilibrium with an external force or not; the force called into play by a strain. This word was introduced into mechanics by Rankine in 1855. In the following year Sir William Thomson used the word as synonymous with *pressure*, or an external force balanced by elastic forces. The terminology has been further confused by the use of Rankine's word *strain*, by Thomson and others, as a synonym for *deformation*. The words *stress* and *strain* are needed in the senses originally given to them by Rankine; while they both have familiar equivalents to which they have been wrested. At present, some writers use them in one way and some in the other.

In this paper the word *strain* will be used to denote the change of volume and figure constituting the deviation of a molecule of a solid from that condition which it preserves when free from the action of external forces; and the word *stress* will be used to denote the force, or combination of forces, which such a molecule exerts in tending to recover its free condition, and which, for a state of equilibrium, is equal and opposite to the combination of external forces applied to it.

Rankine, Axes of Elasticity, § 2.

A *stress* is an equilibrating application of force to a body. . . . It will be seen that I have deviated slightly from Mr. Rankine's definition of the word *stress*, as I have applied it to the direct action experienced by a body from the matter around it, and not, as proposed by him, to the elastic reaction of the body equal and opposite to that action.

Thomson, Phil. Trans., CLXVI. 487.

3. Stretch; strain; effort.

Though the faculties of the mind are improved by exercise, yet they must not be put to a *stress* beyond their strength. *Locke, Conduct of the Understanding, xxviii.*

4. Weight; importance; special force or significance; emphasis.

Consider how great a *stress* he laid upon this duty, . . . and how earnestly he recommended it. *Bp. Atterbury.*

This, on which the great *stress* of the business depends.
Locke, (Johnson.)

So rare the sweep, so nice the art,
That lays no *stress* on any part.

Lowell, Appledore.

5. The relative loudness with which certain syllables or parts of syllables are pronounced; emphasis in utterance; accent; ictus. In elocution, *initial, opening, or radical stress* is stress or emphasis at the beginning; *medial or median stress* is that in the middle; and *close, final, or vanishing stress* is stress at the end of a vowel-sound. The union of initial and final is *compound stress*, that of all three stresses is *thorough stress*.

—**Anticlastic stress.** See *anticlastic*. —**Axis of a stress.** one of three mutually perpendicular lines meeting at any point of a body in which a given stress tends to produce only elongation or contraction, without any tangential action. —**Center of stress.** See *center*. —**Close stress.** See def. 5. —**Composition of stresses.** See *composition of displacements, under composition*. —**Compound stress.** See def. 5. —**Concurrent stress and strain.** See *concurrent*. —**Final stress.** See def. 5. —**Homogeneous stress.** in *mech.*, a stress which affects alike all similar and similarly turned portions of matter within the boundary within which the stress is said to be homogeneous. —**Initial stress.** See def. 5. —**Lateral stress.** See *lateral*. —**Medial, median stress.** See def. 5. —**Normal stress.** a stress such that its tendency to change the relative positions of two parts of a solid always acts along the normals to the surface separating those parts. Such a stress consists of three extensive or compressive stresses along three rectangular axes. —**Orthogonal stress.** (a) Relatively to a homogeneous strain, a stress which neither increases nor diminishes the work of producing that strain. (b) Relatively to another stress, a stress

orthogonal to a strain perfectly concurrent with the other stress. —**Perfectly concurrent stress.** (a) Relatively to another stress, a stress equal to that other multiplied by a real number. (b) Relatively to an infinitesimal homogeneous strain, a stress such that, if the strain be so compounded with a rotation as to produce a pure strain, the motions of the particles upon the surface of a sphere relatively to its center represent in magnitude and direction the components of the stress. —**Principal tension of a stress.** a component of the stress along one of its axes. —**Radical stress.** See def. 5. —**Shearing stress.** a stress tending to produce a shear. —**Storm and stress.** See *storm*. —**Synclastic stress.** a stress upon a plate tending to give it a positive curvature. —**Tangential stress.** a stress such that its tendency to change the relative positions of two parts of a solid always acts along the tangents to the surface separating those parts. Such a stress consists of three shearing stresses having orthogonal axes. —**The principal axes of stress.** See *axis*.

—**Thorough stress.** See def. 5. —**Type of a stress.** See *type*. —**Vanishing stress.** an increasing loudness toward the end of a vowel-sound, producing the effect of a jerk. See def. 5. —**Syn. 6. Accent, etc.** See *emphasis*.

stress² (stres), *n.* [*< stress¹, v.*] In part an aphetic form of *distress*, *q. v.* 1. Distress; difficulty; extremity; pinch. [Obsolete or archaic.]

And help the pure that ar in *stress*
Oppress and heret mercies.
Lauder, Dedicte of Kyngis (E. E. T. S.), l. 469.

The agony and *stress*
Of pitying love. *Whittier, The Two Rabbits.*

2. In *law*: (a) The act of distraining; distress. (b) A former mode of taking up indictments for circuit courts.

stress-diagram (stres'di' a-gram), *n.* See *diagram*.

stressless (stres'les), *a.* [*< stress¹ + -less.*] Without stress; specifically, unaccented. *Encyc. Brit., XVIII. 788.*

stress-sheet (stres'shet), *n.* In bridge-building, same as *strain-sheet*.

stretch (strech), *v.* [*< ME. strecchen* (also unassimilated *strecken*, whence mod. E. dial. *streck, streck, var. strake*) (pret. *straughte, straight, strachte, strechte, *streichte, streigte, streichte, strehte*, pp. *straught, straucht, straight, streigt, streiht*), < AS. *streccean* (pret. *strehte*, pp. *streht*) = OFries. *strekka* = D. *strecken* = MLG. *strecken* = OHG. *strecchen*, MHG. G. *strecken* = Sw. *sträcka* = Dan. *strække*, draw out, stretch; connected with the adj. AS. *stræc, streac*, strong, violent (lit. stretched?), = MHG. *strac* (strack-), G. *strack*, straight; √ *strak*, perhaps orig. √ **srak*, a var. of √ *rak* in *retch², reck, reach¹*; otherwise akin to L. *stringere*, pp. *strictus*, draw tight (see *stringent, strain¹, strait¹*), and to Gr. *σπαγγός*, twisted tight. Hence *straight¹*, orig. pp. of *stretch*. Connection with *string, strong¹, etc.*, is uncertain.] I. *trans.* 1†. To draw (out); pull (out).

But stert vp stithly, *straight* out a swerde.
Destruction of Troy (E. E. T. S.), l. 1240.

2. To draw out to full length; extend; expand; spread: as, to *stretch* one's self; to *stretch* the wings; to *stretch* one's legs; hence, sometimes, to tighten; make tense or taut.

Redli. of your right arm that our rome *streyt*,
I see wel the significance.
William of Palerne (E. E. T. S.), l. 2957.

I have *stretched* my legs up Tottenham Hill to overtake you.
I. Walton, Complete Angler, p. 43.

3. To extend, or cause to reach or extend, lengthwise, or between specified points: as, to *stretch* a rope from one point to another.

My wings shall be
Stretch'd out no further then from thee to thee.
Quarles, Emblems, iii. 12.

Phœnicia is *stretched* by some . . . even to Egypt, all along that Sea-coast.
Purchas, Pilgrimage, p. 95.

A clothes-line with some clothes on it . . . is *stretched* between the trunks of some stunted willows.
Ruskin, Elements of Drawing, iii.

4. To draw out or extend in any direction by the application of force; draw out by tensile stress: as, to *stretch* cloth; to *stretch* a rubber band beyond its strength.

My business and that of my wife is to *stretch* new boots for millionaires.
Harper's Mag., LXXVIII. 623.

5. To distend or expand forcibly or violently; strain by the exercise of force; subject to stress, literally or figuratively.

Come, *stretch* thy chest, and let thy eyes spout blood.
Shak., T. and C., iv. 5. 10.

They that *stretch* his infallibility further do they know what.

6. To extend or strain too far; impair by straining; do violence to; exaggerate: as, to *stretch* the truth. — 7†. To exert; strain.

Till my veins
And sinews crack, I'll *stretch* my utmost strength.
Beau. and Fl. (?), Faithful Friends, iii. 3.

Stretching their best abilities to expresse their loues.
Quoted in *Capt. John Smith's Works, I. 182.*

8. To reach or hold out; put forth; extend.

He drough oute a letter that was wrapped in a cloth of silke, and *straught* it to the kynge.

Merlin (E. E. T. S.), iii. 639.

Stretch thine hand unto the poor. *Eccles. vii. 32.*

9. To cause to lie or fall extended at full length: as, to *stretch* an opponent on the ground by a blow. — 10. To hang. [Slang.]

The night before Larry was *stretched*.

R. Burrows, in Froude's Reliques, p. 267.

To *stretch* a point. Same as to *strain* a point (which see, under *point*).

II. *intrans.* 1. To extend; reach; be continuous over a distance; be drawn out in length or in breadth, or both; spread.

Twenty fadme of brede the armes *straughte*.
Chaucer, Knight's Tale, l. 2058.

The town *stretcheth* along the bottome of the haven, backt on the West with a rocky mountain.

Sandys, Travels, p. 10.

2. To be extended or to bear extension without breaking, as elastic substances; attain greater length: literally or figuratively.

The inner membrane . . . because it would *stretch* and yield, remained unbroken.

Boyle.

The terms . . . must be very elastic if they would *stretch* widely enough to include all the poems.

O. W. Holmes, Emerson, xiv.

stridulant (strid'ū-lant), *a.* [*< NL.* as if **stridulan*(-t)-s, ppr. of **stridulare*: see *stridulate*.] Strident or stridulous, as an insect; capable of stridulating; specifically, of or pertaining to the *Stridulantiæ*.

Stridulantiæ (strid'ū-lan'shi-ā), *n. pl.* [*NL.* (Burmeister, 1835): see *stridulant*.] A group of hemipterous insects, including various forms which have the faculty of stridulating; specifically, the cicadas. See *Cicadidae*.

stridulate (strid'ū-lāt), *v. i.*; pret. and pp. *stridulated*, ppr. *stridulating*. [*< NL.* as if **stridulatus*, pp. of **stridulare*, < *L. stridulus*, giving a shrill sound, creaking: see *stridulous*.] To make a stridulous noise, as an insect; effect stridulation, as the cicada; grate, scrape, or creak with the organs of stridulation; shrill; chirr.

stridulating-organ (strid'ū-lā-ting-ōr'gan), *n.* In *entom.*, a finely wrinkled or file-like surface

or plate, frequently having a pearly luster, by friction of which against another surface brought into contact with it a creaking sound is produced. These organs are variously situated on the wings, elytra, legs, abdomen, thorax, and even the head.

stridulation (strid'ū-lā'shon), *n.* [*< stridulate + -ion*.] The act, process, or function of stridulating; the power of so doing, or the thin, harsh, creaking noise thus produced; a shrilling. Stridulation is effected by rubbing together hard or rough parts of the body, often specially modified in various ways for that purpose, being thus not vocalization or phonation. It is highly characteristic of many homopterous insects, as the cicadas; of many orthopterous insects, as various locusts or grasshoppers; and of some coleopterous insects, or beetles. It rarely occurs in lepidopterous insects, but has been observed in some butterflies and moths, and also in a few spiders, as of the genus *Theridion*. Those homopterous insects in which it is specially marked are named *Stridulantiæ*.

stridulator (strid'ū-lā-tor), *n.* [*< stridulate + -or*.] An insect which stridulates, shrills, or chirrs; that which is stridulatory.

stridulatory (strid'ū-lā-tō-ri), *a.* [*< stridulate + -ory*.] Pertaining to stridulators or stridulation; stridulant or stridulous; shrill or shrilling; chirring.

stridulous (strid'ū-lus), *a.* [*< L. stridulus*, creaking, rattling, hissing, < *stridere*, creak: see *strident*.] Making a small harsh sound; having a thin, squeaky sound; squeaky; creaking.

To make them [the old men] garrulous, as grasshoppers are *stridulous*. Chapman, *Iliad*, iii. Commentary.

Stridulous angina. Same as *laryngismus stridulus* (which see, under *laryngismus*).

Striet, *v. t.* A Middle English form of *strew*.
strife (strif'), *n.* [*< ME. strif*, < *OF. estrif*, < *Icel. strith*, strife, contention, pain, grief, = *Sw. Dan. strid*, combat, contention, = *OS. OFries. strid* = *D. strijd* = *OHG. MHG. strit*, *G. streit*, strife, = *OL. stlis* (gen. *stlit*), *L. lis* (lit-), strife, litigation (see *litigate*); from the verb, *Icel. stridha*, strive, contend, etc.: see *stride*. Cf. *strive*.] 1. A striving or effort to do one's best; earnest attempt or endeavor.
With *strife* to please you, day exceeding day.
Shak., *All's Well*, Epil.

2. Emulative contention or rivalry; active struggle for superiority; emulation.
Weep with equal *strife*
Who should weep most. Shak., *Lucrece*, l. 1791.
Thus gods contended (noble *strife*,
Worthy the heavenly mind!)
Who most should do to soften anxious life.
Congreve, *To the Earl of Godolphin*.

3. Antagonistic contention; contention characterized by anger or enmity; discord; conflict; quarrel: as, *strife* of the elements.
Sith for me ye fight, to me this grace
Both yield, to stay your deadly *strife* a space.
Spenser, *F. Q.*, II. vi. 33.
Twenty of them fought in this black *strife*.
Shak., *R. and J.*, iii. 1. 183.

To take strife, to enter into conflict.
For which he took with Rome and Cesar *strif*.
Chaucer, *Good Women*, l. 595.

= *Syn.* 2 and 3. *Strife*, *Contention*. These words agree in being very general, in having a good sense possible, and in seeming elevated or poetical when applied to the organized quarrels of war or to anything more than oral disputes. *Strife* is the stronger. *Contention* often indicates the more continued and methodical effort, and hence is more often the word for rivalry in effort to possess something. Such a rivalry, when definite in form and limited in time, is a *contest*: as, the *contests* of the Greek games. A *contention* that is forcible, violent, exhausting, or attended with real or figurative convulsions or contortions, is a *struggle*. See *battle*, *encounter*.

strifeful (strif'fūl), *a.* [*< strife + -ful*.] Full of strife; contentious; discordant.
But *strifful* mind and diverse qualtee
Drew them in partes, and each made others foe.
Spenser, *F. Q.*, II. ii. 13.

strig (strig), *n.* [Origin obscure.] 1. The footstalk of a flower, leaf, or fruit. *Cre*, *Dict.*, I. 302.—2. The tang of a sword-blade. See *tang*.

strig (strig), *v. t.*; pret. and pp. *strigged*, ppr. *strigging*. [*< strig, n.*] To remove the footstalk from: as, to *strig* currants.

striga (stri'gā), *n.*; pl. *strigæ* (-jē). [*NL.*, < *L. striga*, a swath, furrow, < *stringere*, draw tight, contract: see *strict*.] 1. In *bot.*, a sharp-pointed appressed bristle or hair-like scale, constituting a species of pubescence in plants.—2. In *zool.*, a streak or stripe; a *stria*.—3. In *arch.*, a flute of a column.

strigate (stri'gāt), *a.* [*< NL. *strigatus*, < *L. striga*, a furrow: see *striga*.] In *entom.*, same as *strigose*.

Striges (stri'jēz), *n. pl.* [*NL.*, < *L. strix* (strig-), an owl.] The owls, or *Strigidæ* in a broad

sense, as a suborder of *Raptores*; the nocturnal birds of prey. The physiognomy is peculiar by reason of the lateral expansion, lengthwise contraction, and diploic thickening of the skull, which is often asymmetrical. The eyes look forward, not laterally as in other birds, and are set in a peculiar disk of radiated feathers more or less completely formed, the feathers of the front being antrorse and adpressed, hiding the base of the bill. This is the facial disk, of which some radiating feathers of peculiar shape and texture constitute a ruff. The eyes are very large, with a peculiarly shaped eyeball, the cornea being protuberant, and with the sclerotic presenting a figure somewhat like a short acorn in its cup; the iris is capable of great movement, dilating and contracting the pupil more than is usual in birds. The ear-parts are very large, often unlike on opposite sides of the head, and provided with a movable external flap, the operculum, sometimes of great extent. The tufts of feathers, or so-called "ears," of many owls are the comiplumes or plumicorns. The bill is peculiar in that the nostrils open at the edge of the cere rather than in its substance, and the tomia are never toothed. There are four toes, of which the outer is versatile and shorter than the inner, with three of its joints together shorter than the fourth joint. The claws are all long, sharp, and curved, and the middle one is sometimes pectinate. The feathers lack aftershafts, and the plumage is peculiarly soft and blended, conferring a noiseless flight. The birds have no ambiens muscle, one pair of intrinsic syringeal muscles, a nude oil-gland, long clubbed caeca, short intestines, moderately muscular gizzard, capacious gullet without special crop, a peculiar structure of the tarsometatarsi and shoulder-joint, a manubriated and double-notched or entire sternum, basipterygoid processes, and spongy maxillopalatines and lacrymals. The suborder is divided into two families, *Strigidae* and *Aluonidae*. *Nyctaraptes* is a synonym. See cuts under *barn-owl*, *braccate*, *Bubo*, *hawk-owl*, *Otus*, *Nyctala*, *owl*, *scree-owl*, and *Strix*.

Strigidae (strij'i-dē), *n. pl.* [NL., < *Strix* (*Strig-*) + *-idae*.] The owls as a family of strigine or nocturnal birds of prey of the order *Raptores*: used in three senses. (a) Same as *Striges*, including all owls. (b) Same as *Aluonidae*, including only the barn-owls. (c) Including all owls excepting the *Aluonidae*. In this sense the distinctive characters are the furculum not ankylosed to the double-notched or fenestrated sternum, the middle claw not pectinate, and the facial disk incomplete or not triangular.

strigil (strij'il), *n.* [L. *strigilis* (= Gr. *στριγγίς*), a scraper, < *stringere*, draw tight, contract, touch, graze, stroke: see *strict*.] 1. An instrument of metal, ivory, or horn, used by the ancients for scraping the skin at the bath and in the gymnasium; a flesh-scraper. See cut under *Lysippus*.—2t. A flesh-brush, or a glove of hair-cloth, rough toweling, or other article used for stimulating the skin by rubbing.

You are treated after the eastern manner, washing with hot and cold water, with oyles, and being rubbed with a kind of *strigil* of seal's-skin, put on the operator's hand like a glove. *Ecelyn*, Diary, June, 1645.

strigilate (strij'i-lāt), *a.* [L. **strigilatus*, < *strigilis*, *q. v.*] In *entom.*, noting the front leg of a bee when it is furnished with a strigilis.

strigilis (strij'i-lis), *n.*; *pl.* *strigiles* (-lēz). [NL., < L. *strigilis*, a scraper: see *strigil*.] An organ on the first tarsal joint of a bee's fore leg, used to curry or clean the antennæ; a curry-comb: so called on account of the fringe of stiff hairs. At the end of the tibia is a movable spur, and on this spur an expanded membrane, the velum, which can be brought into contact with the strigilis, forming a circular orifice. The bee lays the antenna in the hollow of the strigilis, presses the velum of the spur upon it, and draws the antenna through the aperture thus formed.

strigilose (strij'i-lōs), *a.* [Also, erroneously, *strigillose*; *dim. of strigose*.] In *bot.*, minutely strigose.

strigine (strij'in), *a.* [L. *strix* (*strig-*) + *-ine*.] Owl-like; related to or resembling an owl. (a) Of or pertaining to the *Striges*, or *Strigidae* in a broad sense. (b) In a narrow sense, belonging to the *Strigidae* (c); distinguished from *aluine*.

strigment (strig'ment), *n.* [L. *strigmentum*, that which is scraped off, a scraping, < *stringere*, draw tight, contract, graze, stroke: see *strigil*.] Scraping; that which is scraped off.

Brassavolus and many other, beside the *strigments* and audacious adhesions from men's hands, acknowledge that nothing proceedeth from gold in the usual decoction thereof. *Sir T. Browne*, *Vulg. Err.*, ii. 5.

Strigopidae (stri-gop'i-dē), *n. pl.* [NL. (Bonaparte, 1849), < *Strigops* + *-idae*.] The *Strigopinae* regarded as a family apart from *Psittacidae*.

Strigopinae (strig-ō-pī-nē), *n. pl.* [NL., < *Strigops* + *-inae*.] The owl-parrots; a subfamily of *Psittacidae*, or the only subfamily of *Strigopidae*, represented by the genus *Strigops*. Also *Stringopinae*. O. Finsch.

Strigops (stri'gops), *n.* [NL. (G. R. Gray, 1845); also *Strigopsis*; also *Stringops* and *Stringopsis* (Van der Hoeven, 1856); < *Strix* (*Strig-*), a screech-owl, + Gr. *ὤψ*, eye, face.] A genus of *Psittacidae*, or made type of a family *Strigopidae*, containing the kakapo, or nocturnal flightless parrot of New Zealand, *S. habroptilus*; the owl-parrots: so called from the owl-like physiognomy. The sternal keel and the furculum are defective,

and the birds have not the power of flight. See cut under *owl-parrot*.

strigose (stri'gōs), *a.* [NL. *strigosus*, < *striga*, *q. v.*] 1. In *bot.*, rough with strigæ; beset with sharp-pointed and adpressed straight and stiff hairs or bristles: as, a *strigose* leaf or stem.—2. In *entom.*, streaked, or finely fluted; having fine, close parallel ridges or points, like the surface of a file. Also *strigulate*.

strigosus (stri'gus), *a.* [NL. *strigosus*: see *strigose*.] Same as *strigose*.

strike (stri:k), *v.*; *pret.* *struck*, *pp.* *struck*, *stricken* (obs. or dial. *strucken*), *ppr.* *striking*. [ME. *striken*, *stryken* (*pret.* *strok*, *stroke*, *strake*, *pp.* *striken*, *stricken*), < AS. *strican* (*pret.* *strāc*, *pp.* *stricen*), *go*, proceed, advance swiftly and smoothly, = (OFries. *strika* = D. *striken* = MLG. *striken*, LG. *striken* = OHG. *strihan* (strong), *streichen* (weak), MHG. *strichen*, *streichen*, G. *streichen*, smooth, rub, stroke, spread, strike; cf. Icel. *strjúka*, *strykja* = Sw. *stryka* = Dan. *stryge*, stroke, rub, wipe, Goth. *striks*, a stroke, tittle, akin to L. *stringere*, draw tight, graze, stroke, etc. (see *stringent*, *strain*, *strict*). Cf. *streak*¹, *streak*², *stroke*¹, *stroke*², *stroke*, etc. The senses of *strike* are much involved, the orig. sense 'go,' 'go along,' being commonly lost from view, or retained only as associated with the sense 'hit.' I. *intrans.* 1. To go; proceed; advance; in modern use, especially, to go or move suddenly, or with a sudden turn.

A mous that moche good conthe, as me thougte,
Stroke forth sternly, and stode biforn hem alle.

Milton, Reformation in Eng., I.

3. The line or cord of a bow.

The best bow that the yeman browthe
Roben set on a string.
Robin Hood and the Potter (Child's Ballads, V. 27).

4. In musical instruments, a tightly stretched cord or wire by the vibration of which tones are produced. The materials most used are gut, as in instruments of the lute and viol families, and brass or steel, as in the mandolin, the zither, and the pianoforte, though silk is also used. Silk strings are usually, and metal strings sometimes, wound with light silver wire to increase their weight; and such strings are often called *silver strings*. The pitch of the tone produced depends on the density, tension, and vibrating length of the string. The vibration is produced either by plucking or twanging with the finger, by a plectrum, or by a jack, as in the lute and harp families generally, and in the harpsichord; by the friction of a bow, as in the viol family; by a stream of air, as in the aeolian harp; or by the blow of a hammer, as in the dulcimer and the pianoforte. The strings are named either by the letters of the tones to which they are tuned, or by numbers. The smallest string of several representatives of the lute and viol families is often called the *chanterelle*, because commonly used for the principal melody or cantus. The tuning of strings is effected usually by means of tuning-pins or pegs, which in lutes and viols are placed in the head of the instrument, but in harps, zithers, and pianofortes in one side or rim of the frame. Not only has each instrument had a varying number of strings in different countries and at different periods, but the accordatura, or system of pitches, to which they are tuned has also varied. The vibrating length of the strings in instruments of the lute and viol families may be diminished, and the pitch of their tones raised, by pressing them with the fingers of the left hand against the finger-board. The exact places for such shortening or "stopping" are sometimes marked by frets, as in the guitar and also in the zither. The modern harp is provided with a mechanism for raising the pitch of certain sets of strings one or two semitones by means of pedals.

Of instruments of strings in accord
Herde I so pleye a ravynshing swetnesse.
Chaucer, Parliament of Fowls, l. 197.

Ye'll take a lock o' my yellow hair, . . .
Ye'll make a string to your fiddle there.
The Bonny Bower o' London (Child's Ballads, II. 362).
There's not a string attuned to mirth
But has its chord in Melancholy.
Hood, Melancholy.

5. *pl.* Stringed instruments, especially the stringed instruments of a band or orchestra taken collectively—that is, violins, violas, violoncellos, and double basses—in distinction from the wind and the percussives.

stripulose (stripl'ü-lös), *a.* In *entom.*, covered with coarse, decumbent hairs, as the elytra of certain beetles.

stripy (stri'pi), *a.* Stripe-like; occurring in stripes; marked by streaks or stripes.

Strisores (stri-sö-réz), *n. pl.* [*NL.*; origin obscure.] An artificial order or suborder of birds, including a number of picarian families. It was divided by Cabanis into *Macrochires* (the humming-birds, swifts, and goatsuckers) and *Amphibolæ* (the colies, toura-cous, and hoatzins). [*Not in use.*]

stritchel (strich'el), *n.* An assimilated form of *strickle*.

strive (striv), *v. i.*; pret. *strove*, pp. *striven* (formerly also *strived*, Rom. xv. 20), ppr. *striving*. [*< ME. striven, stryven, strifen* (orig. a

weak verb, pret. *strived*, afterward conformed to the analogy of strong verbs like *drive*, pret. *drove*, with pret. *strof, strore*, pp. *striven*). [*< OF. estriver = Pr. estribar, strive, prob. < OHG. *striban, in deriv. weak verb, MHG. G. streben = D. streven = MLG. streren, LG. streuen = Sw. sträffa = Dan. stræbe, strive; cf. Icel. stríðu = Sw. strida, strive: see stride, and cf. strife.*] 1. To make strenuous effort; endeavor earnestly; labor hard; do one's endeavor; try earnestly and persistently: followed by an infinitive: as, he *strove* hard to win the prize; to *strive* to excel; to *strive* to pay one's way.

Strive to enter in at the strait gate. Luke xiii. 24.
I'll *strive* . . . to take a nap. Shak., Rich. III., v. 3. 104.

When there is perfect sincerity—when each man is true to himself—when everyone *strives* to realize what he thinks the highest rectitude—then must all things prosper. H. Spencer, Social Statics, p. 518.

2. To contend; struggle; battle; fight: followed by *with*, *against*, or *for*: as, to *strive against* fate; to *strive for* the truth.

First *with* the bettir be waar for to *strive*,
Agens thi felaw noo quarel thou contrive.
Babees Book (E. E. T. S.), p. 58.

While Ieavs *strove* with Sathans strong Temptations.
Sylvester, tr. of Du Bartas's Weeks, I. 1.

Against the Delyt 'tis hard to *strive*.
Prior, Second Hymn of Callimachus.

Striving with love and hate, *with* life and death,
With hope that lies, and fear that threateneth.
William Morris, Earthly Paradise, II. 151.

3. To vie; contend for preëminence: with *with*.

With the rose colour *stroof* hire hewe.
Chaucer, Knight's Tale, I. 180.

Nor that sweet grove
Of Daphne by Orontes, and the inspired
Castalian spring, might *with* this Paradise
Of Eden *strive*. Milton, P. L., iv. 275.

4. To quarrel or contend with one another; be at variance one with another, or come to be so; be in contention, dispute, or altercation.

Do as adversaries do in law,
Strive mightily, but eat and drink as friends.
Shak., T. of the S., I. 2. 270.

5. To oppose by contrariety of qualities: with *with*.

Now private pity *strove* with publick hate,
Reason with rage, and eloquence with fate.
Sir J. Denham, On the Earl of Strafford's Trial
[and Death.]

strob (strob), *n.* [*< Gr. στροβός, a twisting or whirling round, < στρέφειν, turn, twist. Cf. strobile, strophe.*] The angular velocity of one radian per second.

strobic (strob'ik), *a.* [*< strob + -ic.*] Appearing to spin.—**Strobic circles,** a number of circles drawn concentrically which appear to spin round when they are moved about.

strobila (strö-bi-lä), *n.*; *pl. strobilæ* (-lë). [*NL.*; *< Gr. στροβίλη, a plug of lint like a pine-cone, cf. στροβίλος, anything twisted, a pine-cone, etc.: see strobile.*] In *zool.*: (a) In *Hydrozoa*, a stage in the development of a discophoran, super-vening upon the scyphistoma or hydra-tuba stage by the development of ephyrae, and before these become detached from one another and from the stalk upon which they grow. See *ephyra*, 1, and *scyphistoma*.

(b) In *Vermes*, a segmented tapeworm; the chain of zooids formed by a scolex and the proglottides which have successively budded from it. (c) [*cap.*] [*NL.*] A supposed genus of aculephs, based on the strobiliform stage of certain hydrozoans. *Nars, 1835.*

(d) [*cap.*] [*NL.*] In *entom.*, a genus of lepidopterous insects. *Sodoffsky, 1837.*

strobilaceous (strob-i-lä'-shius), *a.* [*< strobile + -aceous.*] 1. Resembling a strobile; strobiliform.—2. Bearing strobiles; strobiliferous.

strobilæ, n. Plural of *strobila*.

Strobilanthes (strob-i-lan'thëz), *n.* [*NL.* (Blume, 1825), so called from the inflorescence, usually cone-like when in bud; *< Gr. στροβίλος, a pine-cone, + άνθος, a flower.*] A genus of gamopetalous plants, of the order *Acanthaceæ* and tribe *Ruellieæ*. It is characterized by flowers with acute linear calyx-lobes, a somewhat equally five-lobed corolla with a short or long and slender tube, stamens four and perfect or two perfect and two rudimentary, and two or perhaps rarely three ovules in each of the two ovary-cells. There are about 180 species, natives mostly of India, scantily represented in China, Japan, and Malaysia, with one species in tropical Africa. They are herbs or shrubs, commonly erect, bearing opposite entire or toothed leaves, which are in a few species very unequal in the same pair. Their usually rather large and handsome flowers are often blue or purple, and form dense or interrupted spikes which are terminal or crowded in the axils, and are sometimes replaced by a panicle or cyme. The fruit is an oblong or linear capsule slightly contracted at the base. Several species are cultivated for ornament, sometimes under the name *cone-head*. *S. flaccidifolius* yields the room, or mayyee dye, of India, etc. See *room²*, and cut under *stoma*, 2.

strobilate (strob'i-lät), *v. i.*; pret. and pp. *strobilated*, ppr. *strobilating*. [*< strobile + -ate².*] To form or develop strobiles; be or become a strobile; effect strobilation.

strobilation (strob-i-lä'-shon), *n.* [*< strobilate + -ion.*] 1. Formation or production of strobiles; metameric division of a scyphistoma or hydra tuba into medusæ.—2. Gemination of the successive links or joints of a tapeworm; also, the transverse fission of various worms.

strobile (strob'il), *n.* [= *F. strobile* = *G. strobil*, a pine-cone, *< LL. strobilus*, a pine-cone, *< Gr. στροβίλος, anything twisted, a pine-cone, a top, sea-snail, whirlpool, twist or turn, etc., < στρέφειν, turn, twist, spin.*] 1. In *bot.*, a cone (which see, and cuts under *Lepidostrobus* and *pericarp*). Also *strobilus*.

With reference to fructification, the form of Lycopodites Milleri renders it certain that it must have borne *strobiles* at the ends of its branchlets, or some substitute for these, and not naked spore-cases like those of Psilophyton.

Dawson, Geol. Hist. of Plants, p. 101.

2. In *zool.*, a strobila. *Quain, Med. Diet., p. 1587.*

[NL., < L. *stroma*, < Gr. *σπῶμα* (*spōma*), a covering, a coverlet, < *σπῶνναι*, *stropenninai*, spread, spread out, strew; see *strew*, *stratum*.] 1. In anat.: The sustentacular tissue or substance of a part or organ, usually of connective tissue.—2. In bot.: (a) In fungi, a variously shaped more or less continuous layer of cellular tissue, in which perithecia or other organs of fructification are immersed. Sometimes called *receptacle*. See cut under *ergot*. (b) In vegetable physiology, the solid matter remaining after all the fluid has been expressed from protoplasm. *Goodale*.—**Cancer stroma**, the interlacing connective-tissue framework containing the alveoli of cancer-cells.—**Intertubular stroma**, the connective-tissue framework which supports the tubules of the kidney, and which contains the blood-vessels, lymphatics, nerves, etc.—**Stroma fibrin**, fibrin formed from the stroma of the blood-corpuscles.—**Stroma of red blood-corpuscles**, that part of those corpuscles which remains after the hemoglobin is removed.—**Stroma of the ovary**, the connective tissue of the ovary. Formerly the ova were supposed to originate in this stroma. They are, however, derived from the investing cell-layer or germ-epithelium of the ovary, from which multitudinous cells, some of them to become ova, penetrate the stroma.

Stromateidae (strō-mā-tē'i-dē), *n. pl.* [NL., < *Stromateus* + *-idae*.] A family of acanthopterygian fishes, typified by the genus *Stromateus*, related to the scombroids and carangoids.

They have large denticulous or saciform gill-rakers on the last branchial arch, extending into the esophagus; a single long dorsal fin with a few spines in front; and the ventrals, when present, generally under the pectorals but in the typical forms more or less reduced, or absent. They are small fishes of most warm seas, of about 6 genera and 25 species, divided into *Stromateinae* and *Centrolophinae*. Also *Stromateina*, as a division of *Scombroideae*.

stromateine (strō-mat'ē-in), *a. and n.* [*< Stromateus* + *-ine*.] 1. *a.* Of, or having characters of, the *Stromateidae*.

II. *n.* A fish of the family *Stromateidae*.

stromateoid (strō-mat'ē-oid), *a. and n.* [*< Stromateus* + *-oid*.] Same as *stromateine*.

Stromateoides (strō-mā-tē-oi'dēz), *n.* [NL. (*Bleeker*, 1857), < *Stromateus* + Gr. *εἶδος*, form.] A genus of stromateoid fishes, with restricted branchial apertures. *S. sinensis* is the white and *S. cinereus* the gray pomfret. See cut under *pomfret*.

Stromateus (strō-mat'ē-us), *n.* [NL. (*Linnaeus*, 1748), < Gr. *στροματεῖς*, a coverlet, a bag for bed-clothes (in pl. patchwork), a kind of fish, < *σπῶμα* (*spōma*), a coverlet or spread (in allusion to the color of the typical species, supposed to resemble that of a spread or carpet): see *stroma*.] The typical genus of the family *Stromateidae*, in which the ventral fins are lost in the adult, the caudal peduncle is not keeled, and the gill-membranes are free from the isthmus. There are a number of species, of tropical to warm temperate seas. One of the best-known is *S. triacanthus* of the Atlantic coast of the United States, variously called *butter-fish*, *harvest-fish*, and *dollar-fish*. (See cut under *butter-fish*.) A very similar species is *S. alpeidotus*; another is *S. similis* of the Californian coast, highly esteemed as a food-fish, known in the markets of San Francisco as the *pompano*. See *pompano*, 2.

stromatic¹ (strō-mat'ik), *a.* [*< stroma* (t) + *-ic*.] In anat., physiol., and bot., of the nature of a stroma; resembling a stroma; stromatous.

stromatic² (strō-mat'ik), *a.* [*< Gr. Στροματά*, a false reading for *στροματεῖς*, i. e. 'patchwork,' 'miscellany,' the title of a work by Clement of Alexandria; pl. of *στροματεῖς*, a coverlet: see *Stromateus*.] Miscellaneous; composed of different kinds. [Rare.]

stromatiform (strō-mā-ti-fōrm), *a.* [*< NL. stroma* (t), *q. v.*, + L. *forma*, form.] In bot., having the form of a stroma.

Stromatopora (strō-mā-top'ō-rā), *n.* [NL. (*De Blainville*, 1830), < Gr. *σπῶμα* (t), a covering, + *πόρος*, pore.] 1. The typical genus of *Stromatoporidae*.—2. [*l. c.*] A member of this genus. **Stromatoporidae** (strō-mā-tō-por'i-dē), *n. pl.* [NL., < *Stromatopora* + *-idae*.] A family of hydrocoralline corals, typified by the genus *Stromatopora*. They are all of Paleozoic age. Also *Stromatoporoidea*.

stromatoporoid (strō-mā-top'ō-roid), *a. and n.* [*< Stromatopora* + *-oid*.] 1. *a.* Pertaining to the *Stromatoporidae*, or having their characters.

II. *n.* A member of the *Stromatoporidae*. **stromatous** (strō-mā-tus), *a.* [*< stroma* (t) + *-ous*.] 1. Of or pertaining to stroma.—2. In bot., bearing or producing a stroma.

stromb (strom), *n.* [*< NL. Strombus*.] A conch of the family *Strombidae*, and especially of the genus *Strombus*; a wing-shell; a fountain-shell. The best-known stromb is *S. gigas*, whose delicate pink shell is used for cameo-cutting, and also ground up in the manufacture of some fine kinds of porcelain, for which purposes it is said that 300,000 were imported into England in one year from the Bahamas. Another well-known species is *S. pugilis*, so called from the red, as if bloody, mouth. See also cut under *wing-shell*.

Strombidae (strom'bi-dē), *n. pl.* [NL., < *Strombus* + *-idae*.] A family of teneioglossate siphonostomatous peccinibranchiate gastropods, typified by the genus *Strombus*; the strombs or wing-shells. The animal has an elongate annulated muzzle. The eyes are highly developed, at the ends of thick elongated peduncles, from which the inner sides of the tentacles, when present, originate. The foot is compressed, rather small, and adapted for leaping. The shell is mostly obconic, with a rather short conic spire and an elongate and narrow aperture; a horny claw-like operculum, serrated along the outer margin, is generally developed. Numerous species live in tropical seas, and some of them attain a large size. The largest is *Strombus gigas*, the giant conch of the West Indies, much used for cameos, and also as an ornament, especially around fountains, whence it is known as the *fountain-shell*. The family is divided into *Strombinae* and *Scaphytinae*. See cuts under *Rostellaria*, *scorpion-shell*, and *stromb*.

A Wing-shell or Stromb
(*Strombus pugilis*).

Strombidium (strom-bid'i-um), *n.* [NL. (*Claparède* and *Lachmann*, 1859), < *Strombus* + Gr. dim. *-idium*.] A genus of peritrichous ciliate infusorians, of the family *Halteriidae*. These interesting animalcules inhabit both salt and fresh water, and, though there are no springing-hairs, they are noted for such activity and energy of movement that their examination is difficult. They are free-swimming, of globose or turbinate form, with eccentric terminal oral aperture associated with a spiral wreath of erect cirri; the endoplasm and contractile vacuole are conspicuous. Numerous species are described.

strombiform (strom'bi-fōrm), *a.* [*< NL. strombus* + L. *forma*, form.] Shaped like a wing-shell; having the form of a stromb; belonging or related to the *Strombidae*.

strombine (strom'bin), *a. and n.* [*< Strombus* + *-ine*.] 1. *a.* Of, or having characters of, the *Strombidae*; stromboid.

II. *n.* A stromboid; a gastropod of the family *Strombidae*.

strombite (strom'bit), *n.* [*< stromb* + *-ite*.] A fossil stromb, or some similar shell.

stromboid (strom'boid), *a. and n.* [*< stromb* + *-oid*.] 1. *a.* Resembling a stromb; pertaining or related to the *Strombidae*; strombiform.

II. *n.* A strombine or stromb.

strombuliform (strom'-bū-li-fōrm), *a.* [*< NL. "strombulus"*, dim. of **strombus*, a top (see *Strombus*), + L. *forma*, form.] 1. In geol., formed like a top.—2.

Strombuliform Pods.
a. Of *Medicago orbiculata*.
b. Of *Medicago apiculata*.
c. Of *Medicago citiaria*.

In bot., twisted or coiled into the form of a screw or helix, as the legumes of the screw-bean, some species of *Medicago*, etc.

Strombus (strom'bus), *n.* [NL. (*Linnaeus*, 1758), < L. *strombus*, a kind of spiral snail, < Gr. *σπῶμα*, a top, a pine-cone, a snail, anything twisted or whorled, < *σπῶνναι*, twist, turn: see *strobile*.] The typical genus of *Strombidae*, formerly conterminous with the family, now restricted to such species as the West Indian giant stromb, *S. gigas*; the wing-shells, fountain-shells, or strombs. They are active, predatory, and carnivorous marine shells, much used for ornamental purposes. Also called *Galus*. See cut at *stromb*.

stromeyerine (strō'mi-er-in), *n.* [*As stromeyer* (ite) + *-ine*.] Same as *stromeyerite*.

stromeyerite (strō'mi-er-it), *n.* [Named after Fr. *Stromeyer*, a German chemist and mineralogist (died 1835).] A sulphid of silver and copper occurring in crystals near chalcocite in form, also massive. It has a dark steel-gray color and metallic luster.

strommell, *n.* An obsolete form of *strammel*.

strond, *n.* An obsolete form of *strand*.

strong¹ (strōng), *a.* [Se. *strang*; < ME. *strong*, *stronge*, *strang* (compar. *strenger*, *strongere*), < AS. *strang*, *strong* (compar. *strengra*, *strongra*), *strong*, mighty, = OS. *strang* = MD. *strenge*, *strength*, D. *streng* = MLG. *LG. strenge* = OHG. *strang*, *strangi*, *strengi*, MHG. *strenge*, G. *streng*, hard, rigid, severe, strict, = Icel. *strangr* = Sw. *sträng* = Dan. *streng*, *strong*; connections uncertain; perhaps related to *string*. Cf. L. *stringere*, draw tight (see *stringent*, *strain*, *strict*); Gr. *σπῶνναι*, tightly twisted, *σπῶνναι*, a halter, etc. (see *strangle*). No connection with *stark*. Hence *strength*, *strengthen*, etc.] 1. Possessing, exerting, or imparting force or energy, physical or moral, in a general sense; powerful; forcible; effective; capable; able to do or to suffer.

In gram., inflected — (a) as a verb, by a change of the radical vowel instead of by regular syllabic addition: opposed to *weak*: thus, *find* (*found*), *spoke* (*spake* or *spoke*), *strike* (*struck*, *stricken*), and *swim* (*swam*, *swum*) are *strong* verbs; (b) as a noun or an adjective, with fuller retention of older case-distinctions: thus, German *Buch* is called of *strong* declension, and *Held* of *weak*. *Strong* and *weak* are purely fanciful terms, introduced by J. Grimm; they belong properly to Germanic words alone, but are occasionally applied to similar phenomena in other languages also.

20. In photog., same as *dense*, 3.—*Strong arm* or *hand*, figuratively, great power or force: forcible or violent means; overpowering vigor; the force of arms: as, to overcome opposition with a *strong arm*; "a *strong hand*," *Ex* vi. 1.

It was their meaning to take what they needed by *strong-hand*.

Raleigh.

Strong box, a strongly made case or chest for the preservation of money and other things of great value in small compass.—*Strong double refraction*, in optics. See *refraction*, 1.—*Strong drink*, election, place. See the nouns.—*Strong faints*. See *faint*, 2.—*Strong room*, a fire-proof and burglar-proof apartment in which to keep valuables.—*Strong water*. (a) Distilled spirit of any sort: generally in the plural: as, a draught of *strong waters*.

In the time of our fast, two of our landmen pierced a runlet of *strong water*, and stole some of it.

Winthrop, Hist. New England, I. 4.

(b) Aqua fortis, or some other strong biting acid.

Metals themselves do receive in readily *strong waters*; and *strong waters* do readily pierce into metals and stones; and . . . [some] *strong waters* will touch upon gold, that will not touch upon silver.

Bacon, Nat. Hist., § 800.

= *Syn*. 2. *Sturdy*, *Stout*, etc. (see *robust*); hardy, sinewy.—3. Potent.—11. Tenacious, tough.—13. Impregnable.—14. Vivid.—15. Pungent, sharp.

*strong*¹ (stróng), *adv.* [*<* ME. *strong*, *stronge*; *<* strong¹, *a.*] Strongly; very; exceedingly. [Obsolete except in the slang phrase below.]

I will to-morrow go to an Abbey, and feyne me *stronge* aike.

Merlin (E. E. T. S.), I. 52.

To go or come it *strong*, to do a thing with energy and perseverance. [Slang.]

*strong*². An obsolete past participle of *string*.

Spenser, Virgil's Gnat, I. 16.

strong-back (stróng'bák), *n.* *Naut.*: (a) A piece of wood or iron over the windlass, to trice the chain up to when the windlass is to be used for any purpose. (b) A spar across boat-davits, to which the boat is secured at sea.

strongbark (stróng'bärk), *n.* A tree or shrub of the boraginaceous genus *Bourreria*, which belongs to the West Indies and tropical America. One species, *B. Havanensis*, which extends into Florida, is a small tree or shrub with a hard, fine, and beautiful wood of a brown color streaked with orange; the larger trees, however, are hollow and defective.

strong-barred (stróng'bärd), *a.* Strongly barred; tightly fastened. *Shak.*, K. John, II. 1. 370.

strong-based (stróng'bäst), *a.* Strongly or firmly based. *Shak.*, Tempest, V. 1. 46.

strong-besieged (stróng'bê-séj'd), *a.* Strongly besieged. *Shak.*, Lucrece, I. 1429.

strong-bonded (stróng'bon'ded), *a.* Strongly bound or secured; made strongly binding. *Shak.*, Lover's Complaint, I. 279. [Rare.]

strong-fixed (stróng'fíks't), *a.* Strongly fixed; firmly established. *Shak.*, 1 Hen. VI., II. 5. 102.

stronghand (stróng'hánd'), *n.* Violence; force; power: a contraction of the phrase *by the strong hand*. See *strong arm* or *hand*, under *strong*.

stronghold (stróng'höld), *n.* A fastness; a fort; a fortified place; a place or position of security: often used figuratively, and formerly as two words.

David took the *strong hold* of Zion.

2 Sam. v. 7.

strong-knit (stróng'nít), *a.* Strongly or well knit; firmly joined or compacted.

For strokes received, and many blows repaid,

Have robb'd my *strong-knit* sinews of their strength.

Shak., 3 Hen. VI., II. 3. 4.

strongle (stróng'gl), *n.* A strongyle. *T. S. Cobbold*.

strongly (stróng'li), *adv.* [*<* ME. *strongly*, *strongly*, *strongliche*, *strongliche*; *<* AS. *stronglice*, *strong*, *<* *strangle*, *strong*, *<* *strang*, *strong*: see *strong*¹ and *-ly*.] In a strong manner, in any sense of the word *strong*.

That Cyter [Cassay] is *strongliche* enhabited with peple, in so moche that in on House men naken 10 Housholders.

Manderly, Travels, p. 209.

Fly, fly; delay

J. Beaumont, Psyche, I. 44.

strongman's-weed (stróng'manz-wéd), *n.* See *Petiveria*.

strong-minded (stróng'mín'ded), *a.* 1. Having a strong or vigorous mind.—2. Not in accordance with the female character or manners; unfeminine: applied ironically to women claiming the privileges and opportunities of men.

strong-mindedness (stróng'mín'ded-nes), *n.* The character or quality of being strong-minded, especially as used of women.

strong-tempered (stróng'tem'pér'd), *a.* Made strong by tempering; strongly tempered. *Shak.*, Venus and Adonis, I. 111.

strongylate (strón'ji-lát), *a.* [*<* *strongyle* + *-ate*.] Having the character of a strongyle, as a sponge-spicule; simply spicular, with blunt ends. *Sollas*.

strongyle (strón'jil), *n.* [*<* NL. *strongylus* (see *Strongylus*), *<* Gr. *στρογγύλος*, round, spherical, *<* *στρογγύς*, draw tight: see *strangle*.] 1. A spicule of the monaxon biradiate type, with each end rounded off; a strongylate sponge-spicule. It is simply a rhabdus whose two ends are blunt instead of sharp. A strongyle blunt at one end and sharp at the other becomes a strongyloxe. *Sollas*.

2. In *Fermes*, a nematoid or threadworm of the genus *Strongylus* in a broad sense; a strongylid. There are many species. See *Strongylidæ*.

Strongylia (strón'jil'i-ä), *n. pl.* [NL., *<* Gr. *στρογγύλος*, round, spherical: see *strangle*.] A suborder of chilognath myriapods, with manducatory mouth, and sexual organs opening in the anterior part of the body. It includes the families *Polyxenidæ*, *Polydesmidæ*, *Iulidæ*, and *Lysioptelidæ*. *H. C. Wood*, 1865.

strongylid (strón'jil'id), *a.* and *n.* Same as *strongylid*.

Strongylidæ (strón'jil'i-dē), *n. pl.* [NL., *<* *Strongylus* + *-idæ*.] A family of endoparasitic nematoid worms, typified by the genus *Strongylus*, and containing about 10 other genera.

They are formidable parasites, sometimes attaining a length of 3 feet, though usually much smaller than this. They are cylindrical, and more or less elongated and filiform: the mouth is oval, circular, or triangular, and armed or unarmed; and the tail of the male is furnished with a bursa or pouch, or a pair of membranous lobes, and usually a pair of protruding spicules. The female is commonly larger than the male. *Strongylus bronchialis* is the lung-strongyle of man: the female is an inch long, the male half that size. *S. armatus* infests the horse: *S. micrurus* and *S. contortus* are found in ruminants, as cattle and sheep. *Eustrongylus gigas* is the giant strongyle of the kidney, the largest known endoparasite of this kind, the male being about a foot long, the female a yard or more. *Strongylus quadridentatus* or *Sclerostoma duodenale* infests the human intestine, and a similar strongyle, *Syngamus trachealis*, causes the gapes in poultry, occurring in great numbers in the air-passages.

Strongylocentrotus (strón'ji-lō-sen-trō'tus), *n.* [NL. (Brandt), *<* Gr. *στρογγύλος*, round,

spherical, + *κεντροτός*, < *κέντρον*, point, center: see *center*¹.] A genus of regular sea-urchins,

Common New England Sea-urchin (*Strongylocentrotus drobachianus*).

of the family *Echinidae*. One of the commonest and best-known sea-urchins of the Atlantic coast of the United States is *S. drobachianus*.

strongyloid (stron'ji-loid), *a.* and *n.* [*< strongyle + -oid.*] *1. a.* Like a strongyle; related to the genus *Strongylus*; belonging to the *Strongylidae*.

II. n. A strongyle, or some similar nematoid.

strongyloxea (stron-ji-lok'sē-ū), *n.*; pl. *strongyloxeae* (-ē). [*NL., < Gr. στρογγύλος*, round, + *ὄξις*, sharp.] A strongyle blunt at one end and sharp at the other; a strongyloxeate sponge-spicule. *Encyc. Brit.*, XXII, 417.

strongyloxeate (stron-ji-lok'sē-āt), *a.* [*As strongyloxea + -ate.*] Blunt at one end and sharp at the other, as a sponge-spicule of the *rhabdus* type: having the character of a strongyloxea. *Nollas*.

Strongylus (stron'ji-lus), *n.* [*NL., < Gr. στρογγύλος*, round, spherical, + *σπάγγω*, draw tight, squeeze: see *strangle*.] *1.* The typical genus of the family *Strongylidae*. *Müller*, 1780.—*2.* [*l. c.*; pl. *strongyli* (-li).] In sponges, a strongyle.

strontia (stron'shi-ū), *n.* [*NL. (Klaproth), < strontium, q. v.*] The monoxid of strontium, SrO, an alkaline earth which when pure is an infusible grayish-white powder having an acrid burning taste. It is soluble in water with evolution of heat, slaking into a hydrate, Sr(OH)₂, which is quite soluble and deposits from its solution crystals of the hydrate containing eight molecules of water of crystallization. The hydrate has a strong alkaline reaction, and is more caustic than lime, but less so than the alkalis. Strontia does not occur native, but is prepared by igniting the carbonate, the mineral strontianite.

strontian (stron'shi-an), *n.* and *a.* [*< strontium + -an.*] *1. n.* Native strontium carbonate; strontianite; hence, also, strontia, and sometimes strontium. [*Indefinite and rare.*]

II. a. Pertaining to or containing strontia or strontium.—**Strontian yellow**, a color formed by adding potassium chromate to a solution of a strontium salt.

strontianiferous (stron'shi-a-nif'e-rus), *a.* [*< strontian + -iferous.*] Containing strontian. *Philos. Mag.*, 5th ser., XXV, 238.

strontianite (stron'shi-an-it), *n.* [*< strontian + -ite.*] Native strontium carbonate, a mineral that occurs massive, fibrous, stellated, and rarely in orthorhombic crystals resembling those of aragonite in form. It varies in color from white to yellow and pale green. It was first discovered in the lead-mines of strontian, in Argyllshire, Scotland.

strontic (stron'tik), *a.* [*< strontia + -ic.*] Same as strontianite.

strontites (stron-ti'tēz), *n.* [*NL., < stronti(um) + -ites.*] Same as *strontia*: so named by Dr. Hope, who first obtained this earth from strontianite, or native carbonate of strontium.

strontitic (stron-tit'ik), *a.* [*< NL. strontites + -ic.*] Pertaining to or derived from strontia or strontium.

strontium (stron'shi-um), *n.* [*NL., < Strontian, in Argyllshire, Scotland.*] Chemical symbol, Sr; atomic weight, 87.37; specific gravity, 2.54. A dark-yellow metal, less lustrous than barium, malleable, and fusible at a red heat. When heated in air, it burns with a bright flame to the oxid. It decomposes water at ordinary temperatures, evolving hydrogen, and uniting with the oxygen of the water to form the oxid strontia. It does not occur native. The chief strontium minerals are the carbonate (strontianite) and the sulphate (celestine). Strontium also occurs as a silicate in the mineral brewsterite. It has been detected in the waters of various mineral springs, as well as in seawater, and in the ashes of some marine plants. Salts of strontium are chiefly used in pyrotechny, imparting an intense red color to flames.

strook (strük). An old preterit of *strike*. *Pope*, *Iliad*, xxi, 498.

stroot (strüt), *r.* An obsolete or dialectal form of *strut*¹.

strop (strop), *n.* [The older and more correct form of *strap*; < ME. *strop*, *strobe*, < AS. *stropp* (= D. *strop*, etc.), < L. *stroppus*, *struppus*, a strap: see *strap*.] *1.* Same as *strap*. Specifi-

cally—*2.* A strap or strip of leather, thick canvas, or other flexible material, suitably prepared for smoothing the edge of a razor drawn over it while it is attached by one end and held in the hand by the other; hence also, by extension, a two-sided or four-sided piece of wood, with a handle and a casing, having strips of leather of differing surfaces affixed to two sides, and the two other sides, when (as more commonly) present, covered with coarser and finer emery or other abrasive powder for use in honing a razor.—*3. Naut.*, same as *strap*, *1 (a)*.—*4.* In *rope-making*, a rope with an eye at each end, used in twisting strands.

strop (strop), *v. t.*; pret. and pp. *stropped*, ppr. *stropping*. [*< strop, n.*] To sharpen on or as if on a strop or strap.

Scarce are the gray-haired sires who *strop* their razors on the family Bible, and doze in the chimney-corner. *C. D. Warner*, *Backlog Studies*, p. 2.

strobe (ströp), *n.* A dialectal form of *strap*.

strophanthin (strö-fan'thin), *n.* [*< Strophanthus + -in.*] An active poisonous principle, said to be neither an alkaloid nor a glucoside, found in the seeds of *Strophanthus hispidus*.

Strophanthus (strö-fan'thus), *n.* [*NL. (A. P. de Candolle, 1801), so called from the twisted and tailed lobes of the corolla; < Gr. στροφός*, a twisted band, a cord (< *στροφή*, turn, twist), + *άνθος*, flower.] A genus of gamopetalous plants, of the order *Apocynaceae*, tribe *Echitideae*, and subtribe *Nericeae*. It is characterized by a glandular calyx; a funnel-shaped corolla with five tailed lobes and an ample throat, bearing about ten scales within, and including the long taper-pointed anthers; and an ovary of two distinct carpels, ripening into divergent follicles with seeds tailed at one end and extended at the other into a long plumose beak. There are about 20 species, natives of Asia and tropical Africa, with one, *S. Capensis*, in South Africa. They are small trees or shrubs or often climbers, either smooth or hairy, with opposite feather-veined leaves, and terminal cymes of handsome flowers which are either white, yellowish, orange, red, or purple. The seeds of several species or varieties in Africa yield arrow-poison: in western Africa *S. hispidus* affords the insect poison (see *poison of Palanias*, under *poison*). In eastern Africa *S. Kombe* the *Kombe* poison, and some species between Zanzibar and Somali-land the *wanka* poison. But *S. Kombe* is suspected to be a variety of *S. hispidus*, and the third species is probably the same. Since 1875 these seeds have excited great medical interest as a medium for the treatment of heart-disease, but their investigation is not complete. (See *strophanthin*.) Several species are cultivated under the name *twisted-flower*.

strophe (strö'fē), *n.* [*< NL. strophe, < L. strophā, < Gr. στροφή*, a turning round, a recurring metrical system, the movement of a chorus while turning in one direction in the dance, the accompanying rhythmical (musical and metrical) composition, < *στροφή*, turn, twist.] *1.* In *anc. pros.*: (a) A system the metrical form of which is repeated once or oftener in the course of a poem; also, a stanza in modern poetry. In a narrower sense—(b) The former of two metrical corresponding systems, as distinguished from the latter or *antistrophe*. (c) The fourth part of the parabasis and first part of the epirrhematic syzygy. It is hymnic in character, as opposed to the septic tone of the epirrhema.—*2.* In *bot.*, one of the spirals formed in the development of leaves. [*Rare or obsolete.*].—**Asclepiadean strophe**. See *Asclepiadean*.

strophic (strof'ik), *a.* [*< Gr. στροφικός*, of or pertaining to a strophe, < *στροφή*, a strophe: see *strophe*.] Of or pertaining to a strophe or strophes; constituting strophes; consisting of strophes: as, *strophic* composition; *strophic* poems.

strophical (strof'i-kal), *a.* [*< strophic + -al.*] Same as *strophic*. *Athenæum*, No. 3300, p. 123.

strophiate (strof'i-ō-lāt), *a.* [*< strophiole + -ate.*] In *bot.*, bearing or furnished with a strophiole or something that resembles it.

strophiolated (strof'i-ō-lā-ted), *a.* [*< strophiole + -ate.*] Same as *strophiole*.

strophiole (strof'i-ōl), *n.* [*< L. strophium, a small wreath or chaplet, dim. of strophium, < Gr. στροφή*, a band, a breast-band, dim. of *στροφή*, a twisted band, a braid, a cord, < *στροφή*, twist, turn.] In *bot.*, an appendage produced from the hilum of certain seeds, of the same origin as a true aril, but less developed. Sometimes used interchangeably with *caruncle*, from which it clearly differs.

strophoid (strof'oid), *n.* [*< F. strophoïde, < Gr. στροφός*, a twisted band, a cord.] *1.* A nodal plane cubic curve which is the locus of a focus of a conic whose directrix and two tangents are given.—*2.* A

Strophoid.

curve which is the locus of intersections of two lines rotating uniformly with commensurable velocities. See also *substrophoid*.—**Right strophoid**, a strophoid symmetrical with respect to the line through the two centers of rotation.

Strophostyles (strof-ō-sti'lēz), *n.* [*NL. (Elliott, 1824), so called from the incurved style; < Gr. στροφός*, a twisted band, a cord, + *στυλος*, a pillar.] A genus of leguminous plants, of the tribe *Phaseoleae*. It is distinguished from the related genus *Phaseolus*, in which it was formerly included, by capitate flowers with the keel and included style and stamens incurved but not spirally coiled, and followed by a commonly terete and straight pod with its scurfy or smooth seeds quadrate or oblong, not reniform. About 17 species have been described, but some of them insufficiently, natives largely of North America, including Mexico and the West Indies, also occurring in Peru, India, and China. They are tangled vines with prostrate or climbing stems, usually retrorsely hairy, bearing pinnate leaves of three leaflets, and usually long-stalked purplish clusters of a few sessile flowers. Two species, known as *wild bean*, both called *Phaseolus helveticus* by various authors, extend along the Atlantic coast northward to Long Island or further, of which *S. peduncularis* (*Phaseolus umbellatus*) is a slender twiner of sandy fields, and *S. angulosa* (*P. diversifolius*) a commonly trailing plant extending west to Minnesota, and to Missouri, where on river-bottoms a high-climbing variety sometimes reaches 30 feet. Another species, *S. pauciflorus*, occurs in the southern and western United States. See *Phaseolus*.

strophulus (strof'ū-lus), *n.* [*NL., dim. of *strophus, < Gr. στροφός*, a twisted band, a cord: see *strophiole*.] A papular eruption upon the skin, peculiar to infants, exhibiting a variety of forms, known popularly as *red-gum*, *white-gum*, *tooth-rash*, etc.

strosserst (stros'ēr-z), *n.* [A var. of *trossers*, which is a variant of *trousers*: see *trousers*.] Same as *trossers*.

You rode like a kern of Ireland, your French hose off, and in your strait *strossers*. *Shak.*, *Hen. V.*, iii, 7, 57.

Sets his son a horseback in cloth-of-gold breeches, while he himself goes to the devil a-foot in a pair of old *strossers*. *Middleton*, *No Wit Like a Woman's*, ii, 1.

stroud¹ (stroud), *n.* [Also *strowd*; origin obscure.] A senseless or silly song. *Jamieson*. [*Scotch.*]

stroud² (stroud), *n.* [Also *strowd*; origin obscure.] *1.* Same as *strouding*.—*2.* A blanket made of strouding.

Be pleased to give to the son of the Plankasha king these two *strouds* to clothe him. *Journal of Capt. Treat* (1752), p. 52. (*Bartlett.*)

strouding (strou'ding), *n.* [*< stroud¹ + -ing.*] Coarse warm cloth; a kind of blanketing used in trading with North American Indians.

Hazelnuts enough to barter at the nearest store for a few yards of blue *strouding* such as the Indians use. *The Century*, XXXIII, 33.

stroup (stroup), *n.* [Also *stroop*; < ME. *stroupe*, *strowpe*, < Sw. *strupe*, the throat, gullet, = Norw. *strupe*, the throat, gullet, an orifice, = Dan. *strube*, the throat, gullet; cf. Icel. *stripi*, the trunk of the human body with the head cut off.] *1.* The trachea or windpipe. [*Obsolete and prov. Eng.*]

He smote him in the helm, bakward he bare his *stroupe*. *Langtoft's Chronicle*, p. 190. (*Halliwel.*)

2. A spout (of a tea-kettle, etc.). [*Scotch.*]

strout, *v.* An obsolete or provincial variant of *strut*¹. *Bacon*.

strove (ströv). Preterit of *strove*.

strow (strö), *v. t.*; pret. *strowed*, pp. *strowed* or *strown*, ppr. *strowing*. An archaic form of *strew*.

strowt, *a.* [*Cf. strow, strew.*] Loose; scattered. [*Rare and dubious.*]

Nay, where the grass,
Too *strow* for fodder, and too rank for food,
Would generate more fatal maladies. *Lady Almonny*, D 4 b. (*Nares.*)

strowd¹ (stroud), *n.* See *stroud¹*.

strowd², *n.* See *stroud²*.

strowlt, *v. i.* An old spelling of *stroll*.

strown (strön). A past participle of *strow*.

strowpet, *n.* See *strowp*.

stroyt, *v. t.* [ME. *stroyen*, by aphesis from *destroyen*: see *destroy*.] To destroy. *Middleton*.

stroyt, *n.* [ME., < *stroy*, *v.*] Destruction. **stroyall** (stroi'al), *n.* [*< stroy*, *v.*, + obj. *all*.] One who destroys or wastes recklessly; a waster.

A giddy brain master, and *stroyall* his knave,
Brings ruling to ruin, and thrift to her grave. *Tusser*, *Good Husbandly Lessons*.

stroyer (stroi'er), *n.* [*ME. stroyere*, by aphesis from *destroyer*.] A destroyer.

The drake, *stroyere* of his owene kynde. *Chaucer*, *Parliament of Fowls*, l. 360.

stroylt, *n.* See *stroll*.
